SIR,

W With reference to Mr. Ibbetson's letter No. 1011/37-6 dated 10th July 1895, I am directed to forward a copy of a letter No. 14/19-1 dated 28th April 1899 from the Assistant Agricultural Chemist to the Government of India, making suggestions for the distribution of his time between the Imperial Forest School at Dehra Dun and the Poona and Saidapet Colleges and to enquire whether, in the event of Dr. Leather's visits to Poona being discontinued, the Governor in Council would care to utilize his services at the Saidapet College for 5 months. In the latter event I am to say that the Government of Madras will be required to meet the cost of his salary and travelling allowance for that period.

I have the honour to be,
Sir,
Your most obedient servant,
E. Maconochie
Under-Secretary.

1899
REVENUE DEPT.
Encl. No. 1
No. 5730

Enc. No. 1 to Bd's General Reg. No. 1686 of 1899

Letter from the Assistant Agricultural Chemist to the Government of India, to the Secretary to the Government of India, Department of Revenue and Agriculture, No. 14/19-1 dated 28th April 1899.

I am now able to reply to your letter No. 108/86-3 dated 16th January 1899.

2. On my return to Dehra last week I saw Mr. Hill, Director of the Imperial Forest School, with regard to the duties which he wishes me to perform. During the months July to October inclusive, he wishes me to deliver lectures at the School. In addition to this there are a number of experiments on the extraction of tannin from bark which he has requested me to take charge of. I cannot at this moment say whether this will occupy the whole of my time during the six months, but so far as I can tell it will certainly occupy the greater portion of it in the present year.

3. Regarding now in the second place the disposal of my time during the cold weather, I take it that it is the wish of Government that lectures at Saidapet and Poona should be considered a primary duty of the Assistant Agricultural Chemist. The time which has been allotted in the past in either the one case or the other, but more especially in that of Madras, is apart from other considerations far too short to enable one to deal properly with the subjects involved, and consequently only lectures on certain subjects have been delivered. I presume however that Government has been fully aware of this and only adopted the present ~~this~~ programme because there was only one man to do the work. There is one point however which I think should be taken into consideration in reference to this division of the Assistant Agricultural Chemist's ~~time,~~ time,

time, and that is that whilst at Saidapet there are always some forty to sixty agricultural students, at Poona there have been practically no students for several years. I believe I am right in saying that for the past two years there were no agricultural students at all; this year there was one and for next year (so far as Agricultural Chemistry is concerned) there will again only be one. If therefore these courses of lectures are considered by Government to be my principal duty it would be infinitely better to devote the time entirely to Saidapet for the present.

4. Had it been possible one might have suggested that instead of devoting five weeks at Saidapet and three months and a half at Poona, the longer period should be devoted to Saidapet and the shorter one to Poona. But practically this is impossible. It so happens that no lectures can very well be delivered at Poona during November and December as the examinations of the Bombay University interfere; then too, at both Saidapet and Poona the students go on tour during January. Thus it works out that lectures can be delivered at Saidapet from November until the end of March (excluding a part of January) whilst at Poona (supposing there were any students) the lectures are practically confined to February to the middle of April. Under present circumstances therefore, it would be much better if the time were devoted to Saidapet.

5. Referring to Poona, although there was so little call for lectures in the present year, it was easy for me to find useful employment for the rest of my time, and I devoted it to the examination of dairy produce principally. A report of this will be separately submitted.

6. I think that visits to Experimental Farms (as indicated in paragraph 2 of your letter No. 1871/37-19 dated 31st of August 1898) might advisedly be considered a part of my duties for the present as I believe that I can be of some

48

some little service in that manner.

OFFICE OF THE DIRECTOR OF
PUBLIC INSTRUCTION,
Madras, 12

Madras, 12th June 1899.

6 P

No. 6559

From

THE HONORABLE MR. D. DUNCAN, M.A., D.SC., LL.D.,
DIRECTOR OF PUBLIC INSTRUCTION,
Madras,

To

THE SECRETARY TO GOVERNMENT,
Educational DEPARTMENT,
Fort St. George,
Thro' the Director of Agriculture, Board of Revenue

SIR,

Hap W

With reference to G.O. No. 634, Educational, dated 30th July 1895, regarding the distribution of the time devoted by the Assistant Agricultural Chemist to lecturing at the College of Science, Poona, and at the College of Agriculture, Saidapet, I have the honour to observe that the time devoted to the two institutions is not proportionate to the number of students who are benefited by the lectures delivered by the Assistant Agricultural Chemist. For, whi the College of Science, Poona, has three months and a half, viz. January to the middle of April, the College of Agriculture, Saidapet, has only a month and a half, from the middle of November to the end of December, though the number of students of the latter

Ed. Cor. / 6 1,000—28-10 97

institution who attend the Chemist's lectures is much larger than the number belonging to the College of Science, Poona. In fact, owing to the Christmas holidays the time devoted to lectures at Saidapet is, practically, only about five weeks. When the Assistant Agricultural Chemist was at Saidapet last November, there were as many as 15 students in the Senior class alone, who attended the lectures, while the corresponding number at Poona was, I understand, only three. As I have reason to believe that this preponderance in numbers is not accidental, I would propose that the time devoted to the College of Science, Poona, may be reduced to three months and that the programme may be altered as follows:

15th November to 15th February. Lecturing College of Science, Poona.

15th February to 15th April Lecturing College of Agriculture, Saidapet.

2. The above proposal, which is supported by the Board of Revenue, will not interfere with the rk of the Assistant Agricultural Chemist at the uperial Forest School, Dehra Dun.

I

I have the honour to be,

No. 8443

From

THE HONORABLE MR. D. DUNCAN, M.A., D.SC., LL.D.,
DIRECTOR OF PUBLIC INSTRUCTION,
Madras,

To

THE SECRETARY TO GOVERNMENT,
Educational DEPARTMENT,
Fort St. George.
(Thro' the Secretary, Board of Revenue, Revenue Settlement, Land Records & Agriculture).

SIR,

In returning the endorsement of Government, No 342, dated 15th July 1899, I have the honour to state, in consultation with Mr. Keess, Principal of the College of Agriculture, that the services of the Assistant Agricultural Chemist to the Government of India are not needed [illegible] the College of Agriculture for more than two month[illegible]ually and that the period indicated in this office le[illegible] 6559, dated 12th June 1[illegible], viz; 15th February to 15th Apr[illegible]is the most convenient time for the College to reap the fullest benefit from the lectures of the Agricultural Chemist.

2. Agricultural Chemistry, theoretical and practical, is taught at the College of Agriculture during the third year course by the College lecturer, and the Assistant Agricultural Chemist is expected to deliver to the senior students, appearing for the Government Technical Examination a special course of lectures on the subject as supplementary to those already delivered by the College lecturer. This work should not engage him more than a couple of months.

I have the honour to be,
Sir,
Your most obedient servant,

D Duncan

Director of Public Instruction.
