Proceedings of the Madras Government, Financial Department,

30th April 1864.

No. 65. Read the following Proceedings of Government in the Military Department, dated 15th April 1864, No. 1266.

Communicate for transmission to the Government of India, for incorporation with the General Medical Estimate now before that Department, a Supplementary Estimate of Medical Stores required for 1864-65 *in addition to those included in the Budget Estimate of that year.*

Vide Proceedings Military Department, dated 15th April 1864, Nos. 365 & 366.)

No. 66. To the Secretary to the Government of India, Financial Department, dated Fort Saint George, 30th April 1864, No. 240.

I am directed by His Excellency the Governor in Council to transmit to you, for submission to the Government of India, a copy of the Proceedings of this Government in the Military Department, together with a report from the Controller of Military Finance and the correspondence which accompanied it, forwarding a Supplementary Estimate of articles required for the Presidency Medical Stores for the year 1864-65, to the amount of Rupees 11,567-8-11, for incorporation in the General Estimate of the Medical Department now before the Supreme Government.

Dated 15th April 1864, No. 1266.

(Signed) A. J. ARBUTHNOT,
Chief Secretary.

Exd. J. Tulloch.

MILITARY DEPARTMENT.

PROCEEDINGS OF THE MADRAS GOVERNMENT.

Read the following papers:—

From the Controller of Military Finance, Fort Saint George, 23rd March 1864, *D; to the Secretary to Government, Military Department, Fort Saint George.*

I have the honor to forward a letter from the Principal Inspector General Medical Department, dated 7th March 1864, No. 65, forwarding a Supplementary Estimate in duplicate of Medical Stores required for 1864-65, in addition to those included in the Budget Estimate, together with an Explanatory Statement and letter from the Medical Store-keeper.

Rupees 11,567-8-11.

Dated 19th February 1864, *No.* 498.

2. It appears that there have been unusually large demands from the various Depôts since the Budget Estimate was sent in, in consequence of the Stocks of these supplies having been in previous years reduced to the lowest limit.

3. I called for a Report on the subject from the Medical Examiner, and have the honor to submit it with the Statements showing the expenditure of the several articles at the Presidency and at Out-stations from 1859-60 to 1862-63, and from these it appears that the Medical Examiner's check in 1862-63 was exercised with reference to data taken from the experience of the preceding year; in some respects an exceptional one.

Dated 17th March 1864, *No.* 1716.

4. The principal cause of the deficiency in the Medical Stores however, is that the calculations for the Budget Estimate were made with reference to the state of the Stores on the 1st October before the Annual Indents from Out-stations, which was this year delayed, were received, and the demands therein made do not appear to have been fully anticipated.

5. The Supplementary Estimate appears to be justified by the present state of the Stores, and I have the honor to recommend that the extra provision be made as requested.

From the Principal Inspector General Medical Department, Fort Saint George, 7th March 1864, *No.* 65; *to the Controller of Military Finance, Fort Saint George.*

I have the honor to forward herewith a Supplemental Estimate from the Medical Store-keeper for Medical supplies from the Commissariat, and to beg that you will be so good as to forward the same to Government for sanction, and to express a hope that it may be incorporated in the General Estimate of the Medical Department now before the Government of India.

Dated 19th February 1864.

2. The Store-keeper's explanation is the true one. From the stringent check upon expenditure during the last few years, stocks of all these supplies have been reduced to the lowest limits, and it has been necessary this last year to increase the stocks at various Depôts, to keep them thoroughly efficient.

No. 498 *of 19th February* 1864.

From the Medical Store keeper, Fort Saint George, 19th February 1864, *No.* 498; *to the Secretary to the Principal Inspector General Medical Department.*

I have the honor to bring to the notice of the Principal Inspector General Medical Department, that owing to the unexpectedly large demands made by Deputy Medical Store-keepers on the Presidency Stores, during this as compared with the previous official year, and partly also to the unusual number of "extra Indents" complied with during the last three months, many articles of which it was supposed, when the Budget Estimate for 1864-65 was prepared, that there would be a considerable remainder on the 1st of May next, are already almost, or altogether expended; the quantities now remaining being in many instances quite insufficient even for the estimated further requirements of the current year.

2. The Budget Estimate for 1864-65 having been framed on the actual expenditure of 1862-63, will therefore require to be Supplemented to enable this Department to meet the probable demands during the ensuing official year;—and I accordingly beg to submit, for the consideration of the Principal Inspector General a Supplementary Estimate of probable requirements in excess of those which in October last seemed likely to prove sufficient.

3. I regret that these requirements are so large; but, so far as I can judge from the experience of the last few months, they are not more than sufficient to meet probable demands, should these continue to be at all on the same scale as they have been recently. To enable the Principal Inspector General however to decide on this point, I have annexed a Tabular Statement shewing the grounds on which my calculations have been made.

4. To this is added, in the margin, a Memorandum in support of the Statement in paragraph 1 of this letter, as to the greatly increased demands by Deputy Store-keepers during the current official year as compared with last, and the unusual number of extra Indents complied with during the last three months. I should state that the Divisional Indents named in this Memorandum have not been *selected* as being larger than the others, but that they are the only ones yet completed and therefore the only ones available for the purpose of comparison.

N. B.—The requirements stated in Column II can of course be, but partially, complied with this year, and will on that account probably be larger next year.

(Signed) C. BARCLAY.
Medical Storekeeper.

FORT SAINT GEORGE, MEDICAL STORE-KEEPER'S OFFICE,
19th February 1864.

he Examiner of Accounts, Medical Department, Madras, 17th March 1864, *No.* 1716; *to*
Controller of Military Finance, Fort Saint George.

reply to your Memorandum, No. 873, of the 8th instant, with enclosures* from the Office of the Principal Inspector General Medical Department, I have the honor to observe that one or two causes appear to have operated in ng the results shewn in the letter, No. 498, from the Presidency Medical Store-keeper, to etary Principal Inspector General, in respect of which the former Officer has found it y to send in a Supplemental Estimate of articles required from the Commissariat for the Stores in the ensuing year.

* *Herewith returned.*

In the Report on the Budget Estimate of the Medical Department for 1862-63, called the Examiner of Medical Accounts by the Finance Department, the expenditure of the 1-62 appears to have been taken as that which should regulate all future years, but on n average of the four years from 1859 to 1863, a very considerable difference is found , and in almost all case the average expenditure of the four years is very much higher t of the single year 1861-62.

The two Tables which I now forward represent respectively the actual issues from all ssil Depôts, and that from the Presidency Depôt to Hospitals, Jails, and Dispensaries esidency Division. It is thus an index of the actual requirements or demands upon these or each year. A glance at the columns for 1861-62 will show how much they differ in s from the two "average" columns and that no given year can be taken as a safe guide years. It would appear moreover that the calculation of expenditure for 1861-62 con- the Appendix to letter No. 448, dated 30th June 1862, from the late Examiner of Accounts, had been based on data differing from those now submitted, as I find on on very considerable discrepancies, a few of which are as follows :—

Expenditure for 1861-62.

	As per letter No. 448.		As per Tabular Statement now forwarded.		
	lbs.	oz.	lbs.	oz.	
n.....	176	13	265	0	
fœtida.....	0	1	13	3	
ax.....	10	11	18	8	
mbo-root...	22	7	45	2	
phor.....	435	10	581	0	
or Oil.....	6,899	8	9,257	0	
mmoniac.....	17	0	47	0	&c., &c.

nditure in the left hand column corresponds with the Annual Return of Presidency ues for 1861-62, but it is manifest that such issues cannot prove a safe guide to the f actual disbursements from all Depôts.

Another cause of the present deficiency of Commissariat Medicines is due to the fact Budget Estimate was framed with reference to the quantities remaining in Store on the ber last, at which period none of the Annual Divisional Indents had been received, the their transmission having been caused by the inquiry then pending, and which led to the dismissal of the late Store Manager. These Indents, coming in November, absorbed er part of the quantities then on hand, and thus, by so much, reduced the Stock on calculations were framed.

By the Annual Return of the Presidency Stores for 1862-63, I find that of most of the amed in the Appendix to letter No. 448 above quoted, few or none were supplied in while other articles were received in greatly reduced quantities. The above facts will sufficiently explain the present deficiency and justify the Supplementary Estimate now by the Presidency Medical Store-keeper.

have called for a Return of packing articles received from the Commissariat in 1862-63, nd the above remarks will apply equally to them, but should any unusual expenditure red, I will submit it for your consideration.

Statement shewing the Expenditure of the undermentioned articles in the Medical Stores at Presidency for four years, from 1859-60 *to* 1862-63.
