Subject:

Presidency College, Madras.—Reviewing report on the working of the — for the year 1903.

Dis. No. 2491.

PROCEEDINGS OF THE DIRECTOR OF PUBLIC INSTRUCTION, dated 10th May 1904.

Presidency College, Madras.

Read the following letter from J. B. BILDERBECK, Esq., M.A., Principal, Presidency College, to the Director of Public Instruction, Madras, dated 21st April 1904, No. 297 :—

I have the honour to submit the report on the working of the college during the calendar year 1903. Though signed by me, this report, almost in its entirety, was written by Mr. Middlemast.

2. *Changes in the Staff.*—On November 26th the Hon'ble Mr. J. B. Bilderbeck, the permanent Principal, proceeded to Calcutta on deputation as a member of the Legislative Council of the Governor-General. Mr. E. W. Middlemast was appointed to act as Principal and took charge of the duties on December 26th.

Mr. R. Littlehailes was appointed by the Secretary of State as Professor of Mathematics, and entered upon the duties at the end of the midsummer vacation and Mr. Middlemast, who had been acting as Professor, took up his permanent appointment as Deputy Director of Public Instruction.

Mr. Allen, Professor of History, went on furlough on 10th May and Mr. S. C. Probyn, who was appointed by the Secretary of State to act for him, took charge of the duties on the 13th July.

M.R.Ry. S. Mangesh Rau, who had been acting in the Teachers' College, reverted to his permanent post as Senior Assistant Professor of the College on the 25th August and continued in the appointment till 14th December, when he returned to the Teachers' College.

Mr. C. A. Wilkinson was transferred to act as headmaster of the Central High school, Mercara, on 1st October. M.R.Ry. A. Subrahmanya Aiyar, who had been acting 3rd Junior Assistant Professor, was transferred to the Rajahmundry College on the 2nd September.

M.R.Ry. P. M. Srinivasachari, Tamil Pandit of the College, died on the 19th July, and V. M. Satagoparamanujachariar was appointed to act for him and continued to act till November 17th, when M.R.Ry. V. Swaminatha Aiyar, Tamil Pandit of the Kumbakonam College, was appointed to the post.

M.R.Ry. K. C. Ambalavana Pillai, Head clerk of the College, died on the 24th July and M.R.Ry. N. Ramanujachariar, Head clerk of the Teachers' College, was appointed in his place. The latter was transferred to another appointment on 1st October and his place was filled by the appointment of M.R.Ry. L. Venkatasubba Aiyar, Headmaster, Government Training School, Madura, towards the close of the month.

3. *Accommodation and Equipment.*—The advice of the Consulting Architect was taken with respect to certain structural alterations and additions proposed to be made to the buildings and a general idea of the changes necessary was obtained, but plans and estimates have not yet been drawn up.

The machinery and apparatus for the Physical Science laboratory received during the previous year have now been set up and have greatly increased the usefulness of the laboratory. The work of fitting up the apparatus was heavy, and was effected by the Professor at the cost of sacrificing holidays and vacations. In this connection Mr. Jones reports favourably on the able and loyal assistance given him by M.R.Ry. P. Rajagopala Aiyar, the Assistant Professor.

4. *Strength and Attendance.*—The following statement presents the number of students on the rolls for the 1st and 2nd terms of 1902 and 1903, respectively:—

Class.	1902.		1903.	
	First term.	Second term.	First term.	Second term.
Junior F.A.	57	65	70	72
Senior "	64	63	73	70
Junior B.A.	114	108	116	113
Senior "	170	173	155	174
M.A.	16	15	20	18
Total	421	424	434	447

Twenty-three students left at the end of the first term and one in the course of the second term, and thirty-seven joined during the second term.

The average number on the rolls for the calendar year 1903 was 425.57, and the average daily attendance during the same period was 394.65.

5. Appendix A gives the distribution of students on the rolls on December 31st according to (i) caste or race, (ii) wealth of parents, (iii) occupation of parents; and Appendix B shows the distribution of students according to the districts to which they belong. There was a fall in the numbers of Native Christian and Muhammadan students, but a considerable increase in the number of Hindus, both Brahman and non-Brahman. The proportion of students of the richer classes has increased, while the number of students of the poorer classes has declined.

6. Appendix C gives the number of students studying the various second languages in 1903.

7. *Science Divisions.*—The following statement shows the number of students in the several Science divisions in 1903 :—

Science.	Junior B.A.		Senior B.A.	
	First term.	Second term.	First term.	Second term.
Mathematics	28	27	36	37
Physics	20	20	18	21
Chemistry	17	15	15	15
Botany	5	5	7	9
Animal Physiology	1	1	..	..
Zoology	4	3	4	6
Geology	10	10	1	3
Mental and Moral Science	12	13	19	22
History	34	34	29	32
Total	131	128	129	145

Of the 128 students attending the Junior class in Science, 15 are reading in the Senior class for the Language divisions.

8. *Library—The General Library.*—During 1903, 5,994 volumes were issued to students from the general library as against 5,872 in 1902.

The accompanying statement gives the number of issues of books according to subjects for the two years 1902 and 1903 :—

Subjects.	1902.	1903.
History and Political Economy	1,075	1,095
Biography, Memoirs	282	301
Travels, voyages, etc.	28	12
Literature	3,368	3,556
Mathematical, Physical and Natural Science	683	694
Philosophy	436	336
Total	5,872	5,994

The books taken out for consultation in the room during 1903 numbered 1,102 as against 991 in the year 1902.

During 1903, 571 volumes were issued to the Professors, Assistant Professors and other members of the staff as against 635 in 1902.

The Consulting Library.—The appended statement gives the number of consultations by classes for the years 1902 and 1903 :—

	1902.	1903.
Junior F.A. class students	1,425	1,373
Senior " " " " " " " " " "	2,371	2,458
Junior B.A. class students	2,739	2,531
Senior " " " " " " " " " "	3,359	3,329
M.A. students	343	331
Professors, Assistant Professors and masters	370	385
Total ...	10,607	10,407

Owing to the sickness of the librarian and his absence during the latter portion of the year, the registers of books issued were not, I fear, kept systematically and it is probable that the figures above given for 1903 fall short of the total issues.

An addition of 754 volumes was made to the library in 1903, and a supplementary catalogue of the books added to the library up to 31st December 1902 was printed and issued.

9. Appendix D and Appendix E provide tables of the results of the University Examinations held in December 1903.

In the First Examination in Arts, five of the College students were placed in the first class and one of them headed the list.

In the B.A. Degree Examination, the results were, on the whole, more satisfactory than in the previous year, as a larger proportion of the students passed in the first and second classes. Three were placed in the first class in English, one in Sanskrit and 11 in the Science divisions.

In addition a student of the previous year who was prevented by illness from appearing in Mathematics at the degree examination of 1902, appeared as a private student in 1903 and was placed first in the first class.

University prizes.—The following university prizes were awarded to students of this college :—

Arni Gold Medal for Chemistry, Miller Gold medal for Mental and Moral Science, Grigg Memorial medal for English (Eurasian), Rao Bahadur M. A. Singarachariar's prize for Mathematics (M.A.), Marsh prize for Mathematics, Pitti Muniswami Chetti prize for Mathematics, Palny Andy Medal for Botany, Bysani Madhava Chetti Gold medal for Sanskrit.

At the M.A. Degree examination held in January 1904, two students of the college appeared in Mathematics, of whom one passed in the first class, a distinction which has not been gained by any one in this branch for the past twenty years; four appeared in Physics and one passed in the second class; two appeared in Chemistry and one passed in the third class; two appeared in Zoology and one passed in the second class; one appeared in Geology and passed in the third class.

(ii) *College Examinations.*—The annual examination of the junior F.A. and the junior B.A. classes was held in December 1903. Out of 72 students in the Junior F.A. class, 63 were promoted. Out of 113 in the Language divisions of the Junior B.A. class, 96 were promoted in English and 108 in Second languages. In Science, 115 were promoted out of 128 students.

10. *M.A. Students.*—Of the 18 students on the College rolls during the year, two were studying Mathematics, eight Physics, four Chemistry, two Zoology, one Geology and one Literature (English).

11. *Fees.*—The number of students who paid their fees by instalments during the first term was 93 and during the second term 88.

12. *College Scholarships and Prizes.*—The award of the scholarships and prizes has not yet been finally made as, on account of the change in the Principalship at the end of the year, the necessary notifications were not issued at the usual time. The statement will shortly be submitted.

13. *Finance.*—The following statement shows the receipts and charges during the years 1902 and 1903, excluding the charges on account of scholarships and buildings :—

	1902.	1903.
	Rs. A. P.	Rs. A. P.
<i>Receipts—</i>		
Fees	37,425 13 0	(a) 38,138 4 11
<i>Charges—</i>		
Principal, Professors and Assistant Professors.	1,00,371 12 9	1,07,930 5 0
Masters and Pandits	7,139 10 10	5,984 4 2
Establishment including clerk, librarian and mechanic.	6,546 10 7	5,115 9 9
Demonstrators	500 0 0	500 0 0
Rates and taxes	2,755 15 6	2,755 15 6
Purchase of apparatus	3,750 0 0	244 12 6
Europe stores	6,489 14 1	15,579 1 11
Books and periodicals (class books included) ..	1,115 1 8	2,999 11 7
Travelling allowance	171 12 0	203 11 6
Furniture	77 3 0	19 5 6
Printing at private presses	224 14 0	33 10 0
Other charges including contingencies ..	2,226 12 8	7,648 8 11
Total ..	1,31,370 0 1	1,49,010 0 4

(a) Includes library fees and fines Rs. 43-7-0, sale-proceeds of catalogue and calendar Rs. 7-12-0, sale by auction of dealwood boxes Rs. 107-3-11, and sale-proceeds of distilled water Rs. 9.

The increase in charges is due to the fact that a large proportion of the machinery and apparatus received in 1902 was paid for at the beginning of 1903, and also to the increase in expenditure on books for the library. The increase under "other charges including contingencies" is due to the fact that a large proportion of the Laboratory charge for which provision was made in the budget for 1902-1903 was spent in the first quarter of the year 1903.

14. *Games and Athletics.*—M.R.Ry. K. Ramunni Menon was Honorary Secretary till the end of the vacation when Mr. R. Littlehailes relieved him.

The lawn tennis club was well supported, and the play reached a very fair standard. The club carried off the prize for the junior doubles in the competition held by the Madras Athletic Association.

The football team was fairly good, and won the challenge cup presented by this college for competition among the colleges of the Presidency.

The cricket club was not very well managed and the college eleven did not distinguish itself during the year.

A hockey club was started and has received a fair amount of support.

Athletic sports were held in November after an interval of about six years. The entries were fairly numerous and the events were well contested, but there was evidence of a want of serious training on the part of the competitors.

A sum of about Rs. 3,000 has been collected during the last four years for the purpose of providing a cricket pavilion and endowing a fund for instituting prizes for athletic sports. Plan and estimates for the pavilion were prepared and the permission of Government was sought to erect the building in the cricket ground. While permission to erect a pavilion was accorded, a grant from Government which was solicited at the same time was refused. The erection of the pavilion had accordingly to be postponed.

15. *College Council.*—Four meetings of the college council were held during the year—one in January to consider the results of the annual examination and to make promotions, the second in March to consider and award endowed prizes and scholarships, the third in October to arrange terms, vacations and holidays for 1904, and the fourth in November, to consider the question of recording a resolution expressing the

regret of the council at the loss sustained by the department in consequence of the death of Mr. G. H. Stuart and of conveying to Mrs. Stuart an expression of the sympathy of the members of the council.

16. *The College Societies.*—The various college societies worked fairly well during the year except the Philosophical Association in which a lack of energy was noticeable in the second term.

17. *Residence of Students.*—The Victoria Hostel continues to be popular with students of the college, 92 having resided there during the first term and 111 during the second term of 1903. From statements on record in the office it would appear that about 235 of the students in the college live with their relations and guardians, while the others for the most part reside in rented houses or lodgings.

18. *Madras Educational Rules.*—These rules, so far as they are applicable to the college, have been followed and the registers have been properly kept.

19. *Service Registers.*—These have been verified and brought up to date.

20. *Professors' Reports.*—Owing to recent changes in the staff, two of the Professorships are held by men who were not in charge of the classes during the year under report, and two other Professors have had only one term's experience in the college. Their reports in consequence could deal with little more than the statistics for the year, which have been included in the body of this report.

The Professor of Physics reports that he had not a high opinion of the Senior B.A. class and that it was a matter of great surprise to him that as many as twelve passed out of the twenty-two who appeared. He further states that the M.A. student, who passed the Degree examination in Physics, has been nominated for an appointment in the Magnetic Survey of India for which his training at the college has well fitted him.

The acting Professor of Biology says "the dredging operations were continued. A small sea water tank with an airating apparatus has been put up. The apparatus is not yet in working order. A large number of live marine snakes were supplied to Mr. Pinto of the Medical department who had been deputed by Government to collect the poison of sea snakes and who worked in the Laboratory for several days."

The Professor of Sanskrit reports that M.R.Ry. P. M. Srinivasachariar (the late Tamil Pandit) was an able and ardent teacher who uniformly commanded the love and confidence of his pupils. His work in the college deserves to be remembered with approbation.

21. My thanks are due to Mr. A. Mayhew for examining and reporting on the essays sent in for the Lord Elphinstone prize, and to M.R.Ry. P. Anandacharlu and M.R.Ry. J. M. Velu Pillai for similar offices in connection with the Morehead Vernacular prize and the Norton Medal.

Latin	2	..
III. Mathematics	69	23
IV. Physiology	69	13
V. History	69	12

Proceedings Dis. No. 2491 of 1904.

Staff.—Mr. Bilderbeck was in charge of the institution till 26th November last when he went on deputation as a Member of the Viceregal Council. There were many but unavoidable changes in the *personnel* of the teaching staff, which are detailed in paragraph 2 of the report.

2. *Accommodation and Equipment.*—The plans and estimates for the structural alterations and additions to be made to the buildings are still under preparation. The physical science laboratory was fitted up during the year with the new machinery and apparatus supplied in the previous year.

3. *Library.*—Seven hundred and fifty-four new volumes were added to the library during the year, thus increasing the total number of volumes to 9,912. Judging from the figures given in paragraph 8 of the report, the general as well as the consulting library appears to have been well used both by the students and by the members of the staff.

4. *Strength and Attendance.*—The year under report closed with 447 students or 31 more than the previous year, the increase being made up by additional strength in all four classes. The average number on the rolls and the average daily attendance were 425.6 and 394.6, respectively, against 400.9 and 367.4. As in the previous year, Sanskrit was the most popular of the second languages and mathematics and history the most popular of the optional subjects. All the districts of the Presidency except Anantapur and the Nilgiris were represented in the college as were also several provinces outside the Presidency. Tanjore headed the list with 79 students and Malabar and Madras followed with 43 and 34. One hundred and seven of the students of the B.A. classes, *i.e.*, 37 per cent., were from districts having first-grade colleges, the largest number, *viz.*, 49, being from Tanjore. The neighbouring district of Trichinopoly, which contains two first-grade colleges, supplied only ten students.

5. *Examinations.*—The results of the First Examination in Arts as well as those of the B.A. degree examination were very good and in the case of the latter examination far above the average for the Presidency in all subjects except geology and some of the second languages. The results of the M.A. degree examination in all the subjects taken up except physics were also satisfactory. Promotions from the junior classes appear to have been made with proper care.

6. *Finance.*—The receipts rose from Rs. 37,426 to Rs. 38,138 and the expenditure from Rs. 1,31,370 to Rs. 1,49,010, the increase being due partly to the fact that a large proportion of the supply of the machinery and apparatus required for the physical laboratory was paid for during the year under report, and partly to the fact that the major portion of the laboratory charges provided for in the budget estimate for 1902-1903 was actually incurred only in the first quarter of the year under report. The net cost of the college rose from Rs. 93,944 to Rs. 1,10,872 and the net cost per student from Rs. 234 to Rs. 261.

7. *General.*—The recreation club and the various societies connected with the college continued to do good work. The Victoria Hostel having been completed during the year, the number of students who availed themselves of the hostel rose from 79 to 92 in the first term and to 111 during the second term.

8. *Conclusion.*—In conclusion the Director congratulates the Principal and the staff on the satisfactory working of the college during the year under report.

ORDER No. 322, dated 30-5-1904

Recorded.

2. There was an increase in the strength of the College and the results of the several University Examinations were again good.

3. The net cost per student rose from Rs 234 to Rs 261 but this was ^{mainly} due to the expenditure incurred during the year on special causes, namely in the fitting up of the Physical Science laboratory.

~~277~~ 4. The administration of the College continued to be satisfactory.
