Sir,

You will doubtless remember that the Imperial Education Conference of 1923 discussed the question of the desirability of devising a common form for the fundamental statistics of education (paragraph 10, of Appendix II, to the Report of the Conference). It was hoped that a form might be devised which would be intelligible throughout the Empire.

The Board of Education (England and Wales) undertook to prepare a form, illustrated with the main statistics of their own administration, for consideration by the Education Departments overseas. This form was considered by the Advisory Committee of the Conference at their Meeting on July 15th, and I was instructed to circulate it to the Departments overseas, and to say that the Advisory Committee would be greatly obliged if they could be furnished with the observations and suggestions of those Departments as soon as conveniently may be.

It would be of great assistance to the Committee if each Department could see its way to illustrate its criticisms and suggestions with statistics of the main facts of its own administration, if possible on the lines of the table enclosed.

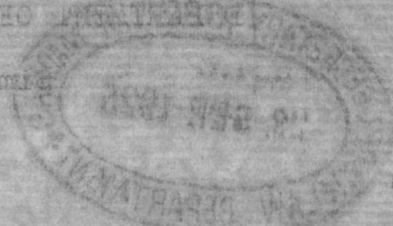

I am to explain that the distinction made in the enclosed table between Elementary and Secondary Education follows the statutory distinction in the English and Welsh Education Acts between Local Education Authorities for Elementary Education and Local Education Authorities for Higher Education.

I am, Sir,

Your obedient Servant,

NOTES.

Date of figures.

All the figures of expenditure contained in the above table relate to the financial year ending 31st March, 1923. The numbers of institutions are, as nearly as may be, the numbers to whom that expenditure related: in technical institutions, training colleges and universities they are the numbers for the academic year to 31st July, 1922. The numbers of scholars are the numbers enrolled, and are taken on 31.3.23 for elementary schools and, for other institutions, at other dates.

Training of Teachers (lines 4 and 5).

The figures of the Universities (line 5) contain University Departments for training teachers, as follows:-

20 Departments, 5,136 Students,
range of fees, £13 to £40,
annual cost to taxes £366,129,
to rates (as aid to students) £106,415.

These figures, if added to those in line 4 will give the total cost to public funds of all State-aided training institutions for teachers.

Pensions to Teachers (line 6).

The pensionable teachers contribute 5 per cent on their salaries to the Board of Education in aid of the expenditure on pensions. The figure in Column 8, line 6, is the gross cost, i.e. the total pensions paid in the year. The cost is likely to increase at the rate of £400,000 per annum. The teachers' contributions in the year amounted to £2,070,391.

Administration and Inspection (line 7).

The cost of administration, central and local is:-

	<u>Apportioned to</u>		
	<u>Elementary Education.</u>	<u>Higher Education.</u>	<u>Total.</u>
	£	£	£
Central	432,549	344,097	776,646

S.I.R./IMPERIAL/586.

Sir,

You will doubtless remember that the Imperial Education Conference of 1923 discussed the question of the desirability of devising a common form for the fundamental statistics of education (paragraph 10, of Appendix II, to the Report of the Conference). It was hoped that a form might be devised which would be intelligible throughout the Empire.

The Board of Education (England and Wales) undertook to prepare a form, illustrated with the main statistics of their own administration, for consideration by the Education Departments overseas. This form was considered by the Advisory Committee of the Conference at their Meeting on July 15th, and I was instructed to circulate it to the Departments overseas, and to say that the Advisory Committee would be greatly obliged if they could be furnished with the observations and suggestions of those Departments as soon as conveniently may be.

It would be of great assistance to the Committee if each Department could see its way to illustrate its criticisms and suggestions with statistics of the main facts of its own administration, if possible on the lines of the table enclosed.

I am to explain that the distinction made in the enclosed table between Elementary and Secondary Education follows the statutory distinction in the English and Welsh Education Acts between Local Education Authorities for Elementary Education and Local Education Authorities for Higher Education.

I am, Sir,

Your obedient Servant,

J.H.B. *Sumner*
Secretary.

FUNDAMENTAL STATISTICS OF STATE-AIDED EDUCATION IN ENGLAND AND WALES.

1922 - 23.

NOTES.

Date of figures.

All the figures of expenditure contained in the above table relate to the financial year ending 31st March, 1923. The numbers of institutions are, as nearly as may be, the numbers to whom that expenditure related: in technical institutions, training colleges and universities they are the numbers for the academic year to 31st July, 1922. The numbers of scholars are the numbers enrolled, and are taken on 31.3.23 for elementary schools and, for other institutions, at other dates.

Training of Teachers (lines 4 and 5).

The figures of the Universities (line 5) contain University Departments for training teachers, as follows:-

20 Departments, 5,136 Students,
range of fees, £13 to £40,
annual cost to taxes £366,199,
to rates (as aid to students) £106,415.

These figures, if added to those in line 4 will give the total cost to public funds of all State-aided training institutions for teachers.

Pensions to Teachers (line 6).

The pensionable teachers contribute 5 per cent on their salaries to the Board of Education in aid of the expenditure on pensions. The figure in Column 8, line 6, is the gross cost, i.e. the total pensions paid in the year. The cost is likely to increase at the rate of £400,000 per annum. The teachers' contributions in the year amounted to £2,070,391.

Administration and Inspection (line 7).

The cost of administration, central and local is:-

S.I.R./IMPERIAL/586.

Sir,

You will doubtless remember that the Imperial Education Conference of 1923 discussed the question of the desirability of devising a common form for the fundamental statistics of education (paragraph 10, of Appendix XI, to the Report of the Conference). It was hoped that a form might be devised which would be intelligible throughout the Empire.

The Board of Education (England and Wales) undertook to prepare a form, illustrated with the main statistics of their own administration, for consideration by the Education Departments overseas. This form was considered by the Advisory Committee of the Conference at their Meeting on July 15th, and I was instructed to circulate it to the Departments overseas, and to say that the Advisory Committee would be greatly obliged if they could be furnished with the observations and suggestions of those Departments as soon as conveniently may be.

It would be of great assistance to the Committee if each Department could see its way to illustrate its criticisms and suggestions with statistics of the main facts of its own administration, if possible on the lines of the table enclosed.

I am to explain that the distinction made in the enclosed table between Elementary and Secondary Education follows the statutory distinction in the English and Welsh Education Acts between Local Education Authorities for Elementary Education and Local Education Authorities for Higher Education.

I am, Sir,

Your obedient Servant,

J.H.B.
 Secretary.

NOTES.

Date of figures.

All the figures of expenditure contained in the above table relate to the financial year ending 31st March, 1923. The numbers of institutions are, as nearly as may be, the numbers to whom that expenditure related: in technical institutions, training colleges and universities they are the numbers for the academic year to 31st July, 1922. The numbers of scholars are the numbers enrolled, and are taken on 31.3.23 for elementary schools and, for other institutions, at other dates.

Training of Teachers (lines 4 and 5).

The figures of the Universities (line 5) contain University Departments for training teachers, as follows:-

20 Departments, 5,136 Students,
range of fees, £13 to £40,
annual cost to taxes £366,199,
to rates (as aid to students) £106,415.

These figures, if added to those in line 4 will give the total cost to public funds of all State-aided training institutions for teachers.

Pensions to Teachers (line 6).

The pensionable teachers contribute 5 per cent on their salaries to the Board of Education in aid of the expenditure on pensions. The figure in Column 8, line 6, is the gross cost, i.e. the total pensions paid in the year. The cost is likely to increase at the rate of £400,000 per annum. The teachers' contributions in the year amounted to £2,070,391.
