G.O., No. 172, 23rd March 1901.

MARCH.

School of Arts.

Asking the Director of Public Instruction to state how the money required for the construction of the new workshops in the — is to be provided, and directing that the Consulting Architect be called upon to prepare the necessary plans and estimates.

GOVERNMENT OF MADRAS.

EDUCATIONAL DEPARTMENT.

READ—the following paper:—

From the Hon'ble Mr. G. H. STUART, M.A., Barrister-at-law, Director of Public Instruction, to the Secretary to Government, Educational department, dated Madras, 13th March 1901, Ref. on C. No. 16157 of 1900.

Referring to G.O., R. No. 89, Educational, dated 18th February 1901, I have the honour to say that for the accommodation of the machinery mentioned in the indent submitted with my letter read in the Government order quoted above, it is necessary that new workshops should be built in the School of Arts. Mr. Chatterton estimates that these workshops will cost at least Rs. 50,000, and he wishes to know whether the necessary plans and estimates should be prepared by the Consulting Architect or whether the design and construction of the shops may be left to him in order to save time.

ORDER—No. 172, Educational, dated 23rd March 1901.

The Director will state how the money required for the buildings is to be provided as there is no allotment for the purpose in the budget. Meanwhile the Consulting Architect will be called upon in the Public Works department to prepare the necessary plans and estimates in communication with Mr. Chatterton. The necessity for these new workshops should have been brought to the notice of Government when the indent for the new machinery was submitted.

(True Extract.)

C. J. WEIR,
Ag. Secretary to Government.

EDUCATIONAL DEPARTMENT.

NOTES CONNECTED WITH G.O., No. 172, EDUCATIONAL, DATED
23RD MARCH 1901.

[SUBJECT.—Construction of Workshops for the Aluminium Department, School of Arts.]

From the Director of Public Instruction Reference on C. No. 16157 of 1900,
dated 13th March 1901.

For orders as to whether the Consulting Architect should be requested to prepare the necessary plans and estimates or whether the design and construction of the workshops may be left to Mr. Chatterton. The latter course is, however, unusual, and it is by no means sure whether, in case it is adopted, Mr. Chatterton can spare enough time to superintend the work.

2. It seems, however, that the question of funds should first be decided. The Public Works department cannot apparently spare anything from their grant, nor will the Financial department be in a position to make any special allotment for the purpose.

3. The original intention appears to have been that the cost of the tools and plant as well as of the sheds required for the manufacture of aluminium ware should be met from the profits derived from the industry. The Director may, however, be now asked u.o. to state how he proposes to meet the cost of the workshops. **A** Meanwhile the Consulting Architect may be authorized to prepare the necessary plans and estimates in consultation with Mr. Chatterton.

P. T. THARYAN.
16-3-01.

Before anything else is done the reference suggested above at **A** may be made. Mr. Hammick's note, dated 9th February last: Mr. Chatterton's anxiety to get out the machinery "as soon * as possible" is not now understood. I am sure that Mr. Hammick had no notion (I had none) that new workshops, to cost half a lakh of rupees, were required before the machinery could be of use. Not a word to that effect has ever been written to Government. If we had known about it before, we could perhaps have arranged for providing the sum in the budget estimates, as it was agreed by Messrs. Hammick and deWinton, that the latter should without objection retain for expenditure on non-educational works as much as

some sixty or seventy thousand rupees
† For the purchase of the 'Umda Bāgh. made available by our reducing a certain item † included in the preliminary lists.

This sum might have been allowed to stand in the name of **A** works in the budget, and on sanction of the estimates for these workshops of Mr. Chatterton have been re-appropriated. [I venture to suggest that, in the first instance, the Secretary might speak to Mr. Stuart. Mr. Chatterton's methods are really alarming to a department which is tied down by budget rules and even then is at times in hot water for overspending grants. Workshops costing half a lakh cannot be run up, and the funds found for them, in a day.]

Secretary.

A. T. PRINGLE.
20-3-01.

Telephone to the Director of Public Instruction, dated 21st March 1901.

Your letter of 13th regarding new workshops in the School of Arts for accommodation of new aluminium machinery.

In case the construction of the buildings cannot be sanctioned, as seems likely, could the machinery be put up and utilized in the Engineering college?

Can you suggest any savings out of the aluminium budget to meet the Rupees 50,000 required for buildings? The budget has been passed by India.

Reply from the Director of Public Instruction, dated 21st March 1901.

The machinery for the School of Arts could not be put up and utilized at the College of Engineering. It is required at the School of Arts for ordinary metal work as well as aluminium. The buildings are necessary, and if the money cannot be found otherwise, the cost must come out of the aluminium budget out of material.

The indent had better be cancelled.

A. T. PRINGLE.
21-3-01.

Secretary—

Please see telephone message to the Director of Public Instruction and his reply. I have also seen Mr. Stuart on this subject. The Chief Secretary says the Rs. 50,000 wanted cannot be given by the Financial department. It must therefore be provided by savings out of the aluminium budget. Otherwise the indent for machinery must be cancelled.

2. This indent was despatched on 18th February 1901 and it is doubtful whether it is not now too late to cancel it even by cable. Mr. Stuart, however, very strongly deprecates this being done and says that unless the new machinery is got no real progress can be made with this industry.

Some mistake, I think. There is no aluminium manufactured in the Engineering College that I know of. The workshop is utilized by Mr. Chatterton for tool-making, etc.

A. T. A. [RUNDEL].
I must have misunderstood Mr. Stuart.
C. J. WEIR.

New buildings are also, he says, essential as the place where the aluminium is being manufactured in the Engineering college is needed for the new instructor there. Mr. Chatterton, moreover, could not any longer supervise work there.

3. Mr. Stuart believes that buildings suitable for the accommodation of the new machinery could be erected for much less than Rs. 50,000, and he says this sum or whatever smaller sum may be found necessary can be provided by savings out of the budget.

4. Rs. 40,000 are provided for "tools and plant." Of this Rs. 16,000 odd will be spent for machinery from home. The Director of Public Instruction thinks that a large portion of the balance of Rs. 24,000 may be transferred to buildings. Rupees 1,40,000 are provided for materials and he proposed to find the rest of the money needed by reducing this grant. It is, of course, a pity to touch this provision as receipts will be thereby diminished, but I think it is better to do so than to stop at this stage the indent for machinery.

5. I submit that the best course is to write to the Director of Public Instruction officially, informing him that Government think the estimate of Rs. 50,000 high and asking him if it cannot be reduced by providing for a cheaper and more temporary style of building. He should also be told that whatever money is needed must be provided by savings out of the aluminium budget and be asked to propose what these savings should be, and he may at the same time be called upon to explain why the necessity for these buildings were not brought to the notice of Government when the new machinery was asked for. Mr. Chatterton, I gather, returns to Madras in a day or two, and if the Honourable Member agrees to the course I have suggested the Director of Public Instruction may be told to submit his proposals after consulting him. Urgent orders on this are, however, required as, if the indent is to be cancelled, a wire should go at once.

Honourable Member.

C. J. WEIR.
22-3-01.

We need not wire to cancel the indent for machinery: but it is useless to take action about the buildings till Mr. Chatterton returns unless the Director of Public Instruction can communicate with him by letter. Mr. Stuart's letter had better be disposed of by asking him to say how the money is to be provided as there is no allotment for the buildings in the budget. The plans and estimates must of course be prepared by the Government Architect with whom Mr. Chatterton should communicate.

[The Director of Public Instruction must realize that Mr. Chatterton is under him and must be properly controlled, and not left to frolic about at his own sweet will!]
