Proceedings of the Madras Government, Financial Department,
23rd July 1873.

No. 164. Read the following letter from J. C. LOCH, Esq., President of the Municipal Commission, Madras, to the Hon. W. HUDLESTON, Chief Secretary to Government, Fort St. George, dated Madras, 10th July 1873, No. 621:—

I have the honour to request that you will be good enough to move Government to allow the Commissioners the use, if they can be spared, of two of the Wheatstone's Universal Telegraph Instruments, imported some years back for the use of Government House, until such time as they receive others which have been ordered in England.

2. These instruments are required for working a telegraph line which it is proposed to construct along the Water Delivery Channel from Madras to the Red Hills. The experience gained by the Engineer since the water works have been in operation proves that it is very desirable to establish telegraphic communication between the outlet sluice from the tank at the Red Hills and the Madras end of the Delivery Channel.

No. 165. ORDER THEREON, 23rd July 1873, No. 1046.

Ordered that the President of the Madras Municipal Commission be allowed the use of two out of the seven Wheatstone's Telegraph Instruments in the Store Depôt of the Telegraph Department at Madras.

(True Extract.)

Chief Secretary.

To the Superintendent of Telegraphs, Madras.
,, President of the Municipal Commission, Madras.

No. 621

Madras 12th July 1873.

To

The Honble H. Sandberton
Chief Secretary to Govt
&c &c &c

Sir,

I have the honor to request that you will be good enough to move Government to relieve the Commissioners the rent, if they can be spared, of two of the bullock-=boxes recovered & telegraphs &c=
=boxes, purposed for your Honor, should such there as they receive others which have been ordered in England.

These matters could not be=
=gained for sending a telegraphic line, which would at present be constructed along the water Debing Channel from Chindrus to the Red Hills. The expense incurred by the Engineer since the water works have been in operation

operation proves that it is very desirable to establish Telegraphic communication between the Outlet Sluice across the Inlet, at the Red Hills, and the Madras end of the Retaining Channel.

I am the honor to be,
Sir,
Your most Obt. Servant.
Illegible
President, Mc C.
