Deputy Chief Chemist,
 Mysore Iron Works,
 Bhadravati, (Mysore Railways.)

Dated 6th August 1925.

Ref. No. 262/25

The Educational Secretary,

Government of Madras,
 Madras.

1. 9d 29694
 10875

Sir,

While in England, I approached the Secretary of State for India for an appointment in the Indian Educational Service and was asked in reply, to apply to the "Local -- Government". I enclose herewith a copy of the letter I received from the Secretary, Commerce and Revenue Department of the India Office.

Being a subject of Mysore State, and desiring an educational position anywhere in India, I take the liberty of writing to you which I hope you will excuse.

From the testimonials copies herewith enclosed, you will see that I have the highest academic standing, have had my advanced training in India, Germany, and United States America and that my special field has been organic -- Chemistry with advanced research training in the applied field. (Vide Testimonials Nos. 2 and 4). If necessary I can send reprints of my publications referred to in the testimonials and also give good personal references of ---

Mr. 7-9 inter
 2 p 11 inter

scientists and educationalists in India and abroad.

If among the scientific or technical posts of the Universities or educational services you can think of no suitable vacancy for me, I beg to state that I can be of service even in the administrative or inspectional lines of the educational Departments in as much as I have made a study of the systems in India, England, America and Germany. In this connection please permit me to mention that I have scientific training under distinguished British, German and American Scientists.

I enclose herewith a copy of the application form G.A./No. 1 (Men) of the India Office duly filled in and pray for a favourable consideration of my case.

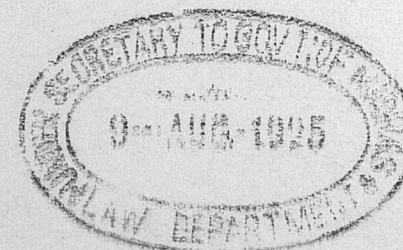

I am now 31 years old and am in Industrial service on Rs. 450/- per month. I shall be grateful for any appointment Professional, Inspectional or Administrative on Rs. 500/- and above in the Imperial cadre.

I beg to remain,

Sir,

Your most obedient servant,

S. S. Aiyar

INDIA OFFICE,

WHITEHALL,

LONDON, S.W.1.

Ref.No.C.&R.290/23.

20th January 1923.

Sir,

With reference to your letter dated the 16th January I am directed to inform you that there is at present no appointment in the Indian Forest ~~Off~~ Service requiring to be filled by this office which could be offered to you. A copy of your letter has however been sent to the Government of India for information.

With regard to Educational appointments I am to say that this office is unaware of any suitable vacancy for which your candidature could be accepted. It is however possible that vacancies exist for which ~~re~~ recruits are being sought in India.

If you wish to apply for an appointment in the Indian Educational Service you should complete the annexed form and forward it with the necessary accompaniments to the Local Government of the Province to which you belong.

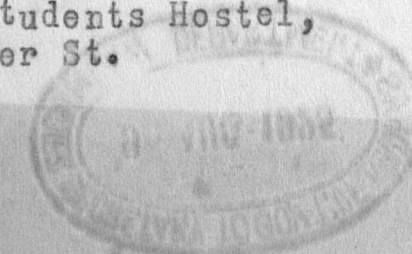

A memorandum regarding such appointments is enclosed for information.

I am, Sir,
Your obedient Servant,

Sd/- x x x

For Secretary, Commerce and Revenue
Department.

Dr. S.S. Aiyar, B.A., M.S.,
Indian Students Hostel,
Gower St.

23rd January, 1923.

Dr. S.S. Aiyar has been introduced to me by Professor Mathews and Professor Kahlenberg of the University of Wisconsin, Madison, U.S.A. I enclose the letters concerning him which these gentlemen have sent me.

Dr. Aiyar has been working in the Forest Products Laboratory of the University of Wisconsin on cellulose questions and other matters, and it will be seen from the personal letters which Professor Mathews and Professor Kahlenberg have sent me that they have a very high opinion of his work. I would in particular draw attention to the letter of Professor Mathews, who speaks of the ability and industry of Dr. Aiyar in the very highest terms. Both Professor Mathews and Professor Kahlenberg hold high positions in science in the United States, and I feel sure that their personal opinions can be depended upon. It is therefore very much to be hoped that a good position will be found for Dr. Aiyar in India, considering the excellent work which he has done in the United States, and the very high opinion which his Professors have formed of his work and ability.

Sd/ F.G. DONNAN,

Professor of General Chemistry.

THE UNIVERSITY OF WISCONSIN

MADISON.

December 14, 1922.

Department of Chemistry
J.H. Mathews Ph.D.,
Chairman & Director.

Professor Frederick L. Donnan,
Professor of Chemistry,
University College,
London, England.

My dear Professor Donnan:

I have by no means forgotten the kindly assistance which you gave me during my sojourn in London in the latter part of 1917, at which time I was working in the interests of the Ordnance Department of the United States Army. I remember with keenest pleasure the delightful evening which I spent with you in your home, and I feel that I have been greatly remiss in not writing you long before this time.

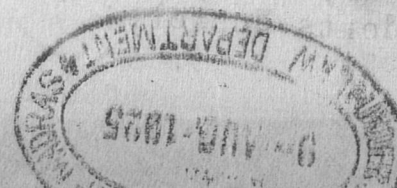

Human nature is much the same the world over, I presume, and we are most likely to remember our friends when we have something to ask of them. During the past two years, we have had at the University of Wisconsin an extraordinarily capable young man from India by the name of Mr. S. Subrahmanya Aiyar. Mr. Aiyar received his early training in the Universities of India, and came to Madison to receive special training in Forest Products Chemistry and to do other graduate work in the Chemistry Department. Mr. Aiyar has now completed his work for the Doctorate Degree, and desires to enter into the Imperial Indian Service. It has occurred to me that you would probably be in a position to aid him in accomplishing this desire. I can assure you the strongest assurance of Mr. Aiyar's ability, integrity and personality. We regard him as being an extraordinarily capable young man, and one whom it is a pleasure to assist. I feel confident that the scientific life of India will be greatly enhanced by the addition of Mr. Aiyar to its list of notable men. I shall deeply appreciate any courtesies which you may see fit to extend to this able young man.

Cordially yours,

Sd/ J.H. Mathews.

Copy of letter dated December 18, 1922 from Louis Kahlenberg
PH.D. Professor of Chemistry, The University of Wisconsin, Madison
to Professor. F.G.Donnan, PH. D., Chemical Lab., University Col-
lege, London.

--:--:--

Dear Mr. Donnan:

Kindly permit me to introduce to you the
bearer of this letter, Dr. S.S. Aiyar, who has studied at
the University of Wisconsin for two years as an advanced
student and has just completed the requirements for the
Ph. D. Degree with us.

Dr. Aiyar has been interest especially
in organic lines, and has done work on the celluloses in
our Forest Products Laboratory. We have found him an
able, dependable worker and a thoroughly clean and reli-
able man in every particular. I take special pleasure
in commending him to you most warmly and unreservedly.

Dr. Aiyar hopes, on returning to India,
to get a position in the Imperial Indian Service,. It
would seem to me that with his unusually good equipment
and great capacity for work, an opportunity ought to be
found for him where his special qualifications would re-
sults in great good.

Any kindness that you may show Dr. Aiyar
assure you will be greatly appreciated.

With kindest regards to you personally, I am

Sincerely yours,

Sd/L.Kahlenberg.

Copy of letter dated November 27, 1923 from Dr. L.F.Hawley,
in charge section of Derived Products to the Inspector General
of Education in Mysore, High Ground, Bangalore, India.

-:-:-:-

Dear Sir,

I have been requested by Dr. S.S.Aiyar to furnish you with a more complete and detailed account of his work in the University and at this laboratory. For two years he was registered as a graduate student in the University of Wisconsin, taking his major work and doing his thesis at this laboratory. Although it is unusual for a student to obtain a -- doctor's degree in two years, he was able to accomplish this by unusual diligence and ability and by putting in practically - full time instead of working only during the regular university periods. His standing in the University course was high, and the record of his special work given below shows his ability in research and gives a good idea of the wide experience gained by him.

His thesis was on " The distribution of Methoxyl in the Products of Wood Distillation " and the results of this work were of sufficient value so that a long abstract of original thesis was prepared and published in the Journal of Industrial and Engineering Chemistry, Volume 14, page 1055, (1922).

The above work was considered entirely satisfactory as a doctor's thesis, but he was later able to do similar work along another line which resulted in a publication entitled,, " The Distribution of Methoxyl in the Products of Cooking Jack Pine by the Soda Process ", Journal of Industrial and Engineering Chemistry, Volume 15, page 714, (1923).

In another field, the field terpene chemistry, he also did some experimental work with Prof. Kremers of the University which resulted in a publication, " The Balsam of White Fir ", Jour. Am. Pharm. Assoc., Volume 12, page 587, (1923).

In further work in terpene Chemistry he made an examination of a Mexican turpentine and a comparison of its properties with those of the ordinary American turpentine. This report has not been published, but is suitable for publication and may be brought out in the near future.

In still another line of work, cellulose Chemistry, he has also gained some experience. He carried out some experimental work on the acetolysis of wood cellulose, which has been prepared for publication and accepted by one of our chemical journals. Its actual publication has been held up for some time on account of some further work which it was found desirable to do before the publication was made.

~~5~~

Aside from these five special studies in Chemical research, he found time to take one of our special intensive -- course in kiln drying, which gives him information on the physical properties of wood as well as the Chemical properties.

This is certainly a remarkable record of research accomplished in two years time especially when it is considered that he was carrying on regular university courses during a part of his time. Dr. Aiyar has a record among the best of the graduate students who have received their doctor's degree in chemistry at the University of Wisconsin, and we consider him to have an excellent training in chemistry and an ability in research far above the average graduate student $\frac{1}{2}$ in Chemistry.

Very truly yours,

Sd/ L.F.Hawley, in Charge
Section of Derived Products.

Copy of letter dated December 15, 1922 from Mr. Victor Lenher
Professor of Chemistry The University of Wisconsin Madison to the
Dewan of Mysore State, Mysore State, India.

Dear Sir,

Mr. S. Subrahmanya Aiyar of Mysore State, India
leaves the University of Wisconsin next week for his home in In-
dia. He has just passed the final examinations for the Doc-
tor's degree, and has made a brilliant record in this Univer-
sity.

It is a pleasure to have had Mr. Aiyar with
us for the past two years, and while he has taken his major work
in the U.S. Forest Products Laboratory, he has in addition taken
a large amount of work in Chemistry. He has taken all of the
lectures in inorganic and analytical chemistry which I give to
graduate students.

I am sorry to lose Mr. Aiyar as student, as he
possess a mind far beyond the ordinary. He is versatile and
resourceful, and has exceptional scientific ability. It is
association with students of the character of Mr. Aiyar which
brings happiness to a Professor's life.

While I am sorry that Mr. Aiyar will not be
with us, I can wish him Godspeed to his native land with the
feeling that India is getting a man of unusual promise. I
most heartily congratulate you on having such a brilliant --
young man associated with you.

Very respectfully yours,
Sd/ Victor Lenher,
Professor of Chemistry.

-:-:-

Mr. L.S. Subramanya Iyer B.A., worked with Dr. Watson and myself in these Laboratories for about two months on experiments on the distillation of Sandalwood Oil. Subsequently he was appointed an Assistant Chemist in one of the Mysore Government Sandalwood oil Factoroes and remained there for 19 months. Afterwards he returned to the ~~Enstitue~~ Institute, and, at the request of the Mysore Forest Department, carried out experiments on the suitability of different raw materials for the production of Straw-boards. This occupied him some three months and since then he has carried out larger scale experiments.

Mr. Subramanya Iyer's work has improved considerably since I first knew him. ~~He~~ He is keen, industrious and shows initiative in overcoming difficulties in his work.

Sir,

The bearer, Mr. Swaminatha S. Aiyar, has just received the degree of Doctor of Philosophy from the University of Wisconsin.

During his residence here he took considerable work with me in Organic Chemistry and I am pleased to state that his work has been of an excellent character throughout. Mr. Aiyar is a very exceptional young man, one of the very best that I have ever been in contact with, and, given the proper opportunities, is assured of a brilliant future. I heartily recommend him to your kind consideration and hope that you may be able to find a suitable -- situation for him in his native land, feeling confident that he will fill the same with credit to you and to himself.

Very respectfully yours,

Sd/Richard Fischer,
Professor of Chemistry.

Two sets of copies of testimonials should be submitted with the application form. Original testimonials should not be forwarded unless asked for by this Office.

21. Observations.

(Subjects the applicant is prepared to teach and any special qualifications or experience (e.g., music and singing, commercial subjects, languages, literary work, organization or inspection) not mentioned under heads 14-18 above, should be given here).

I have specialised in organic Chemistry especially on the lines of cellulose research and forest products and hence can teach even up to B.Sc. and M.Sc. standards.

Having had about 9 years industrial experience can be in charge of any applied chemistry laboratory of a university, technological college or institute.

I have studied foreign languages viz French and German the latter for over three years in U.S.A. and Germany. I can teach the latter to advanced students of science.

I have also made a study of the educational systems in foreign countries especially England, Germany & U.S.A. and as such would also with advantage serve in the executive or administrative position of the educational services.
