SUBJECT.

Regarding the appoint-
ment of certain
quaranteed Engineer
and Engineer Subordinates
Student in the permanent
Establishment of the P.W.D.

In the special cir-
cumstances of the case, the Govt
does not consider that the
stipend of any student should
be forfeited on account of any
leave he might have enjoyed
in excess of fifteen days or that
the practical course of such
student should be extended
by a period equal to the excess
leave taken.

Note.

The reduction of the length of the
practical course is altogether special &
it seems inadvisable to stop the stipend
for two or three days' leave which the
students might have taken, thinking
that they are entitled to one month's
leave. It does seem fair to ask them to
pay for the leave.

Current No. 785

PUBLIC WORKS DEPARTMENT.

PROCEEDINGS OF THE MADRAS GOVERNMENT.

Read the following

From the Principal, College of Engineering, Madras, No. 177 C,
dated 21st May 1896:-

With reference to G.O. Educational No. 223, dated 7th April 1896, I have the honour to request that the Engineer students of Jagadisa Aiyar's batch and the Engineer Subordinate students of Muthayya's batch may be relieved of work on their practical course on 30th June 1896, and that the appointments guaranteed for these batches may be conferred from 1st July.

2. Under G.O. No. 560 Educational dated 28th July 1892, leave on the practical course is limited to one month per annum. As the works course of the batches referred to has extended only to six months, it is considered that their allowance of leave should be reduced to half a month. Any students of these batches who have enjoyed more than 15 days leave since the 1st January should therefore lose stipend for any excess and make good that excess after the 30th June.

3. It is understood that the second Engineer Subordinate student K. Narrain Hebbar has enjoyed more than 15 days leave. I recommend that the excess should not prejudice the award of the guaranteed appointment to which he will become entitled, and I suggest that such appointment be reserved until he has made good the excess.

4. It is possible that there may be other cases of a similar nature

Order

Order thereon:-No. 1608 W, dated 18 June 1896.

It is observed that the forecast of vacancies on the permanent Upper Subordinate Establishment of the P.W. Department likely to be available in January 1897 for passed Engineer Subordinate students of the College of Engineering was fixed in June 1894. It was then assumed that there would be 5 appointments available for students who completed their theoretical course in December 1894. Owing to the curtailment of the practical course, these students are eligible for appointments 6 months earlier or on the 1st of July of the present year. The number of vacancies now existing is 7, but of these, two have to be reserved for Military students and thus 5 only are available for civilians. In January 1897, another batch of students, namely, those who passed out of the College in December 1895, will also look for appointments, and it was announced in notification published in the Fort St. George Gazette of the 12th June 1894, Part II, page 918 that as many as five vacancies would be likely to be available. This forecast has been vitiated by the change in the rules, curtailing the period of the practical course, and it will thus have to be considered how far the conditional guarantees already given can be fulfilled.

2. Paras 2 and 3 of the letter from the Principal of the College will be considered in the Educational Department. The question raised in para 1 as to the Engineer student is being considered separately.
