File 38

To

The Secretary to Government,

Educational Department.

Sir,

I have the honour to submit the enclosed plan with estimate amounting to Rs 10,700/- for the construction of a building for the Board High School, Bapatla and to recommend that, under Rule 119 of the Grant-in-Aid Code, a proportionate grant of Rs 3,120/- be sanctioned. The plan and estimate have been approved by the D.P.W. authorities.

2. The necessity for the proposed building is explained in column 12 of the application for grant which is herewith submitted.

3. The plan and estimates have been approved by the Superintending Engineer, Second Circle.

4. Out of the allotment for building grant in the current year's budget estimate payment of Rs 1902/- has been authorized up to date.

I have the honour to be,

Sir,

Your most obedient servant,

S. Sathianathan

Director of Public Instruction

15-6-04

For the Assistant Secretary.

SUBMITTED that the Public Works department may be asked when a reply to the unofficial reference noted below * may be expected.

C. No. 1076 From the Director of Public Instruction No 3377, dated 15-6-1904.

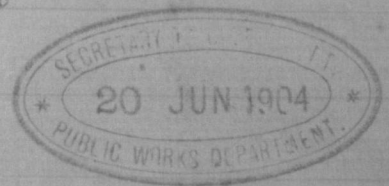

SUBJECT.

Building grant for the Board High School, Bahadla.

The plan and estimate may be forwarded up to the P.W.D. for scrutiny before the grant of Rs. 3,120 recommended by the Director is sanctioned. It is however observed that under rule 118 of the Grant-in-aid Code the School is ordinarily entitled to draw one-third grant, viz., Rs. 3,566 and it is not explained by the Director why the ordinary grant ^{has been} cut down to Rs. 3,120. The Director may perhaps be asked by memo: about this after sending the Estimate to P.W.D. for scrutiny.

Est. no. 282 D of 20/6/14

Note by the Chief Engineer, P.W.D.

The plan and estimate, the latter amounting to Rs.10,700 for constructing a Board High School at Bapatla in the Kistna District, have been scrutinised in this Office and the following remarks are offered:-

1. The floor provided for, is a very bad one for a School. It would be better to use plain Cuddapah slabs pointed with cement over 6" sand. The increase in cost will be about Rs.30 and is not much when compared with the superiority of the flooring obtained thereby.
2. The verandah rafters should not be let into the walls, but should be nailed to wall purlins supported at intervals of about 5½ feet on cut stone corbels as per sketch below. The section of the wall purlins should be 3" x 4½".

3. From the nature of the design there appear to be only 4 valleys, but in the item of teak wood 8 valley rafters are provided. Probably it is intended to use double ones. If so the dimensions can be reduced to 2" x 5½".
4. The lengths of the rafters for main roof and verandah are 14 feet and 12 feet against 13½ feet and 11 feet. The slope for Mangalore tiled roof of main rooms should be 14 feet and not 14½ feet.
5. The requirements of iron work are wrongly calculated. They have been corrected in pencil in estimate and reduced from 927 to 513 lbs.
6. The provision, in the item of wood work of

"walling
