From

G. L. Hancock Esq.,
Executive Engineer,
Vizagapatnam Division.

To

The Inspector of Schools,
Northern Circle.

Sir,

Referring to your letter No. ¹⁵⁶/₂₄₋₁₋₉₆
I have the honour to inform you that
the cost of construction of a compound wall
to the normal school building at Vizaga-
patnam amounts to Rs 1180 nearly.

Under G. O. No. 2806 W Dated
7th October 1892, I am prohibited from
preparing plans and estimate for other
departments for original works costing
over Rs 500 without the previous appro-
val of Government.

I therefore request that you will
be good enough to obtain sanction of
Government for their preparation before
P.W.D.

I have &c
Sd/- G. L. Hancock
Ex. Engineer, Vizag. Div.

No. C-III.

From
THE HONORABLE MR. D. DUNCAN, M.A., D.Sc., LL.B.,
DIRECTOR OF PUBLIC INSTRUCTION,
Madras,
To
THE HONORABLE THE CHIEF SECRETARY TO GOVERNMENT,
FORT ST. GEORGE.

SIR,

With reference to Memorandum No. 1076, dated
23rd instant I have the honour to explain why a com-
pound wall is necessary round the training school
building at Vizagapatam. The matter was a
subject of personal investigation on the occasion of
my visit to Vizagapatam in February last.

2. The school building is bounded by a public
road (one of the principal thoroughfares) and a
maidan on two sides, and by a public tank and
a dwelling house on the other two sides. The public
road passes only a few yards in front of the
school door, and runs along one side of the
Compound. Persons passing along the road or
from the maidan have the ~~free~~ ^{free-est} access to
the

the school Compound and they make the fullest use of that freedom. Stray cattle or ^{wayfarers} ~~grasses~~ at night can rest in the school verandah. There is a well in the Compound (claimed by the Municipality, I believe) close to the side of the road and within some 20 yards of the school. This well is resorted to by way-farers, generally of the poorer classes, who eat their food round the well, leaving the refuse to litter the Compound. An unsuccessful attempt was made some years ago by means of wire fencing to prevent trespassers from the tank getting into the Compound. The residents on the other side of the road who draw their water supply from the tank pass freely to and fro through the Compound and within a few yards of the school. Apparently there was a pathway from one to two yards broad running between the school Compound and the dwelling house above referred to, and intended for the use of those passing from the road to the tank. But this pathway has been blocked up by temporary sheds erected by the owner or occupier of the dwelling house. Persons using the tank are perforce driven to trespass in the school Compound.

3. I instructed the Headmaster to ascertain whether the well was a municipal well and if so to instruct the Public Works Officer to run the wall round it so as to leave it open to the road, but shut out from the Compound. I also instructed him to ascertain how the pathway from the road to the tank came to be blocked up. My own impression is that this would never have happened if the school Compound had been shut off from trespassers.

4. The result of the Compound being open to trespassers is that it is used as a public latrine at night and is in a disgracefully filthy condition. A training school should be a model of order and cleanliness. Teachers who come to be trained cannot be expected to carry away with them ideas and habits of care, order, and cleanliness if the school premises are left from day to day in a state of neglect.

5. I may add that the school-house is a large commodious building and is worth being cared for. A part of it is used as the office of the Inspector of schools, Northern Circle.

I have the honour to be,
Sir,
Your most obedient Servant,
J. S. Suman
Director of Public Instruction

1896.
