Sir,

Sub: Equipment grant - Voorhees College, Vellore -
inclusion of the scheme in the approved list -
sanctioned - requested.

@@@@

With reference to rule 61 of the Grant-in-aid Code I have the honour to submit herewith the application of the Correspondent, Voorhees College, Vellore for an equipment grant on a scheme the estimated cost of which is Rs.46,260-4-0. In his letter No.510/44, dated 12-12-44 (copy enclosed) the Correspondent has explained the immediate necessity for the articles included in the application. ~~xxx~~ In view of the urgency of the scheme, I have already permitted the Correspondent to proceed with the purchase of the articles in order to satisfy Rule 58(b)(iv) of the Grant-in-aid Code pending the approval of the scheme by Government. The Correspondent was however made to understand that the permission accorded by me does not convey with it any promise that the scheme will be approved by Government or that grant will be paid on it.

I recommend that the entire scheme, excepting the Acrogen gas plant costing Rs.4,725/- (item 66 under chemical apparatus - list B) may be approved by Govt. at an estimated cost of Rs.41,535 and included in the approved list for 1945-'46 so that the scheme may become eligible for the payment of a grant of Rs.20,768/- if and when necessary funds are available.

T. Sany Nanyan
for Director of Public Instruction.

5. No. 445/H/44, dated 3-10-44.

@@@@@

not read

1. For the building alone we are spending more than half a lakh of rupees (Rs.55,000). Out of this Rs.20,000 has come as donations from the public and the Mission has made up the remaining portion (Rs.35,000). Over and above this, half at least of the total cost of science articles and furniture has to be borne by the management.

2. The present permitted strength for practical work in Chemistry and Physics is 32 per batch. To meet adequately the local pressure for admissions into science sections, we have to increase the strength per batch from 32 to 60. As at present, so in future also, we hope to have three batches in each class. In July 1944, 160 applicants for seats in the Junior Intermediate Class had to be refused admission on account of the lack of accommodation. This does not include the forty who were forced by circumstances to take non-science subjects in the Intermediate Class although they had studied science subjects as optionals in the High School.

3. Regarding furniture the application now presented represents minimum requirements. All the work benches, shelves and almirahs now in use in the laboratories and library are to be used, after necessary repairs, as indicated in the list. The lack of a proper science lecture room has been a long felt want. As a matter of fact two rooms, one for Physics and one for Chemistry to serve demonstration and lecture purposes are badly needed. But at present only one new lecture room is being provided with a gallery consisting of twelve rows of seats as shown in the sketch.

4. As regards science articles and chemicals, the present stocks have to be supplemented. In the Physics practical classes the work is to be conducted in cycles of four different experiments at a time. The lists have been prepared having in mind the strictest economy.

5. The gas plant we now have is a small one supplied twenty-five years ago by an Indian firm at Bombay. It has been repaired several times during the last ten years and is so worn out that it has to be replaced by one of larger capacity. After much correspondence we find that the Acrogen plant now indented for will be the cheapest to install. The indent for gass and water pipes has been prepared with care and every part of the old fittings that can continue to be used are to be utilised.

The Director in view of the circumstances stated pleased to sanction half grant on the science equipment.

and furniture. Without Government aid it will be impossible for us to push through the scheme which is regarded by the management and the public as 'essential and inescapable'.

Permission is hereby sought for immediately purchasing the articles so that the improvements may become effective from the beginning of the next college year (July 1945). The grant may, however, be made payable in 1946-47."

The estimated cost of the scheme will then be Rs 41,535 (Rupees forty one thousand five hundred and thirty five only).

While this approval does not

convey any guarantee of grant, it will render the institution eligible for a grant of one half of the cost not exceeding Rs 20,768 (Rupees twenty thousand seven hundred and sixty eight only) if and when funds become available provided that all the conditions prescribed in the Grant-in-aid Code are duly complied with.
