EDUCATION DEPARTMENT.

(N)

Office of the Director of
Public Instruction, MADRAS,
Dated: 10th March, 1950.

C. No. 206-C. 6/50

Director of Public Instruction,

M A D R A S.

The Secretary to Government,
Education Department,
Fort St. George, M A D R A S.

Sir,

Sub: Establishment - Office of the Director of
Public Instruction - Collection of statistics
additional staff - Continuance requested for.

Ref: Government Order Ms. No. 966 Education
Dated 4.4.1949.

...

The post of one Senior Deputy Inspector of Schools
(Grade II) and one Lower Division Clerk sanctioned in Government
Order Ms. No. 966 Education dated 4.4.1949 for a period of one
year with effect from 1.5.1949 for the work connected with the
collection and compilation of statistics, will expire by
30.4.1950.

The staff mentioned above with the two clerks detailed
for Public Information Report work are exclusively devoted for
the collection and compilation of statistics and in view of the
importance of statistics as index to the state and progress of
education, I have the honour to request that Government may
kindly accord necessary sanction for the continuance of the
staff mentioned above for one year with effect from 1.5.1950.

The necessary provision has been included in the
Budget Estimate for 1950-1951 for the continuance of the staff.

Yours faithfully,

Chinnappa

for Director of Public Instruction.

C.No. 206-C.6/50 dated 30-3-50

Sir,

Subject: Office of the Director of Public
Instruction - additional staff
for collection of statistics -
continuance

Reference: Government Memo No. 1678 A/50-1 Edn
dated 13th March 1950.

Prior to the creation of a separate statistical section sanctioned in G.O. MS. No. 966 Edn. dated 4.4.49 the staff for doing the work relating to the Public Instruction Report normally consisted of two clerks forming part of a section. But with the rapid increase in the number of institutions of all kinds and due to the varied nature of the statistics required from time to time in connection with new proposals, this staff was found inadequate to cope up with the work. Further, with the expansion of education in recent years and its progress every year the work in connection with the collection of numerical data required for gauging the educational progress and for formulating new schemes called for a special staff. It was also felt that the then existing arrangement of attaching this important part of the work of the office to a section did not conduce to the prompt collection and tabulation of useful data. In view of the above facts the Government were pleased to sanction in the G.O. quoted above the employment of one Senior Deputy Inspector of Schools (grade II) and one lower division clerk in addition to the then existing staff of two lower division clerks for constituting a separate section for statistical work.

With the introduction of new schemes of education and with the implementation of plans to eradicate illiteracy in the State the continuance of the special staff of the statistical section is all the more necessary now for an accurate tabulation of the numerical data required for gauging the progress so far made and for formulating new proposals. The special staff is essential for the collection of valuable data for the use of the department from the subordinate officers and for building up a systematized stock of useful figures which will form a reliable frame of reference.

The newly created statistical section was in charge of the collection and compilation of Public Instruction Report 1948--49 and collection of other statistics required for dealing with important questions that arose in the day to day administration of the department and for answering references from the State and Central Governments. Details of some of the important items of statistical work so far done by the section are given in the Appendix. It will be seen that the nature of the statistics to be collected and compiled is such as to require an expert staff and that it will not be possible for an ordinary section to do the work efficiently.

pp 9-11

45 2

To bring the existing Tabular Inspection Reports on Secondary and Training Schools in line with the requirements of the reorganised schemes of education they were revised by the statistical section. The work connected with the preparation of reports like those as 'the place of Arts in General education', 'the educational opportunities for Women in the State' etc. where statistical particulars are important was also done by this section. The various annual returns including appendices received in connection with the Public Instruction Report number about 5463. As the date of submission of the public Instruction Report to Government has been advanced the work of prompt collection of the returns necessarily involved considerable increase in the volume of Correspondence. In addition to the General Educational Tables consisting of 16 separate Tables submitted to the Government of India along with Vol. I of the Public Instruction Report, 79 tables required for Vol. II of the Public Instruction Report were prepared in regard to elementary schools, secondary schools, special schools and Colleges and the education of Anglo Indians, Harijans and other Kindred classes.

In their No. F 15-1/48 E (Stat) dated 23.1.50 the Government of India (Ministry of Education) have desired the educational statistics for the year 1949--50 and onwards to be furnished in the form of General Educational Tables now revised by them which consist of 29 tables and involve collection of much additional data not hitherto gathered. In this connection it may be mentioned that even the present staff of the Statistical section may not be adequate for the several new returns to be obtained and compiled in connection with the revised tables now prescribed by the Government of India.

On account of the rapid and large increase in the number of institutions of various types large masses of facts and figures are being received. In addition to collecting them the data collected have to be systematically tabulated with a view to scientific analysis of the figures. To simplify masses of facts, classify numerical facts and to furnish a method of comparison mean considerable additional work which only a separate statistical section can cope up with efficiently. Sanction may therefore be kindly accorded for the continuance of the staff as requested in my letter C. No. 206-C.6/50 dated 10.3.50 since it is very essential to meet the increasing volume of work detailed above.

Yours faithfully,

M. V. Krishna Rao

Madras.

C. No. 206-C.6/50 dated 10.3.50

Subject: Office of the Director of Public Instruction - Additional staff for collection of statistics - continuance

Reference: Government Memo No. 1073 VI-1-48 dated 13th March 1950.

Prior to the creation of a separate statistical section sanctioned in G.O. No. 1003 dated 4.4.49 the staff for the work relating to the Public Instruction Report normally consisted of two clerks forming part of a section. But with the rapid increase in the number of institutions of all kinds and due to the various nature of the statistics required from time to time in connection with new proposals, this staff was found inadequate to cope up with the work. Further, with the expansion of education in recent years and the increase every year in the number of institutions, the collection of statistical data required for preparing the educational progress and for formulating new schemes called for a special staff. It was also felt that the existing arrangement of collecting this important part of the work of the office to a section did not conduce to the proper collection and tabulation of useful data. In view of the above facts the Government were pleased to sanction the 4.0 sanctioned above the employment of one Senior Inspector of Schools (Grade II) and one Junior Division Clerk in addition to the staff existing in the lower division clerks for constituting a separate statistical section for statistical work.

With the introduction of new schemes of education and the increasing number of institutions, the statistical work in the office has become more and more important. The special staff of the statistical section is all the more necessary now for an accurate collection of the statistical data required for the progress of the work and for formulating new proposals. The statistical staff is essential for the collection of statistical data for the use of the Government in the various departments and for the purpose of statistical work of the Government.

The staff of the statistical section is all the more necessary now for an accurate collection of the statistical data required for the progress of the work and for formulating new proposals. The statistical staff is essential for the collection of statistical data for the use of the Government in the various departments and for the purpose of statistical work of the Government.

Appendix.

Statement showing important items of work done by the Statistical Section since its formation in May 1949.

1. Preparation of Public Instruction Report 1948--49 Vol. I and II.
2. Proof correction of Public Instruction Report -Volume II of 1946--47 and 1947--48.
3. List of secondary schools in the State corrected upto 1.9.49 prepared - Proof corrected and sent to Government Press.
4. Presidency Administration Report - Part I - 'Madrās in 1949' - Salient features relating to education - prepared.
5. Presidency Administration Report - Part II - 1948--49 Chapter on Education - prepared.
6. List of villages in the State with a population of 5,000 and above.
7. Report on the educational opportunities for women in the State.
8. Report on the place of 'Arts in General Education'.
9. Statistics of 'Single teacher schools' in the State.
10. Revision of Tabular Inspection Reports of Secondary Schools.
11. Revision of tabular Inspection Reports of Training Schools.
12. Collection of particulars for examining the question of re-introduction of selection examination in High Schools.
13. Statistics - Cultural Indices for Madras State.
14. Statement of expenditure incurred by the Provincial Govt. on the education of scheduled castes and other backward classes.
15. Particulars of exempted teachers in Secondary schools - extracted.
16. Particulars of regarding medium of instruction in Secondary Schools.
17. Statistics of educational institutions in Rayalseema.
18. Particulars of secondary schools which have introduced 'Reorganised scheme of secondary education'.
19. Statistics of 'Trained and untrained teachers' in Secondary Schools.
20. Preparation of answers to the questionnaire on the progress and condition of elementary secondary and University education in the State from the Professor of Yale University.
21. Statistics of Nursery schools, Basic schools etc. required by the Government of India.
22. Particulars regarding classification of colleges, schools, number of scholars, expenditure on education etc. for the Quinquennial Report required by the Economic Adviser to the Government.

23. Statistics of school less centres in the State and the number of schoolage children yet to be provided for in different areas.
24. Particulars of expenditure on education from Dt. Board and Municipal funds.
25. List of Primary and Secondary schools district War - to the Government of India.
26. Statistics of students in High school classes in the State to the Curator, Central Bureau of Education, New Delhi
27. Statistics of educational institutions in Telugu and Non-Telugu districts.
28. Statistics of educational institutions in the State furnished to Sri M. Bapineedu, M.L.A.,
29. Statistics of trained and untrained teachers in educational institutions - Legislative Assembly Question.
