Transmitting three of
each of the days of the
Academy in which the
relating to the two hours
can't have been inserted
during the past month.

*Proceedings of the Madras Government, Financial Department,
from 9th to 15th July 1859.*

No. 1. Read the following letter from Lieut. Colonel J. H. BELL, Chief Engineer ; to the Secretary to Government, Public Works Department, Fort Saint George, dated 2nd July 1859, No. 2335.

At the request of the Mint Committee, I have the honor to forward for submission to Government a Plan and Estimate amounting to Rupees (6,270) six thousand two hundred and seventy, for the enlargement and improvement of the Mint Buildings, chiefly for the purpose of setting up the 10 Horse power Engine lately received from England, for the lamination of Copper Ingots. Major Orr explains, that being obliged to make considerable alterations to the Western range of the Mint buildings, to accommodate the new Machinery, he has taken advantage of the opportunity to modify them, and thereby obtain a capacious airy

room in which to place the Copper Cutting Presses and Copper Milling Tables in the immediate vicinity of the copper annealing and cleaning room. He also states that the present improvement is a continuation of that effected last year, and which it is very desirable to extend over the whole range of narrow, low and inconvenient rooms.

2. He shews that by removing the Copper melting and Gold refining Furnaces which are no longer required, and occupy valuable space, a spacious airy apartment 62 feet by 37 feet will be formed for the accommodation first of the Copper cutting presses, and secondly of the Milling tables. By transferring the Machines for cutting and Milling the Copper blanks to the same room adjacent to the Engine, it is hoped hereafter to communicate motion to them by it.

3. The importance and urgency of the improvements recommended by Major Orr are so evident that I need hardly add my strong approval of the same, and I beg to request that the Estimate should be sanctioned for immediate execution out of the general funds at the disposal of the Civil Architect, as the works have been already commenced.

No. 2. ORDER THEREON, 9th July 1859, No. 374.

Under the explanation afforded, the Government sanction, for immediate execution, the estimated outlay of Rupees (6,270) six thousand two hundred and seventy, for the enlargement and improvement of the Mint Buildings.

(Signed) T. PYCROFT,
Chief Secretary.

Order thereon. 9 July 1859 - No 374

Under the explanation afforded, the Government sanction, for immediate execution, the
estimated outlay of Rupees (6,270)
Six thousand two hundred and
seventy, for the enlargement and
improvement of the Mint Buildings.
