Proceedings of the Madras Government, Financial Department,
29th July 1875.

Municipal—Drainage.

No. 192. Read the following letter from L. R. BURROWS, Esq., Acting President of the Municipal Commission, Madras, to the Hon. D. F. CARMICHAEL, Officiating Chief Secretary to Government, Fort St. George, dated Madras, 19th July 1875, No. 267-G. :—

I have the honor to report, for the information of the Honorable the Governor in Council, that Mr. May, the Engineer of the Madras Harbour Works, addressed a letter to me a few days ago recommending, on sanitary grounds, that the sewer which discharges its contents into the sea about 150 yards to the south of the point where the stone embankment for the new harbour will be commenced should be extended by a pipe through the embankment so as to allow its contents to be discharged outside the harbour.

2. I replied that I had no objection to the extension of the sewer provided Government would guarantee expenses, and that, as it would be necessary to get piping of the required dimensions out from England, it would be necessary to obtain the sanction of Government without delay.

3. To-day Mr. May paid me a visit at my office and informed me that he is of opinion that the sewer could not be extended by means of a pipe. He suggested that it should be diverted by land so as to discharge itself at a point north of the stone embankment; but as this would be an expensive operation, and as the sewer will be rendered innocuous by the carrying out of Mr. Clark's system of drainage, which will shortly be put in hand, he thought the sewer might be left alone altogether. At Mr. May's request I report the result of our negotiations on the subject of the sewer.

No. 193. ORDER THEREON, 29th July 1875, No. 1562.

Communicated to the Public Works Department. It will in any case be necessary eventually to prevent any discharge of sewage into the enclosed harbour, and the cost will fall on the Municipality.

Madras

To.

The Honble D. F. Carmichael

Acting Chief Secretary to Government

Ootacamund.

Sir,

I have the honour to report for the information of the Honourable the Governor in Council that Mr. May the Engineer of the Madras Harbour Works addressed a letter to me a few days ago recommending on Sanitary grounds that the sewer, which discharges its contents into the sea about a hundred and fifty yards to the south of the point where the stone embankment for the new harbour will be commenced, should be extended by a pipe through the embankment, so as to allow its contents to be discharged outside the harbour.

2. I replied that I had no objection to the extension of the sewer provided Government would guarantee expenses, and that as it would be necessary to get piping of the required dimensions out from England, it would be necessary to obtain the sanction of Government without delay.

To-day

3.

To-day Mr May paid me a visit at my office and informed me that he is of opinion that the sewer could not be extended by means of a pipe. He suggested that it should be diverted by land so as to discharge itself at a point north of the stone embankment, but as this would be an expensive operation, and as the sewer will be rendered innocuous by the carrying out of Mr Clarke's system of drainage, which will shortly be put in hand, he thought ~~that~~ the sewer might be left alone altogether. At Mr May's request I report the result of our negociations on the subject of the sewer.

I have the honour to be

Sir

Your most obedient Servant

L. R. Burns.

Acting President

Municipal Commission

WMc

Ootacamund 29 July 1875 No 1582

To The Secretary to the Govt of India
Home Department - Sir I have the honor to forward herewith a communication from the Chairman of the Municipal Council of Ootacamund with its enclosures on the subject of the sewage of the Municipal Town emptying itself within the Harbour limits of Madras and to request that you will be pleased to lay the same before the Secretary of State for India in Council for the orders of Her Majesty's Government thereon.

I have &c
