Letter Ref.No. 58679B2/48-3 Edn. dated 6-11-48

To

✓ The Secretary to the Govt. of India,
Ministry of Education,
New Delhi.

Sir,

Subj:- Elementary Schools - Construction of
buildings. -----

When the Hon'ble the Premier of this Province had been to Delhi last time he met the Hon'ble the Minister for Education of the Govt. of India and discussed with him the feasibility of the Centre providing this Govt. with a grant spread over a period of 10 years, ^{specifically} for the construction of buildings for elementary schools which have no suitable buildings of their own. I am now directed to address you to move the Govt. of India in the matter.

There are in this Province 15,123 elementary schools with no suitable buildings. On the basis that the cost of construction of a building would be Rs 4,000 (for each building), the total cost of providing the schools with buildings will come to Rs 6 crores. As the estimate of Rs. 4,000 for a building is not based upon ^{any particular} ^{house,} Type Design, the actual cost is likely to be higher and the total cost is likely to increase consequently.

The entire cost in respect of Govt. elementary schools has to be met by the Government. In the case of elementary schools under Dt. Boards and those under aided managements, the intention is to pay them a grant equal to 2/3rds of the cost, the remaining 1/3rd portion being met from the funds of the respective managements. As to elementary schools under Municipal Councils, it is proposed that half the cost of construction may be met from out of Govt. grant and the other half out of the Municipal funds.

The following table will illustrate how the cost is arrived at and how it would be distributed:-

Management.	Number of schools.	Cost of providing buildings.	Cost to be borne by local bodies or private agencies.	Cost to be borne by Government.
(1)	(2)	(3) (Rupees in lakhs)	(4)	(5)
Government ..	810	32.40	--	32.40
Municipal Councils ..	488	19.52	9.76	9.76
District Boards ..	9,342	373.68	124.56	249.12
Private agencies ..	4,483	179.32	59.77	119.54
Total.	15,123	604.92	194.09	410.82

If the scheme is spread over a period of ten years, the annual

expenditure to be met by the Govt. will be about Rs 40 lakhs. *lakh*

I am to request that the Govt. of India will give their earnest consideration to the matter and be so good as to sanction a grant of Rs 20 lakhs every year from the Central Revenues for a period of 10 years for the provision of buildings for the schools, in the interests of elementary education in this Province.

Yours faithfully,

W. Agnew

No. D.5656/48-D.I.
Government of India.
Ministry of Education.
New Delhi 3, the 22nd December, 1948.

From The Secretary to the Government of India.

To The Secretary to the Government of Madras,
Education and Public Health Department,
Fort St. George,
MADRAS.

ELEMENTARY SCHOOLS - CONSTRUCTION OF BUILDINGS.

Sir, I am directed to refer to your letter No. 58679-B2/48-3-Edn., dated the 6th November 1948 on the subject mentioned above and to state that as recommended by the Committee on Ways and Means of financing education, the Government of India have already under consideration a scheme for financing Basic Education in the Provinces. In view of this and considering the present financial position in the country, it is not possible to sanction a special annual grant of another 20 lakhs to the Provincial Government for buildings for Elementary Schools.

I may also point out that the Ministry of Education's policy with regard to school buildings is to construct houses of semi-permanent kind, costing not more than Rs. 4,000/- to 5,000/- for a Junior Basic School.

The villagers for whose children the school is to be started may be encouraged to raise a certain proportion of the cost of the building. Experience in other Provinces shows that villagers on the whole have been willing to contribute towards their school house.

Yours faithfully,

B. Chatterjee

for Secretary.

Notes

OF BUILDINGS. - CONSTRUCTION

Elementary Schools. Lacks to the Provincial Government for buildings for 20 schools to sanction a special annual grant of another 20 sent financial position in the country, it is not possible to sanction a special annual grant of another 20 the provinces. In view of this and considering the pre-consideration a scheme for financing Basic Education in action, the Government of India have already under con- by the Committee on Ways and Means of financing Edu- best mentioned above and to state that as recommended 22/4-3-54a., dated the 24th November 1948 on the sub- Sir, I am directed to refer to your letter No. 58678-

It may also point out that the Ministry of Education policy with regard to school buildings is to construct houses of semi-permanent kind, costing not more than Rs. 15,000/- to 25,000/- for a Junior Basic School.

The villagers for whose children the school is to be started may be encouraged to raise a certain proportion of the cost of the building. Experience in other provinces shows that villagers on the whole have been willing to contribute towards their school house.

Yours faithfully,

for Secretary.

2. The Govt. have appointed a Committee to prepare cheap type-designs for elementary schools. According to the recommendations of the Committee, the cost of providing a building to accommodate 40 pupils has been estimated at Rs. 9,400. Thus, the cost of providing a building will work out at the rate of Rs.235/- per pupil. It has been estimated that about 35 lakhs of children are studying in the elementary schools in the Province. The number of pupils who may have been receiving education in the ⁹¹⁵⁴~~2740~~ schools may be ~~about 10 lakhs~~. The cost of providing buildings to accommodate these children will be Rs. ~~2550 lakhs~~ ^{2250 lakhs} ~~or Rs. 24 crores~~.

3. H.Pr. desires that a grant should be obtained from the Govt. of India towards the provision of buildings for elementary schools. The expenditure of Rs. ~~24 crores~~ ^{24 crores} on the provision of buildings for ~~2740~~ ⁹¹⁵⁴ ele.schools will have to be spread over a period of 10 years. The cost of the scheme each year and the grant which may become available from the Govt. of India ^{each year} will be Rs. ~~2.4 crores~~ ^{2.4 crores} and Rs. ~~1.2 crores~~ ^{1.2 crores} respectively. The other half of the cost ^{which} will be Rs. ~~1.2 crores each year~~ ^{1.2 crores each year}.

will have to be met from Provincial Govt. each year.

Under this arrangement a full grant will have to be paid

from the provincial funds towards the construction of ^{of Rs. 1.2 crores} buildings. ^{to management of school of a half year} ^{to be} ^{from the Govt. of India each year}

4. It may be noted that at present a grant to cover only one half of the expenditure is paid from Provl. funds towards the construction of buildings for schools, the other half being met by the management from its resources. If this condition is insisted on, the cost of the scheme and share to be borne by the Govt. of India, the Madras Govt. and managements of schools would be as shown below:-

Total cost of the Scheme	- Rs. 24 crores
Cost to be borne by Managements	- Rs. 12 crores
Cost to be borne by the Madras Government	- Rs. 6 crores
Cost to be borne by the Govt. of India	- Rs. 6 crores.

5 The

E+P.H.O 58679 B2/48-1

10/8/48

77053

Finance (Exp. A)

The notes on pages 1-3 above may be perused.

2. E.P.H. have estimated that the total cost of providing buildings for all the elementary schools in the Province which do not at present possess their own buildings will be roughly 24 crores, arriving at this figure they have assumed that the no. of schools which might require buildings to house the schools will be 9104 and the number of pupils studying in these schools will be 10 lakhs.

The intention is to spread the scheme over a period of 10 years and incur an expenditure of Rs. 2.4 crores each year. The Govt. of India is to be approached for a half grant with reference to the promise of help ^{promised} by the Edu. Minister to the Govt. of India during H.Pr.'s talk with him when they met last time ^{at} in Delhi.

3. Before considering the question of the cost involved in the scheme, the first thing to be settled is whether the present moment is opportune to embark on a scheme of construction of buildings.

The policy of the Govt. is to defer, as far as possible, all building schemes in view of the prevailing high cost of materials and labour. Only very

war development schemes.

If the proposal is to be sanctioned ~~it will~~ ^{and introduced in the budget} it will have to be treated as a 'new service' and referred to the S.F.C. and the Cabinet before issue of orders. ^{Otherwise, it} may be considered as a Part II scheme for 1949-50.

12.8.48

12.8.48 A.D.S./S
S.P.H.

There is already a proposal separately under consideration to earmark ^{for "Education"} a portion of the 'block' grant of the Govt. for post-war devt. schemes. Even if the Govt. agree to give a half grant for the construction of buildings for elementary schools, it is very doubtful if the grant will be in addition to the 'block' grant. If the grant for elementary school buildings is to form part of the amount to be earmarked for "Education" out of the 'block' grant, there will be no advantage to the Govt.; on the other hand, the amount available for the "Education" schemes out of the earmarked amount will be reduced. We have advised against the proposal to earmark a portion of the 'block' grant for "Education".

Even if the Govt. agree to give a half grant for the school buildings, the Govt. will have to spend about Rs. 1.20 crores every year. As pointed out above, it will be difficult to find this sum in addition to the existing commitments.

If the proposal is to be pursued, it may be treated as a Part II scheme for 1949-50. It does not seem to be so urgent that it cannot wait till 1949-50. Further, the Govt. will be in a better position to judge when considering the budget of 1949-50 ^{than now} what amount, if any, can be provided for the scheme. It is advisable to consider scheme

although a full grant is proposed by Govt.

12.8.48

447 x 10,00,000
9104 = 50,50,000

X 50,000 pupils in 447 schools
50,000 x 22.8 = 1,175,00,000

22.8 x 1.18 or 1.2 crores

By the Govt. cost is to be borne by the Provincial Govt. & the Govt. of India

1.4.49

essential schemes which are considered absolutely necessary are undertaken at present. Thus, while the Govt. do not themselves take up building schemes on a large scale, it is for consideration whether ^{local bodies and private} ~~the~~ managements should be asked to construct buildings at the present moment. E. & P.H. will no doubt take orders in circulation, including H.M. (Fin.), on this point.

E. & P.H. propose that a full grant may be given to ^{local} para 3, p2 above ~~local bodies and private~~ managements from Provincial funds for constructing buildings for elementary schools. This is considered necessary in order that a half grant of Rs. 1.2 crores each year for ten years may be claimed from the Govt. of India. It is submitted that the normal procedure for giving building grants to private managements and ^{local bodies} ~~is to give half grants~~, the other half being met ~~from~~ ^{by the P.G. managements or} local bodies concerned from their own funds. The fact that a grant of Rs. 1.2 crores could be ^{claimed} from India does not seem to be a sufficient justification for the Govt. to depart from the present policy and to sanction full grants ^{involving} an expenditure of Rs. 1.2 crores. ~~on the scheme~~. E. & P.H. may take orders in circulation on this point also.

5. Out of the 9104 schools, 447 are Govt. schools and the Govt. will have to bear an expenditure of roughly ^{1.2 crores} ~~Rs. 1.2 crores~~ on providing buildings for these schools and a half grant ^{of Rs. 0.60 crores} ~~claimed~~ from the Govt. of India. The balance of Rs. 22.8 crores is the expenditure involved in constructing buildings for schools owned by local bodies and private managements. ^{By the Govt. cost is to be borne by the Provincial Govt. & the Govt. of India} a sum of Rs. 11.4 crores will be payable ~~in~~ ^{from} Provincial funds, the other half being met by the Govt. of India as proposed. The net amount to be provided by this Govt. ^{will be Rs. 1.20 crores} ~~annually~~ ^{per annum for each of the next ten years} ~~Rs. 0.88 crores~~ ^{Rs. 0.88 crores} for Govt. schools, and Rs. 1.14 crores ^{p.a.} for non-Govt. schools.

6. With the introduction of total prohibition in the near future, the Govt. will be losing a total revenue of about Rs. 17 crores per annum. The Govt. are committed to a large expenditure on post-war development and other nationalization schemes, and it does not seem from the point of view of finances of this Province that the scheme can be financed from current revenues, even assuming that the Govt. of India agree to bear half the cost by giving a special grant in addition to the block grant for post-

6
 of this magnitude only in connection with the Budget.
~~Consideration of the introduction of the scheme~~
~~and~~ the course of the financial year ~~and~~ ~~thereby~~ will
 get the Govt. committed to it in preference to other
 schemes that may be equally necessary and desirable;
 without a proper examination of the overall financial
 position.

For
 1/8/48 S
 C.P.P.

Considering the difficulties experienced in
 obtaining grants from the Govt. in respect of individual
 schemes (roads, bridges, irrigation etc) eligible for grants
 & the close scrutiny to which each of such schemes is
 subjected with a view to reducing the grant payable
 it is very doubtful whether grants of the order contemplated
 will be easily ~~granted~~ made by the Central Govt. for the
 construction of elementary school buildings. The difficulties
 of obtaining building materials must set a limit
 to schemes of this kind & the Govt. themselves have
 referred to these difficulties in connection with P.W.D.
 building schemes in general. Expenditure of the order
 of Rs 2.4 crores per annum (however ~~the~~ the expenditure
 is apportioned) ~~on~~ on unproductive schemes must
 add to the inflationary tendencies already in
 existence & whatever the attitude of the Govt. in the Education
 Ministry may have been in the past the present indications
 are that the Govt. are contemplating an all out drive
 against inflation & to that extent the chances of a
 grant being given for construction of school buildings
 are diminished. However this dept. need not object
 to the Govt. being addressed for a grant & a tentative
 scheme being evolved for the purpose. There seems
 to be no question for the present of the scheme being
 considered ^{either} as a Part II scheme or a scheme for introduction

10
 in the current year. Everything must depend
 on whether the Govt. of India are willing to
 give a grant, if so whether it will be part
 of a general Education grant or simply
 a part of the 'block' grant which we are
 getting for P.W.D. & other schemes. If any
 grant given for this purpose is going to
 reduce grants available for other purposes
 the question of the relative urgency of the
 construction of buildings for elementary schools
 and other development schemes (particularly those
 which will more immediately add to material
 wealth) will require careful consideration.

So far as the estimate is concerned X on
 p. 4 up. will represent the position in regard to Govt.
 schools. You p. 1 above suggests that private
 contributions are not to be shut out altogether.
 Also H.P. is anxious that schemes relating to
 rural areas should be given preference over those
 relating to urban areas, and there is no
 reason why municipalities should not provide
 half the cost of school buildings within municipal
 limits, the other half being shared by the Provincial
 Govt. & the Govt. of India. As regards Dist. Board &
 private schools it may be necessary for the
 Provincial District Govts to provide more than
 half the cost in several cases. I would suggest
 that for purposes of working out the probable cost
 it may be assumed that on the average the
 two Govts will have to provide $\frac{2}{3}$ of the cost.
 On this basis the total cost to be shared by
 the two Govts will be Rs 16.13 crores & the grant
 payable by the Govt. of India will be Rs 8.07 crores
 over 10 years. The attitude of the Govt. of India
 in regard to making a grant of about
 Rs 80 lakhs per year for 10 years - outside
 i.e. in addition to the block grant - may be
 ascertained before the scheme is considered further.

on Public Instruction from copy of the report drawn from the D.P.I. office for use.

31.8.48
11/9/48
31.8.48

From the Administration Report, I find that total the/number of elementary schools to be 31,975. Of this, 15,123 have no buildings of their own. The figures on p. 1 ante, though rough, are not at all correct. I think we should take the figure 15,123 and not base our calculations on 9,104.

O.P.R.
5.10.48.

Extract from the orders of H. Pr. in another file.

" I think we may ask the Govt. of India for a grant of 17 crores for existing schools. "

O.P.R.,
H. Pr.

The proposal in this file is whether a programme may not be drawn up for construction of buildings for the schools and the Govt. of India addressed for a grant towards the portion of the cost. The Secretary, Finance Dept., has suggested that in the case of buildings to be provided for Municipal Councils, ^{are half} of the expe. should be met by Govt., (the remaining cost from Municipal funds).

In the case of Dt. Board schools, ^{and school under private agency} the cost of the building programme that will ^{full} form on provincial funds has been estimated at 2/3 of the cost ^{extra} (1/3 of the cost being met from the District Boards ^{extra}). In the case of Govt. schools the ^{extra} cost of the building will be met from provincial funds.

The cost of a building for a school ^(to accommodate 200 pupils) has been estimated at Rs. 47,000/- on the data furnished by the Typed Design Committee. H.Pr. has expressed the view that the estimate is too high to be adopted. He has suggested that the cost may be put as Rs.4,000/- for a school and has ordered that the Govt. of India may be addressed for a grant (of 17 crores) for existing schools.

From the report of Public Instruction, it is seen that 15,123 Elementary schools have to be provided with buildings against 9,104 reported by the D.P.I. ^{At the} cost of providing buildings for these schools is ^{estimated} at Rs.4,000/- per school, the cost to be borne by this Govt., by the Govt. of India and by local bodies ^{are} indicated in the statement below:-

28 5 x 200

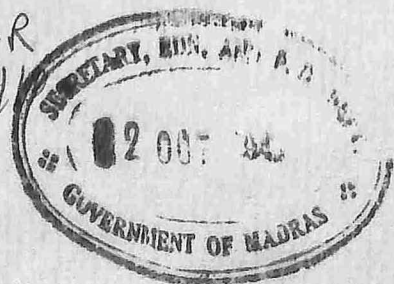

do not take this as basis as it appears from design, very much doubt as to whether it is possible to build up, a school for 200 pupils at this figure. Public Instruction Dept. has been asked to verify the figures and report.

Management.	Number of schools.	Cost of providing buildings.	Cost to be borne by local bodies or private agencies.	Cost to be borne by Madras Government.	Cost to be borne by the Govt. of India.
(1)	(2)	(3)	(4)	(5)	(6)
Government. ..	810	32.40	-	16.20	16.20
Municipal Councils.	488	19.52	9.76	4.88	4.88
District Boards.	932	373.68	124.56	124.56	124.56
Private agencies.	4683	179.32	59.77	59.77	59.77
	15123	604.92	194.09	208.41	208.41

4. It will be seen from the statement above that out of the total cost of Rs. 6 crore for the buildings a sum of Rs. 2.05 crore will have to be borne by Govt., ~~xxx~~ and Rs. 1.94 crore will have to be met by local bodies and private agencies from their own funds. Unless this expenditure is incurred by this Govt., local bodies and private agencies on the building programme, there is no possibility of getting any grant from the Govt. of India. The Secretary, Finance Dept., also doubts the chances of this Govt. getting a grant for the building scheme. For orders whether a letter may be drafted to the Govt. of India as indicated in the note of Secretary, Finance Dept.

5 The file may be circulated.

The Government of India are talking so much about helping us in Elementary (Basic) Education. Let us have a try. Even if they can give us a few lakhs every year, to that extent, we can get things done and so, I think the letter to the Government of India may go.

A draft letter to the Govt. of India is submitted for approval

It may be noted that the Govt. of India have since suggested to this Govt. the need for postponing all schemes of ^{on} unproductive expenditure, especially ^{there involving} capital expenditure. They have asked for a list of schemes introduced by this Govt. arranged in the order of priority with a view to curtail expenditure on any other scheme or postponing some of the schemes with a view to prevent inflation. In the circumstances, it is not known whether the programme of building scheme can be taken up and whether the Govt. of India will be willing to sanction grants to this Govt. for the scheme.

Our own procedure with the Dept of P&D is in fact the same as the one in the case of the Dept of P&D. The only difference is that the Dept of P&D has a separate section for the purpose of the work. The work is done in the same way as the work in the Dept of P&D. The only difference is that the Dept of P&D has a separate section for the purpose of the work.

Elementary Schools - Grant from India - is recorded.

Not put up docket No 100

E.A.P.H. Dept (B2)

The file may be circulated to H.M. (C&D), H.M. (Fin) and H.P. for orders on the letter from the Govt. of India on p. 9. cf.

24/1/49

DM 24/1/49

Alau

(contd. from p. 1)

I would like to know whether the provision that we have made for the building of houses for elementary schools and basic schools could be brought in within the Post-War Development grant. If not, the Govt. of India may be addressed in the matter.

6.P.R. 25/3

25/3 2.2.49 13.2

With reference to the minutes of H.M. (Edu.) above, it is noted that the provision for buildings for basic schools has been made only under the head "Post-War Reconstruction". It does not is, therefore, not necessary to address the Govt. of India in the matter.
