GOVERNMENT OF MADRAS.

EDUCATIONAL DEPARTMENT.

READ—the following paper :—

Letter—from the Hon'ble Mr. A. G. BOURNE, D.Sc., F.R.S., Director of Public Instruction.
To—the Secretary to Government, Educational Department.
Dated—Madras, the 23rd December 1905.
No.—C. No. 10275.

The special grant of six lakhs has this year been devoted wholly to the construction of buildings for rural schools. Some of these buildings are being constructed in places where there are schools which are badly housed and others in villages without schools. Special batches of students who will open schools in these latter places are undergoing a course of training, and will go out early in April next. I have furnished Presidents of District Boards with lists of these persons and of the villages in which they will open schools. I have also informed them that persons for whose villages new buildings are not being provided this year may be allowed to open and conduct schools under Board management in rented buildings until Government buildings are constructed for them and that I shall propose to Government to allot sufficient funds for the maintenance of these schools, the number and cost of which I shall soon be in a position to determine. In the meanwhile, to enable me to enter into negotiations as regards the number of new buildings that may be constructed next year, I have the honour to request that Government may sanction the utilization in the construction of buildings of the amount that will be left over out of the six lakhs after providing for the maintenance of the schools referred to above.

Order—No. 33, Educational, dated 19th January 1906.

The Government sanction the Director's proposal to utilize in the construction of buildings the balance of the special grant of six lakhs for 1906-1907 that will be left over after providing for the equipment and maintenance of the schools newly brought into existence. The Director should, however, submit detailed proposals for the provision of the funds required for these schools and in doing so he should state to what extent the grant for the current year has been expended—

(a) on renewal or construction of schools in places where Board schools formerly existed;

(b) on the construction of school buildings in new localities.

2. The grant for the current year was distributed unevenly among the various districts. In recommending supplemental grants for 1906-1907 the Director should see that they are given mainly to districts which did not receive the share proportionate to their actual requirements in the current year. Proper provision should be made for the complete equipment of all new schools with furniture, maps and the like.

3. It is quite possible that the current year's allotment will not be fully expended by District Boards before the 31st March next. The Director should therefore obtain and submit to Government as soon as possible after the expiry of the year a statement showing the actual expenditure out of the sanctioned allotments and the

amounts that may be required for completing the buildings remaining incomplete. Meanwhile it will be considered in the Local and Municipal Department whether a small lump provision should not be made in the budget for 1906-1907 for the completion of these buildings. It is not intended that District Boards should be in a position to appropriate for their general purposes in after years any portion of the unexpended balances of the special allotments sanctioned by Government merely because any portion of such allotments has lapsed to their general balance.

19TH JANUARY 1906.

[SUBJECT.—Utilization during the next official year in the construction of buildings of the amount remaining out of the special grant of six lakhs after providing for the maintenance of the schools for which buildings are being constructed this year.]

From the Director of Public Instruction, dated 23rd December 1905, No. 10275.

The special grant of six lakhs made by the Government of India during the current official year to meet increased expenditure on primary education has been fully distributed among the various District Boards.

N.L.R.—26-12-05.

The amount granted this year has been wholly utilized for the construction of

of further buildings. There seems to be no objection to the adoption of this course. Orders are solicited.

P. T. THARYAN—26-12-05.

I suppose it is impossible to give approximately what will be spent on maintenance and what on construction. The Director of Public Instruction's proposal may be accepted.

C. A. SOUTER—2-1-06.

I see no objection. It is not likely that the Boards will themselves be able to provide all at once for the additional establishments at schools newly brought into existence.

2. The Director of Public Instruction may be asked to submit detailed proposals on the lines indicated by him, and, in doing so, he should state to what extent the past allotment was expended (a) on renewal or construction of schools in places where Board schools formerly existed, (b) on the construction of school buildings in new localities. It is for the latter class alone that grant in aid of establishment charges can reasonably be given.

3. The grant in the past year was distributed rather unevenly to certain districts, and in recommending supplemental grants it will be necessary to see that they are given mainly to districts which did not receive their proper share in the current year.

4. It is quite possible that the current year's allotment will not be fully expended by District Boards and that some buildings will remain incomplete and will require additional funds next year. The unexpended grant will have lapsed to the general balances of the Board concerned and will not be available for reappropriation unless budget provision is made by the District Board. We may make some *provisional* allotment in the District Board budgets, and can then as soon as possible after 31st March obtain a statement from District Boards of actual balances from the current year's

grant which remain unexpended; and then adjust from the current year's special grant. Boards must not be allowed to appropriate unexpended balances for general purposes in subsequent years.

I have made provision for furniture and equipment on a suggestion from Mr. R. H. Campbell. Accepted in Local and Municipal. Financial should accept as it relates to next year's grant.

FINANCIAL DEPARTMENT.

The draft order deals with the following two points:—

(a) *Special grant of six lakhs sanctioned during 1905-1906 on account of primary education.*—This sum has been distributed among the several Local Boards. It is

proposed to provide on the expenditure side of the Local Boards' budgets for 1906-1907 the approximate unspent balance that will remain at the end of the current year so that allotments from the special grant may not be diverted for general purposes by Local Boards.

(b) *Special grant of six lakhs for 1906-1907.*—The Director of Public Instruction proposes (i) to utilize a portion for

providing for the equipment and maintenance of the primary schools newly brought into existence and (ii) to spend

the balance towards the construction of new buildings.

SUBJECT.

Utilization during the next official year in the construction of buildings of the amount now available out of the Special grant of lakhs after providing for the maintenance of the schools for which buildings are being constructed this year.

The Special grant of 6 lakhs made by the Govt of India during the current official year to meet increased expenditure on primary education has been fully distributed among the various District Boards. It is, however, possible that the whole amount might not be expended & that there will be savings in this direction. The Director consequently proposes to utilize the unexpended portion of the grant made this year in the construction of buildings next year. Before this proposal is approved, Financial may be consulted as to the point.

W.R.
26/12/5

The amount granted this year has been wholly utilized for the construction of buildings. The Director would utilize the next year's grant in maintaining or aiding the schools which will now be established. He wants to spend whatever balance there may be in the construction of further buildings. There seems to be no objection to the adoption of this course. Orders are solicited.
