JULY.

Government Girls' School at Namakkal

Estimate of Rs. 4,800 for constructing a new building for the — in the Salem district, sanctioned with remarks.

20/7/98

GOVERNMENT OF MADRAS.

PUBLIC WORKS DEPARTMENT.

Buildings and Roads.
Civil Works.

READ—the following papers:—

G.O., No. 122, Educational, dated 25th February 1898.

Read—the following papers:—

From the Director of Public Instruction, Madras, dated 9th June 1897, No. 6111.

With reference to G.O., No. 875, Educational, dated 15th November 1895, I have the honour to submit, for sanction and transmission to the Public Works Department, the enclosed plan with estimate, amounting to Rs. 4,800, for the construction of a new school house for the Government Girls' school, Námakkal, in the Salem district. The building has been designed similar to the one erected at Dharmapuri and will accommodate 150 pupils.

2. In the preliminary issue of the Provincial Civil Works Budget for 1897-98, this work has been included under class B works. As the Inspectress of Girls' Schools, Western Circle, reports that the school has long been suffering from poor and insufficient accommodation, I request that this work may be transferred to class A works if practicable, and the necessary funds may be provided for commencing the work as soon as possible.

From the same officer, dated 8th February 1898, No. 1203.

Order—No. 122, Educational, dated 25th February 1898.

The plan and estimate are approved and will be transferred to the Public Works Department.

(True Extract.)

(Signed) H. TREMENHEERE,
Ag. Secy. to Government.

From the Superintending Engineer, IV Circle, dated 12th April 1898, No. 201/W.

" IV " " 2nd May 1898, No. 250 W.

" Director of Public Instruction, dated 12th May 1898, No. 5578.

Note by the Chief Engineer, Public Works Department.

As soft rock is said to occur at depths varying from $2\frac{1}{2}'$ to $4\frac{1}{4}'$, there seems no necessity for excavating foundations to a depth of 5 feet. The rock should be benched out, and equality of pressure secured by allowing in foundations one foot of brick in chunam, with concrete below taken down to the level of the rock. The average total depth of foundations is thus $3' 4\frac{1}{2}"$, and the estimate has been altered accordingly.

2. Provision has also been made in this office for a ridge ventilator along the whole length of the building—an essential addition for schools in the plains.

29th June 1898.

(Signed) W. B. DEWINTON,
Chief Engineer.

ORDER—No. 1673 W., dated 5th July 1898.

The estimate, amounting to Rs. 4,800, for constructing a new building for the Government Girls' school at Námakkal in the Salem district, is sanctioned for execution when funds are available.

2. This sanction has been registered as Provincial No. 31 W. of 1898-99, and classified as Civil Buildings—Original Works.

3. Attention is drawn to the note by the Chief Engineer.

(True Extract.)

Under Secretary to Government.

To the Superintending Engineer, IV Circle, with seven enclosures.
