To

The Secretary to Government,
Education & P.H. Department,
Madras.

Rec.No.539 M/48 dated 30-8-1948.

2-SEP-1948
Sir,

Buildings - College of Engineering, Guindy - Location
of the Highways Department - Repair yards within a
portion of the College Machine shop and adjoining
ground. - Erection of Nissen Huts. - Permission.

65127

below

M

I have the honour to submit herewith a copy of letter Re.No. 61 SK/48 dated 15-7-1948 from the Principal, College of Engineering, Guindy, and to request that in the circumstances stated therein Government may accord permission for the location of the Highways Department Repair yards in a portion of the College Machine shop and the adjoining grounds.

2. It is reported that the Highways Department will be erecting Nissen Huts on the College grounds for locating their Repair Yards. Necessary permission for the same may also be given.

3. Similar permission for the location of the Highways Department Soil Research Laboratory in the Compound of the College of Engineering Guindy and for the construction of a Nissen Shed for the purpose was accorded by Government - vide G.O.No.2674 Tdn., dated 16-12-1947.

(K) N

Yours faithfully,

P. M.

k.h.1-9.

for Director of Public Instruction.

Copy of the letter from the Principal, Engineering College, Guindy referred to above.

below

I am enclosing herewith a copy of letter dated 8-7-48 from the Divisional Engineer (Highways) Transport and Machinery Division Madras to the Principal, College of Engineering, Guindy asking for permission to utilise a portion of the College Machine Shop and to locate a repair yard within the College compound. About 4 months ago Mr. Durrani, Superintending Engineer (Highways) discussed with me the advisability of having their workshops located in the Engineering College premises, Guindy. As Professor of Mechanical Engineering I considered that this proposal would be very beneficial to the students of this college from the instructional point of view. The Highways Department are planning a fairly large and upto date workshop for dealing with the maintenance, repair and upkeep of all the mobile plants and other machinery in their charge, and I was consulted off and on about the type of machinery that should be acquired for this purpose. When Mr. Durrani originally proposed this idea of locating the workshops in the premises of the College, I welcomed his idea, as it would give excellent opportunities to the students of this College to see repairs of mechanical transport mobile units and other machinery, as they are carried out in a departmental workshop. This procedure would, in a large measure, supplement the initial workshop training that

the students receive in the College workshops. The request has now been renewed, and I strongly recommend that permission may be granted for the Highways Department to locate their workshop in the College premises, as there is ample room for this purpose adjoining the existing College workshops.

I am further of opinion that the location of the Highways workshop would in no way interfere with the future expansion of the college laboratories or any other buildings that may be proposed in the future.

Since taking charge of the college, I have remodelled the workshop to a large extent. The College Workshop needed remodelling and with the machine tools that were allotted to this college from the Disposals and by rearranging the various departments in the workshops, the Workshop has now been remodelled to a large extent and considerable room has been made available for work which requires a yard. It is also the intention to obtain permission from the Director of Public Instruction to take in orders from outside so that the present policy of implementing the practical training of students in the college by getting familiar with actual working experience may be introduced sooner or later into the curriculum of studies in this college. A large portion of the Machine Shop is now completely free for further machine tools, and the request of the Highways Department is to utilise a portion of this for carrying out any repairs to the mobile plants. I therefore recommend that the permission asked for may be granted.

Copy of letter No. Cl. 8548/48 dated 8-7-1948 from the Divisional Engineer (Highways), Transport & Machinery Division, T Nagar, Madras to the Principal, College of Engineering, Guindy.

Referring to the conversation you had with Mr. G. Sri Rangachari I request you to kindly confirm your approval to proposal to locate the Transport and Machinery Repair Yards within a portion of the College Machine Shop and adjoining ground.

Please also let me know, whether you are agreeable to shifting the repair yards immediately.

An early reply is requested.
