(b) The amendment to Rule 45 for substitution of the expression ('in English' by the words 'in the language in which the book is written' -- (Vide G.O.No.Ms.1058 Edn., and P.H., dated 29-5-46).

6. Three meetings of the Text-Book Committee for the Elementary Schools and four for the Secondary Schools Committee were held on the dates mentioned below:-

Elementary Schools Committee.	Secondary Schools Committee.
22nd February 1945.	23rd February 1945.
Nil.	20th September 1945.
27th February 1946.	28th February 1946.
27th February 1947.	28th February 1947.

As a measure of economy and due to the small number of books received for consideration in connection with the September meeting every year, no meeting was held in September 1945 and also in September 1946, for the Elementary Schools Committee. As a special case, one meeting was held on 20th September 1945, for the approval of a large number of books received for consideration by the Secondary Schools Committee, consequent on the introduction of the system of prescribing books for non-detailed study in schools. Out of 1386 books, received for approval for 'class use - Non-detailed study' during 1945-47, 1024 books were approved for non-detailed study.

7. The number of books considered by the Committee from 1944 to 1947 is shown below:--

Statement showing the number of books considered from 1944 to 1947.

YEAR	Elementary Schools. Reapproval	Fresh approval.	Total	Approved for class use.	Secondary Schools. Reapproval	Fresh approval.	Total	Approved for class use.
1944-45	132	301	433	150	234	437	671	280
1945-46	106	414	520	136	205	1137	1342	323
1946-47	296	350	646	314	328	786	1114	524
Total	534	1065	1599	600	767	2360	3127	1127

The marked increase in the number of books considered in 1946 is due to the fact that the books written in accordance with the Elementary School Syllabus issued in 1939 and which were reapproved in 1940 were submitted by the publishers by efflux of time for re-approval under Rule 29 and inclusion in the Consolidated List of 1940.

The total number of books included in the three Consolidated Lists of 1945, 1946, and 1947 in the several languages and in the several subjects is shown in the comparative statement for both the Elementary and Secondary Schools, vide Appendix V (a), (b), (c), and (d).

Year.	Elementary Schools.	Secondary Schools.
1944-45	3395	4230
1945-46	2960	4495
1946-47	2868	4248
Total.	9223	12,973

The total number of books considered by the Committee during the period under report according to the several languages and in the different subjects is shown in the comparative statements showing the books received in each of the years separately for both Elementary and Secondary Schools-- vide Appendix VI (a), (b), (c), and (d).

PP. 35-41 infra

8. One manuscript book on 'General Science' in Urdu was received and considered. The book was considered suitable for 'class use' pending the receipt of the final printed copy of the book from the publishers.

9. Due to the scarcity of paper and the high cost of printing materials, there was a slight fall in the number of books submitted by publishers for consideration by the Committee during 1944-1946.

10. In G.O.No.Ms.2027 Edn., and P.H., dated 30-11-1945, Government directed not to revive the publication of the Consolidated List of Approved Books, but to continue the existing arrangement of the publication of the list of books approved by the Committee at the respective meetings with the necessary additions and other changes effected in the lists, till the paper position became normal.

11. At the instance of the Postmaster General, Madras, the registered publishers were advised to include a lesson describing the 'Journey of a letter' in the text-books published by them and a copy of lesson for incorporation in the text-books as furnished by the Director General, Posts & Telegraphs was furnished to the publishers.

12. The publishers were also advised to avoid the following:-

(1) Any reference to the episode of Poet Firdousi and Sultan Muhammad of Ghaznavi in History books that the Shahnama was not composed at the orders of the latter and that the famous satire of him is spurious which was accepted to be historically not true.

(2) Any reference in future to the incident of 'Blackhole of Calcutta' in text-books.

(3) Inclusion in text-books, passages of verse or prose which are likely to wound the feelings or susceptibilities of Jains.

13. The main defects noticed in respect of the books considered by the Committee for use in Elementary and Secondary Schools and the suggestions for improvement are as mentioned below:-

(a) Defects noticed in the review of the books during the triennium.

(1) Many of the current text-books are unsystematic in their choice of vocabulary and constructions. There is very little attempt at grading the lessons.

(2) In some books, the language was colloquial and in others, it was difficult and pedantic.

(3) There was no uniformity maintained.

(4) The fundamental rules of grammar are often ignored and the language is often unidiomatic.

(5) The instruction that the English spelling should be given in brackets in the case of all proper names, excluding those which are commonly met with, has not been followed. Correct technical terms have not been used.

(6) Accuracy and precision in expression are found frequently lacking.

(7) Faulty notation, inaccurate phrasing are some of the defects noticed.

(8) Many books were found wanting in the variety of subject-matter and correlation with other subjects.

(9) Spelling mistakes of proper names are too frequent. The same name is spelt differently in different parts of the same chapter.

(10) Proper attention has not been paid to punctuation.

(11) Dates and contents are not properly verified and in many cases mistakes have escaped attention.

(12) Too much detail or too little are both defects to be avoided.

(13) Selection of very large number of illustrations which are not useful to the contents in the texts, has been noticed.

(14) Place-names have been spelt wrongly and in some cases even differently in maps. Maps are also over-crowded with details.

(15) Bad and hasty proof reading is too common. The use of worn out types is another defect. The printing of symbols for addition, subtraction, division are often defective owing to the want of correct types with the printers. The printing of algebraical symbols needs improvement. Mis-prints have frequently occurred in the books and were left unnoticed. The printing of text-books in double columns must be stopped.

(16) Many of the books were printed on paper of poor quality of unbleached nature availing the concession granted on account of the war, which was not satisfactory.

(b) Suggestions for improvement:-

The subject-matter in text-books for detailed study in the languages should be interesting to children, clear and easy, so that they may read them without undue strain and help from the teacher.

The readers for lower standards in Elementary schools should be printed in larger types and contain vivid and coloured pictures, which will attract the attention of the children.

There should be freshness or newness in the selection and treatment of subjects.

Explanations for difficult words and verses occurring in the poetical passages should be provided. In choosing verse passages for books for detailed study, an attempt must be made to include in an ample measure, representative passages from the didactic, lyrical, devotional and narrative classics of older poetry.

Some of the books contained lessons praising contemporary personalities of provincial fame. This tendency has to be watched with care, since it is likely to lead to awkward situations in which the right of particular personalities to biographical treatment, may have to be decided later.

Books which contain views which are likely to arouse bitterness have to be rejected by the committee. Hence, harsh judgments should not be passed on Muslim rulers. All reference to the Blackhole incident or the story of the poet Firdousi and Muhammad Ghaznavi have been suggested to publishers to be avoided from inclusion in History text-books.

Science books especially for the lower standards, should be based on observation and experiment.

The need for more Music books has been felt.

Books of outstanding merits intended for use as text-books for non-detailed study, may be brought out by the publishers in large numbers.

14. During the period under review, disciplinary action was taken in regard to eight publishers, who either failed to give the required particulars relating to the books submitted for consideration or gave incorrect particulars.

13. The receipts and charges during the triennium 1944 to 1947 connected with the Text-Book Committee showed a surplus of Rs.18312-0-0--vide statement--Appendix VII.
