Subject:- STUDY LEAVE - MR S. R. SAVUR, ASSISTANT LECTURER IN PHYSICS, GOVERNMENT COLLEGE, KUMBAKONAM.

Sir,

With reference to correspondence resting with your letter No.542-A Mis. dated 10th April 1924, I am directed to enclose, for the consideration of the Government of Madras, an application Dated 17.3.25 with enclosures (in original.) from Mr. Savur for the extension of his leave by 6 months.

His present sanctioned leave is as follows:-

Average pay 9. 7. to 30. 9. 23.
Study leave 1.10.23 to 30.9.24.
Average pay 1.10.24 to 16.1.25.
" " 17. 1. to 8.7.25.

Under the rule quoted by Mr. Savur in the last paragraph of his letter an extension of 4 months leave, which would bring the total period to 28 months, is presumably admissible. Extraordinary leave without pay for the remaining two months is also, under Fundamental Rule 85(a), admissible in special circumstances. His application is strongly supported by the authorities at University College, and the High Commissioner is of opinion that the grounds for the extension are sufficiently important

Sheet 2.

important to warrant its being granted and therefore recommends approval of the application.

Paragraph 3 of your letter referred to above states that Mr. Savur may be granted study allowance (during leave other than study leave) from the 1st October 1924 to the end of the period of his study in England. He applies for study allowance during the full period of the extension but it would appear that, should the Government of Madras agree to the extension, the rule restricting the issue of study allowance to a maximum of 2 years during the period of an officer's service could in no circumstances be relaxed.

I am, Sir,

Your obedient Servant,

F. P. Ramo

Sir

I beg to submit that a piece of research in "The Photo-elasticity of Celluloid," which I took up in November last, has become more important than it was at the beginning on account of some valuable results which I was lucky enough to obtain about three weeks back. As a result of this, this piece of work, which I had hoped to finish before the end of May next, will probably last till the end of December next.

My leave, however, expires on the 7th of July next. In view of the facts that by that time

6)
this piece of work will only be half done and that, if I were to leave it here at that stage, I shall not be able to begin it for at least a year after my return to India mainly on account of the lack there of the special apparatus needed for this work, may I request you to kindly extend my leave by six months more?

According to para 2 of the Government of India Finance Department Resolutions no F. 20 (2). C.S.R. 25 dated the 4th of February '25, my leave may be extended by four months more. The remaining two months may be granted on loss of pay. But in view of the work that I have been doing here and also of the high cost of living here coupled with the fact that my passage to and from India is borne by me, may I request you to continue my allowance, as a special case, for that period also?

I understand that Mr. S. R. Sauer is applying for an Extension of his leave from June to December of this year for the purpose of completing some research which he has in hand.

Mr. Sauer has been working in my laboratory as a Research Student for the last year and his work has been of a high order of excellence: just now he has been successful in getting valuable results, which will take some time to develop. It would be a great pity if his course were to be interrupted at this stage, now that his apparatus is in full working order and that his work is bearing fruit.

He is a careful and accurate worker and I find that he is really able to do research work and has the necessary brains, a quality not always possessed by many who come here intending to do research work.

I would very strongly recommend him for the Extension of his leave which he is applying for

Sir,

I wish to support very strongly the application of Mr.S.R.Savur for an extension of his grant and for permission to remain at this College so that he may complete the research work on which he is engaged. That work has been of a very high order and will probably result in the discovery of new facts of great importance both in the scientific and commercial world.

Yours faithfully,
