U.O. Reply No.

When the question of electric lights for the
college hostel, was raised by the former Principal
of the college I suggested that it would be better
to await the construction of the new buildings.

When the Principal applied for additional
electric installation recently the Electrical
Engineer of the Public Works Department required
funds set apart by the Educational Department for
the purpose. Since funds were not available I
informed the Principal that he might take up the
question of electric installation to the college
buildings early next year.

I suggest the following draft answers:-

(a) It was considered desirable to
await the construction of a permanent building
for the college;

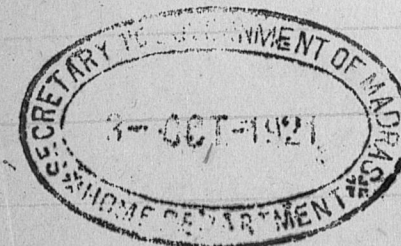

(b) The question will be considered

next year.

when funds are available.
