From (Name) The Hon'ble Mr. T.T. Logan, B.A.

(Designation) Ag: Director of Public Instruction,

Madras.

To The Secretary to the Government of Madras,
Educational Department.

Sir,

Page 4 of c

With reference to Memorandum No. 328-1 Educational, dated 14th instant, requesting me to report under what authority one of the scholarships for post-graduate study for 1906 was awarded to a student of English Literature instead of to a student of one of the Science subjects specified in section VI of the Scholarship Notification, I have the honour to state that the scholarship was sanctioned as it was thought that the Director was competent to do so under the terms of the notification. The use of the word "Ordinarily" in the first para of section VI of the Scholarship Notification was intended to meet cases of this kind. In the present instance there were 8 candidates for the six scholarships. There was no difficulty in selecting five of the candidates who had obtained good places in the degree examinations in one or other of the science subjects in the previous December and whose fitness for a post-

DR
27/2

graduate course was certified but for the remaining scholarship Dr. Bourne had to consider the merits of (1) a Chemistry graduate of 1902 whose testimonials did not indicate that he had done any chemical work after his degree, (2) a Zoology graduate of 1904 who furnished no evidence that he was fitted to undertake post-graduate work and (3) a graduate of 1905 who took a high place in English and was strongly recommended by Mr. Mark Hunter, the Principal of Rajahmundry College, as being qualified to continue his studies in English and as deserving a scholarship. Dr. Bourne considered that the sixth scholarship could most profitably be bestowed on the last.

I have the honour to be,
Sir,
Your most obedient servant,

E W Middlemast
For Director of Public Instruction.

Note to G.O. No. 1628 Edl. 21-5-07

Educational Department.

Subject.

Grant of scholarships to candidates for State Technical Scholarships during the period of their Practical Training in India.

R Para. 7.

In G.O. No.46, Edl., dated 23rd January 1906, the Government stated that the first scholarships in Madras under the Scheme of Technical Scholarships instituted by the Government of India would be assigned in connection with the study of industrial Chemistry in one or more of its branches and in connection with the tanning industry. In G.O. No. 630, Edl., dated 26th September 1906, it was laid down that ordinarily candidates for the scholarships in these subjects should have taken the B.A. degree with Advanced Chemistry (Branch II-B of the Madras University) as their optional subject or at any rate should have passed in this branch and that after passing the examination in Branch II-B candidates for the scholarships in connection with the tanning industry should qualify by a course of practical training for a year in a fairly equipped native tannery and should have studied for six months more in a modern tannery such as that of Messrs. Adamji Peerbhoy at Bombay, the Government Harness Factory at Cawnpore, the North West Tannery at Cawnpore. In

G.

the case of candidates for the scholarships in connection with the study of Industrial Chemistry it was laid down that they should undergo industrial training for 18 months in the branch of the subject they select.

Para. 2 II of his letter on page 1 of the notes with G.O. No 630 Edl. d/ 26th September 1906. G.

2. Before the issue of the second of these orders the Hon'ble P.S. Sivaswami Aiyar had suggested that a certain number of stipends might be awarded to deserving students undertaking a preliminary study of these subjects in India, the value of each stipend being Rs.25 per mensem if held in this Presidency and Rs.35 per mensem if held in any other Presidency.

Page 5 - ibid.

On this the Honourable Member (the Hon'ble Mr. Forbes) called for information regarding the existing scheme of technical scholarships in connection with the present system of Technical examinations. The office then noted as follows:--

Page 6 - ibid.

"Under the existing scheme of "Technical scholarships there are (leaving "aside scholarships of Re.1 and Rs.1-8-0 in "elementary standards, i.e., standards "below the class preparing pupils for the "technical elementary examination):--

" Thirty-five scholarships of the "monthly value of Rs.2 tenable for one "year in the elementary technical class,

" Twenty scholarships of the monthly "value of Rs.7 tenable for two years in "the intermediate technical class, and

"Fifteen scholarships of the monthly "value of Rs.10 tenable for two years in "the advanced technical class.

"The scholarships in the elementary "class are sanctioned - 30 by the "Inspector of Technical Schools and five "by the three Inspectresses on the "results of the examination in standard D. "The courses of instruction in standard D "will be found on pages 56-62 of the "Educational Rules. All the twenty "scholarships in the intermediate class "are sanctioned by the Inspector of "Technical Schools on the results of the "elementary technical examination and all "the fifteen scholarships in the advanced "class are sanctioned by the same officer "on the results of the intermediate "technical examination. The subjects to "be brought up and the standard required "for the three grades of the technical "examinations are given in the syllabuses "put up."

Fourth Edition.

The Hon'ble Member did not, however, pass any final orders on the Hon'ble P.S. Sivaswami Aiyar's suggestion.

H.

3. In the notes connected with G.O. No.758 Edl., dated 23rd November 1906, the Secretary raised the point again in the following words:--

G.

"G.O. No.630, Edl., dated 26th "September 1906, omits all reference to "one point raised by the Hon'ble P.S. "Sivaswami Aiyar, item II of paragraph 2 [illegible] putting the cart before the horse. It is the most [illegible] that out of [illegible] number of [illegible] in the [illegible] [illegible] to [illegible] a [illegible] Scholarship

"of his letter on page 1 of K.W. that "Government Order, viz., the payment of a "stipend to students who may be prepared "to undergo the practical course.

" 2. Should not some such stipend be "allowed, and should not a student who is "admitted to stipend be promised a scholarship if he goes through the practical "course satisfactorily?

" 3. As the period of training is "ordinarily 18 months we shall have to "obtain India's sanction to the grant of "a scholarship in such case some 20 months "or so in advance."

The Hon'ble Member then said

"I don't think we can give preliminary stipends though the question may be "raised separately. There is no use "inviting paupers because the scholarship "in England will not be sufficient to "support a student and he should have some "private means. However the question may "be raised separately.

"Of course there is nothing to prevent the making of a nomination at once "if a candidate has had a practical course "already. Our "prescribed" course is only "for those who have not had this. If this "is not clear in the Government Order it "may be made so after issue of the draft "letter which is approved."

4. The question is therefore submitted for further orders. The Government of India have already desired that for the ordinary Government of India scholar-

ships

Mr. Risley's D.O. on page 1 of the notes with S. No 454 R.D.I. d/ 27th June 1906. IV.

scholarships only candidates possessing some private means should be selected. For Technical Scholarships also only such candidates will be ordinarily selected but under present circumstances some scholarships seem necessary to induce candidates to undergo the required preliminary training in India.

This is putting the cart before the horse. It is the most hopeless sign that out of the vast number of educated lads in the country, the Govt shd have to induce one or two of them to qualify for a single Technical Scholarship!

9/1

2/1/7

Secy.

It seems, I submit, a good deal to expect a graduate after a university course of four years or five if he takes a B.A. degree with Honours to undergo a further period of 18 months of practical or industrial training ^ If an applicant's parents are possessed of only moderate means, a stipend of Rs 25 in this Presidency & 35 Rs if the applicant goes outside the Presidency would probably be a concession which might be valued. A man good enough for ‡ our purposes is likely to have had a scholarship at College; and would feel it hard to be doing nothing to earn his living so to speak

^ without a stipend

What an extraordinary view! 9/1

There are thousands of lads who are the sons of wealthy parents. Is there not a single parent or a single boy ~~[illegible]~~ in the whole Presy possessed of any inherent desire for technical or industrial pursuits?

‡ Another wrong point of view. It is not for our purposes but for the sake of the advancement of the country

note 162 Ek.

when he left the University. There is a great paucity of candidates as it is and perhaps this is due to the conditions laid down being too hard. After all committing himself to such a career is rather a venture for an Indian student. It is natural that in the absence of some special inducement he should follow the beaten paths of the ordinary professions.

The promise of such stipends might perhaps be made in cases in which enquiry showed it them to be necessary. and paupers might be excluded by obtaining some form of guarantee from the parents that the Scholarship when from held in Europe would be supplemented within such limits as might be considered reasonable. They are worth £200. & with £50 extra, the man, if at all economical should be able to get on. even at Oxford or Cambridge & with vacation & general expenses, i.e. if he goes to one of the less expensive Colleges & does not play the Raja.

4/1/07

i.e. qualified candidates
HR

Natural! What a reflection!
RF
9/1

Yes. The S of State has insisted on this in the case of University Scholars.
HR

But surely it is not intended that these State Technical Scholars should go to Oxford or Cambridge. They are to go for practical training in the industries which they take up.
RF
HR
5.1.07

I think that a monthly stipend should be allowed for the preparatory training subject to the condition that the same should be refunded (security being furnished) in the event of the scholar failing to proceed to England.

Presumably these scholars will do practical work ~~at home~~ in England. They will not go to Oxford or Cambridge, but might perhaps go to Manchester, Birmingham or Glasgow University, and attend Polytechnic Institutions, as well as studying practical work with leading firms. The latter might insist on payment.

5-1-07

Probably not to a University at all ~~[illegible]~~ even of the Birmingham type: but to a Technical Institution in the vicinity of a factory &c

9/1

WM

What Govt say to the thousands of educated lads in the Pcy. many of them sons of very wealthy parents "here is a Scholarships to take you to Europe to study a practical industry". At the present moment there are dozens of such lads in England studying ~~for~~ at their parents expense — Even a Civil Apothecary who visited me the other day had two sons in England ~~to~~ studying — ~~&~~ on the very off chance ~~of~~ not ~~of~~ a profession but of getting in to the Indian Civil Service. Are there not one or two who from natural inclination will take to an industrial education? It is a gloomy outlook for the country! Must not people work out their own salvation. We offer special facilities & they wont take them.

What do the "advanced technical classes" for which there are R10 Scholarships teach please put up their syllabus? A

What scholarships if any are there at the P. College &c or the University for science? B

G. F.

7/1/07

Please note as at A - B

HDT

10.1.07

A. Under paragraph VII of the notification regarding Government scholarships published in Part I-B of the Fort St. George Gazette dated 6th March 1906, pages 112-116, there are fifteen scholarships of the monthly value of Rs.10, tenable for two years in the Advanced Technical class. These classes appear to prepare students for the advanced examinations in the following subjects and the syllabus prescribed for the several examinations will be found on the pages of the Book of syllabuses specified against each:—

* For the portion relating to Technical Scholarships please see page 114 of the Gazette – put up – slip XV

These postgraduate scholarships for technical study are I am glad to find utilized tho' I fear that in some of the cases they are accepted merely to enable a student to qualify more easily for the M.A. exam. than out of pure love of science. However we need not.

grumble at that in present circs.

I object however to one of
these scholarships having been
given for the English language.
We must be careful not to
allow such a precedent to
exist. Under what authority
was the scholarship diverted
A from its proper & prescribed
purpose? If the D.P.I. has the
authority to make such a
diversion, it shd be authorised;
B if he has not he shd explain
why it was so diverted.
The money shd have been
either retained to give
an extra scholarship the following
year, or assigned to give extra technical
scholarships to undergraduates or
students at school, or on some
other technical or scientific
educatl purpose, & not for a
literary course.

We may note for future
reference that seen all the post

Graduate technical scholarships are not taken up

G.F.
12/2/07

Please note as at "A". If D.P.I. has no ~~[illegible]~~ authority a reference No. be made as at 'B'

13.2.07

With reference to the Hon's remarks at A & B on page 17 Supra, it is Submitted that the rule in Section VI of the Scholarship notification, says that "the Scholarships will ordinarily be given to Students of Physics, Chemistry or Natural Science". It is also Stated that two of the Six scholarships should be allotted to Branch I (Mathematics and Natural Philosophy), two to Branch II (Physical Science) and two to Branch III (Natural Science). It is also laid down that a scholarship not appropriated for one branch may be awarded to a Student in either of the other branches.

page 4 of the notifn. – slip XII

It is pretty obvious that to grant one of these scholarships for the study of English is entirely ~~[illegible]~~ contrary to the intention of Govt.
C.W.
14.2.

2. Under Rule (4) of the General Regulations page ~~5 & 6~~ of the Scholarship notification, the Director Sanctions these scholarships.

Slip XII

3. There appears to be no express provision in

25-19

27/98

in the notification authorising the D.P.I. to divert any of these Scholarships to subjects other than those specified therein. Apparently the D.P.I. has taken the word "ordinarily" occurring in the rule as the authority for this deviation.

4. Perhaps the D.P.I. may be asked to explain the authority for the deviation. The draft memorandum placed below is for approval.

The D.P.I. states that ~~the~~ one of the Scholarships for post graduate study for 1906, was given to a student of English Literature instead of to a student of one of the Science subjects specified in Section VI of the Scholarship notification, as it was thought that the Director was Competent

XII

Page 6 of f.

Competent to do so under the terms of the notification, the use of the word "ordinarily" in the first paragraph of Section VI of the Scholarship notification being intended to meet cases of the kind.

It is also stated that altho' Candidates who had taken their degree in one or other of the science subjects were among the applicants Dr. Bourne considered that one of the scholarships could most profitably be bestowed on ~~the Last~~ a student of English Literature

A.O.B.
8.3.07

Sec.

The D.P.I. may be told that it was not the intention of Govt. that these scholarships should be granted for studies other than technical. The word 'ordinarily' can ~~mean~~ give the D.P.I. a discretion only when candidates for technical study are insufficient.

It seems desirable in such case that reference should be made to Govt.

Under the notification regulating the grant of ~~set~~ Government Scholarships, the Six scholarships allotted for post-graduate Study are to be awarded ordinarily to Students of Physics, Chemistry, or Natural Science, two being allotted to Branch I, two to Branch II and two to Branch III. It is also laid down that a scholarship not appropriated for one branch may be awarded to a Student in either of the other branches.

2-

Rew

Pages of f.

2. It is observed ~~that~~ one of these six scholarships was awarded in 1906 to a student of English Literature instead of to a ~~S~~ student of one of the science subjects specified in the notification. This was irregular & defeats the intention of the appropriation ~~The action of the Director in having diverted one of these Scholarships from its proper and prescribed purpose was entirely opposed to the intention, was Clearly irregular~~. The money should have been either retained to give an extra scholarship in the following year or assigned to give extra technical scholarships to undergraduates or students at schools ~~or on some other technical or scientific educational purpose~~ and not for ~~a~~ literary studies ~~Course~~. This ~~The D. P. I.~~ course should be [illegible] ~~is requested to see that the provisions of the notification are strictly complied with~~ for the future.
