Copy of the letter R.C.No. 51/45 dated 24-4-46 from the Correspondent, St. Joseph's Secondary School, Cuddalore, N.T.

....
SUBJECT:- Grant - St. Joseph's Secondary School, Cuddalore - installation of an electric motor pump for supply of water to the School and the hostel.

With reference to R.C.No. 270-D/46 dated 25-3-46 of the Director of Public Instruction, Madras, and R.O.C.No. 1416-B/45 dated 5-4-46 of the District Educational Officer, South Arcot, informing me that the scheme for the installation of an electric motor pump for supply of water to the 2000 pupils of this institution and 300 inmates of the Hostel attached thereto, is proposed to be treated as a part of the building scheme, and requiring me to establish the need for a Government grant, I have the honour to state the following: -

This is one of the biggest schools in the Presidency, having over 2000 pupils on its rolls, pupils attending School from neighbouring villages, 2 to 3 miles distant and a hostel with 300 inmates. The need for an adequate supply of water and the suffering due to the absence of the same has been too often impressed in my letter dated 27-8-45. In these days of acute food shortage, the necessity for an adequate supply of water which forms one of the most essential pre-requisites for the existence of man, in such a big School as this, not to speak of the hostel, has been very keenly felt. The hostel and the laboratory and conduct of science classes require not a small quantity of water. Finding other means of satisfying the thirst for water impossible, the management requested the Department to come to their aid in alleviating the long felt want. Mr. B.B.Dey, the late Director of public instruction, when he actually visited the school and the hostel was really impressed with the need and promised to do his best. Hence I refrain from stating the need for it in that direction. Besides, I understand that the Government considering the deterioration in the health of the student population, have thought it expedient to introduce Medical Inspection in Schools as a compulsory measure shortly, and as a Scheme of first preference in connection with Post War Reconstruction. Water would be required in greater quantities for keeping both the students, the staff and Building, and not to speak of latrines and urinals, in addition to its utility in various other ways by the inmates of the hostel. Thus I feel sure that the Department is satisfied with the need for an adequate supply of water and should readily approve the Scheme as part of the Building Scheme and as one deserving urgently of Grants-in-aid Under the Grant-in-Aid Code considering the absolute necessity for the same.

3 As regards the financial position of the School, I beg to state that after the outbreak of the War, what little financial help the School was getting from the Continent, has been completely cut off, so much so, the school has been forced to stand on its own slender resources for discharging its obligation to the pupils and the Department. In this connection, I cannot but recall how the School was deprived of its legitimate Grant in the erection of New Buildings in 1935 even after protracted appeals. The school has been growing in popularity and has been evidenced by its increasing strength and it has to discharge heavier responsibilities consequent on expanding activities, such as opening of a Chemistry section, acquisition of more space for play, Grant of dearness allowance at full Government Rates to the Staff, and the last but not the least, in putting up the construction and renovation of temporary sheds for additional classes, due to the imposition of ban on Grants-in-aid for buildings during War time. These have drained the finances of the Institution severely and the management during the last two years approached the Director for Advance Teaching Grant owing to their inability to meet the increasing

and the amount may be kindly sanctioned as early as possible in order to make arrangements for the necessary medical treatment as speedily as possible.
