Sir,

With reference to the requisition contained in your letter No. 13 dated 16th January 1903, I have the honor to forward herewith plans and estimate, as per margin, and to request that you will be so good as to forward the same for the countersignature of the Director of Public Instruction and Surgeon General with the Govt of Madras, in token of his approval and submission to Government for sanction.

The works to be done are explained in the report attached to the estimate.

I have the honor to be,

Sir,

Your most obedient Servant,

W. Ashpitel
Offg. Consulting Architect to Govt

Name of work. Old Bullet Factory

Reference.—

Letter No 13 of 16th January 1903 from
the Surgeon ^{1st} District, Madras

REPORT.

This Estimate has been prepared at the request of the Surgeon of the 1st District. It is stated that at present there being no roof to the veranda the sun strikes in throughout the day. The Estimate therefore provides for a bangalore tiled roof laid on flat tiles and teak rafters.

The work to be executed in general accordance with the Standard Specification of the Public Works Department and to the satisfaction of the Consulting Architect to Government.

C. No. 736, From the 249, Dated 8-5-1903.

Subject. Rayapuram Medical School.

It will be seen from pages 20 & 21 of G.O. No 320 Est
of 10th June 1901 that the initial cost of the buildings,
furniture & fittings required for the Medical School at
Rayapuram was estimated at Rs 40,000. The estimates
passed up to date amount however to Rs 62,088. vide
G.O. No 1228 W of 27th April 1903. It seems therefore that
the time has come for these little estimates to be stopped.
It does not appear that either the Surgeon General or the
Director has satisfied himself by personal inspection
that a tiled verandah is absolutely necessary. Orders
are therefore solicited as to whether the present estimate,
small as it is, should be approved & transferred to the
P.W.D.

The D.P.I. may be asked us to give his
remarks on this matter. If the windows
have venetians, a verandah does not seem
necessary in order to exclude sun. If the windows
have no venetians, it might suffice to provide
venetians.

Dy 12.50

Est. No. 121 of 12-5-03.

249

502 No.

29 of 25 May 1903

There are no venetians:

the windows are fitted with solid wooden

Recd 1-6-03.
Recd 1-6-03.

shutters which must be left open when classes are held.

I think some protection from the sun will be found necessary: but as the proposed tiled roof is for the verandah on the south side, where no sun falls for the next few months the matter may be dropped for the present. After the school is opened if the lecturers find from actual experience that protection is necessary the proposal will be revived.

W. S.
25.5.03

The P.W.D. may be asked to consider whether the solid wooden shutters cannot be altered into venetians. thus rendering the verandah unnecessary.

Educational Department.

The Director has promised to revive the question if the lecturers find from actual experience that protection is necessary. May not the present letter be therefore recorded & the question further considered when it is again raised if at all.

W. S.
28/6/03

W. S.
20.6.03

Better ask the P.W.D. to convert the batten shutters into venetians at once. Batten shutters are clearly not convenient.
