Funds - Diversion - Palni Municipal
Council - construction of Municipal
high school building

ref: Government Memorandum No.32043-C/49-2
L.A., dated 20-9-49.

The plans for the municipal High school buildings have been approved by the Director of Public Instruction, Madras in his Dis.No.5615-49 dated 19-10-49.

2 The estimates for the Municipal High school buildings have since been sent to the Chief Engineer (Defence & buildings) Madras in this office Roc.No.1123-48 dated 28-10-49, for technical scrutiny and his approval is awaited. As instructed in para 2 of the Government Memorandum cited above, necessary applications will be submitted to Government, through the Director of Public Instruction, Madras for a subsidy for the work after the estimates are approved by the Chief Engineer.

3 In this connection, I submit that as explained by me in my letter Roc.No.B1-7664-49 dated 19-7-49, the existing school building is in a very dilapidated condition and that unless provision is made for additional accommodation before the school reopens after the summer vacation in the year 1950, it will be definitely impossible to accommodate all the classes and keep the entire strength of 1400 on rolls. Further the educational authorities are pressing for additional accommodation and the permanent recognition has also not been sanctioned, for want of accommodation. The cost of construction has to be met from the general funds of the council without going in for any diversion of from any earmarked funds of this Municipality. Necessary provision will be made in the Revised estimate for 49-50 and Budget Estimate for 1950-51 for these item of work. In case of any temporary diversion is necessary it will be diverted from Water supply and Drainage Account with the sanction of the Government and the diversion will be repaid as stated by the Government in their order cited.

4 In the circumstances explained above, I request that the Government may be pleased to pass very early orders without having to wait for orders sanctioning permitting this council to take up the work without having to wait for orders sanctioning subsidy and to sanction the subsidy admissible as and when the work is completed.

I submit herewith a copy of Municipal Councils Resolution No.308 dated 27-10-49 together with a copy of my note dated 17-10-49.

(M) The Municipal High School Palni is a Boys
school and according to the last sentence in para 2
of go. no 2670 Education dated 23.8.49, the scheme
for the construction of a building for the high
school can be considered for aid only if on an
examination of the financial position of the m.c.
it is found that the m.c. cannot meet the
entire cost from its own funds - It is now too late
to consider the question of giving a subsidy in
1950-51 and no information is available in regard
to the cost of the scheme according to the plans
submitted approved by the D.P.2. The Comm.
may be asked to renew the appl. for consideration
in connection with the budget for 1951-52
A draft memo is subd. below for approval

18/11/49
2/12/49

3/12/49

5/12/49

Note to the Council:-

Funds - Diversion from Water supply and Drainage
fund accounts to the General funds for the
construction of high school building.

According to resolution No.721 dated 12-7-49, the Govern-
ment were addressed in this office Roc.No.7664-49 dated 19-7-49
to accord their sanction for the diversion of Rs.75000/- from
Water supply and Drainage Account as resolved by the council.
The Government in their memo No.32043-C-49 dated 20-9-49 have
informed that as the water supply improvement and the drainage
schemes for this Municipality are likely to be included in the
2nd 5 year programme that may be drawn up, the proposal of
diverting all most the whole amount under water supply and
drainage Account to the General funds and repaying the diversion
in 20 annual instalments will not be complied with. The
Government have also stated that after the approval of the
plans and estimates of the proposed High school building by
competent authorities, the council may apply to Government
through the Director of Public Instruction, Madras for a
subsidy for the work. They have further stated that in case a
subsidy is sanctioned, the council may apply to Government
for permission to divert temporarily from the water supply and
drainage account such part of the balance of the cost of work
as could not be found from the General funds of the municipal
council, on condition that any diversion from the water supply
and drainage account should be made good in not more than five
annual instalments.

Keeping in view the urgency with which the additional
accommodation has to be provided, it is necessary here to
consider if we can wait till the Government sanction a subsidy
if it is sanctioned at all. But if there is a prospect of
our getting it, we may not forego it but it should not deter
the quick progress of the work. At any cost the school
buildings must be available for occupation when the school
reopens after the summer vacation, as else it will be definitely
impossible to accommodate all the classes and keep the entire
strength on rolls. The work therefore can be taken up for
execution from out of the general funds of the council without
going in for any diversion from any special account. The
Government may also be requested to sanction us the maximum
subsidy admissible and to grant it to us on the completion
of the work and permit us to carry on the work without waiting
for orders on the question of granting subsidy. Necessary
provision will be made in the Revised Estimate for 49-50
and Budget Estimate for 50-51 for this work. In case it is
seen that some temporary diversion will be necessary, the
Government may be moved later separately to accord sanction
therefor and such temporary diversion may be limited to the
minimum possible and shall be repaid as suggested by Govern-
ment in five years. But it seems possible to take up the work
with funds provided entirely from the General funds.

Sd/-T.R.Rajagopalan,
17-10-1949.
Commissioner.

A 5/12/49

C.I. 7611-49. 8.17.11.49

Memo 93898 B1/49-1 Dated 5.12.49.

The Commissioner Palni Municipality is informed that the question of sanctioning a subsidy towards the cost of construction of a building for the municipal high school can be considered in connection with the budget estimates for 1951-52 and the scheme will be admitted to aid only if on an examination ^{at the time of application in the latter half of 1950} of the financial position of the municipal Council, ~~at the time the application is made for subsidy~~ the Govt are satisfied that

the Council cannot meet the entire cost from its own funds even by raising a loan. no guarantee can therefore be given now that a subsidy will be sanctioned for the work even in 1951-52. If the municipal Council wants to proceed with the work without waiting for sanctioning of subsidy, it may do so provided it is prepared to meet the entire cost from its own funds in case the Govt declines to sanction a subsidy. The work can be taken up for execution only after necessary provision for the capital expenditure is made in the Council's budget and it is approved by Govt.

And
The Chairman, Municipal Council, Palni.

Sir,
Building - High school - construction of
new buildings.
Government Memorandum No. 93898-49 B1 Edn.
D/5-12-49.

The existing accommodation in the High school is very inadequate. Except for a small building where a few classes have been housed there are only thatched sheds put up to accommodate most of the classes. Even this is not sufficient and boys are sometimes put to the painful necessity of being couched under trees. This is very unsatisfactory. Every year the inspecting Officers are passing adverse remarks on the condition of accommodation. Hence the Council decided to construct a building at an estimated cost of Rs. 1,17,000/-. Plans and estimates were prepared and the administrative sanction of the Director of Public Instruction has been received. They were sent to the Chief Engineer for technical sanction and the Chief Engineer in his letter no. 8512/PWM-49-2 dated 14-12-49 has returned them for rectification of certain defects. They are being revised and will be sent back shortly. Meanwhile provision has been made in the Budget Estimate for 1950-51 for Rs. 95,000/- under "Capital" for the construction of building as it is hoped that expenditure upto that extent might be incurred during that year, and in the event of any additional amount being found necessary during that year it will be taken by diverting the required sum from Water Supply and Drainage Fund Account with a specific sanction as directed by Government in their Memorandum no. 32043.C.49.2 dated 20-9-49. The Council is anxious to start the construction immediately after the technical sanction is obtained from Chief Engineer and if possible tenders will be invited even during the current year and work entrusted on contract as early as possible.

(Z) In the concluding portion of the Government Memorandum quoted above the Government have stated that the work should be taken only after provision is made in the Budget and is approved by Government. In view of the supreme urgency, I request that special sanction may kindly be accorded for incurring the expenditure with reference to provision made in the Budget Estimate for 1950-51 and the order communicated even earlier than general orders are passed on the Budget, to enable the Council to go ahead with this work and do the preliminaries connected with it, like invitation and disposal of tenders etc. during the current year itself so that sufficient progress may be made in constructing the building in 1950-51 itself if possible.

I solicit the favour of early orders in the matter.

The B.E. of the M.C. for 1950-51 is examined in the R.F. It contains a provision of Rs. 95,000/- for expenditure on the construction of the school building referred to above. The G.L. Act for 1950-51 is expected to close with a balance of Rs. 30,629/- against the required

minimum of Rs 15000. Rs. 14,900. The Council is in a position to meet the cost of the school building from its own funds. The file may be returned to E & P. H. Dept. for issue of orders.

The current year (1949-50) opened with a balance of Rs 99,239 & will close with a balance of Rs 137,210 under the General Account (Ordinary). Provision has been made for the transfer of Rs 9500 from the said balance for expenditure on the work under reference in 1950-51. Orders will be issued separately in this Dept. on the cl's B.E. for 1950-51 allowing among others this item of capital expenditure. Specific sanction may be accorded, as requested by the Commr. for incurring the expenditure on the work.
