ASST. SECRETARY TO GOVERNMENT
10 JUN 1947
EDUCATION AND PUBLIC HEALTH DEPT.

MEMORANDUM.

48274

Subject:- Advanced Studies Overseas in respect of M/S C.K. Chandran and V.Jagannathan, 1945 Scholars; Extension in period of Scholarship.

....

The undersigned is directed to forward herewith for the information of the Government of Madras, the marginally noted documents in respect of the two scholars mentioned above, received through the Indian Embassy, Washington. [The Educational Liaison Officer, Washington States that Mr. C.K. Chandran has done satisfactory work at the Illinois Institute of Technology towards his Master's Degree in Electrical Engineering, with Machinery and design specialization. He ~~x~~ is expected to complete all his requirements for the Degree in June 1947. After that, his Professors are favourably inclined to recommend a year's practical training with some suitable electrical machinery-and-design concern. With some difficulties, the Educational Liaison Officer hopes to arrange Mr. Chandran's training in a private concern, and he recommends that the Scholar may be granted extension of his Scholarship upto June 1948.]

Separate file

1. Copy of letter dated 5th May 1947 from Professor Eric T.B. Gross, Illinois Institute of Technology, Chicago, regarding Mr. C.K. Chandran.
2. Copy of letter dated 13th May 1947 from Professor J. Murray Luck, Stanford University, California, regarding Mr. V. Jagannathan.

Separate file

p 3 infra

A

The Educational Liaison Officer recommends the extension in the period of Scholarship up to December 1948 for Mr. V. Jagannathan also, in view of the strong support given by Professor Luck of the Stanford University.

The Government of Madras may kindly consider the two cases and communicate their decision to the Government of India at a very early date.

M. H. Rahman
'RAMAN' for Secretary.

Stanford University, California

3

May 13, 1947

Professor M.S. Sundaram,
Educational Liaison Officer to India,
635 F Street, N.W.,
Washington, D.C.

Dear Professor Sundaram:

Although it is somewhat early to do so, I think it well to write at this time recommending to you that the tenure of Mr. Jagannathan's period of study at Stanford University be extended by one year, thus to terminate in December 1948 instead of December 1947. Mr. Jagannathan, I may add, is doing excellent work and has been progressing most satisfactorily in his studies. I have the feeling that with this added time he will complete a very satisfactory piece of work on the biocatalysts involved in certain phases of carbohydrate metabolism, as well as completing other work which bears very closely upon his general program here. I think that with this added time so much will be contributed to his knowledge and experience that he will be of correspondingly greater value to the Government on his return to India.

Yours very sincerely,

J. Murray Luck,
Professor of Biochemistry.

My dear Ashfaque Husain:

In continuation of Mr. Grewal's letter to Rozario No. G.132/45, dated 20th May, 1947, regarding the extension of scholarship for Mr. V. Jagannathan, a Madras Government scholar for 1945-46, I enclose copy of a detailed progress report and further recommendation by Professor Luck, under whom Jagannathan has been working. We have already recommended that this scholarship should be extended for a period of one year. This letter will only further strengthen the hands of your Department, as well as of the Madras Government, to give Mr. Jagannathan the necessary permission.

I need hardly add any comments to the remarks made by the Professor in the concluding paragraph of his letter which I fully endorse.

I shall be grateful if an early decision is obtained and communicated to us telegraphically.

Yours sincerely,

B. K. Byram

Stanford University, California

July 25, 1947.

Professor M.S. Sundaram
Educational Officer to India
635 F Street, N.W.
Washington, D.C.

Re; Mr. Venkataraman Jagannathan

Dear Professor Sundaram:

I had hoped to write to you earlier regarding Mr. Jagannathan's program and the progress of his work, but I was away through much of May and June and have just returned from a bit of a vacation trip in Southern California.

As stated in my earlier letter Mr. Jagannathan has been making excellent progress in all courses in which he is currently registered. He received in all courses a grade of 'A' with the exception of two, in which he received a grade of 'B'. In other courses which were taken from me, for which grades of plus and minus are alone assigned, Mr. Jagannathan did every creditable work indeed and would otherwise have been rated as an 'A' student.

We offer no formal courses on commercial solvents and their applications in industrial chemistry, nor indeed does any other university of which I know. It is necessary, in such a case, to so orient the candidate's program of study as to be sure that the course he takes will be sufficiently relevant and which considered in their entirety will contribute to the candidate's progress. With this in mind much work of a theoretical character has been taken by Mr. Jagannathan, such as advanced courses in physical chemistry and thermodynamics, organic chemistry, biochemistry, and bacteriology. Courses in heterocyclic compounds and in the chemistry of natural products were taken. These are immediately relevant. A number of the commercial solvents that are now of the greatest interest are being produced by fermentation, in which the methods of biochemistry and bacteriology are emphasized.

His lecture and laboratory courses have therefore been supplemented by a special study of fermentation systems, with special reference to the hexose phosphates. A good deal of progress was made in purification of one of the enzymes involved and its isolation in crystalline form followed by its adequate characterization are likely to be achieved in the immediate future.

Work on such a special problem, pursued vigorously and with the unusual competence that Mr. Jagannathan has displayed, is bound to be of great value to one in the pursuit of the practical problems that will be his in the future. A rich theoretical background is, of course, essential. It is my considered recommendation that an extension of Mr. Jagannathan's period of study at the university would be highly desirable. It would permit him to carry to completion the theoretical and practical courses in which he is engaged and would make it possible for him, on his return to India, to fit in much more valuably in the field of applied chemistry which is his recognized objective.

Professor M.S. Sundaram July 24, 1947.

A minimum extension of six months after December, 1947, is indicated, although an extension for a full year would be my considered recommendation. Part of this time could be devoted to industrial experience with a chemical industry active in the field of commerical solvents. This could be arranged if you concur in the general recommendation that such an extension is permissable and desirable.

I would like to see Mr. Jagannathan spend the first six months of the calendar year 1948 on the continuation of his theoretical and practical work, and the remaining six months to courses in engineering which would be solidly built upon his training in physical chemistry, followed finally by about three months of active association in the laboratories of one of our major companies such as: Commercial Solvents, General Carbide & Chemical, or The American Cyanamid Company. In any one of these his program could be brought to a completion which would be fruitful and which would promise much for his future contribution to chemical industry in India.

I should not conclude this letter without adding that Mr. Jagannathan has not only been among the best students we have had for some years, intelligent, serious minded, devoted to his work, and industrious, but has also fitted into the whole environment in a most acceptable way through his fine personal qualities.

Yours very sincerely,

J. Murray Luck
Professor of Biochemsitry.

University, College or Works Report on the work of the Scholar during the period under review:-

Mr. Jagannathan, I believe, has made excellent progress during his period of study here. His scholastic record, as evidenced by the results of examinations, is highly creditable and commendable. His research has proceeded splendidly and gives promise, on completion, of constituting a significant contribution to biochemistry. I am satisfied that he profited much during his study elsewhere this past summer. He evidences, finally, the initiative and ingenuity in the course of his work that we like to find in our advanced students. His comprehensive oral examination in December 1947 was passed "with distinction."

(i) 39 ante

I am directed to refer to this Ministry endorsement of even number, dated 14th September 1948, on the subject mentioned above, and to state that intimation has been received from the Indian Embassy, Washington that Mr. V.Jagannathan is due to sail from New York for Southampton on s.s.Queen Mary on 6th January 1949 enroute to India.

pp43-44 infra

A copy of progress report of the scholar received from the Indian Embassy, Washington is forwarded herewith.

Yours faithfully,

Mam.

for Secretary.

Edn. Dept. Form 32 C. 2.2

REPORT. 1st June 1948 - 1948, 31st August

In every case, it is essantial for you to state the degree, if any, for which you are studying. The likely date of taking the degree should inall case be mentioned. If you are not studying for a degree, please mention the likely date when you hope to complete the course of study you are pursuing. Where you have already taken a degree, please give the date of taking it and state what you have been doing since taking the degree and when you hope to complete the course or training you are undergoing at present. It is, of course, presumed that you know the original duration of your scholarship and that you have planned your entire programme accordingly.

Name in block capitals. VENKATARAMAN JAGANNATHAN

Scholarship. Government of India Scheme for higher Education in technical & scientific subjects.

University College or Works Report on the workof the scholar during the period under review :-

Mr. Jagannathan, during his period of study at Stanford University, has brought to completion a very creditable investigation which indicates to us here that he is a young man of great ability in research and one who is possessed of an excellent mind. It has been a pleasure and a source of stimulation to us to have had him here. He is now commencing a program of study in the Cutter Laboratories in Berkeley in the course of which he will receive some excellent experience in various phases of applied biochemistry.
