REVENUE DEPARTMENT.
FORT SAINT GEORGE,
18th *January* 1864.

No. 104.

No. 202.

From

J. D. SIM, Esq.,
Secretary to the Government of Fort Saint George,

To

The Secretary to the Government of India.

SIR,

1. I am directed by the Governor in Council to enclose a list of Establ ishments which, in the opinion of this Government, are erroneously charged to Public Works, and for the entry of which in the Revenue Budget, I am now instructed to request sanction.

2. The Public Works grant, I am to observe, is simply an annual assignment from the revenue for the construction, repair, and maintenance of Public Works. The excavation of a chanuel, its maintenance in working order, and its repair when injured, are all perfectly legitimat charges on this fund, and the salaries, &c., of the Officers and Establishments employed on such duties are also clearly chargeable to it. But here, in the opinion of this Government, the liability of the Public Works Department should end.

3. A work once completed, the realization of the revenue produced by it devolves on the Revenue Department, which should clearly provide the whole Establishment necessary for the purpose. Among these Establishments it is obvious that Superintendents of Irrigation and Navigation, Maistries and Lascars to regulate the distribution of water or serve locks on canals and all servants maintained for similar purposes should be included. The employment of such Officers is necessary to admit of the revenue being realized, and they ought, therefore, to be charged against Income. To enter in the Budget of Revenue the income derived from such a work as the Godavery Anicut and to leave out the charges incidental to the realization of that revenue is not only erroneous, but has the effect of making the revenue appear larger than it really is.

4. The mistake of charging these servants to the grant for Public Works has doubtless originated from a misconception of the nature of their employment. In case of emergency such servants would no doubt aid in closing breaches and other similar work, but this is not the duty for which they are primarily entertained, and it is a liability which every District Officer from the Collector downwards shares with them. Officers for the distribution of water are attached to almost every village possessing means of irrigation, but these Officers are not charged to the Public Works grant, and it is not clear why a different course should be followe d in regard to the works entered in the enclosed list, merely because when they were finished a separate Department of Public Works had, for administrative purposes, been formed. But for this change they would undoubtedly have constituted a charge on the Revenue.

5. If the question now submitted were merely a matter of account, the Government wo uld not trouble the Supreme Government with this reference, though even in such a case they would regret the deviation from sound principle. But the effect of the arrangement is to deprive the Presidency of nearly a lac of Rupees out of the sum which the Government of India allot out of the annual revenues for the improvement of the country, and which is very far short of the amount the Government could profitably expend, and the development of the resources of the Presidency urgently require.

6. From the number and nature of the works on which the revenue from irrigated lands (Rupees 1,70,00,000 in 1862-63) is dependent, a very considerable portion of the annual Public Works allotment must be devoted to their maintenance, and forms in fact a direct charge on the Nunjah revenue. After providing with the utmost economy for Repairs, Establishments and Civil and Military requirements, the Government have little left for those new wor ks witho which the progress of the country would be stopped.

	Rs.
Establishments.	16,58,465
Revenue buildings	74,304
Public do.	3,15,531
Judicial do.	1,78,954
Military expenditure	3,38,033
Repairs, ...	22,38,294
Stores.	1,50,000
Total...	49,53,581
Balance available for developing the resources of the country.	14,32,595
Total actual expenditure in 1862-63. ...	63,86,176
Add amount unspent, ...	57,831
Total Imperial Grant...	64,44,007

7. The marginal abstract gives the disposition of the Imperial grant for 1862-63, and shows that in that year the Government had but 14½ lacs available for new works. This is equivalent to a little more than 2 per cent. on the revenue, and was all that the Government could afford to expend on a Presidency which by universal consent especially needs liberal treatment, and as actual experience shows amply repays it. The reduction of Establishments now places a somewhat larger sum at their disposal, but the insufficiency of even double the amount is self-evident, when the extent of the country, the importance of irrigation and the returns received from judicious expenditure are considered.

8. Moreover, if the present system is continued, the extension of Public Works Establishments will be unlimited, for each work as completed will need its own staff of servants, and the amount available for new works will yearly be diminished to a corresponding extent.

9. Under these circumstances, the Supreme Government will readily understand the anxiety of His Excellency in Council that the small amount which the exigencies of the State admit of being invested in projects, so profitable to the Exchequer, and so vitally important to the people, should not be lessened by being diverted from its legitimate purpose.

10. The charges for the current year may be passed against savings in the current year's Budget Estimate B. I.— and I am to request early sanction for this arrangement, and for the entry of the requisite amount in the Budget of 1864-65, which in confident expectation of a favorable reply, the Government have directed. The enclosed list furnishes full information regarding each Establishment, and in respect to the first entered in it, I am to request a reference to the enclosed Order of Government, dated 12th instant, No. 68A.

I have the honor to be,
Sir,
Your most obedient servant,
(Signed) J. D. SIM,
Secretary to Government.

KISTNA DISTRICT.			
Conservancy Establishment.			
Anicut Establishment.			
1 Superintendent	100 0 0	1,200 0 0	The first Establishment for this District was sanctioned in consequence of the following representation. The Civil Engineer states that the demand for water for the extension of irrigation is so pressing, that the most injurious expedients are resorted to by the Ryots for securing a supply, such as throwing dams across the channels in some cases, and cutting the banks in others. By these means water is irregularly appropriated by the people through whose lands it passes, to the injury of the more remote villages and to the loss of Government. There being no Establishment to watch and protect the works, these proceedings remain unchecked, and are often not even known until much mischief has been done and loss occasioned. The Civil Engineer therefore earnestly advocates the immediate entertainment of an Establishment for the above purpose, and for regulating the supply of each village according to its real wants and the general interests.
