Sub: Buildings - Government Brennen College, Tellicherry
Acquisition of the Brennen Branch School, and the ground adjoining it and construction of a separate building for the use of the High School Classes - Estimated cost Rs.1,40,000/- Inclusion in Part II of the Budget Estimate for 1946-47.

I have the honour to submit hereunder a proposal for the acquisition of site and construction of a separate building for the High School Department of the Government Brennen College, Tellicherry, at an approximate cost of Rs.1,40,000, for the consideration of Government in connection with Part II of the Budget Estimate for 1946-47.

The erection of a separate building exclusively for the use of the High School, has long been hanging fire for over a decade time and again the University authorities have been insisting that the College Classes should be separated entirely from the High School Department and this ~~xxxxx~~ was already pointed out to Government in my letter No.1172-G/40, dated 11-8-41, disposed of in G.O.Ms.No.820, Edn., dated 3-6-1942 deferring the proposal for the construction of temporary sheds. For one reason or other it has not been possible to solve this question, all these years. The Principal reports that the College is considerably handicapped by the location of the High School in the same building. Besides the fact, that the classes, in Urdu, Arabic and Sanskrit are reported to have no rooms, for want of accommodation, it has not also been found possible to open new subjects in the Intermediate, such as Natural Science and Geography for which there is an urgent need. In this connection, I enclose herewith an extract from the letter of the former Principal (Dr. Karamchand) which will explain the need for accommodation etc.

It is therefore proposed to acquire the Branch Schools, Tiruvengad and the adjoining ground, measuring about 1.25 acres and to construct a new building for the High School Department. It is reported that the Public Works Department Section Officer, Tellicherry has estimated the cost of the construction of the building (inclusive of the site) at Rs.1,40,000/-. It is also reported that there will be sufficient space for play-ground in the site proposed for acquisition.

The valuation statement of the site to be acquired, prepared by the Tahsildar, and a rough plan of the new building, are herewith enclosed. Preliminary plans and approximate estimates will be called for from the Public Works Department, if necessary and will be submitted to Government in due course.

In the circumstances explained I request that Government may be pleased to approve of the scheme, and allot the necessary provision in Part II of the Budget Estimate for 1946-47.

Copy of the letter Rbc.No.450/44, dated 23-8-44, from the Principal, Government Brennen College, Tellicherry to the Director Public Instruction, Madras.

Sub: Government Brennen College, Tellicherry - Schemes for improvement and expansion - submitted.

Para 3.

Year after year, my learned predecessors in my office have been inviting your kind attention in their administration reports to the very limited accommodation in the College and the difficulty of housing the classes. I have also felt likewise and expressed self in similar terms in my reports to you. The University authorities have been insisting that the College classes should be separated entirely from the High School Department. But, as it happened

some part of the High School, a class room, or a masters' room had of necessity to be sandwiched between college classes. One of the High School Classes has no room of its own and is always on the move in search of a vacant room. The Urdu Class too has not room of its own and has to be conducted in an open verandah subject to the inroads of wind and rain and in the sight of other classes. There is no spacious Reading Room for the students worthy of the dignity of a Government educational institution. A separate tiffin room for masters and a tiffin shed for the students has never been thought of all these years of the existence of the college. The Library is cramped with almirahs giving no space for the Librarian to move about and open the shelves. Students cannot enter into it to look at the shelves and inspect the books. They apply for books from the verandah catching a glimpse of the Librarian through the barred window and take the books given to them having no facility to see and choose the books they want. Even the class rooms are not spacious enough to seat all the students who have to be huddled up. ~~xxxx~~ The strength and popularity of the College have considerably increased of late years; but the accommodational facilities have not kept pace with this increase in so much that we are extremely handicapped for space. This last is especially true of the College Classes.

Memorandum.

Buildings - Govt. Brennen College, Tellicherry -
Acquisition of site and construction of a separate building for the High School Department.

Till 1941, the High School Department of the Govt., Brennen College, Tellicherry, consisting of Forms IV to VI was located in a rented building. As the owner of the building gave notice and as there was no other suitable building in the locality the classes were accommodated in the College building itself as a temporary measure. The University authorities have been insisting that the college building should be left for use entirely for college purposes and that separate provision should be made for the high school classes. A proposal for the construction of a building for the high school was considered in 1941, but was deferred on account of the restrictions imposed in the use of controlled materials.

2. The Director of Public Instruction has now submitted proposals for the acquisition of a site and for the construction of a new building for the high school at an approximate cost of Rs.1.4 lakhs (Rs.18,250 for the acquisition of a site measuring about 1.25 acres and the buildings adjoining it and Rs.1,21,750 for construction of a building on the site).

3. The strength and popularity of the college have increased of late and additional accommodation is required for the college classes themselves. It is, therefore, necessary that a separate building should be constructed for the high school immediately and that the school should be removed to the new building as soon as possible. His Excellency the Governor approves the Director's proposal and considers that the scheme should be introduced in the current year. Expenditure on the acquisition of building and site will be incurred in the current year and the construction of buildings will be taken up next year.

4. With reference to paragraph 8(b) of the Memorandum of Financial arrangements during Section 93 situation

Sanction of His Excellency the Governor-General
may be obtained for the proposed expenditure from Provin-
cial funds on the scheme.

Education & P.H. Department (B):

Buildings - Government Brennen College, Tellicherry
Acquisition of site and construction of a separate
building for the High School Department.

From the Director of Public Instruction, R.C.No. 1454-G/45
dated the 27th September 1945.

The High School Department of the Government Brennen
College, Tellicherry, was previously located in a rented
building. As the owner of the building gave notice and
as there was no other suitable building in the locality,
arrangements were made to accommodate the classes in the
College building itself as a temporary measure. The Uni-
versity authorities have been insisting that the College
building should be left for use entirely for College pur-
poses. In 1941 the Director of Public Instruction proposed
the construction of a separate building for the High
School Department in a portion of the College compound at
an estimated cost of Rs. 11,000/- The proposal was consi-
dered as a Part II Scheme for 1942-43 but was finally
deferred as the work involved the use of controlled mate-
rials.

2. The Director has now submitted proposals for the
acquisition of a site and for the construction of a
new building for the high school at an estimated cost of
1.4 lakhs. The cost of acquisition of the site and the
branch school buildings alone is estimated at Rs. 18,250/-.

3. It will be observed from the letters of the
Director and the Principal of the Brennen College on pp.
1-2 c.f. that the strength and popularity of the College
have increased of late and that the College is in need of
expansion. It is presumably considered necessary to reserve
the space in the compound of the College for College exten-
sions and have the high school in a separate building.
Under the circumstances the proposal for the
acquisition of a site and the construction of a building
may be accepted.

College has been pending since 1941. As additional accommodation is urgently required for the College itself, it is necessary to remove the high school department from the College buildings as soon as possible. The proposal to acquire the branch schools Tiruvengad and the adjoining ground at an estimated cost of Rs.18,250/- may therefore be considered as a scheme for introduction in the current year. The proposal for the construction of a building may be treated as a Part II Scheme for 1946-47. The cost of construction of building has been roughly estimated by the P.W.D. Section Officer, Tellicherry, at Rs.1,21,750/- The Director may be asked to obtain and submit very urgently preliminary plans and approximate estimates. A draft memo is submitted below for approval. After issue, the file may be sent to P.W.D. and Finance for remarks.

The necessity for the acquisition of a site and construction of a separate building for the High school dept. of the College, Tellicherry, is explained in the c.f. This dept. may agree to the proposal vide para 3 of E.P.H. note on pp.1-2

yes Page 2 of is a
and picture
V.V.S.

Tiruvengad and the adjoining ground estimated cost Rs.18,250 and (2) cost of constructing a building on the site - estimated cost Rs.1,21,750. They suggest that the first proposal may be treated as a scheme for introduction in the current year, and the second as a Part II Scheme for next year. It is submitted as the proposals really constitute one scheme ~~xxxxxxx~~. the entire proposals should be considered together. As proposed by the D.P.I. himself, the whole scheme may be dealt with as a Part II Scheme for 1946-47 after the D.P.I.'s reply to the memo on p.7 c.f. is received.

If E & P.H. consider that the scheme is urgent and that it should be sanctioned for execution in the current year itself (land acquisition), the proposed expenditure will have to be treated as on a 'new service' and the 'new service' procedure adopted.

The prior sanction of the Governor-General should also be obtained as the non-recurring cost exceeds Rs.1 lakh.
