2

I am directed to refer to your letter No.40395 C Edn., dated September, 17th 1945, Mr.K.Ramesh Rao, one of the students selected by the Madras Govt. was sent to the United Kingdom for advanced training in Civil Engineering (River Conservancy and Flood Control). The High Commissioner for India in London has however, informed us now that adequate facilities for this particular subject cannot be arranged in the United Kingdom. In these circumstances the Government of India have agreed that Mr.K.Ramesh Rao may be sent to the United States of America where necessary arrangements have been made for him.

My son, N.V. Kudva, who has been selected for Wire Communications - Telegraphs and Telephones, writes that he has been asked to join the Stanford University where no provision is made for the study of the subjects. He says that in consultation with Mr. M.S. Sundaram, Educational Liaison Officer to the Indian Agent-General, he has taken up Radio Engineering. Mr. Sundaram will probably report about this in due course to this Govt. through the Govt. of India. In any case, it is hoped that my son will not be found fault with for not taking up the course for which he was selected as it was not possible for him to do so, particularly as he has taken up the course suggested by the Educational Liaison Officer to the Agent-General.

DEPUTY SECRETARY TO GOVERNMENT
19 JUL 1946

Fort St. George,
18th July, 46.

Dear Mr. Sargeant,

I understand that many of the boys who have been selected for overseas studies, have not been securing seats in the various countries to which they have been sent and in many countries, they are taking subjects entirely different from those for which they were selected. You must be having more authorised and exact reports of them.

I shall be glad if you can kindly let me know the actual state of affairs.

Yours sincerely,

BA

New Delhi,
The 26th July 1946.

Dear Mr. Avinashilingam Chettiar,

Please refer to your letter of 18th July 1946 addressed to Sir John Sargent regarding students selected for Overseas scholarships. Since Sir John Sargent has gone abroad on leave I am replying to your letter.

It is true that the position with regard to admission of Indian students in the U.K. and U.S.A. is gloomy as a large number of demobilised personnel in those countries have to be provided for, all at once. We have already issued a Press Note in this connection which you will have seen. Our Educational Liaison Officers in the United Kingdom and the United States of America are however making every effort to secure admission for as many of our selected students as possible and so far about 100 students from the 1946 batch have secured admission in the U.S.A. and about 40 in the U.K. We hope that during the next few months we may be able to secure seats for a reasonable number of our selected students.

With regard to the change of subjects the facts are as follows. As far as the main subjects or their branches are concerned, no changes are made, but specific courses may be changed, in certain cases, after a personal discussion between the Professor and the student.

Yours sincerely,

To file

I am directed to forward herewith a letter dated the 18th March, 1946 from Mr. C. Narasimhachari selected by the Provincial Government and who is now studying in the United States of America. Intimation has been received from the Office of the Agent General to the Government of India, Washington that there is no institution in the United States of America that gives instruction in the manufacture of films. It is a highly secret commercial process known only to M/s Eastman Kodak. They will not admit any foreigners to their institution to teach them the manufacture of films. Therefore Mr. Chari who is already in the United States of America has been authorised to study Food Technology.

no p.t.p

Dear Sir,

Sub: Technical Education Overseas
Ref: Memorandum no. 45895. C.8. Edn.,
dated 14th Nov. 1945.

I was selected by the Government of Madras for the award of a stipend to study the 'manufacture of films'. As Prof. Sundaram was notified that my subject was photochemistry, he placed me with Prof. Leighton, who is an outstanding authority in photochemistry at Stanford University, California. But photochemistry, as you know, has very little to do with the actual manufacture of films and that was the reason why I suggested Columbia University, Brooklyn Institute and Michigan University for training in my application to the Government. When I explained this situation to Prof. Sundaram at New York, he asked me to change the institution if necessary in consultation with the professor at Stanford University.

Prof. Leighton said that there is no

institution in this Country which has a special course in the manufacture of films. He suggested that I can get some course closer to that, however, either at Massachusetts Institute of Technology or University of Rochester at Rochester where the famous plant of Eastman Kodak Co. is located.

Prof. Sundaram told us at Newyork that it is almost impossible to secure admission at that time in any one of the universities in the Eastern States such as those mentioned above. So I thought of the other alternative of taking up food technology, which I offered as a second choice to the Government ~~be~~ during my selection. As University of California has a specialised and well developed course in that field, Prof. Leighton asked me to try at that place. I went to Berkeley and the authorities of the University of California – who were impressed by the sincere efforts of Prof. Sundaram – showed willingness to admit me, if I wish to take up food technology. I acquainted Prof. Sundaram with the above situation. If he could secure admission for me in one of the institutions recommended, I wrote him, that I would shift from Berkeley. Otherwise, if he and the Government of Madras feel that I could take up food technology, I said that I would do so. Under these circumstances, Prof. Sundaram asked me to pursue food technology for one or two terms and in the mean time he said that he would explore the possibilities in places like M.I.T. and Brooklyn. Accordingly I registered in the University of California and am pursuing a course in food technology – preservation of fruits and vegetables by canning, freezing and dehydration.

If the Government of Madras want me to pursue this course further instead of studying the manufacture of films, I shall do so along with the other Indian students, who were sponsored by the Central Government

12

and the Governments of Bombay and N.W.F.P. to study food technology. Otherwise, I shall discontinue this course and take up the study of the 'manufacture of films' as soon as Prof. Sundaram secures admission for me in one of the institutions mentioned above.

I shall be much obliged for a reply,

Yours obediently,
C. Narasimha Chari

Fort StGeorge, MADRAS.

Thro: The Secretary to the High Commissioner for India,
Department of Education, India House, Aldwych. WC 2.

Sir,

RE: R.G. Narayanamurthi. Madras Government Scholar.
Your memo. No. 35343-c-3 Edn. dated 8th August 45. not pertinent

As per your above referred memo, I had the honour of being selected as a Government Scholar for the purpose of undergoing Post-Graduate study in Aeronautical Engineering. I arrived here on 27th November 45, and on instructions from the education department came in touch with Prof. Hall, ~~dapax~~ Head of the Department of Aeronautical Engineering, Imperial College, London and to my surprise I found that my admission was arranged for the D.I.C. course ie. Diploma of the Imperial College in Aeronautical Engineering. This course is similar to the Post Graduate Proficiency Certificate course in Aeronautical Engineering offered by the Indian Institute of Science, Bangalore. Since I had taken the Post Graduate Proficiency Certificate in Aeronautical Engineering at the Indian Institute of Science, Bangalore, in may 44, I could not join Imperial College as arranged. On - instructions from the Education Department of the High Commissioner, I provisionally joined the College of Aeronautical Engineering, Wimbledon Park, London in December 45.

After actually attending the college for some days, I realised, after facing the ~~actual~~ lecture classes and the shops, that I was actually starting a diploma course in preliminary engineering and repeating what I had done in the first years of my Engineering College Course at the College of Engineering, Madras and the first few months at the Indian Institute of Science, Bangalore. I brought these facts to the attention of the Department of Education here and they realised that my attendance in this college will be of no avail. Due to the pressure of extra routine work on their department, I was advised to continue in the present college and in the meantime they itimated me that arrangements will be made in some other institution. At this juncture both the department and myself had to face the reality of the absence of any institution in the United Kingdom for Post Graduate scholarly studies in Aeronautical Engineering.

With the co-operation of the Education Department, attempts were made to secure me a place at Imperial College, London and at the Bristol University, the only two institutions for post graduate study here in this country, and unfortunately Prof. Hall, Imperial College, London and -

26

Prof. Pugsley, Bristol University, expressed their inability to take me in due to lack of facilities in their respective laboratories. So I could not be placed in any institution to start post graduate study even in the start ~~and~~ of the next academic session~~xxx~~ ie. September 46, in the United Kingdom.

After a discussion with the secretary to the education department here I had to face the situation of being placed at an institution at the United States of America. Information has been sent in April 46 to Prof. Sundaram Education Liassion Officer at Washington, to place me in a Graduate School for D.Sc. in Aeronautical Engineering, starting in Sept 46. My personal attempt to the Head of the Department of Aeronautical Engineering, Massachusetts Institute of Technology, U.S.A. matured in his forwarding the necessary application forms and the form duly filled in with the necessary documents have already been forwarded by the secretary to the High Commissioner, Department of Education, with his personal forwarding statement, during the last week of April 46. I have been interviewed by the Hon. Secretary of M.I.T. at London, on 10th May 46 and by this I think I have good grounds to state that I will be registered for D.Sc. in their Graduate School next session starting Sept 46. I am now awaiting their final intimation.

To facilitate the ease of this situation, and to make the best of the next few months I am continuing in the same institution ie. College of Aeronautical Engineering, Wimbledon Park, London. The Principal and the authorities of this college are familiar with my peculiar position and with their co-operation, I will be finishing whatall ? their college can offer by July 46, so as to facilitate me enter an university at the start of the next academic session.

I am instructed by he Secretary, Department of Education to make a statement of my course here and I am forwarding this to you since my case involves a transfer from the United Kingdom to the United States. Since your approval is necessary for this step, I request you to permit me to proceed to the United States of America in the interest of the Postwar Developement of our Government Schemes and incidentally mine. I am writing to youafter making sure that I cannot be suitably placed in the United Kingdom. I should consider myself extremely lucky, if I get registration at the Massachusetts and in case I am not so lucky, I would request you again to permit me to place myself at suitable institution at the States for my post graduate scolarly studies.

I trust confirmation and permission will be granted at as early a date as is covenient, so as to enable me to secure a seat in time.

Thanking you,

Yours obediently,

R. G. Narayanamurthi

p 33 ante

Sir,

I am directed to refer to the previous correspondence on the above subject and to state that Mr. Narayanamurthi was admitted to the College of Aeronautical Engineering Wimbledon, where he had been receiving a course of practical training. The candidate applied for a transfer to one of the American Universities on the ground that the training that he was receiving was of an elementary nature. Efforts were being made to secure his admission in the United States of America but in the meanwhile he has been accepted by the Imperial College of Science for a post-graduate course in the Mechanical Engineering and Motive Power Departgmtn for advanced studies and Research in High Speed and Internal Combustion and Gas Turbine Aero Engines. He will be working for the Ph.D. degree in the current sessions of the London University.

The Provincial Governmwnt will be kept informed of further developments in the case.

I have the honour to be,
Sir,
Your most obedient servant,

A. N. D'Souza 19/10

"GLD" for Secretary.

Edn.& P.H.Department (C2).

From the Government of India, Department of Education, No.F.3.38/45-E dated 27-4-1946 and 15-5-46.

Overseas scholarships - 1945-46 - Sri G. Narasimhachari.

--

Please see the letters of Sri G.Narasimhachari on pages 7-9 c.f. and That of the Government of India on page 1 c.f.

6/9 CF

2. Sri Narasimhachari was the only candidate sponsored by this Government in 1945-46 for the study of "Manufacture of ~~fixex~~ films" in U.S.A.

P1 CF

3. It is stated that as arrangements could not be made in U.S.A. for Sri Narasimhachari for undergoing advanced studies in the manufacture of films, he has been authorised to study Food Technology instead. ~~It is presumed that~~ Food Technology is the same subject as "Canning and Food Preservation". Two candidates were recommended last year by this Government for the award of scholarships for studies in "Canning and Food Preservation", but the Government of India did not select any of them. This year, the Government have recommended names to the Government of India ~~in respect of~~ for only one scholarship in this subject. The inclusion of Sri Narasimhachari's name under "Food Technology" will probably be within Government's originally estimated requirements under that subject. Devt. may see for remarks. Attention is invited in this connection to the notes on pages 179-182 of G.O.No.1439 Edn., dated 15-9-45, written in connection with the alteration in the subject of study by Mr.N.V.Kudva, one of the stipendiary ~~xtxdx~~ candidates sponsored last year.

4. This year, one scholarship has been earmarked for "Manufacture of films" and names have been recommended to the Government of India on that basis. It is not clear whether facilities exist elsewhere than in U.S.A. for undergoing advanced studies in this subject. The Govt. of India may perhaps be addressed on this point; and if there is no possibility of getting Indian students admitted to any institution abroad where such facilities exist, ~~they~~ the G.of I. may perhaps be asked to transfer the scholarship earmarked for "Manufacture of films" to that of any other subject for which additional candidates may be ~~xxx~~ required. Devt. may see for remarks.

M on p1 above

There is no information in this dept. regarding the name or names recommended to the Govt. of India. The no. of Scolarships proposed to be awarded for training in Canning and Food preservation for the Current year was only one. ✓

In U.O. note no 7915 D/46-3 of 1.3.46 it was however decided that the maximum no of scolarships that may be awarded in Canning and food Preservation be 2.

Regarding N on p1 above there is no information in this dept.

With these remarks the file may be returned to E & P.H.

C.No 26742 - From Sri R. G. Narayanamurti, letter dated 13.5.46.

Overseas scholarships - 1945-46 -
R.G. Narayanamurti, student
Sponsored by Govt.

Sri R.G. Narayanamurti has forwarded to Govt an advance copy of his letter sent through the High Commissioner for India. Perhaps the original petition through the H.C. may be awaited. pp9-10 cf

'The Students' request is that as facilities do not exist in U.K. for advanced studies in Aeronautical Engg, he may be permitted to proceed to U.S.A. where he hopes to secure the necessary facilities with the aid of the H.C. for India in London and the Edl. Liaison Officer, Mr. Sundaram, in Washington. In the circumstances explained in the Students' letter on pages 3-4 cf, the Govt may agree to Sri R.G. Narayanamurti being sent to U.S.A if the H.C. considers it necessary. A In ~~the case~~ a similar case, the Govt of India ~~informed this Govt. that they~~ had agreed to Sri K. Ramesh Rao, Stipendiary candidate sponsored by this Govt, being sent from U.K. to U.S.A.; please see letter [at page 1 cf flag (B)] below.

Finance may perhaps see.

A draft letter to the G. of I. is subd.

BM
19/6/46 & 27.6.46

[Issued as letter no. 26742 - 2 C2/46 Edn dt 20.6.46] p 11 CF

From the Govt of India, Edn. Dept, No. F. 3-11/45-O.D IV dated 21. 10. 46. p 35 CF

Sri R.G. Narayanamurthi, a stipendiary candidate, sponsored in 1945-46, for undergoing advanced studies in "Aeronautical Engg. - Ground Engineering" sent in May 46 an advanced copy direct to this Dept. of his petition subd. through the H.C. for India. In that petition he stated that as facilities did not exist in the United Kingdom for advanced studies in Aeronautical Engg., he might be permitted to proceed to the U.S.A. where he hoped to secure the necy. facilities. This Dept. suggested that the candidate's request might be agreed to, if the H.C. for India (through whom the orgl. petition was addressed) considered such a course necessary. Finance had agreed to the proposal. pp 25 & 26 CF A p 3 ante

The Govt. of India now state that efforts were being made to secure the student's admission in the U.S.A, but in the meanwhile he ~~had~~ was ~~been~~ accepted by the Imperial College of Science for Ph. D. degree in "High Speed ~~and Internal Combustion and~~ Gas Turbine Aero-engines". Please see in this connection the progress report of the candidate on pages 28-30 CF/LF. p 35 CF

---

23 5.

C2

The progress report will be forwarded in due course to the Head of the Depts concerned, who will suggest ~~any~~ alteration in the course of studies if there is any need for it. No further action is called for in this file.
