From

Sri N. Govindarajan, B.A., B.E.,

Member, Standing Advisory Board for

Technical Education, 66, Lloyds Road,

Royapettah, Madras.

To

The Secretary to Government,

Education & Public Health Department,

Fort St. George, Madras.

86175
7 NOV 1949 Sir,

Subject: Standing Advisory Board for Technical Education.

Reference: G.O. No. 2990 Education Dept., dated 26th September 1949.

I have not had a copy of this G.O.

I have proposed to convene a meeting of the Sub Committee referred to in the last paragraph of the Proceedings of the Standing Advisory Board for Technical Education dated 7-2-49.

I am Chairman of that Committee. One of the Members of the Sub Committee Mr. M.S. Thaker, Professor, Indian Institute of Science, Bangalore, has written to me enquiring if under the new constitution of the Advisory Board he continues to be a Member. - vide copy of his letter enclosed. It is not clear if either Mr. Thacker or I still continue to be Members of the Standing Advisory Board.

In fact when I handed over charge of my post as Special Chief Engineer on 31-1-49 I wrote a letter to the then Hon'ble Minister for Education. A copy of that letter is herewith enclosed. The Hon'ble Minister sent word through Mr. A.R. Venkatachari, telling me that I continue to be a Member - Copy of Mr. Venkatachari's letter is enclosed. I therefore attended the meeting on 7-2-1949 and in the Proceedings of that meeting I had been charged with 3 purposes. (1) To draft a letter and send it to the other Universities to ascertain their views in the matter of the reduction of the under-graduate course from 4 to 3 years. I have been doing this and I can say about 30 per cent of the work has been done. I am awaiting replies

A/630

20/11/49

20/11/49

from quite a few of the Governments, Universities and Institutions in India. (2) I am Chairman of a Second

Committee to go into the question of prognostic test

(3) I am also Chairman of the Sub Committee to go into the question of providing evening classes for upgrading diploma holders. The then progress of work entrusted

to these Committees has been reported by me to the

Hon'ble Minister for Education in my letter dated

29-7-49 - copy enclosed.

The points on which I now solicit the instructions of the Government are---

(1) If Professor M.S.Thacker still continues to be a Member of the Standing Advisory Board.

(2) If I myself am to continue as a Member of the Standing Advisory Board and proceed with the further work to fulfil the three purposes referred to above.

(3) Replies to the points raised by me in my letter dated 29th July 1949 to the Secretary Technical Education Board are due. (Copy sent to the Hon'ble Minister for Education as already mentioned above.)

I have proposed to convene a conference of the Sub Committee to enquire into the question of evening classes for upgrading diploma holders on the 23rd of December 1949. I have to write to the Members finalising this date and shall therefore be thankful to have Government's orders on the points raised above.

Yours faithfully,

N. Govindarajan
(N. GOVINDARAJAN).

Encls: Copies of 4 letters.

msa/5-11.

Enclosures to letter No.Nil dated 5-11-49 from Sri N.Govindarajan, B.A.,B.E., Member, Standing Advisory Board for Technical Education, 66, Lloyds Road, Royapettah, Madras, to the Secretary to Govt., Education and Public Health Department, Madras.

(1) Copy of letter (D.O) No.P.E.G.958/49 dated 26th October 1949 from Prof.M.S.Thacker, Indian Institute of Science, Bangalore,3, to Sri N.Govindarajan.

I thank you for your letter of the 22nd instant. As you would be aware, the Government of Madras have reconstituted the Standing Advisory Board of Technical Education, and in this reconstitution I do not find myself as a member. In view of this, I shall be glad to know if I can still constitutionally continue to serve on the sub-committee, which was formed at the last meeting of the Board on the 17th February 1949, to consider the subject of "Conducting evening classes for up-grading diploma holders of Technical Institutions etc.", and, if so, the date which would be most suitable to me will be Friday the 23rd December 1949.

With my kind regards,

(2) Copy of letter dated 31st January 1949 from Sri N.Govindarajan B.A.,B.E., Chief Engineer Special, P.W.D., Madras, to the Hon'ble Sri T.S.Avinasilingam Chettiar, Minister for Education, Madras.

"Dear Sir,

I have handed over charge of the office of Special Chief Engineer, Public Works Department, Madras, to Sri M.S.Thirumale Iyengar. G.O.No.2565 Education dated 29-11-47 mentions Chief Engineer Special as a Member of the Standing Advisory Committee for Technical Education. I am therefore transferring my file on the subject to Sri M.S.Thirumale Iyengar and assume that I have ceased to be a member from this forenoon.

Thanking for all your kindness and with kindest personal regards. N.Govindarajan."

(3) Copy of letter dated 6-2-49 from Sri A.R.Venkatachari, Chief Engineer P.W.D.(General & Irrigation), Madras, to the Sri N. Govindarajan.

"My dear Govindarajan,

I met the Education Minister yesterday and he asked me to tell you that he would like you to continue in the Standing Advisory Board and attend the meeting on the 7th February at 2.30 p.m.

I rang you up to tell you this this morning but you were away.

A.R.Venkatachari"

(4) Copy of letter dated 29/30th July 1949 from the / Sri N. Govindarajan, B.A.,B.E., Retd.Chief Engineer, 66, Lloyds, Road, Royapettah, Madras, to the Secretary, Technical Education Board, Engineering College, Guindy, and copied to the Hon'ble Minister for Education, Madras.

With reference to the resolution passed at the 4 meeting of Standing Board of Technical Education held on 7th February 1949 I have to make the following report.

2. I met the Hon'ble Mr.A.B.Shetty on or about 25th of April and gave him a letter - copy of which is enclosed. p.t.o.

4

I have not so far heard from the Government in the matter of printing this letter with its enclosures and sending it to the various addressees mentioned in the draft letter. Once when I casually met Mr. Lobo I mentioned to him that this letter of mine was pending with the Government in his Secretariat.

The Technical Education Board was particular that the universities and the Inter University Board should be addressed and if possible brought round to the view contained in this draft letter. In my personal view the really competent men who can have a say on this subject are the Chief Engineers and this Technical Education Board and not so much the universities and the Inter University Board. Whatever it may be I feel that no further time should be lost in issuing this letter and making an attempt to convert the Universities and the Inter University Board to this view, so that the 3 year course may start atleast from 1950 July.

3. A committee with me as Chairman was formed to go into the details of the prognostic tests that may be set for students seeking admission into the Engineering colleges. One meeting of this committee was held on 11th March 1949 and Dr. Boaz was requested to prepare a note and suggest suitable tests. The idea is to get some students of the Engineering College and also some practising engineers to take these tests with a view to ascertain how far the tests indicate inherent aptitude to Engineering as apart from what they might have picked up from their contact with Engineering works and machines.

When I reminded Dr. Boaz both by letter and on the telephone, he was unable to furnish a note and expressed his regret and seems to have since left on foreign deputation. I therefore suggest that the Government might be requested to co-opt Mr. Phillips, Research Officer, All India Radio, Madras. On having the Government's permission to so co-opt him I shall hold a meeting of the Committee and have further consultations on this subject. However Dr. Boaz mentioned to me that he would have some very useful suggestions to make based on the contacts he will make with the foreign universities in his deputation. So some final conclusion on this subject can be had only by the end of this year or early next year after Dr. Boaz returns from his foreign tour.

4. In the matter of holding evening classes to enable men with aptitude in engineering to obtain university degrees without undergoing 3 or 4 years regular course in an Engineering college I have not taken any steps so far. If at all, these classes can be instituted only from 1950 onwards. It is my view that these evening classes should be so organised that they will enable men with S.S.L.C. qualification already in employment as clerks, artisans etc. to attend these classes over a period of 2 to 4 years at the end of which they should be able to take the Institute of Engineers test for Associate and full membership and/or the P.E. and B.E. degree examinations of the university.

I am not however confident that we can find enough teaching personnel to undertake such continuous evening classes atleast for some years to come. I am also of the view that our resources in the matter of teaching personnel etc. should be used primarily in the numerous colleges already started and should not be frittered away in starting fresh courses of Engineering Education. I should like to have a direction in this matter from the Government before I convene a meeting of the Committee. I shall also await for the Government's response in the matter of issuing the letter already drafted in regard to the reduction of the 4 year course to 3. That will help me to know that the delay with the Government in taking action on my draft letter does not indicate any change in their policy.

I am sending a copy of this letter to the Hon'ble Minister for Education, the Hon'ble Sri K. Madhava Menon.

To:

The Director of Public
Instruction,
Madras.

Sir,

Sub:- Technical Education Standing Advisory Board -
Holding of evening classes in Engineering Colleges.
Ref:- Government Memo No186175-1/49-A-Edn., dated
18th November, 1949.

Sri N.Govindarajan in his letter referred to in the Government Memo-

random read above has referred to the holding of evening classes in paragraph 4. He has raised two important issues in this letter. One is to hold evening classes to upgrade Licentiate and diploma holders. Another is to train those with the basic S.S.L.C., qualifications, already employed in some grade of technical personnel, so that they may get some diploma and upgrade themselves in their profession. The consideration of holding of evening classes was taken up as a side issue when the Hon'ble Minister for Education and Chairman of the Standing Advisory Board for Technical Education stated in the concluding remarks of the meeting of the Board held on 7th February, 1949, that the time has come when facilities must be given to anyone to upgrade himself to the highest in his profession if he has the desire and the ability. Accordingly a Committee under the Chairmanship of Sri N.Govindarajan was appointed to go into this question. The Committee has considered this subject in their previous meeting and is going to consider it in greater detail in the meeting to be held on 23rd December, 1949.

2. The points raised in the Chairman's letter embraces all aspects of upgrading technical personnel and seems to be a very comprehensive one.

It is however suggested that the first aspect of upgrading Licentiate and diploma holders may be taken up in the first instance and with the experience gained and the resources available it might be possible to work out a scheme for upgrading any type of technical personnel with a basic educational standard of S.S.L.C. The Chairman has also pointed out, in the second part of paragraph 4, the difficulty of getting experienced teaching

(P.TO)

12

8-931-1338

personnel at the present time. He has stated that any available staff should be employed in the various Engineering colleges and other Engineering institutions and that that demand should have first priority. Considering the fact that all Engineering institutions in the Presidency are handi-capped for want of experienced lecturers in Engineering this question must also be kept in view in considering the holding of evening classes for the above purpose.

13

3. Another important point raised in the same letter is the question of upgrading these technical personnel with a view to prepare them for the degree examination of the University as well as for the Associate examinations of the Institute of Engineers. This is a matter which requires very careful consideration. The Madras University does not admit of any candidates taking up the Engineering examinations or other examinations unless they have studied for the required number of years in a constituent or affiliated college. The University degree presupposes a University atmosphere and training and the course undergone by a pupil in a University College is perhaps more important than the passing of the University examination. Under the circumstances it is considered not desirable that the upgrading of various categories of technical personnel should be done for the purpose of making them sit for a University examination, which I am afraid the University will not accept. The Associateship examination of the Institute of Engineers is as good a qualification as a University degree in the Engineering field, and if the Special Committee appointed by the Standing Advisory Board for Technical Education can consider measures to upgrade technical personnel for this examination, it is considered sufficient. When post-graduate courses are opened in Engineering in the University, it may be possible for those with the A.M.I.E., diploma to submit thesis for a post-graduate degree and for such a procedure I think the University will most probably agree. If such diploma holders can get a post-graduate degree of the University they can then put up for higher degrees and there is nothing that could stop a candidate from aspiring to the highest award in the Engineering field, provided he has the ability and the desire to ^{do} so.

4. In a letter written by the Chairman dated the 24th ~~in~~ ultimo about the meeting to be held on 23rd December, 1949, he has suggested that a skeleton syllabus may be drawn up for the two categories of technical personnel mentioned in paragraph one. He has invited my opinion on the same and has also asked me to prepare a syllabus for circulation to the members *before the meeting is held. I am suggesting to the Chairman,*

14

that it will be a very big task to prepare a syllabus for the second type of personnel who have only a bare S.S.L.C., qualification but who have been employed as artisans or in some such capacity. A syllabus for upgrading Licentiates and diploma holders only is, therefore, being attempted.

15

5. Last year a memorandum was given by the Licentiate students of this College to the Hon'ble Minister for Education for affording them facilities to study for the A and B Part of the Institute of Engineers (India). On a reference from the Director of Public Instruction I pointed out that although I had given him a comprehensive scheme, to conduct evening classes for the benefit of the Licentiate students of this College on a previous occasion, yet the matter might be deferred for the time being as the students who are likely to take advantage of such a scheme would be those now studying in the Licentiate classes. It was pointed out in my letter that the idea of holding evening classes for such a purpose should be taken up, but such opportunities must only be given to those who had passed out of the various institutions and been in service for some time. If the present Licentiate students are given such facilities it would only confuse the present arrangement of having a separate course for Engineers and separate course for Licentiates. Instead of holding such classes it might be a better proposition to increase the admission for the Engineering classes. It is presumed that this suggestion has been considered and the holding of evening classes for the Licentiates now passing out have been deferred by the Government. In the proposals, therefore, for the upgrading of Licentiates, diploma and other technical personnel one condition must be laid that such opportunities should only be given to those who have been in service for some time and who are recommended by the managements and other Government departments as judged by their work and ability from the record of service to be most fitted for undergoing such a course. Unless such a condition is laid there would be no means of regulating the candidates who wish to undergo this training.

6. In view of the above remarks, I suggest that the report of the Special Committee which is scheduled to meet on the 23rd December, 1949, may kindly be awaited.

10.12.49.

me
12/12/49

Sub: Techl. Edu. - Standing Advisory Board -
 p1-2cf. From Sri N. Govindarajan d. 5-11-49.

The letter from Sri N. Govin-
 p1-4cf. darajan d. 5-11-49 and the enclosures thereto
 maybe perused. The points now for
 consideration are those at K. on p2cf.
 vide item 15 on Point (1): Prof. M. S. Thacker was nominated
 (A) 57cf. as a member of the Standing Advisory Board
 for Techl. Edu. in G.O. No. 2565 Edu. d. 29-11-47
 as the representative of the Indian Institute
 of Science, Bangalore. It is not clear why the
 doubt has arisen as to whether he still
 continues to be a member of the Board.
 Sri N. Govindarajan maybe informed
 that Prof. Thacker continues to be a
 member of the Board.

vide item 5 on (A) 57cf. Point (2): In G.O. No. 2565 Edu. d. 29-11-47, the
 C.F. (Spl.) was, among others, appointed
 as a member of the Board. At that time
 Sri N. Govindarajan was holding the post
 and he handed over charge of his
 post of Spl. ch. Engr. to Sri M. S. Thirumalai
 vide (A) 63cf. Iyengar, he wrote to the then H.M. (Edu.)
 that he presumed that he would cease
 to be a member of the Board thereafter.

para 2 on p1-2cf. It would appear, however, that the then
 A. M. (Edu.) informed him that he might continue
 in the Board. Sri N. Govindarajan is now
 associated with the work of some three
 Committees appointed by the Board and
 he now enquires whether he continues
 to be a member of the Board. ^{It seems that} though
 he has ceased to be in the employ of the
 Govt., in view of his vast experience and

in view of the fact that he is associated with the work of some important Committees appointed by the Bd., it is desirable that he continues to be a member of the Board. It is therefore for orders whether he may be appointed as an addl. member of the Board.

Point (3): The letter d. 29.7.49 referred to was addressed by Sri N. Govindarajan to the Principal, Engg. College, Guindy. Only a copy of the letter was received by the Govt. and they have not heard anything from the Principal in the matter. The main point ^{here} ^{about} Sri N. Govindarajan seeks instructions of the Govt. is about holding of evening classes in the Engg. Colleges. The Principal, Engg. College, Guindy may be asked to offer his remarks in the matter.

2. The file may be circulated to H.M. (P.W.) for orders on M. above.

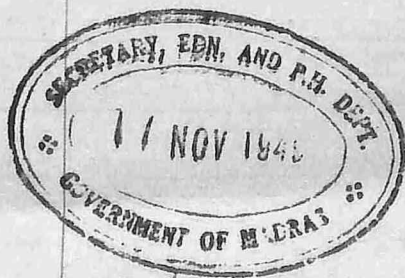

17-11-49
17/11/49

17/11/49
S H.M. (P.W.)

Sri Govindarajan may be appointed additional member and allowed to continue on the Board of Technical Education
