POWERS OF AUTHORITIES SUBORDINATE TO THE DIRECTOR OF PUBLIC INSTRUCTION.

The Director of Public Instruction points out that the proposal to withdraw the powers of reappropriation now exercised by various officers of the Education Department e-g., District Educational Officers etc., will throw a very considerable burden of additional work upon the office of the D.P.I. and that it will not be possible for his office to exercise the control proposed unless Government are prepared to sanction additional staff.

The Secretary, Law (Education) Department, agrees with the D.P.I. and is for maintaining intact the existing powers of all grades of officers.

Finance (Codes).

The powers now enjoyed by the various subordinate authorities in the Education Department are confined to reappropriations under voted expenditure between detailed heads under 'Contingencies' including 'Supplies and Services' and in some cases between Contingencies and 'Allowances' also provided no reappropriation is made to meet any recurring expenditure. The latter proviso excludes reappropriations to ~~most~~ most of the important new secondary units and the powers enjoyed are reduced to practically very little. The withdrawal of these powers does not therefore amount to much. The number of frauds and the scope for economy in contingent expenditure that have been brought to light by the audit on spot of Mr. Subbuswami Ayyar, the Special Officer for Contingencies, indicate the necessity for more effective control of contingent expenditure and it seems unnecessary to continue any power of reappropriation to any subordinate authorities under Contingencies.

3. Each subordinate controlling officer will have full powers of appropriation within the amount allotted to him and his subordinate disbursers under each unit.

The Law Department's notes on page 2 ante may be perused. Copies of the latest proofs of Appendices I and II to the G.O. on Control of Expenditure showing the units finally agreed upon and the items falling thereunder may be sent to Law (Education).

2. It may be pointed out that the withdrawal of the powers of reappropriation enjoyed by the officers on page 15 of Law Department's notes is not really serious as will be seen from the following considerations.

With the exception of District Educational Officers, Inspectresses of Schools and the Agency Educational Officers (about to be abolished), the remaining seven officers in the Law Department's list have no subordinate disbursing officers under them and in accordance with the principle applied even in the case of chief controlling officers with regard to their own disbursements, the withdrawal of powers becomes automatic. The only powers enjoyed by these officers in the past were, as already stated on page 1 ante, confined to reappropriations under voted expenditure between the detailed heads under Contingencies including Supplies and Services and in some cases between Contingencies and Allowances provided that no reappropriation was made to meet any recurring expenditure. The principle regarding recurring expenditure has assumed a statutory importance under Devolution Rule 38(1)(b). The following statement compares the detailed heads of account now existing under Contingencies (Voted) of the Education Department with the corresponding heads that will have to be opened under the new scheme.

Existing heads.	New heads.
	Non-Contract Contingencies-Voted.

unit and this coupled with the broad secondary units now fixed most of which cover more than one detailed head of account in the past, should go a great way in reducing the number and the necessity for frequent reappropriations.

The D.P.I. need not therefore fear any large increase of work in his office on account of the proposed withdrawal of powers. The additional Junior Superintendent's post applied for by him in connection with the scheme for Control of Expenditure - which Mr. Subbuswami Ayyar has already been requested to examine and report upon - should, if sanctioned, be sufficient for any slight increase of work anticipated on this account also.

The necessity to continue the powers of reappropriation of subordinate officers disappears with the grouping of detailed heads under the broad secondary units of appropriations. The withdrawal of the powers is also advisable in view of the inadequate control of contingent expenditure, in particular, that has been found to be a common feature in many offices.

which Law and the D.P.I. appear to have lost sight of.

Each of these new units is fairly definite in its scope and ought to be susceptible of correct budgeting, and they are designed to show separately items the expenditure on which is intended to be controlled separately. Moreover, the first 3 secondary units are recurring items, the fourth, namely, Electric Current, occurs only in the Presidency town and the only units between which re-appropriation can be exercised, if not withdrawn by the present G.O., will be

The transfer of works from the head Contingencies, with regard to works automatically results in the withdrawal of the power. Thus, it can hardly be contended that there has been any real withdrawal of powers from the subordinate officers of the Education Department which would result in the centralisation of work in the D.P.I.'s office, and the little withdrawal has been necessitated by general principles which have been applied to, and have been accepted by, all departments and which are equally applicable to the Education Department. We need not object to Law (Education) Department passing on this note to the D.P.I. for information.

that "the additional Junior Superintendent's post applied for by him in connection with the scheme for Control of Expenditure--which Mr. Subbuswami Ayyar has already been requested to examine and report upon--should, if sanctioned, be sufficient

for any slight increase of work anticipated on this account also". The Special Audit Officer proposed a Superintendent and one Upper Division clerk and this Mr. Littlehailes's accepted but reserved the right to apply later for additional staff if necessary for the Audit section alone.

I do not anticipate that the Audit section staff will be able to take any of the burden of the Budget section. It is not possible to estimate

exactly how much additional work will be involved, but there will certainly be some addition and, as far as I can gather at present, the Budget section is inadequately staffed as it is and I

anticipate that it will be necessary for me to approach Government for an additional clerk in this section. When I have been in charge of the office for some time longer I shall be in a position to know exactly how far my present impression is justified and shall then address Government officially, if necessary.

Submitted that the supt and the clerk
to be newly entertained are for the 'audit'
section. The D.D. states that an additional
clerk will be necessary in the budget section
also and that he will address Govt. after
some experience has been gained of
the working of the office. It was thought
better that Finance should see the

While accepting for the present the Special
Officer, Mr. Subbuswami Ayyar's recommendation for a
Superintendent and a clerk, Mr. Littlehailes observed
that he may have to approach Government again for
further staff after some working knowledge of the
scheme is gained. This, Mr. Grieve holds, applies
to the account or audit section only and he thinks
that for the extra work in consequence of the with-
drawal of the powers of reappropriation of the sub-
ordinate authorities he may have to approach Govern-
ment for extra staff in the Budget section also if
necessary.

It was however reported by Mr. Subbuswami Ayyar
after an inspection of the expenditure of the Presi-
dency College and of the District Educational Officer
Chingleput, for 1922-23 and 1923-24 that the powers
of reappropriation were not at all exercised. The
withdrawal of those powers should not therefore in
practice throw any extra work on the D.P.I.'s staff
office. Secondly, it will be seen from Mr. Little-
hailes' note on para 6 of the Special Officer's
report that while accepting the recommendations of
the Special Officer he took also into account the extra
work, if any, in consequence of the withdrawal of
such powers. Thirdly, it was pointed out in the
penultimate para of the same note that the Superin-
tendent to be in charge of the Control work should
be one well acquainted with accounts as well as
Budget. Obviously, it was intended that he should
attend to reappropriation work also. At any rate
it is hardly possible that the Budget section of the
office or the section attending to reappropriations
can work quite water-tight and independant of the
Accounts Section. The two must necessarily co-
operate as it is solely for effective budget control

control that departmental accounts have been required to be compiled.
In the light of the above circumstances, there seems to be no point in the D.P.I.'s arguments.

24.2

The D.P.I. asked at first for only one man and when the Special Officer, on a thorough investigation into the work, recommended for 2 men, the D.P.I. also asked for two and this has also been agreed to by Law (Edn) + Finance except as regards the Superintendent's pay. The staff agreed to be was for the entire additional work consequent on the introduction of the scheme of control and not any part of it. The D.P.I. (Mr. Griens) is not correct in his statement which implies that the needs of the Budget Section of his office have not been considered. The Law Dept. note on p.6 seems also to require modification. The reservation by the D.P.I. of the right to come up again for additional staff does not appear to be justifiable.
