Local Funds—Vaccination.

Read the following papers:—

No. 203. Proceedings of the Board of Revenue, dated 22nd July 1875, No. 2042.

Read the following letter from A. WEDDERBURN, Esq., President of the Local Fund Boards, Coimbatore, to H. E. STOKES, Esq., Acting Secretary to the Board of Revenue, dated 25th June 1875, No. 34:—

As vaccination is now admitted to be a chief element of sanitation, and as the present establishment and results do not half meet the probable annual increase of the population, the Local Fund Board, with the concurrence of the Sanitary Commissioner, have decided on offering further inducements for the spread of vaccination which are—

	RS.
2. (1.) A payment of 1 Anna each successful case to private vaccinators, say	300
These vaccinated 3,000 cases last year in the district.	
(2.) A similar payment to public vaccinators of cases above the number of 1,200 annually, say	300
(3.) Travelling batta to their Superintendent, ten months at 1 Rupee per diem	300
And a Peon to accompany him on Rupees 7 a-month and batta.	100
Total ...	1,000

which it is requested may be transferred from the general head of "Sanitary Establishments and Cleansing Tanks and Wells," Rupees 4,000.

3. It is believed that these payments will stimulate the energies of both private and public vaccinators, and in no other manner whatever can district vaccination be conducted cheaper than at 1 Anna per case. In a crowded town it might be done, as at Coimbatore at 9 Pies, but this is quite exceptional.

4. It has not been found in experience that an increased number of paid vaccinators has resulted in an economical increase of vaccination.

5. The batta to the Superintendent is a most essential point, as the check on the returns depends on his duly visiting every village where operations have been conducted.

6. In some cases, of late, the village Monigars have collected the whole children of the village and work has been done in one day, which, in other cases, would have been the result of three or four months unaided operations of a vaccinator.

7. In this manner we may now hope for success, and to overtake the omissions of past years. The annual average vaccination for the past twenty years

has been 16,885, while the population has been increasing at a probable rate of twenty-five per mille per annum; at thirty per mille the children born would amount to 50,000 annually, the increase in the last Census was found to be 25 per cent. over that of the previous, an increase of 347,000 in five years.

1,153,863 in 1852.
1,393,582 in 1866.
1,740,970 in 1871.

8. Considering the vast amount of youthful population still unprotected, it is hoped the Revenue Board will accord early sanction to the resolution of the Local Fund Board, who now commence their first year of responsibility for the spread of vaccination.

ENCLOSURE No. 1.—Extract from Proceedings of Local Fund Board.

SUBMITTED for the orders of Government.

2. The Board do not think that the grant of additional batta to the Superintendent affords sufficient guarantee that the claims of private vaccinators will be adequately checked; and would have preferred to see an increase in the Supervising Staff. Some information ought to have been given as to the number and qualifications of the private vaccinators. The Board doubt the expediency of sending out into the villages men over whom the authorities have no hold, with *quasi* official support. However the scheme is said to have been approved by the Sanitary Commissioner.

(A true Copy and Extract.)

(Signed) H. E. STOKES,
Acting Secretary.

No. 276.

Referred to the Acting Sanitary Commissioner for any remarks he may desire to make.

OOTACAMUND,
2nd August 1875.

(Signed) CHARLES MACLEAN,
Acting Under Secretary.

No. 204. From Surg.-Major H. KING, A.B., A.M., Acting Sanitary Commissioner for Madras, to the Honorable D. F. CARMICHAEL, Officiating Chief Secretary to Government, Fort St. George, dated Tanjore, 5th August 1875, No. 2.

With reference to Proceedings of the Board of Revenue, No. 2042, dated 22nd July 1875, I have the honor to state that I approve of the principles on which the proposals under reference are founded, *viz.*, that encouragement to private vaccinators to operate, and to public vaccinators to exceed a fixed numerical standard, is desirable, and that efficient supervision will be promoted by grant of travelling allowance in some form to Superintendents.

2. I cannot doubt that in their own interest the Local Fund Boards will take care that the evidence of the successful performance of vaccination whether

by public or private vaccinators is satisfactory, and I do not understand the "private vaccinators" whom the Local Fund Board desire to encourage to be in any way commissioned or officially supported by them.

No. 205. ORDER THEREON, 28th August 1875, No. 1736.

The Governor in Council resolves to sanction the proposal of the Local Fund Board, Coimbatore, which is approved by the Acting Sanitary Commissioner, experimentally for one year, subject to special report at its close.
