Station Madras, Dated the 29th July 1926.

From (Name) R.G.Grieve Esq., M.A.,

(Designation) Ag:Director of Public Instruction

To The Secretary to the Government of Madras,

L a w (Education) Department.

Str:

Submitted to Government with the following remarks:-

Para 1:- M.R.Ry K.Sukumaran cannot be given the pay of the post of laboratory assistant, viz., Rs.250-450 as M.R.Ry P.Subba Rao the permanent incumbent of the post was not made to act as Professor of Electrical Engineering in the Indian Educational Service but was only required to carry on the duties of the Professor in addition to his own for which he is paid an allowance of Rs.120 per mensem. It was for this reason that an additional post of Instructor, P.W.D was sanctioned temporarily and M.R.Ry K.Sukumaran was appointed to it.

Paras 2 and 3 (1) and (2):-

1134
30628

(L)

2

In his note No.C.E.1507 E/26-1 dated 9-7-26 copy enclosed the Chief Engineer, P.W.D., (General Buildings and Roads) has stated that M.R.Ry K.Sukumaran has not in any way suffered by his stay in the Engineering College Guindy as he is drawing pay which he would have drawn in the P.W.D. and as his seniority has not been affected. One point, however, has to be considered. His juniors have been given officiating Assistant Engineers' places and if M.R.Ry K.Sukumaran were to revert now to the P.W.D. he will have to prove his fitness first for promotion as an ^{officiating Assistant} Engineer by working as a section officer for some time, as his service in the Engineering College will not in any way help him to get the rank due to him immediately.

131102

Paras 3(3) and (4):- The reason for not permitting M.R.Ry K.Sukumaran to draw the pay attached to the post of Instructor in Electrical Engineering is that the post is not vacant. M.R.Ry P.Subba Rao the permanent incumbent thereof though he has been designated as acting Professor of Electrical Engineering still holds the post of Instructor in Electrical Engineering and has only been asked to carry on the duties of the Professor.

101728 (E)
12.12.23

Para 3(5) - (7):- These call for no special remarks. M.R.Ry K.Sukumaran has done good ^{work} in the college and consequently his services have been retained in the College beyond the ordinary period by giving him increased pay of Rs.250

Para 4:- It is not possible to comply with the requests of M.R.Ry K.Sukumaran.

M. Rama Rao

M.R.Ry K.Sukumaran, Supervisor, P.W.D., and Instructor in Electrical Engineering (Temporary) - College of Engineering - Memorail to Government (Law ~~Education~~) D 45

--
C.No.1507-E from the Director of Public Instruction
R.O.C.No.685 C/26 dated 17th May 1926.

My remarks are apparently called for only on paras. 2 and 3 (1) and (2) which relate to his ^{te} retention in the college although this Department asked for his ^{reversion} ~~revision~~ on several occasions and to his promotion to sub-division charge in the department. The statements contained in the other paras relate to the Education Department and are therefore not susceptible of any verification in this Department.

2. Paras 2 of the memorial - A summary of the facts is given below:-

Mr.K.Sukumaran, a passed Mechanical and Electrical Engineer of the College of Engineering, entered service in the P.W.D. as a temporary Supervisor in August 1919. After about one year's service in the Department he was transferred to the College of Engineering in October 1920 as Assistant to the Laboratory Assistant (Electrical Engineering). Under para 2 (K) of G.O.No.55 W, dated 12-1-22 Instructors and Assistant Instructors who are selected for duty in the College should ordinarily be posted there for a limited period of three years. With reference to this rule, the Principal of the College was informed that, as Mr.Sukumaran with some other subordinate would complete 3 years' service in the College by January 1924, he would be transferred from the College. The Principal agreed to the transfer, but required a passed Engineer of the college with Electrical Engineering training to replace him. Mr.C.T.D'Silva, a passed Mechanical Engineer was proposed, but the Principal did not want him. He wanted Mr.A.C.D.Rozario who was then officiating as Assistant

4
Electrical Engineer. As Mr. Pozario could not be spared and as there was no other suitable subordinate available for transfer, the question of Mr. Sukumaran's reversion was then dropped. It was next raised in April 1924. As an efficient substitute was again wanted and as none was available the question of Mr. Sukumaran's transfer was deferred and the Principal was informed accordingly in May 1924. As stated in his memorial, Mr. Sukumaran applied in April 1924 for permission to revert to this Department on the ground that his further stay in the College would be prejudicial to his prospects in the Department. He was informed in reply on 23-6-24 that his reversion was deferred for a while and that the question would be considered in a few months. Subsequently, in November 1924 the question of his reversion and promotion to the Madras Engineering Service in the Department was taken up with the Principal at the instance of the P.S.G. and the papers on the subject have been finally sent to the Law (Education) Department with P.W.D. U.O.No.3188-E/24-5 dated 27-5-25. In the absence of these papers, it is not known what recommendation was made to the Government. Apparently on this recommendation (L) orders were issued in G.O.No.1134 Law (Education) dated 30th June 1925, sanctioning the creation of a temporary post of Instructor on Rs.250 per mensem to be held by Mr. Sukumaran in the College. It will thus be seen that he was retained in the college for want of a suitable substitute to be sent in his place and that he was suitably rewarded for the same by being given Rs.250 per mensem

3. Paras 3(1) and (2) of the Memorial

Even if Mr. Sukumaran had reverted to the Department he would not have been made a S.D.O. at once. His juniors got officiating Assistant Engineer's places because they were tried and found fit. Had Mr. Sukumaran reverted to the Department he would have been made a Section Officer first, and he would have had to first prove his fitness for sub division charge, before he could be considered eligible for such charge.

3/5
It is not possible to assert that (having regard to the number of vacancies and the claims of other qualified Supervisors) Mr. Sukumaran would have certainly been made a S.D.O. if he had reverted to the P.W.D.

The memorialist was confirmed in May 1923. Some of the passed Engineers who were confirmed later and who have been given officiating charge of sub divisions are not seniors to him as stated by him, nor do they draw more pay than he, as officiating Assistant Engineers. He has thus not lost seniority nor has he been superseded. When he reverts he will be tried as a Section Officer first and on his proving himself competent, his eligibility for sub division charge will be considered in due course. In the circumstances it cannot be asserted that he has lost in emoluments by continuing in the College.

4. Substitute in place of Mr. Sukumaran, if reverted

*
Now that two passed Mechanical Engineers are being appointed by the Education Department as Assistant Instructors for the Engineering College, an upper subordinate can be spared in place of Mr. Sukumaran, if he is reverted to P.W.D.

* against the sanction in G.O.No.398 Law (Edn) dated 16-3-26

For Director of Public Instruction

FROM

M.R.RY. KANOTH SUKUMARAN,

INSTRUCTOR IN ELECTRICAL ENGINEERING (TEMPORARY),

MADRAS COLLEGE OF ENGINEERING,

GUINDY.

To

The Secretary to Government,
Law (Education) Department,
Fort St. George.

Thro' the proper channel.

SIR,

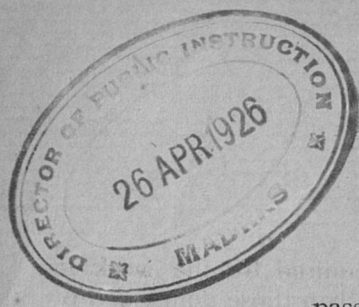

I am a B.E. of the Madras University and a past Engineer student of the College of Engineering, Madras. I entered service as a temporary Upper Subordinate in the P.W.D. on 7th August, 1919. After a period of service of about one year as a Section Officer P.W.D., my services have been lent to the Educational Department for duty in the College of Engineering, Guindy, which I joined on 7th October, 1920. In the College I was put in at first as an Assistant Instructor in Mechanical Engineering. From 7th February, 1922 I was required to work in the Electrical Engineering Laboratory. Consequent on the leave of absence of Mr. H. B. Mathews, Professor of Electrical Engineering, orders were issued in G.O., No. 275 L.E., dated 10th March, 1922, requiring Mr. P. Subba Rao the then Electrical Laboratory Assistant to carry on the duties of the absent Professor posting an Upper Subordinate of the P.W.D. to assist him in carrying on his own duties. I continued to do the duties of the Laboratory Assistant under the above G.O. The duties that I had to do in the Electric Engineering Laboratory were to say the least, all that the old Laboratory Assistant had to perform. On the strength of doing these duties satisfactorily, I put in a petition on 2nd February, 1923 requesting permission to draw the then pay attached to the post of the Laboratory Assistant, viz. Rs. 200—40/2—400. This was strongly recommended by the Principal, but in Pro Dis. No. 1292/23, 21st March, 1923 the Director declined to sanction it on the ground that the post of Laboratory Assistant was not technically vacant.

2. As the period of leave originally granted to the Professor Mr. H. B. Mathews was short, i.e., six months, I hoped that I would soon be reverted to the Department and did not therefore press my claim for increased pay. Mr. Mathews, however, extended his leave several times and I had to continue to work in the Electrical Engineering Laboratory. During the period the P.W.D. called on me to revert to the Department several times. But the Educational Department persisted in retaining my services. I again put in my application in April, 1924 asking for permission to revert to the P.W.D. In June and October of that year the Chief Engineer again addressed the Principal regarding reversion. The Principal then asked me to state my inclinations in the matter. I expressed my willingness to stay in the Department on condition that I should be given the salary and status of a Sub-Divisional Officer of the P.W.D., as the Principal then felt that he could not spare my services. Thereupon Government in their Order No. 1134, Mis. L.E., 30th June, 1925 sanctioned the creation of a temporary post of Instructor on Rs. 250 a month to be held by me in the College.

3. I beg to point out that during the period of my stay in the college, my prospects in the P.W.D. have seriously suffered as detailed below: The Chief Engineer, P.W.D. may, if necessary, be referred to about this point:—

(1) I have lost several chances of being promoted to a sub-division charge in the P.W.D.

Kanath Sukumaran

2

(2) Although I was confirmed much earlier than my contemporary Engineer passed men the latter had been in course of time promoted to sub-division charges and became my seniors.

(3) I have not been getting the remuneration corresponding to the post whose duties I am entrusted with from 7th February, 1922 and onwards. The establishment for the Electrical Engineering Laboratory (excluding the Power House) consists of (1) Professor of Electrical Engineering in the I.E.S. (2) a Laboratory Assistant on Rs. 200—40/2—400 plus T. A. revised as Instructor in Electrical Engineering on Rs. 250—40/2—450 and who is now termed as Instructor in Electrical Engineering on Rs. 250—vide G.O., No. 1063 L.E., dated 2nd August, 1923. Until the commencement of Mr Mathews' leave Mr. P. Subba Rao was holding the latter post. In G.O., No. 1728 L.E., dated 12th December, 1923, Mr. Subba Rao was designated as Acting Professor of Electrical Engineering during the period of leave of late Mr. Mathews without any addition to his pay. The wording of the G.O., No. 275 L.E., dated 10th March, 1922 is peculiar in that it required Mr. P. Subba Rao to carry on the Professor's duties in addition to his own and ordered the posting of an Upper Subordinate of the P.W.D. to assist him. Now I beg to state that I had practically to do all the duties of the post of Laboratory Assistant and something more without any remuneration whatsoever, a state of affairs which still continues. The reasons for this are as follows :—

- The nature and quantity of work of the Electrical Department have very much outgrown due to increased equipment and greater facilities for instruction in experimental work.
- Larger number of students to deal with in Laboratory Supervision.
- Fitting up of the Laboratory after it was moved from the Chepauk buildings to Guindy.
- Expansion of the Laboratory on an improved and re-modelled basis, the work of which is still in progress.

As a result of the above Mr. Subba Rao had to confine himself entirely to the duties of Professor and I had to do all the duties of the Laboratory Assistant. Even under former conditions it would have been impracticable for one man to combine in himself the duties of both Professor and Laboratory Assistant to anything approaching efficiency.

(4) The objection raised by the Director of Public Instruction to give me the pay of post of Laboratory Assistant was that this post was not vacant as Mr. Subba Rao was to do the duties of the Professor in addition to his own. If the Laboratory Assistant can do both the duties, it is not clear why any assistance was at all necessary for the Laboratory work as provided for in the G.O., so to say that my position in the Electrical Laboratory has been vague so far i.e. from 7th February, 1922 to 30th June, 1925 when a temporary post on Rs. 250 was created for me. The fact was that an attempt was made when Mr. Mathews first went on leave to combine the two posts and it proved unworkable. Admitting that I could not be technically called a Laboratory Assistant my designation in the college had been various, first as Laboratory Assistant, then as additional Laboratory Assistant, then as Assistant Instructor in Electrical Engineering and now Instructor in Electrical Engineering. Further, any assistance that is to be given in an Electrical Engineering Laboratory is of varying responsibility, such as (1) giving instruction to students; (2) demonstration work; (3) supervision of the experimental work of the students which is of a highly technical and responsible character, highly technical because instruction has to be given in an advanced and complicated subject and responsible, as costly and dangerous machinery is worked every day by inexperienced people under purely experimental conditions, a state of affairs which require a good deal of forethought and constant watchfulness on the part of the supervisor, to avoid accidents to men and machinery.

(5) The nature of work I have to do has been fully recognised by the Principal of the college, as will be evidenced by his recommendations on my application for being allowed to draw the pay of the post of Laboratory Assistant and his declining to spare my services even though the P.W.D. have requested him several times to revert me to the Department.

K. Anand Sukumaran

3

(6) Further the technical abilities and responsibilities required for the work in an Electrical Engineering Laboratory are of a much higher order than those demanded of an Upper Subordinate of the Public Works Department. It is not out of place to mention that my being asked to work in the Electrical Engineering Laboratory has been exceptional in that there has been no previous instance of an Upper Subordinate of the P.W.D. detailed for such work, the qualifications of such men being generally considered inadequate for work in the Electrical Engineering Laboratory.

In addition to my duties in the Electrical Engineering Laboratory proper, my services are being utilised in the newly created Electrical Power Station attached to the college. A large part of erection work of this Power House on the Electrical side (which is required to supply energy to the Government House, the King Institute, the Teachers College, and the Engineering College) has been done by me.

A portion of the plant which requires expert handling has also been solely entrusted to my care. I have now and then been required to supervise the working of the Power Station ever since I joined the Electrical Engineering Laboratory during the summer vacations and other holidays of not less than a week's duration when the Professor of Mechanical Engineering, Mr. M. K. Ranganatham who was in charge of the Power Station had to be away from the station. After the transfer of Mr. M. K. Ranganatham I was required by the Principal, Mr. Cartwright to carry on the duties of the Power Station Superintendent. It is only recently that Government has sanctioned a separate post—Power House Superintendent on Rs. 250—10—350 to take effect from 1st April, 1926 for the above duties—vide G.O., No. 2081, Law (Education), dated 7th December, 1925, though I have been doing the duties of this post in addition to my own for the last over a year without any extra remuneration.

(7) In conclusion, I trust that Government will be convinced from the foregoing facts of how hard I am being worked without any adequate remuneration, not to speak of the promotions I have lost so far by being made to remain in the Educational Department. There had been large savings to Government as the post of Professor of Electrical Engineering has been right through left vacant. Mr. Subba Rao has been designated as Acting Professor of Electrical Engineering during the absence of Mr. Mathews on leave. As such there is no reason to suppose that the post of Electrical Laboratory Assistant (now Instructor in Electrical Engineering) is not available for appointment.

(4) I, therefore, pray that Government will be pleased to consider the foregoing facts and bestow on me (1) the post of Instructor in Electrical Engineering on Rs. 250—40/2—450 with retrospective effect from 7th February, 1922 and (2) to revise the sanctioned scale of pay of the post so that the maximum grade in that post be fixed at Rs. 750—the pay usually allowed to Sub-Division officers. It has to be submitted in this connection that I only request to be paid the pay of the post whose duties I have satisfactorily been discharging, not to speak of my work connected with the Power House for which I do not claim any remuneration and I ask for a revision of the pay of the post so as to give me in a way some compensation at least, for the chances lost to me all these years of having been promoted as an Assistant Engineer, P.W.D.

If for any reason it is considered that the second request cannot be complied with for some time to come, I pray that I may be confirmed provisionally as Instructor in Electrical Engineering on the sanctioned scale of pay viz., Rs. 250—40/2—450 subject to any modification that may become necessary as a result of the recommendations of the Lee Commission.

I beg to remain,
Sir,
your most obedient servant,

GUINDY,
Dated 24th March, 1926.

K. Anand Sukumaran

NRe No 1744/25
23-4-26

Methodist Publishing House, Madras—1926.

Submitted for favourable consideration.

Mr. Sukumaran's work in the various capacities in which he was employed in the College, has been uniformly Satisfactory

G. N. Ranganatham
As Principal 23.4.26

C 685-426

Law & Education Department

(C.No.3087-A) From the D.P.I., N.R.C. No.685 C/26 dated 29th J u l y 1926.

Subject:- Sukumaran M.R.Rv.K.--- Assistant Instructor College of Engineering--Memorial for confirmation as Instructor in Electrical Engineering.

Mr. Sukumaran first entered service in the P.W.D. as a temporary Supervisor in August 1919. In Octr. 1920, his services were transferred to the Edl. Dept for duty in the Engineering College. From Feby. 1922 he has been working as Assistant ~~in the~~ ~~Electrical Engineering~~ in the Electrical Engineering Laboratory. Till July 1925 he was drawing only his pay as Supervisor in the scale of Rs. 80-10-150-12½-250.

Usually P.W.D Officers lent to the Education Department are reverted to their original posts after a period of three years, new incumbents being appointed in their places. It was however not possible to adopt this procedure in the case of Mr. Sukumaran as the P.W.D had no qualified officers to be appointed in his place. He therefore continues to be retained in the Educational Dept.

In 1924 when the P.W.D raised the question of his reversion, Mr. Sukumaran stated that he would prefer not to be reverted to the P.W.D if

- (1) he is confirmed in the near future as Instructor in Electrical Engineering in the college (Pay Rs. 250-40/2-450) or
- (2) he is given the status of a sub-division officer in the P.W.D and lent to the Edn. Dept until such time as he can be permanently employed in the Electrical side of the college.

2 W
The idea then was to confirm Mr. Sukumaran as Instructor in Electrical Engineering at the college when the post fell vacant.

That however depended upon Mr. Subba Rao's appointment as Professor of Electrical Engineering which in turn depended upon final orders on Lee Commission's recommendations.

The Govt. therefore created a temporary post of Instructor on Rs. 200/- a month to be held by Sukumaran now
The question of issuing final orders on these recommendations is separately under consideration.

2. Mr. Sukumaran repeats the request made in 1924. The main arguments brought forward by him are :-

(1) that his prospects in the P.W.D have been affected by his stay in the College and that he has lost his seniority;

(2) that as Mr. Subba Rao has been appointed Acting Professor of Electrical Engineering the post of Instructor may be held to be vacant; and

(3) that he has been doing his duties satisfactorily and ^{has} specially assisted in the erection of the Power House plant and the supervision of the working of the Power Station.

As regards (1) the Chief Engineer says that Mr. Sukumaran has ^{not} lost seniority nor ~~been~~ superseded. He however says when he reverts he would be tried as a section Officer first and on his proving himself competent, his eligibility for sub-division charge will be considered in due course.

As regards (2) the D.P.I says that Mr. Sukumaran cannot be given the pay of the post of Laboratory Assistant, viz, Rs. 250-450 as Mr. Subba Rao the permanent incumbent of the post ^{has} not made to act as Professor of Electrical Engineering in the Educational Service but ^{has been} required only to carry on the duties of the Professor in addition to his own for which he is paid an allowance

Vide p 249
p 113429
30.6.25 (L)

para 3 on
pp 6-74

p 54

p 14

of Rs. 120 p.m.

As regards (3) it is admitted that Mr. Sukumaran has done good work in the college and consequently his services have been retained in the College beyond the ordinary period by giving him increased pay of Rs. 250.

3. The question of ^{reorganizing the S.D. Service with reference to} ~~issuing final orders~~ by Lee Commission's recommendations is separately under consideration. When ~~these~~ orders are issued, the question of appointing Mr. Subbarao as Professor of Electrical Engineering can be considered. The question of giving Mr. Sukumaran the pay of the post of laboratory assistant can therefore be considered only thereafter.

For orders whether the D.P.I may be informed accordingly.

K.K. 15.8.26 ^{may} It ~~might~~ be noted that if Mr. Sukumaran now desires to revert to the P.W.D ~~by~~ there may be no difficulty in relieving him as the Chief Engineer says that an upper subordinate can be spared in his place. *This may also be comm. to him.*

U.O.Reply No. R.C.685-9/6/26-26.

The draft order implies that there is a necessary connection between the recommendations of the Lee Commission and the appointment of Mr.Sukumaran as Instructor in Electrical Engineering. The consequential inference is that with the reorganisation of the superior educational services the appointment of Mr.P.Subba Rao as Professor of Electrical Engineering will be considered. It is not at all desirable that this inference should be drawn. Regarding Mr.Subba Rao attention is invited to G.O.No.1728 Law (Education) dated 12th December 1923. This G.O. had reference to the correspondence ending with the D.P.I's letter No.2465 C dated 27th November 1923. From the G.O. I quote the following:-"This will not give Mr.Subba Rao any extra remuneration, nor will he have any claims to be appointed as Professor in case the post falls permanently vacant". I have elsewhere urged the necessity of securing as soon as possible a highly qualified permanent staff in the College of Engineering. It is submitted that the draft order, if issued, would raise false hopes.

299
6.9.26

Law and Education Dept

With reference to the D.P.S's remarks at X on phante, it is submitted that Mr. Subbarao actually submitted in Aug 1928 an application for Confirmation as Professor of High Electrical Engineering. In that connection M2 observed as follows:-

"Until final orders of Govt of India are issued on Lee Commission regarding J.E.S. position nothing seems possible" The D.P.S. was accordingly requested in Cr. No 1815 L.B. & Q. 10.28 to inform Mr Subbarao that the Govt were unable to accede to his request.

The draft order does not therefore appear to raise false hopes as phante apprehended by the D.P.S.
