Electricity Department.

From The Chief Operation Engineer (North),
157, Mount Road, Madras.

The Secretary to Government,
Public Works Department,
Madras.

THROUGH The Superintendent of Stationery,
Guindy, Saidapet, Madras.

No. 724-J/50-1 dated 20th March 1950.

Sir,

Sub: Stationery - Additional duplicator - purchase
for the use of the Superintending Engineer,
Madras Electricity System - Sanction - Requested.

In G.O.No.Ms.999 P.W.D. dated 23-3-48 Government sanctioned the purchase of one electrical model duplicator for use in the office of the Superintending Engineer, Madras Electricity System at a cost not exceeding Rs.1200/- The duplicator was accordingly purchased on 31-3-48 and has been in use in the Madras Electricity System since then.

2. The Superintending Engineer, Madras Electricity System reports that the above machine is put to very heavy work. On an average the number of copies taken on this duplicator ranges from 5000 to 6000 per day. Of late the ~~rapid expansion of the system~~ demand for roneoed copies is increasing with the rapid expansion of the system. Due to heavy strain the machine goes out of order very often with the result that the machine of Messrs. Gestetner Duplicators Limited has to be requisitioned very frequently to set right the machine.

3. After a thorough examination, Messrs. Gestetner Duplicators Limited who supplied the above machine are of the opinion that this machine is being overworked to its utmost capacity without any rest whatsoever. If the same strain is continued, they are afraid it might break down at any time. The Company has therefore suggested that we should go in for another machine so that there may not be any sudden break down of the existing machine due to heavy overwork.

4. As already stated the demand for roneoed copies is steadily increasing with the rapid expansion of the system and the one duplicator already in use is inadequate for our requirements. Consequent on the Accounts Reorganisation a large number of circulars and instructions have to be issued out from the headquarters and they also require the use of a duplicator. Messrs. Gestetner Duplicators Limited recommends for our use their latest model -160 T foolscap size duplicator which costs Rs.1895 (Sales tax extra). They are of opinion that this model is a more stronger one with extra strong mechanism attached to it. A copy of the Company's letter dated 7-2-50 to the Superintending Engineer, Madras Electricity System together with a descriptive leaflet is also enclosed. A foolscap size machine will be more useful for us since our roneo work is mostly confined to this size.

5. In the circumstances, I request that Government may be pleased to sanction urgently the purchase of an electrically operated foolscap size Gestetner Rotary Duplicator (latest model No-160T) at a cost not exceeding Rs.1895/- (excluding sales tax) for use in the Madras Electricity System and the headquarters Accounts organization.

For Chief Operation Engineer (North).

Encl: Copy of Company's letter dated 7-2-50 with descriptive leaflet.

Copy of letter Ref.No.D.56 dated February 7, 1950 from Gestetner Duplicators Limited 17/35, Mount Road, Madras to the Superintending Engineer, Madras Electricity System, Madras-2.

YOUR GESTETNER DUPLICATOR MODEL 77-E/301609.

In response to your telephonic call of yesterday we deputed our Senior Mechanic Jaganathan to attend to your above Duplicator and we now understand that he has since repaired the machine and the same is now in good working order.

Of late we have been receiving Service Calls from you to attend to the machine almost daily. The undersigned, therefore, called at your office this morning along with the Service Representative in charge of your machine and examined same. We are of opinion that the machine is being overworked to its utmost capacity without any rest whatever, and we are afraid that the same might break down at any time. There is more than enough work for 2 Duplicators.

From the details gathered from your Office this morning it appears you have more Foolscap size work to do than double-foolscap. We, therefore take this opportunity of suggesting you the purchase of our latest Model 160-T Gestetner Rotary Duplicator, the details of which are given below for your perusal.

Latest All-Steel-Streamlined Gestetner Rotary Duplicator Model 16-T. Electrically Operated Foolscap size, fitted with Automatic Counting

Feeding Divices complete with Steel Cabinet
and Motor at the accepted rate of Governments
of India and Madras. ... Rs.1895/-

F.O.R. Madras, Sales Tax extra.

Illustration of the machine quoted above is
attached herewith for your perusal.

The model 160-T is a more stronger machine with extra
strong feeding mechanism attached to it. It is made of steel
and runs very smoothly. The machine is guaranteed free from
Mechanical defects for a period of one year from the date of
supply, during which period any mechanical parts found defec-
tive will be replaced free of charge. Further, the machine
will also be serviced free of charge for its entire life-time.

Awaiting the favour of your esteemed commands.

5. In the circumstances, I request that Government may be pleased to sanction urgently the purchase of an electric duplicator.

Gestetner

MODEL

160

An electric duplicator of new design with many outstanding new features. The product of a firm that has specialised in the manufacture of duplicating machines since 1881.

1 SILENCE. The need for quietness under modern office conditions has had special consideration. The Gestetner 160T, even under full pressure, is a quiet machine.

2 SPEED CONTROL. This is designed for accurate control of the rate of feed for different classes of work.

3 COLOUR. Changing the colour of ink is a clean and simple job. Nine colours are available.

4 POWER UNIT. This is enclosed in the machine. The machine and motor are self-contained and independent of the cabinet.

5 SWIFT-SET COUNTER. How many copies do you want? This counter, designed for quick and easy setting, stops the machine at just that number.

6 SIDE MARGIN CONTROL. Instant adjustments to paper margins by the turn of a thumb wheel.

7 A CABINET OF NEW DESIGN. The top drawer of the machine cabinet is fitted with compartments designed to accommodate the Colour Changer and accessories. Two other drawers are available for storage of Stencils, Inks and Paper. The Gestetner machine and cabinet form a handsome piece of office equipment, of good appearance and functional design.

8 THE PAPER FEED. Has been constructed for accurate automatic feeding of varying thicknesses of paper. The feed-board accommodates one ream.

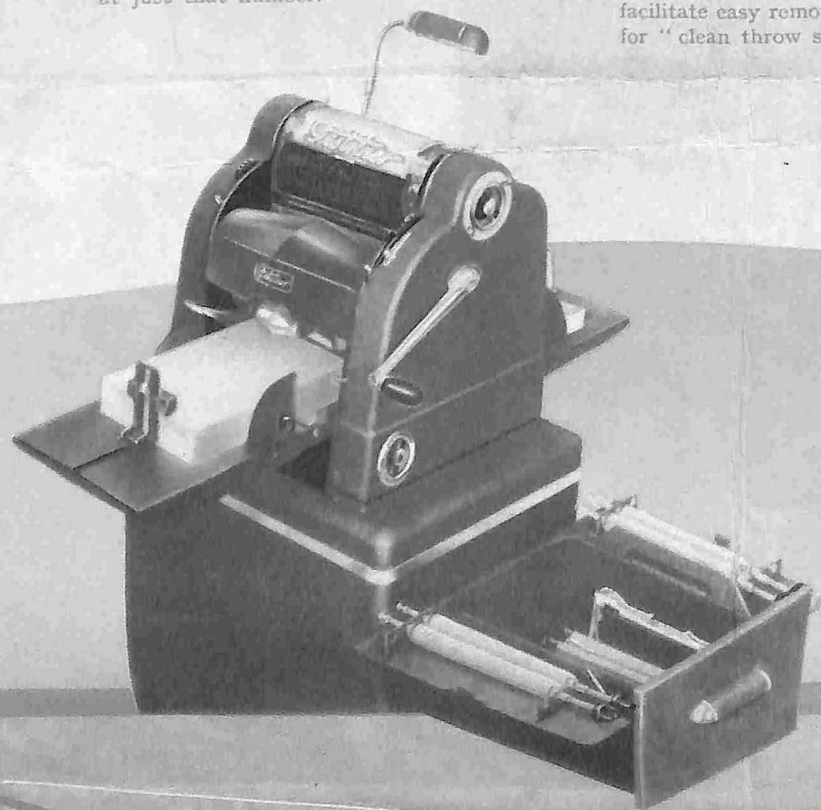

9 RECEIVING TRAY. Designed to facilitate easy removal of printed copies and for "clean throw stacking."

We invite your investigation into the merits of this new model of a famous machine and its value to your own business or profession.

We invite you to see it working in your office.

All Gestetner Branches are pleased to arrange this—free of cost or obligation—at any time and anywhere.
