The Secretary to Government,
Education and Public Health Department.

Sub: Elementary Education - General Schools - under
Public Management - admission of scheduled class pupils

Ref: G.O.No.329 Home (Edn) dated 17-3-1919

I have the honour to submit herewith my report for 1945-46 on the admission of pupils belonging to the scheduled classes in the elementary schools under Public Management not specially intended for them. The statistical particulars received from the Dt.Edl.Officers and Inspectresses of Girls Schools are submitted in the enclosed statement.

Schools: The total number of elementary schools under Public management not specially intended for the scheduled classes was 16908 during the year under report as against 16516 during 1944-45. The increase was mainly due to the steep rise in the number of schools in the West Godavari, ~~Tinnevely~~, ~~Salem~~, North Arcot, South Arcot, Tanjore, Madurai, Tinnevely, Salem, and Malabar Dts. The fall in some of the other districts is due to the amalgamation of several schools and closure of some uneconomic schools.

The tabular statement below furnishes figures for the admission of scheduled class pupils in Elementary Schools under Public management not specially intended for them in 1944-45 and in 1945-46.

	Plains 1944-45	1945-46	Agency 1944-45	1945-46
a. Total number of schools under Public management not specially intended for Scheduled class pupils	16401	16753	115	155
b. No. of schools accessible to Scheduled class pupils	16337	16743	115	150
c. No. of schools in which scheduled class pupils were freely admitted	12133	12212	83	118
d. No. of schools held in inaccessible buildings	4	--	--	--
e. No. of scheduled class pupils admitted with ~~into~~ schools not specially intended for them.	88329	100933	439	575

No school is held in an inaccessible building as suitable action had been taken by the Inspecting Officers on 4 such schools that were in existence during the previous year.

The percentage of schools in the plains accessible to pupils of scheduled castes during the year under report was 99.9% the same as last year.

The percentage of number of schools in which scheduled class pupils were admitted freely to the number of schools

accessible

1505
11/10/46

accessible to them decreased from 74.5 in 1944-45 to 72.9 in 1945-46.

There is a large disparity in the number of schools accessible to scheduled class pupils and the number of schools in which they were admitted freely in many districts. The disparity is great particularly in East Godavari, West Godavari, Kistna, Guntur, Kurnool, Bellary, Nellore, Chingleput, North Arcot, South Arcot, Tanjore, Trichinopoly, Tinnevely, Coimbatore, Malabar and South Kanara Districts. The number of schools in which scheduled class pupils were freely admitted increased in West Godavari,

Bellary, Cuddapah, Madras, North Arcot, South Arcot, Tanjore, Madurai, Tinnevely, Salem, Malabar Districts and in the remaining districts there was a decrease in the number. The disparity between the number of schools accessible to scheduled class pupils and the number of schools in which they were freely admitted was in most cases due to ~~scholarship~~ following reasons: (i) Proximity of schools intended for scheduled castes (ii) Non-existence of scheduled caste pupils in the school year and (iii) Some school specially intended for Muslims where Urdu is the medium of instruction.

Pupils: The number of pupils belonging to scheduled caste admitted into schools not specially intended for them was 100933 in the plains and 575 in the agency areas during the year under report as against 88329 in the plains and 439 in the agency areas in the ~~pre~~ year 1944-45. Thus there has been a considerable increase in the total number of scheduled class children admitted freely into schools which are not intended for them. There was an increase in 21 districts and a decrease in a few districts, viz. West Godavari, Kistna, The Nilgiris and South Kanara Districts. The poverty, famine and war conditions which made pupils go to work in preference to Education, indifference towards learning and migration to ghats along with their parents in search of labour and field work in some districts are some of the causes hampering the free admission and attendance of scheduled caste pupils in schools.

Teachers: The number of scheduled caste teachers employed in schools not specially intended for scheduled class pupils increased from 1337 in 1944-45 to 1477 in 1945-46. The increase is due to the employment of scheduled caste teachers especially in schools under District Board managements.
