Not to be folded or roughly handled

No. 33. Read the following letter from J. B. PENNINGTON, Esq., President of the Municipal Commission, Trichinopoly, to the Honorable D. F. CARMICHAEL, Acting Chief Secretary to Government, Fort St. George, dated Trichinopoly, 16th October 1874, No. 109 :—

I have the honor to enclose the report of the Commissioners on the working of the Trichinopoly Municipality together with the Auditor's report and the required statements in the form annexed to G.O., No. 1646, dated 28th October 1871, for the year 1873-74, and also a copy of the report on the working of Civil Dispensary.

Report on the Working of Trichinopoly Municipality for the Year 1873-74.

The Commissioners for the Town of Trichinopoly have the honor to submit the annual report on its working for the year 1873-74, together with the report of the Auditor, Mr. W. E. Wright, Treasury Deputy Collector, and the required statements.

2. Referring to paragraph 2 of the Auditor's report, the Commissioners have the honor to state that, as the Civil Dispensary has now been removed to the building constructed for that purpose, no rent will be paid in future, and the slight irregularity pointed out will, therefore, not occur again.

3. The receipts for the year (including the opening balance Rupees 5,977-12-11½) amounted to Rupees 87,655-5-4½, against Rupees 78,390 as estimated in the Budget. The increase is made up chiefly of the Rupees 6,000 withdrawn from the funded capital of the Civil Dispensary, and Rupees 3,000 contributed by the Local Fund Board towards the construction of the Dispensary. The whole of the receipts were spent, leaving no balance, as explained in the Revised Budget sent with my letter, No. 96, dated 19th May 1874.

4. To explain the increase and decrease in other items, we append a Statement, A.

5. At the close of the year under report, a sum of Rupees 2,215-13-11 (including old arrears) remained uncollected under the heads House-tax and Profession-tax, out of which Rupees 1,322-7-3 have since been collected, and bills amounting to Rupees 193-1-0 cancelled, leaving a balance of Rupees 523-13-8 under House-tax, and Rupees 176-8-0 under the Profession-tax, the greater part of which will probably have to be struck off as irrecoverable.

6. EXPENDITURE.—The principal items of expenditure were under Grant I., No. 1 a and c, No. 2 a and c, Grant III., No. 4 a, b, and c, and Grant IV., Nos. 1, 2, 5, and 10. Statements II.-A and II.-B explain the expenditure in greater detail, the chief items being a new road, Rupees 1,792; the Civil Dispensary, Rupees 12,825-1-0; drain at Singaratope for carrying off the rain water, Rupees 633; additional stalls at the Mylawsandai Market, Rupees 1,844-3-6; balance of bill for lamp-posts, Rupees 715; balance of account for clock tower, Rupees 735; and the Moat Reclamation Scheme on which no less a sum than 11,353 Rupees were expended. Notwithstanding this liberal expenditure, the Commissioners were

not able to complete the work during the year, as promised in the previous report, chiefly for want of funds. The Government, however, having now contributed Rupees 5,000, and the Local Fund Board Rupees 1,000, the Commissioners hope it may be completed this year, if more funds are available later on. The portion that has been completed (fully seven-eighths of the whole) is universally acknowledged by all competent observers as a most signal success both in a sanitary and æsthetic point of view.

7. *Repairs.*—Rupees 5,199 were spent on twenty-nine roads during the year, as detailed in Statement II.-B. Still larger provision has been made for repairs during the current year, although owing partly to want of funds during the first few months of the year, and partly to want of rain and other causes, there has not yet been as much expended on roads as is desirable, and some of them are consequently not in such good condition as ratepayers have a right to expect. They have, however, been taken in hand now, and will be restored to their usually good condition in the course of a month or so.

8. *Education.*—The Commissioners have spent the full amount sanctioned in the Budget (some bills for result-grants being unpaid at the end of the year), and have now under consideration the question of improving pial schools; and the whole subject will shortly be reported on in reply to G.O., No. 712, dated 27th April 1874.

9. *Sanitary and Miscellaneous—Grant* III.—The Commissioners have spent Rupees 22,119 under this head, the details of which, as given in Statement II., require no explanation.

10. *Lighting.*—Rupees 5,176 were spent under this head, and the lighting of the town has been much improved. It is, however, much too expensive, and the Vice-President is now working out a plan by which it is hoped the cost will be reduced, and at the same time the lighting much improved. There is no doubt, however, that the town requires many more lights, and some of them at any rate will be provided for in next year's Budget.

11. *Planting and Maintenance of Avenues.*—Rupees 3,778 were spent under this head alone (nothing on watering streets).

12. *Health of the Town.*—There was no epidemic during the year, and the deaths from fever fell from 349 to 272. There were no deaths from cholera, and the number who died of small-pox was seventy-seven against 157 last year. On the other hand 388 persons died of bowel-complaints against 212 last year.

13. The total number of deaths registered during the year is 1,574 against 1,383 last year and 1,133 the year before. Estimating the population at 78,000, this gives a death-rate of a little over twenty per mille, which may be pretty nearly right; as the births registered during the year numbered only 1,796 (against 1,476 last year) or twenty-three per mille it must be assumed that the registration of births is still defective. The increase in the death-rate during the year, which was certainly not an unhealthy one, is satisfactory evidence of improved registration of deaths at any rate; and the greater proportional increase in the numbers of births registered,

as compared with the increase in the number of deaths, is proof of some improvement in the registration of births also. The decided reduction in deaths from small-pox is a satisfactory feature in the history of the year, and may be due, in some measure, to greater activity in vaccination, 3,927 persons having been successfully vaccinated this year against 2,693 last year, or five per cent. of the population. Great care is taken by the Commissioners that money is not misappropriated under the system of payment by results which is still in force; and an allowance of Rupees 15 per mensem has been sanctioned to the Senior Hospital Assistant at the Dispensary as an inducement to him to devote his spare time to personal inspection of results.

14. Analyses are being made of the water of the Wyacondan at different points to ascertain where the purest supply could be obtained, and it is hoped that the Water-Supply Sub-Committee will shortly submit proposals for improving the supply to the second, fourth, and fifth Divisions.

15. The drainage of sewage water seems to be a question as much beyond the ability as it is certainly beyond the present means of the Commissioners; and no one has yet suggested a practicable scheme for improving on the present system of covered cesspools. The Commissioners are well-aware of the many defects of that system, especially when householders are poor, and it is impossible for them to construct proper masonry cesspits; but they have not as yet seen their way to any general change, and, as a matter of fact, the cesspools are much less offensive and (apparently) less injurious to health than many more pretentious drains.

16. As observed before, the Moat Reclamation Scheme is the chief original sanitary work of importance that has been undertaken in this Municipality, and perhaps when that is done the Commissioners may find themselves in a position to do something effectual for the permanent improvement of the Silkweavers' quarters and other filthy parts of the town. At present the Commissioners are painfully conscious that they are doing very little more than cleansing the outside of the cup and the platter.

17. A copy of the annual report on the working of the Civil Dispensary is annexed.

18. We append, also, a list giving the names of the Commissioners for the year, the number of meetings held, and the number attended by each Commissioner.

19. The Commissioners are strongly of opinion that the District Engineer for the time being should be *ex-officio* a Commissioner, and should be in charge of all public works; but, as a matter of fact, the District Engineer, even when a Commissioner, has taken very little interest in Municipal work.

(Signed) J. B. PENNINGTON,
President.

Annual Report of the Civil Dispensary, Trichinopoly, for the Official Year ending 31st March 1874.

The condition of public health has been very good; there has been no sign of epidemic disease; small-pox has certainly been present, but not in an alarming form.

2. There has been no epidemic.

3. The principal diseases have been fevers, rheumatic ailments, diarrhœa, and dysentery amongst pilgrims. Bronchitis and asthma; a number of patients are treated for fractures, dislocations, wounds and other injuries requiring surgical aid. This last class of patients seems to apply very readily for assistance.

4. Admissions into hospital from 1st April 1873 to 31st March 1874 :—

2. The receipts exclusive of the opening balance exceeded the estimates by Rupees 8,287, owing chiefly to an appropriation of Rupees 6,000 from the funded capital of the Civil Dispensary on account of the new building, and a contribution of Rupees 3,000 from the Local Fund Board for the same object. An increase of Rupees 1,612 appears under Tolls, but there is a decrease of Rupees 2,486 under "Rates on Houses," and of Rupees 3,251 under "Tax on Arts, &c.," and from Statement IV. it appears that of these amounts only Rupees 1,623 and Rupees 593, respectively, are due to uncollected balances, so that, it would seem, that the receipts under these heads had been over-estimated. Several of the entries in Statement I.-A are irreconcileable with those in Statements I. and II., and a revised Statement I.-A must be submitted.

3. Notwithstanding the increase in the receipts, the whole amount available was utilized within the year. The expenditure on "New Works" amounted to Rupees 34,809, of which Rupees 32,559 were expended on Sanitary and Miscel-

laneous works against an estimate of Rupees 18,844, the more important items being—

	Rs
Moat Reclamation Scheme	11,353
Civil Dispensary Building	12,825
Total ...	24,178

Fully seven-eighths of the reclamation scheme is said to have been completed, and to be generally acknowledged as a most signal success both in a sanitary and æsthetic point of view. From the defective nature of Statement I.-A, the Government are without any information as to how large a portion of the cost of the new Dispensary building was met from Municipal Funds.

4. The expenditure on repairs to roads was less than the estimate by Rupees 3,801, and as a consequence, some of the roads were not in very good order at the end of the year, but it is reported that they have been taken in hand during the current year.

5. It is stated in the report that the full amount sanctioned in the budget was spent on education; but as Statement II. shows an expenditure of only Rupees 1,071 against an estimate of Rupees 1,340, it would seem that the unpaid bills for results-grants were taken into consideration in calculating the expenditure above referred to. In future every effort should be made to meet all legitimate bills for results-grants immediately on presentation. It is presumed that the charge of Rupees 135 on account of "Training Schools" was a payment in arrears, as, during the year under review, all charges on account of Training Schools were to be defrayed from Provincial Funds.

6. The report on the working of the Dispensary is very meagre. It appears that 366 in-patients and 9,146 out-patients were admitted during the year, and that eighty-five of the in-patients were dieted at their own expense.

7. Vaccination, the registration of births and deaths, and the lighting of the town appear to have been satisfactorily attended to, though the expenditure on the latter item is admittedly high, and endeavors are being made to arrange for a reduction.

8. It is observed that the Commissioners are fully alive to the necessity for the further prosecution of drainage and sanitary works generally, but that at the same time they are of opinion that the existing cesspools in Trichinopoly "are much less offensive and (apparently) less injurious to health than many more pretentious drains." This opinion should receive the attention of the Sanitary Commissioner.

DECEMBER.
Nos. 33-34.

Trichinopoly Municipality.—The annual report for 1873-74, on the working of this Municipality, reviewed.

Construction of the Dispensary.
The whole of the receipts were spent, leaving no balance, as explained in the Revised Budget sent with my letter No 96 dated 19th May 1915.

IV To explain the increase and decrease in other items, we append a Statement No 4.

V At the close of the year under report, a sum of Rupees 2,215-13-11 (including old arrears) remained uncollected under the Heads House and Poll of which Rupees 1,322-4-3 have since been collected and bills amounting to Rupees 193-1-, Cancelled; leaving a balance of Rupees 523-13-8 under House Tax and Rupees 176-8-0 under the Profession Tax, the greater part of which will probably have to be struck off as irrecoverable.

VI Expenditure

The principal items of Expenditure were under Sp Act I of 1912 & 2 & 3 G. V c. 2 & 3 G. V c, Sp Act III of 1914 & 4 & 5 G. V c and Sp Act IV of 1914, 2, 5 and 10.

Statements II & VIII explain the Expenditure in great detail, the chief items being a new pandal (Rs 1,792-0-0), the Civil Dispensary Rupees 12,920-1-0, Drainage at Singaravelupet for carrying off the rain water (Rs 633), additional staff at the Mylapore Vandiyar Market Rs 1844-3-6, Balance of bill for lamp-posts Rs 916-0-0, Balance of Account for Block Pavement Rs 930-0-0, and the Moat Reclamation Scheme on which no less a sum than 11,353 Rs. were expended. Notwithstanding this liberal Expenditure the Commissioners were not able to complete the work during the year as promised in the previous report, chiefly for want of Funds.

The Government however having now Contributed Rs 5,000-0-0, and the Local Fund Board Rs 1,000-0-0, the Commissioners hope it may be Completed this year, if more funds are available later on. The portion that has been Completed (fully 7/8ths of the whole) is unanimously acknowledged by all

Co[illegible] [illegible]aliveness [illegible] [illegible] most signal
per[illegible] [illegible]ve in a Sanitary and Esthetic
for[illegible]ew.

VII [illegible]s. Rupees 5799 were spent
and [illegible] during the year as detailed
in S[illegible] [illegible]th has still larger provision
has [illegible] added for repairs during the
Cur[illegible]ar; although owing partly
to [illegible] funds during the first few
mon[illegible] [illegible]s year and partly to want
of [illegible] other causes, there has
not [illegible]en as much expended
of [illegible] as is desirable, and [illegible] and
good [illegible] Consequently not in such
a ri[illegible]ition as rate payers have
hec[illegible]xpect. They have however
be [illegible]ir hand now, and well
Cond[illegible] to their usually good
or [illegible] in the Course of a months

VIII [illegible]- ation. The Commissioners
have [illegible] the full amount sanctioned
in the [illegible] Act (some bills for repairs
Grants [illegible]- remain unpaid at the end of the year)

13 4

and have now under Consideration
the question of improving final Schools
and the whole subject will shortly be
reported on in pursuance of G. O. No. 712
dated 24th April 1895.

IX Sanitary and Miscellaneous
Item VIII

The Commissioners have
spent Rs. 2,119 under this head, the
details of which as given in State-
ment II require no explanation.

X Lighting. Rupees 8,196 was
spent under this head, and the lighting
of the Town has been much improved.
The Vice President is now working
out a plan by which it is hoped
the Cost will be reduced and at the
same time the lighting much improved.
There is no doubt however that the
Town requires many more lights,
and some of them at any rate will
be provided for in next year's Budget.

XI Planting and Maintenance of
Avenues — Rupees 3,778 was spent
under this head also (nothing on
watering streets)

XII Health of the Town — There
was no epidemic during the year
and

and the deaths from fever fell
from 349 to 292. There were
deaths from cholera, and the number
who died of diarrhœa was more than
15% last year. On the other hand
388 persons died of bronchitis
against 279 last year
(xiii) The total number of deaths
registered during the year was 5,211
against 4,383 last year and 4,705
the year before. Estimating the
population at 95,000, this gives
a death-rate of 21.11 per
1,000 per mille which may be set down
nearly right; and the births registered
during the year numbered 3,796
3,796 (against 3,496 last year) or 39.9
per mille it must be understood
that the registration of births is
still defective. There was a rise
in the death-rate during the year
which was certainly not an unhealthy one is satisfactory evidence
of improved registration of deaths
at any rate; and the greater proportional increase in the numbers
of births registered as compared
with the increase in the number of deaths

as proof of some improvement in
the registration of births also. The
decided reduction in deaths from
small pox is a satisfactory feature
in the history of the year, and may
be due in some measure to great
activity in vaccination, 3,997 persons
having been successfully vaccinated
this year against 2,693 last year
or 5 per cent of the population. Great
Care is taken by the Corporation
that money is not misappropriated
under the system of payment by
results which is still in force; and
an allowance of Rupees 50 per month
has been sanctioned to the Senior
Hospital Assistant at the Dispensary as an inducement to him
to devote his spare time to personal
inspection of pervets. (xiv) Analyses
are being made of the water of the
Wyecoodoo at different points
to ascertain where the purest supply
could be obtained and it is hoped
that the water supply sub-committee
will shortly submit proposals for
improving the supply to the 2nd & 3rd
Divisions.

XV The drainage of Sewage & Water seems to be a question as much beyond the ability as it is certainly beyond the present means of the Commissioners; & no one has yet suggested a practicable scheme for improving on the present system of Covered Cess-pools. The Commissioners are well aware of the many defects of that System, especially when houses & holders are poor and it is impossible for them to construct proper masonry Cess-pits; but they have not as yet seen their way to any change, and as a matter of fact the Cess-pools are much less offensive and (apparently) less injurious to health than many more pretentious drains.

XVI As observed before the Great Reclamation Scheme is the chief original Sanitary work of importance that has been undertaken in this Municipality, and perhaps when that is done the Commissioners may find themselves in a position to do something effectual for the permanent improvement

improvement of the Filthy Courts Quarters and other filthy parts of the Town. At present the Commissioners are painfully conscious that they are doing very little more than cleansing the outside of the cup and the platter

XVII A Copy of the Annual Report on the working of the Civil Dispensary is annexed.

XVIII We append also a list giving the names of the Commissioners for the year, the number of Meetings held & the number attended by each Commissioner.

XIX The Commissioners are strongly of opinion that the District Engineer for the time being should be Ex-officio a Commissioner, and should be in charge of all public works; but, as a matter of fact, the District Engineer, even when a Commissioner, has taken very little interest in Municipal Work.

No 109

From Municipal Commrs Office
Pricknopoly 16th October 1871

To J. B. Pennington Esqre
President Municipal Commrs
Pricknopoly

The Chief Secretary to Government
Fort Saint George

Sir,

I have the honor to enclose the Report of the Commissioners on the working of the Pricknopoly Municipality for the month ending the 30th September 1871 with the Auditor's report and the required Statements in the Form annexed to G.O. No. 1646 dated 28th October 1871 for the year 1873-74 and also a Copy of the Report on the working of the Civil Dispensary.

I have the honor to be
Sir,
Your Most Obedient Servant

J. B. Pennington
President

Z.J. 2204/74

Memorandum

The accounts of the Trichinopoly Municipality for the year 1873-74 have been audited by me at the Presidents request.

2. I have carefully gone through the whole of the entries in the Cash Book with the vouchers produced and found all receipts and disbursements properly accounted for. The head and grant to which each item belongs is very properly and correctly written above the entry. The receipt for the rent of the Civil Dispensary building, instead of being signed by the landlord, is invariably signed by the Civil Surgeon to whom are entrusted the payments connected with the rent and establishments of the Institution; with this exception the vouchers were in proper order.

3. The separate registers kept for the several sources of income also received my attention and were found correct. The collections made have been duly brought forward in the Cash Book.

4.——— There was no cash balance on the 31st of March 1874, the income of the year Rs 51,677 with the opening balance of Rs 597 amounting to Rs 87,655 being entirely expended.

5——— A sum of Rs 761-7 against profession and house tax has been written off as irrecoverable.

6.——— The outstanding balance at the close of the year was Rs 2070-10-11, two thirds of which was against House tax.

7.——— Rs 6,000 were withdrawn from the Funded capital of the Civil Dispensary towards the erection of the new buildings: the expenditure on which has been Rs 12825-1-0.

8.——— The Statements I to IV with enclosures, are herewith sent, prepared in accordance with G. O. No 1646 dated 25th October 1871.

Office	4,600	2,637
Miscellaneous		1408
Advances recoverable		350
Refunds		68
Balance	220	"
	78,390	87,658

2. The receipts exclusive of the opening balance exceeded the estimates by Rs. 8,287 owing chiefly to an appropriation of Rs. 6,000 from the funded capital of the Civil Dispensary on account of the new building and a contribution of Rs. 3,000 from the Local Fund Board for the same object. An increase of Rs. 1,612 appears under tolls, but there is a decrease of Rs. 2,486 under "Rates on Houses" and of Rs. 3,251 under "Tax on Arts", and from Statement IV it appears that of these amounts only Rs. 1,502 and Rs. 593 respectively are due to uncollected balances, so that, it would seem, that the receipts under these heads had been over-estimated - several of the entries in Statement IA are irreconcileable with those

those in Statements I and II and a revised Statement IA must be submitted.

3. Notwithstanding the increase in the receipts, the whole amount available was utilized within the year. The Expenditure on New Works amounted to Rs 34,809 of which Rs 32,559 were expended on Sanitary and miscellaneous works against an Estimate of Rs 18,846, the more important items being

Moat Reclamation scheme Rs 11,353
Civil Dispensary building Rs 12,825
Rs 24,178

fully seven-eighths of the reclamation scheme is said to have been completed and to be generally acknowledged as a most signal success both in a sanitary and aesthetic point

point of view. From the defective nature of Statement IA, the Government are without any information as to how large a portion of the cost of the new dispensary building was met from Municipal funds.

4. The Expenditure on repairs to roads was less than the Estimate by Rs 3,901 and as a Consequence, some of the roads were not in very good order at the end of the year, but it is reported that they have been taken in hand during the current year.

5. It is stated in the report that the full amount sanctioned in the Budget was spent on Education, but as Statement II shows an Expenditure of only Rs 1,071 against an Estimate of Rs 1,340 it would seem that the unpaid

unpaid bills for Results grants were taken into consideration in calculating the expenditure above referred to. In future every effort should be made to meet all legitimate bills for Results grants immediately on presentation. It is presumed that the charge of Rs 135 on account of "training schools" was a payment in arrears, as during the year under review, all charges on account of training schools were to be defrayed from Provincial funds.

6. The report on the working of the dispensary is very meagre. It appears that 366 in-patients and 9146 out-patients were admitted during the year and that 85 of the in-patients were

were dieted at their own expense.

7. Vaccination, the Registration of Births and deaths and the lighting of the town appear to have been satisfactorily attended to, though the expenditure on the latter item is admittedly high and endeavours are being made to arrange for a reduction. It is observed that the Commissioners fully alive to the necessity for the further prosecution of drainage and ~~further~~ sanitary works generally but that at the same time they are of opinion that the existing conservancy in Srirangam "are much less offensive and (apparently) less injurious to health than many more pretentious drains". This opinion on the part of should receive the attention of the Sanitary Commissioner.
