To

The Secretary to Government,

Educational Department.

Sir,

Referring to your endorsement No. 140, dated 13th March 1905 communicating Proceedings of the Public Works Department No. 470 W, dated 3rd March 1905, I have the honour to state that the school has at present six classes with 138 girls and that the disturbance apprehended by the Chief Engineer is perhaps likely to be experienced. The building, however, appears either to have been completed or to be approaching completion and I am calling on the Inspectress to suggest improvements to it calculated to remove the disturbance if it is likely to affect the working of the school and I shall submit a further report on hearing from her.

2. I find from the correspondence in connection with this building that the design was drawn up by the officers of the Public Works Department on information furnished as regards the accommodation required. It is probable that the question of cost determined the nature of the design.

I have the honour to be,

Sir,

Your most obedient servant,

E. W. Middlemass

Director of Public Instruction.
