JULY.

Medical College.

Reviewing the report on the working of the — during the year 1902–1903.

GOVERNMENT OF MADRAS.

EDUCATIONAL DEPARTMENT.

Read—the following paper :—

From the Hon'ble Mr. G. H. STUART, M.A., Director of Public Instruction, to the Secretary to Government, Educational department, dated Madras, 9th July 1903, C. No. 4958.

I have the honour to submit, for the information of Government, a copy of my Proceedings, Dis. No. 4217, dated 6th July 1903, reviewing the report on the working of the Medical College during the year 1902–1903.

Enclosure.

Proceedings of the Director of Public Instruction, dated 6th July 1903, Dis. No. 4217.

Read the following letter from Lieutenant-Colonel J. MAITLAND, M.D., I.M.S., Acting Principal, Medical College, to the Director of Public Instruction, Madras, dated 19th May 1903, No. 88 :—

I have the honour to submit the annual report on the working of the college during session 1902–1903.

Enclosure.

ANNUAL REPORT OF THE MADRAS MEDICAL COLLEGE, SESSION 1902–1903.

The sixty-eighth session of the college began on the 1st July 1902 and terminated on the 31st March 1903.

2. Changes in the staff.—The only changes that are necessary to note are that, owing to the promotion of Colonel W. R. Browne, M.D., I.M.S., to the administrative grade, Lieutenant-Colonel J. Maitland, M.D., I.M.S., was appointed Principal; Lieutenant-Colonel W. B. Browning, C.I.E., I.M.S., Professor of Surgery; and Captain C. H. Leet-Palk, M.B., I.M.S., Professor of Medical Jurisprudence. These changes, however, did not involve any interruption to the course of instruction, as the various Professors concerned continued to lecture in their former subjects to the close of the session. Colonel H. Allison, M.D., I.M.S., was also appointed to the administrative grade, and was succeeded by Captain H. Kirkpatrick, M.B., I.M.S., in the chair of Anatomy.

3. Strength of the College.—It is satisfactory to observe that 583 students were admitted during the session, 101 of whom joined the Sanitary Inspectors' class in January. Nineteen casualties occurred in all departments of the college and thus only 564 students completed their curricula, or 75 more than in the last session.

The following statement shows the number of **new entries** in each department of the college during the past quinquennium :—

Department.	1898–1899.	1899–1900.	1900–1901.	1901–1902.	1902–1903.	Increase or decrease as compared with previous year.
College { M.B.	21	24	33	37	32	— 5
College { L.M.S.	1	7	6	6	2	— 4
Apothecary	12	15	45	39	50	+ 11
Chemist and Druggist	..	1	1	1	2	+ 1
Hospital Assistant	42	56	78	64	45	— 19
Sanitary Inspectors' Class	99	87	92	76	99	+ 23

The 583 students were **distributed** as follows :—

Department.	Designation of students.	No.	
College	M.B. & C.M. (females 4)	86	
	L.M. & S. (,, 3)	38	
	Casual (females 2)	18	
		—	142
Apothecary	Military pupils	107	
	Colonial apprentices	13	
	Female students	21	
	Private pupils	4	
		—	145
Chemist and Druggist			3
Hospital Assistant	Native Military pupils	51	
	Civil pupils	47	
	Local and Municipal pupils	3	
	Mysore pupils	37	
	Coorg pupils	2	
	Burma pupils	*16	
	Madras-Burma pupils	16	
	Private pupils	16	
	Female ,,	4	
		—	192
Sanitary Inspectors' Class			101
	Total		583

4. Professors' class reports.—The only points worth noting in these reports are the suggestions of the Professor of Hygiene, who is of opinion that the Apothecary section of his class should be entirely separated from the M.B. and L.M.S. section, both in lectures and class examinations, as the preliminary education of the members of this section "does not enable them to profit by, or even understand, a good deal that has to be taught to the M.B.'s" and he considers that "the instruction in hygiene would be rendered both more intelligible and more profitable, if a series of out door demonstrations, similar to those ordained for the Sanitary Inspectors' class, could be instituted" for the Apothecary students. The Professor of Hygiene's suggestion of separating the Apothecary section of the class from the M.B. section is, I fear, not feasible. The same difficulty is felt in all the classes.

5. College Department.—As shown in paragraph 3, there were 142 students attending college in this department against 135 in the preceding year.

The following statement shows the distribution of these students according to the **year of study** :—

——	1st year.	2nd year.	3rd year.	4th year.	5th year.	Total.	——
M.B. & C.M.	*32	*18	17	12	7	86	* Includes two female students.
L.M. & S.	2	†19	7	10	..	38	
Casual	* 8	7	2	1	..	18	† Includes twelve from first M.B. class of last year and three female students.
Total	42	44	26	23	7	142	

The progress of the four female students—two in the first and two in the second year M.B. and C.M. classes—was satisfactory during the session and they will proceed to the first and second M.B. examinations, respectively, in April next. Two female M.B. students appeared for the First examination last April and having failed took out casual courses this session. Of the three second year L.M.S. female students, one failed to obtain term certificates, but the other two will appear for the ensuing first L.M.S. examination.

As anticipated in last year's report, the results of the University examinations last April showed an improvement, a total percentage of 57·4 having passed against 51 in the preceding year. The results for April of this year also show a similar improvement, the total successful percentage being 60·8.

6. Apothecary Department.—There were 145 students in this department against 103 in the previous year, or an increase of 42. The following tabular statement gives the distribution of these students according to their year of study :—

Section of Apothecary Department.	Year of study.				Total.
	First.	Second.	Third.	Fourth.	
Military pupils	51	34	17	5	107
Colonial apprentices	4	4	2	3	13
Female students	8	3	4	6	21
Private pupils	..	1	..	3	4
Total	63	42	23	17	145

Of the fourth year pupils, one Colonial apprentice died during the year and sixteen appeared for the Final examination, of whom fourteen passed in the second class. One Military pupil of the third year failed to obtain his term certificate in two subjects and was consequently debarred from appearing for the Second examination. Of the remaining 22 who sat for this examination, 17 passed in the second class. Five pupils of the second-year class failed to obtain their term certificates and were debarred in consequence from appearing for the First examination. Of the remaining 37 who were subjected to this examination, 34 passed in the second class.

7. Chemist and Druggist Department.—This department consisted of three students, one of whom passed the first examination under the Technical examination scheme last April, but he failed to obtain his term certificate this year in all the subjects. Of the two remaining students who were admitted this year, one ceased attending early in the session and the other failed to obtain his term certificates in all but one of the subjects.

8. Hospital Assistant Department.—The total number of students in this department was 192 against 209 last year, representing a decrease of 17. Seventy-one of these pupils, among whom there were two casualties, were in their third year of study. Sixty-nine of these appeared for the Final examination, of whom 52 passed, four in the first class.

The second and first year classes consisted of 74 and 47 pupils, respectively, of whom six in the former and two in the latter failed to obtain their term certificates.

With the sanction of the Director of Public Instruction, the connection of this department with the college was brought to a close on 1st April of this year on which date it was transferred to the Medical school, Rayapuram, under G.O., No. 320, Educational, dated 10th June 1901.

9. Sanitary Inspectors' Class.—This class consisted of 101 students, being an increase of 25 over last year's figure of 76. During the course of instruction which extended from 12th January to 24th March, forty lectures were delivered by the Professor of Hygiene and ten tutorial meetings were held by his Assistant. Sixty-six students of last year's class appeared for the Government Technical examination in Hygiene and 38 passed, 1 in the first class.

10. Female Students.—The number of female students rose from 26 in the past year to 34 this session, being an increase of 8. The following table gives the details of their class and year of study :—

Department.	Year of study.					Total.
	First.	Second.	Third.	Fourth.	Fifth.	
M.B. & C.M.	4	2	..	..	..	6
L.M. & S.	..	3	..	..	..	3
Apothecary	8	3	4	6	..	21
Hospital Assistant	1	2	1	..	..	4
Total	13	10	5	6	..	34

As regards race, 23 are Eurasians or Europeans, 10 are Native Christians and 1 is a non-Brahman Hindu. Thirteen of the total number hold Dufferin scholarships, nine hold other scholarships and twelve are private students who were not stipended. Six Apothecary students appeared for the Final examination and four passed, as did also the third year Hospital Assistant student. Four sat for the Second and three for the First examination, of whom two passed in the former and all three in the latter.

11. College Diplomas. Examinations for—. These examinations began on the 13th March and terminated on the 31st idem and were conducted by Lieutenant-Colonel F. C. Reeves, I.M.S., as President, and Major R. Robertson, M.B., I.M.S., and Captain C. Donovan, M.D., I.M.S., as Members.

The results of these examinations are detailed in paragraphs 6, 8 and 10.

12. Physical Training.—This was maintained as usual and sports of various kinds were indulged in throughout the year.

13. Library and Museum.—There are now 4,415 volumes in the library, 196 having been added during the year from local sources and by purchase from England. The Museum contains 1,864 specimens, 38 of which were obtained during the session.

14. The service books have been verified up to the 31st December 1902 and the inventory of valuable stock up to 31st March 1903.

J. MAITLAND, M.D., Lt.-Col., I.M.S.,
Ag. Principal, Medical College.

19*th May* 1903.

Endorsement, N. Ref. on C. No. 4178, dated 4th June 1903.

Forwarded to the Surgeon-General with the Government of Madras for favour of remarks and return.

T. R. SCOTT,
for *Director of Public Instruction.*

Endorsement No. T. C. 188

Returned as requested.

2. The increase in the strength of the college and the improvement in the percentage of passes are satisfactory features in the report. It seems hardly worth while maintaining a department for the training of druggists and chemists.

D. SINCLAIR, M.B., Surgn.-Genl.,
Surgeon-General with the
Government of Madras.

OOTACAMUND,
12th June 1903.

Recorded.

2. The strength of the college was the largest on record and the increase during the year under review was shared by all the classes except the hospital assistant class which showed a decrease of 17. It is noted that the number of female students

rose during the year. The Principal is requested to report, in consultation with the College Council, on the Surgeon-General's suggestion to close the chemist and druggist department.

3. A steady improvement is noticed in the results of the University examinations, the total percentage of success having risen from 47 in 1899–1900 to 51 in 1900–1901, 57 in 1901–1902 and 61 in 1902–1903. The results of the college examinations for the last four years as shown in appendix F show more variation in the percentage of passes in the various examinations.

4. The suggestions of the Professor of Hygiene mentioned in paragraph 4 of the report should be laid before the College Council, and their opinion should be submitted to the Director for orders. If the difficulty caused by combining the apothecary and collegiate sections for lectures in hygiene exists also in connection with other subjects, it seems desirable that measures should be devised for the separation of the two sections both for instruction and examinations.

5. The administration of the institution continued to be efficient and was creditable to the Principal and the staff.

(A true Extract.)

G. H. STUART,
Director of Public Instruction.

To the Principal, Medical College, with six spare copies.
„ Principals of Government First-grade and Professional Colleges.

Copy to the Surgeon-General, } for information.
„ „ Sanitary Commissioner, }
„ „ Government with covering letter.

ORDER—No. 348, Educational, dated 22nd July 1903.

The strength of the Medical College at the close of the year was 564 as against 489 at the end of the previous year, the increase occurring chiefly in the Apothecary and Sanitary Inspectors departments. Next to Europeans and Eurasians, Brahmins formed the largest number on the rolls, 65 out of the 101 students in the Sanitary Inspectors class belonging to this community.

2. Only two students joined the L.M. & S. first-year class while 32 entered the M.B. & C.M. class. With reference to paragraph 2 of G.O., No. 505, Educational, dated 25th August 1902, the College Council considered that the time had not arrived for raising the minimum qualification for entrance to the latter class. Such of the students as find the course difficult readily join the L.M. & S. class in the second year. Twelve of the previous year's first-year M.B. & C.M. students thus joined the second-year L.M. & S. class in 1902–1903.

3. The results of the College department, though better than in any of the previous three years, did not reach the standard attained in 1898–99. Those of the Apothecary department showed, on the whole, a marked improvement on the previous year.

4. The report called for in paragraph 2 of the Director's review should be submitted without loss of time and the Government should be informed whether they are already committed to expenditure on the department during the current session. The Governor in Council agrees with the view expressed in the latter part of paragraph 4 of this review.

5. The large falling off in the contributions of local boards and municipalities is due to the revised method of calculation introduced by G.O., No. 860, Financial, dated 10th October 1901.

the end of

The strength of the Medical College at the close of the year was ~~16 per cent higher than~~ at the previous year, ~~and~~ the increase occurring chiefly in the Apothecary and Sanitary inspectors' departments. Next to Europeans & Eurasians, Brahmans formed the largest number on the rolls, 65 out of the 101 students in the Sanitary inspectors class ~~being~~ belonging to this community.

2. Only two students joined the L.M.S. first year class while 32 entered the M.B. & C.M. class. With reference to paragraph 2 of G.O. No 505 Edl dy 25th August 1902, the College Council considered that there was no

the [illegible] of rising
necessity to raise the minimum qualification
for entrance to the latter class. Such of
the students as find the course too
difficult readily join the L.M.S. class in
the second year. Twelve of the previous
year's first-year M.B. & Ch. students
then joined the second year L.M.S. class
in 1902-03.

3. The results of the College department though better than in any of the previous three years did not reach the standard attained in 1898-99. Those of the Apothecary Department showed on the whole a marked improvement on the previous year.

4. The report called for in para: 2 of the Director's review should be furnished without loss of time to the Govt. who will then be in a position to say whether they are prepared to sanction the expenditure proposed by the Director in para: 4 of his review. The Governor in Council agrees with the view expressed in the latter part of para: 4 of this review.

5. The large falling off in the contributions of Local Boards and Municipalities is due to the revised method of calculation introduced by G.O. No 860 Fin. dt 10th October 1901.
