Sub: SCHOOLS - Secondary - Students studying 'Engineering' and 'Agriculture' under the scheme for bifurcated courses of studies - Provision for study of higher technical courses -

Please see the letter from the Director of Public Instruction on pages 1-2 c.f. Orders on the question of giving preference to students who have taken "Engineering" under the bifurcated courses of studies for admission into the Polytechnics have to be issued in the Development Department. (Vide para 1 on page 1 c.f.). A copy of the letter may be sent to that Department U.O. for necessary action. A copy of the letter may also be sent to the Food Department U.O. for taking action with reference to the last paragraph.

Copy of letter Rc.No. 2731-B1/48 dated 11-8-49 from the Director of Public Instruction, Madras to the Secretary to Govt., Education and Public Health Department, Madras.

Sub: Schools - Secondary - Introduction of bifurcated Courses - Provision of Higher Technical Courses -
Ref: G.O. No. 1395 Education dated 29-5-48.

With reference to the scheme of bifurcated courses of studies introduced as per the Government Order cited pupils taking the academic course will move on to the University Courses as they do at present. But of pupils taking the technical courses, the intention is that they should also be enabled if they wish to do so to move on to the University Courses. The question of admission of these students into the University courses has been taken up with the Universities and their decision in the matter is awaited. In regard to the pupils taking the pre-technological courses viz., Engineering and Agricultural courses who do not wish to get themselves admitted into the Universities but wish to be made for their admission into polytechnics or some technical Schools providing for such advanced courses of study. The Director of Industries and the Principal of the Engineering College, Guindy who were addressed in the matter of giving preference for admission into polytechnics and the Engineering College respectively to the pupils who complete the High School course with Engineering as their special subject under the bifurcated scheme of studies have agreed that preference could be given to such pupils. The Director of Industries has however said that as high a percentage of seats as possible will be allotted to candidates who pass out High Schools with Engineering bias and that the exact percentage of seats that can be allotted to them cannot be determined at this stage. The Principal of the Engineering College, Guindy considers that for admission to the Polytechnics and Overseer course in the Engineering College, Guindy, preference may be given to the students who have completed the Engineering Course in the High School forms and the remaining seats may be given to those students who have passed with the usual optional subjects in the High Schools. Besides this he suggests that University should provide a suitable continuation at the intermediate stage. A copy of letter Rc.No. 104-B1/49 dated 2-6-49 of the Principal, Engineering College is submitted hereunder for favour of information. In regard to the admission of pupils who pass out of the high School with Engineering as their special subjects into the polytechnics and Engineering Colleges definite orders have to be issued by Government relating to the rules of admission of pupils to the polytechnic and the Engineering Colleges.

While there is scope for admission of Engineering pupils of the bifurcated courses of studies into polytechnic or Engineering Colleges there seems to be no provision at present for pupils of the Agricultural Course under the scheme of the bifurcated courses of studies for admission into higher technical institutions providing advanced courses in Agriculture. I therefore request that Government will be pleased to consider this matter also and provide for higher technical courses for pupils who pass out of the High School with Agriculture as their special subject.

• • •

Ref:- Your Pros. Rc. No. 2731 B1/48 dated 21st May 1949.

The detailed examination of the engineering course in the bifurcated scheme for the High Schools would suggest that it would be followed by intermediate students in the University. The type of students who would be most suitable for admission to Engineering Colleges would certainly be those who have taken up the Engineering course in the High Schools and those who follow it up in the Intermediate classes of the University. If such a scheme is drawn up and approved by the University, it would go a long way to ensure that those who have really keenness for taking up engineering studies are admitted in the Engineering Colleges. In previous communications about admissions in the Engineering Colleges, I have pointed out under 'other considerations for admission to engineering Colleges' that one criterion for admission to the Engineering College is intelligence of the highest type. If now a scheme is drawn up to follow the engineering course in the high schools by an engineering course in the Intermediate class, then really intelligent students who have a keen ~~inter~~ desire to take up engineering studies would be attracted to join the engineering course of the bifurcated scheme. I request that this point which I have raised may kindly be considered favourably, as I feel that it is a very important issue affecting the success of the bifurcated scheme.

Order
~~Memorandum~~ No 3192 Education dated 18.10.49

The remarks of the Director of Agriculture in his
letter read above with which the Govt agree are communicated
to the D.P.I. and he is informed that it is not possible to
provide for the admission of the students taking 'Agriculture'
under the bifurcated courses of studies into the Agricultural
colleges in this Province. The question whether Agriculture
may be introduced in the Intermediate course also is a matter
for consideration by the University authorities.

Re. 2731 B1/48 dated 17-11-49

Sub:--Schools--Secondary--Students studying 'Agriculture'
under the scheme of bifurcated courses of studies
Provision for study of Higher Technical Course-

~~Ref:--G.O.Ms.No.3192-Education dated 18-10-49~~

In the Government Order cited orders have been issued to the effect that it is not possible to provide for the admission of the students taking 'Agriculture' under the bifurcated courses of studies into the Agricultural Colleges in this Province. But I request that early orders may be issued on the following two matters as suggested in my letter Rc.No.2731B1/48 dated 11-8-49.

1) In regard to the admission of pupils who pass out of the High School with Engineering as their special subject into the Polytechnics and Engineering Colleges definite orders have to be issued by Government relating to the rules of admission of pupils to the polytechnics and Engineering colleges.

2) Though the pupils of the Agricultural course under the bifurcated scheme are not to be admitted into Agricultural Colleges, some higher technical courses may be opened for such pupils for further technical pursuit in consultation with the Director of Agriculture if need be.

Yours faithfully,

For Director of Public Instruction

SCHOOLS - Secondary - Students studying 'Agriculture' under the scheme of bifurcated courses of studies - Provision for study of higher technical courses.

From the Director of Public Instruction, R.C.No.2731-B1 of 1948 dated the 17th November 1949.

MEMO NO. 91578-B1/49-2 *2nd* 17/12/49

8/15.12
12/12/49

The Director of Public Instruction is informed that it has been decided that students taking 'Engineering' under the ~~under~~ bifurcated courses of studies may be preferred for admission to polytechnics, ^{subject to exceptions that} but that bright boys pursuing ^{the ordinary} academic course should not be denied ^{into} admission in polytechnics and that ~~the~~ Engineering students may be selected, preference being given to them at the discretion of the Director of Industries and Commerce. Orders amending the rules for the admission of students into polytechnics will shortly be issued by Government in the Development Department. The question of admitting the students for the Over/seeers' Course is under consideration and orders ~~is~~ will be issued in due course.

P.T.O.

2. The Director of Agriculture has already reported that the proposal to provide higher technical courses to the students taking 'Agriculture' as a bifurcated course, ^(to enable them) to continue their studies, after they pass out of the high schools, is not possible and that the analogy of the Overseers' Course in the Engineering College, Guindy, to which the students ^{who have taken} ~~taking~~ Engineering ^{as a bifurcated course in high schools} can be admitted, cannot be applied to the Agricultural course. He has also reported that the students turned out by existing Agricultural Colleges is surplus to the requirements of the Agricultural Department. The Director of Public Instruction is informed that the Government do not consider it necessary to pursue this question further and that he may, if he considers it necessary, ~~may~~ consult the Director of Agriculture in the matter.

Sub: Edu. Agri - Agri. Colleges. Admission ⁸⁰
of Students of bifurcated courses in High F & A Dept
Schools.
To As

Please see the E.O. note and its enclosures on pp. 2 above from the E.P. & Dept. This Department is concerned with the suggestion of the DPI that necessary provision may be made for pupils, who pass out of the High Schools, with Agriculture as their special subject, for admission ~~for admission~~ into higher technical institutions providing advanced courses in Agriculture. It is submitted that there are ^{only} two Agri. Colleges in this Province, one at Coimbatore and another at Bapatla, which provide higher education in Agriculture. Candidates who seek admission into these colleges ~~should be~~ are required to have passed the Intermediate Examination in Arts and Science of any ^{India.} University. In the circumstances it may not be possible to provide advanced course in Agriculture at these colleges for those pupils who pass out of High Schools with Agriculture as their special subject unless they also pass Intermediate Examination in Arts and Science.

3) With these remarks the case may be returned to E.P. & Dept.

1949 S.P.H.
E.P.H.C.B. 13 Sept.

Please see the note of Govt & Agri Dept. above. They have noted that the students who pass out of the high schools ^{with Agriculture} ~~with~~ Agriculture under the bifurcated courses of studies cannot be admitted into the Agricultural colleges, as the minimum qualification required for the same

Food & Agri. E.O. No 35793M/49-
(9.49)
67506
30849

is Intermediate in Arts & Science.

As suggested at Z ¹⁰¹ in respect of Engineering if provision is made by the University for suitable continuation at the Intermediate stage there will no difficulty. Till then it would seem ^{some} method should be devised to enable students who take agriculture as a bifurcated course in high school to join the Agricultural College by suitably altering the qualification laid down for admission into the Agricultural College by requiring the students to undergo a preliminary course for a period at the Agricultural College before they are admitted to the course intended for candidates

this is a matter for consideration by the university authorities.
A 5/9/49

who are Intermediates in Arts & Science. The Food & Agricultural Dept may be requested to consult the Director of Agriculture in the matter & obtain his views.

E.P.H. index from the bottom of p3 above may be perused.

Expt. no. 62506 on 12-12-49
5/9/49

With reference to E.P.H.'s suggestion at 'A' above, it is submitted that it is ^{neither} possible, nor advisable, to lower the standard of qualifications laid down for admission into the Aggl. College. During the current year, the Govt. ^{after careful consideration} reduced the number of admissions of students in both the Aggl. Colleges from 192 to 160 for the reason that the hostel accommodation facilities for Laboratory work, intercolleges were limited at present and at the present scale of admissions the Aggl. Graduates passing out from the two colleges would be surplus to the requirements of the Aggl. Dept. In the view of the foregoing, it does seem necessary to consult the D.A. on this point.

22.6.49
(W.A. put)

For orders whether the D.A. need be consulted. If ~~not~~, the case may be returned to E.P.H.

I don't think high school students with 'Agr' in the bifurcated course can cope with the syllabus in the Aggl. College even with pre-training. If pre-training is necessary, why not introduce 'Agr' in the Intermediate course also. Let us however consult D.A. as suggested by E.P.H.

Recd 12/9

Orders above: A draft O.M. is submitted for approval.

S
HMCEOL

This raises the question of the utility of Agriculture in the curriculum. Can the successful candidates obtain any employment in agriculture, on the strength of the course undergone. If not, should we not consider an inferior course in Agr. parallel to the course in the Polytechnics. Otherwise agriculture must be allowed as an optional in the Intermediate to meet the candidates may have learnt, and may know enough to obtain private or public employment in subordinate grades. Re examine

11
2X

Please see the Secretary's note above.

2. The Director of Public Instruction has already reported, in consultation with the Director of Agriculture, P.T.O.

10

that the students taking the 'Agriculture' course under the bifurcated courses of studies can be appointed as Fieldmen, Grade II, in the Department of Agriculture, on the scale of pay of Rs.45-2-55-1-60. As this scale is considered low, and in order to popularise the course, the Director has suggested that these students may be started at least Rs.10/- over those of others with ordinary qualification. This question is now under the consideration of the Food and Agriculture Department. It is, however, not known whether these students can secure any employment under private agencies.

A on 11/10/49

Page 5 of 9

Page 5 of 9

3. The Director's proposal is to provide higher courses to the students to continue their studies after they pass out of the high schools. The Director of Agriculture has reported that the analogy of the Engineering course (Overseers' Course in the Engineering College, Guindy to which the students taking the 'Engineering' as bifurcated course can be admitted, cannot be applied to the Agriculture course. These students cannot also be admitted into the Agricultural colleges, as the minimum qualification prescribed is Intermediate in Arts and Science. The Director of Agriculture is not in favour of lowering the standard of the courses in the colleges, to admit students taking the Agriculture course in high schools, as the Dept. is turning out plenty of Agricultural graduates. ~~students coming out of them are more than the requirement of the Agricultural Department.~~ ^(at present) There does not appear to be any polytechnics, providing instruction in Agriculture, where the students taking the subject in high schools can continue their studies and if such institutions are to be opened, it is one for consideration in the Food and Agriculture Department. The question of ~~providing~~ ^{presenting to syllabus} instruction in the subject in the Intermediate classes, is for consideration by the Universities.

~~The draft order already put up for approval~~
4. ~~The file may again be sent to Food and~~

~~Agriculture Department for remarks.~~

SCHOOLS - Secondary - Students studying 'Agriculture' under the scheme of bifurcated courses of studies - Provision for study of higher technical courses.

From the Director of Public Instruction, R.C.No.2731-B1/48 dated the 17th November 1949.

Please see the orders in ~~circulated~~ G.O.No.3192 Education, dated the 18th October 1949, and the letter from the Director of Public Instruction on page 1 c.f. The Director requests the orders of Government on the following points:-

(i) Admission of pupils who pass out of the high school with 'Engineering' as their special subject into Polytechnics and in Engineering Colleges (for the Overseers' course).

(ii) Provision of higher technical courses ~~by opening technical institutions like polytechnics and~~ for the pupils who take the 'Agricultural course'.

(i) above:- It has been decided that students taking 'Engineering' ~~alone~~ ^{may} ~~should not~~ be preferred for admission to polytechnics; ^{but} ~~discouraging the~~ ^{bright} students pursuing the academic course ^(who not be denied admission in the polytechnics) and that the Engg. students will be ~~pre~~ ^{may be} selected, preference being given to ^{them} at the discretion of the Director of Industries and Commerce. The file on the subject was received in this department with a draft order amending the necessary rules for admission into the polytechnics and it has been returned to that dept. after acceptance. The question ^{of} admitting the students to the Overseers' Course is still under consideration. The Director may be informed that orders in regard to the admission of the students into the polytechnics will be ^{shortly} issued by the Government in the Development department and that in regard to the Overseers' course will be issued in due course.

(ii) above:- The Director ^{considers} ~~intention~~ ^{presumably}

This is D.P.I. & not D.A. ^{may} 13/11/49.

10

-2-

that provision should be made for the higher technical study by the students taking the 'Agricultural course' as the Overseers' course and the course in polytechnics. For this purpose, separate institutions will have to be opened, in consultation with the Director of Agriculture. As already noted on page 5 n.f. of G.O.No.3192 Edn. dated the 18th October 1949, it is one for consideration by the Food and Agriculture Department. The Director of Agriculture has already reported that the proposal to provide the students higher technical courses to the students to continue their studies, after they pass out of the high schools as in the case is not possible and the analogy of the Overseers' Course in the Engineering College cannot to which the students taking 'Engineering' can be admitted, cannot be applied to the Agricultural course. Further, he has reported that the students turned out by the existing Agricultural Colleges is surplus to the requirements of the Agricultural Dept. In the circumstances, it is for consideration whether the question of provision of higher technical courses for the students to should be considered further.

2. The remarks of Food and Agriculture Dept. may be invited U.O.
