OCTOBER.

Remuneration to Examiners.

Sanctioning the revised scale of — appointed to conduct the Government technical examinations.

GOVERNMENT OF MADRAS.

EDUCATIONAL DEPARTMENT.

READ—the following papers:—

From the Hon'ble Mr. G. H. STUART, M.A., Commissioner for Government Examinations, Madras, to the Secretary to Government, Educational Department, dated 26th March 1902, No. 196/4-D.

With reference to G.O., No. 653, Educational, dated 28th September 1899, I have the honour to forward, for the approval of Government, the accompanying scales of remuneration to examiners appointed to conduct the technical examinations. These scales apply to certain of the subjects only that are included in the technical examination scheme,—subjects which are most frequently brought up by candidates and which may be regarded as the more important ones in the scheme. There are subjects in which no examination has ever been held, as no candidates have ever applied to be examined in them. For these subjects no scales appear to be necessary. There are a few others for which I have not been able to draw up any scales, as yet, as there are points connected with the examinations in these subjects which are still undecided, and I should like to have further experience of them before making any definite proposals. In some cases, the scales must be regarded as being only of a tentative character. Circumstances may at times require a departure from the rates laid down, and I must ask Government to allow me some discretion when such circumstances arise.

OFFICIAL MEMORANDUM.

No. 92.

With reference to his letter, No. 196/4-D., dated 26th March 1902, forwarding for approval scales of remuneration to examiners appointed to conduct the technical examinations, the Commissioner for Government Examinations is requested to be good enough to submit at an early date a comparative statement showing the present and proposed fees in parallel columns.

A. T. PRINGLE,
Asst. Secretary to Government.

5th April 1902.

To the Commissioner for Government Examinations.

From the Hon'ble Mr. G. H. STUART, M.A., Commissioner for Government Examinations, Madras, to the Secretary to Government, Educational Department, dated 3rd September 1902, No. 493/4-D.

With reference to memorandum No. 92, dated 5th April 1902, I have the honour to submit the comparative statements called for. In doing so, it is necessary to explain that the new scales do not materially differ from the old scales in the rates for setting question papers and valuing answer papers. All that can be claimed for the new scales is that they are more complete and definite than the old ones and that their adoption will get rid of the element of arbitrariness, which seems to have entered formerly into the calculation of stipends for the technical examinations. In some cases, it will be observed that the rates proposed are higher than the old rates. The reason is that, when the technical examinations were first instituted, there were no

data to go upon, and the scales drawn up originally, necessarily imperfect, were meant to be of a tentative character and to continue in force until sufficient experience had been gained of the working of the scheme. In the case of examinations of the usual literary character, there is no great difficulty in determining the remuneration to be paid to examiners,—the chief points to be considered being the standard of the examination and the duration of the papers set,—but it is a different matter dealing with examinations of a technical and professional nature, where special knowledge of the subjects is required, and the papers set involve, as they often do, the preparation of elaborate plans and diagrams. The time allowed for answering a paper is, in these cases, no guide to the fee to be paid for setting it. Before the scales could be revised, it was necessary to consult those who had the kind of special knowledge required and who had had experience of the working of the technical examinations, and it was found that papers which, it was thought, could have given little or no trouble in setting, involved a great deal of time and labour and required to have a higher value set on them. This will account for the higher rates proposed in some instances.

2. In G.O., No. 653, Educational, dated 28th September 1899, it was observed that "Government considers that, in the present condition of technical education, it would be inadvisable to reduce the maximum fees for examiners". Agreeing with Government in this opinion, I have made little attempt to reduce the fees: in fact, it would be almost impossible to do so in the face of the difficulty that is felt in getting suitable examiners. In the order quoted, Government remarks that "the fees should be graduated according to the difficulty of the subject." I fear the difficulty of doing this is not sufficiently realized. But even if it were possible to estimate aright, the relative difficulty of the subjects comprised in the technical examination scheme, this is not the only element that enters into the question. There is the other difficulty that has to be reckoned with,—the difficulty of securing competent examiners. I have frequently to travel beyond the limits of the presidency for examiners capable of taking part in these examinations and willing to lend their services. Having regard to these and to other points, I would deprecate the laying down of any hard-and-fast rules which would prevent me from occasionally deviating from the scale of payment now submitted for approval, when such deviation appears to me to be necessary in any particular case.

ENCLOSURE.

Government Technical Examinations.

ORDER—No. 612, Educational, dated 3rd October 1902.

The revised scales submitted by the Commissioner are sanctioned. They will be reconsidered after they have been in operation for three years.

(True Extract.)

A. T. PRINGLE,
Assistant Secretary to Government
in charge.

To the Commissioner for Government Examinations.
" Accountant-General.

EDUCATIONAL DEPARTMENT.

NOTES CONNECTED WITH G.O., No. 612, EDUCATIONAL, DATED
3RD OCTOBER 1902.

[SUBJECT.—*Scale of remuneration to examiners in technical subjects.*]

*From the Commissioner for Government Examinations, dated 26th March 1902,
No. 196/4-D.*

In 1899 the Government had under consideration the question of rendering the examinations under the control of the Commissioner for Government Examinations self-supporting. In regard to the technical examinations, it was considered inexpedient to raise the fees payable by candidates as proposed by Dr. Duncan, but at the same time it was considered inadvisable to reduce the maximum remuneration payable to the examiners. It was, however, thought that the remuneration should be graduated according to the difficulty of the subject, and the Commissioner was requested to draw up a scale for the approval of Government—*vide* paragraph 3 (5), page 10, of G.O., No. 653, Educational, dated 28th September 1899.

2. With his present letter the Commissioner submits a scale applicable to certain of the subjects which are most frequently brought up by candidates. As regards the remaining subjects, he says there are some in which no examination has ever been held for want of candidates, while there are others in respect of which he desires to gain further experience before making definite proposals.

3. The existing scale will be found at the statement in G.O., No. 607, Educational, dated 12th September 1899. It is not easy to see how the present scale compares with it, and without this information Government may not be quite ready to sanction the new scale. The fee for setting each question paper and for valuing each answer paper in the different subjects varies with the time allotted to each paper. This time may be ascertained from the syllabuses put up, but there are other considerations also in calculating the total amount payable in each case. On the whole, therefore, the Commissioner may, it is submitted, be requested to submit a comparative statement of the present and proposed fees.

P. T. THARYAN—3-4-02.

By official memorandum.

A. T. PRINGLE.

The draft placed below may issue.

T. KANAKASUNDARAM PILLAI—3-4-02.

P. T. THARYAN—3-4-02.

A. T. PRINGLE—3-4-02.

[Memorandum No. 92, dated 5th April 1902.]

*From the Commissioner for Government Examinations, dated 3rd September 1902,
No. 493/4-D.*

The Commissioner submits a comparative statement of the present and proposed fees. A glance at this statement shows that in the majority of cases the revised fees are higher than those now in force. In ordering the revision it was not the intention of Government that any reduction should be effected in the maximum amount payable

to examiners, but neither was it intended that there should be any increase. So far, the Commissioner has not * followed the instructions of Government. It was also the intention of Government that the fees should be regulated according to the difficulty of the subject, but in regard to this the Commissioner fears that Government did not realize the difficulty of doing this.

2. There is apparently no help for it now: the remuneration to examiners is now paid according to the revised scale and formal sanction may be accorded to this scale.

P. T. THARYAN—25-9-02.

I fear there is "no help for it." Does the Honourable Member wish the subject pursued, after reading Mr. Stuart's last letter?

A. T. PRINGLE—29-9-02.

The receipts and the payments to examiners compared badly enough already and will now be worse. What is meant by saying "the remuneration to examiners is now paid according to the revised scale." Is not the scale alterable by Government at any time? Do the examinations go on all the year round?

2. It will certainly be necessary to consider as soon as can properly be done whether Government can go on paying fees at an increasing rate of loss. When can that be?

J. T. [HOMSON]—30-9-02.

With reference to the Honourable Member's remark at A it is submitted that the scale is alterable by Government at any time, but the scale which is now in force is the revised scale. If we make any reduction in it or if we go back to the old scale, the examiners will get less than they now do and this will cause a strike among them as a similar step did in the case of the examiners on the Board of the Engineering College. The Director had to put in an inferior set eventually. The examinations are held only once a year, but some of them are held in April and others in November (*vide* pages 79—82 of the calendar of the Commissioner for Government Examinations for 1901—1902).

2. As regards the Honourable Member's remark at B we may perhaps wait, say, for two or three years. If by that time the examination is not self-supporting a reduction in examiners' stipends may be considered.

P. T. THARYAN—30-9-02.

I do not know what else to suggest.

A. T. PRINGLE—30-9-02.

Very well. We can only watch developments.

J. T. [HOMSON]—30-9-02.

I concur.

G. S. [TOKES]—1-10-02.

To

The Secretary to Government,

Educational Department.

Sir,

With reference to G.O. No. 653, Educational, dated 28th September 1899, I have the honour to forward, for the approval of Government, the accompanying Scales of remuneration to Examiners appointed to conduct the Technical Examinations. These Scales apply to certain of the Subjects only that are included in the Technical Examination Scheme, - Subjects which are most frequently brought up by candidates and which may be regarded as the more important ones in the Scheme. There are Subjects in which no examination has ever been held, as no candidates have ever applied to be examined in them. For these Subjects no scales appear to be necessary. There are a few others for which I have not been able to draw up any scales, as yet, as there are points connected with the Examinations in these subjects which are still undecided, and I should like to have further experience of them before making any definite proposals.

Educational Department.

Sir,

With reference to memorandum, no 92, dated 5 April 1902, I have the honour to submit the comparative statements called for. In doing so, it is necessary to explain that the new scales do not materially differ from the old scales in the rates for setting question papers and valuing answer papers. All that can be claimed for the new scales is, that they are more complete and definite than the old ones and that their adoption will get rid of the element of arbitrariness, which seems to have entered formerly into the
