INDIA OFFICE, LONDON,

March 1907.

Dear Sir,

With reference to the Madras Government despatch (Public) to the Secretary of State for India dated 27th September 1906, I forward, for information, copy of the papers noted in

*
From Major C. Donovan, I.M.S.,)
dated 1st March 1907.) the margin,* on the subject of
with enclosure.) the purchase of
To ditto. R. & S. 684.) microscopical apparatus.
dated 6th March 1907.)

Major Donovan has been informed that no action should be taken until the wishes of the Government of Madras have been ascertained.

It is presumed that if the Government of Madras wish the instruments to be purchased, they will address the Secretary of State.

Yours faithfully,

J. W. Holderness.

General Hospital and Professor of Physiology,
Medical College, Madras.
(on leave).

To The Under Secretary of State for India,
India Office.

Enclosure 1.

Sir,

I have the honour to state that from the
information gleaned by me on the deputation leave
of 3 weeks' granted to me (vide your letter No.
R. & S. 2878 dated 2.11.06) to study protozoology in
connection with disease in man I find the following
microscopical apparatus (list affixed) essentially
necessary for the furtherance of such study on my
return to Madras next June.

I therefore request the favour of the sanction
of the sum of £85:13:0 to procure the apparatus
specified from Zeiss, before I leave for India.

I

I have not sufficient time to refer to the Government of Madras and obtain its sanction and as a more suitable occasion will not present itself for a personal selection of the accessories in London, I have presumed to take the unusual step of approaching you prior to referring the matter for the consideration of the Government immediately concerned.

It is unnecessary for me to enter into details for the urgent need of the apparatuses in question, they have been selected after a careful and due regard to immediate wants and economy.

The amount asked for, if favourably considered, could be debited to the Professor of Physiology, Medical College, Madras under the head of the Educational Department, Medical. The apparatus could be used in the study of the minute anatomy of the animal cell.

I have, &c.,

Surgeon, 3rd District, Second Physician,
General Hospital and Professor of
Physiology, Medical College, Madras.
