No. 404.

To the Officiating Chief Secretary to Government with reference to Rule XIII. of the Notification of the Financial Department, Government of India, No. 3761, dated 15th October 1873, published on page 1674 of the *Fort St. George Gazette* of 28th October 1873.

APPENDIX.

Description of Work.	Expenditure in 1874-75.	Remarks.
Tinnevelly Local Fund Board.	RS. A. P.	
Reconstruction of the ruined portion of the bridge over the Satur River on the High Road from Palamcottah to Madura.	21,961 14 2	The Treasury Deputy Collector, Tinnevelly, reports that the work has been completed.
Calicut Local Fund Board.		
Completion of the Tambrachary Ghaut Road and approach in the Wynaad Section.	55,280 4 8	The Acting Special Executive Engineer, Wynaad, reports through the Treasury Officer, Calicut, as follows:— "The allotment from loan in 1874-75 was Rupees 65,000, the expenditure amounted to Rupees 55,280, leaving a balance of Rupees 9,720. The short expenditure was mainly due to the exceptionally feverish season and the failure of the completion by contract of the iron Warren girder bridge at Kalpetta. "On the first section of the road, the Tambrachary Ghaut, the whole of the drainage has been completed and the roadway either metalled or with metal ready for spreading throughout. All revetments have been finished and parapet walls built in dangerous places. A sum of about Rupees 2,000 will complete this section. "*Second Section—Head of Ghaut to Vythery.*—Metal or gravel has been either spread or collected throughout. The Thalapaya Bridge of 52′ span composite has been completed and several road drains finished. Four more drains are required before this section will be completed. "*Third Section—Vythery to Kalpetta.*—Five culverts have been built, and one is in course of erection. The major portion of the road has been either metalled or gravelled, and sufficient material to complete the whole has been collected. A bridge of 16′ span, originally with a timber superstructure erected by the contractors, Messrs. Hindo and Co., has been reconstructed and a masonry arch substituted. The defective portions of the Kalpetta Bridge have been cut out and the whole rebuilt and strengthened according to revised estimate. The iron superstructure is at site. The completion of the bridge, the building of six more road drains, and spreading of metal or gravel will finish this section. "*Fourth Section—Kalpetta and Sultan's Battery.*—The foundation and part of abutment of the Chalipoya Bridge of 18′ span have been got in. The Cherryapoya 60′ iron Warren girder has been put up and is complete excepting the approaches. The abutments of the Padrepoya Bridge, 52′ span, have been raised 11′. The completion of this bridge, the construction of a 16′ bridge of two culverts of 9′ and three road drains with some two miles of metalling is all the work remaining undone on this section. *Fifth Section—Sultan's Battery to Mysore Frontier.*—The foundation and part of one abutment of the Gunnapadderattam Bridge 30′ has been put in and the foundation of the other abutment commenced. "The Kullur Bridge, 76′ span, has been nearly completed. Out of four culverts repaired between 9′ and 6′ span arc has been completed, another is ready for the arch to be turned, and a third has the foundation in. Gravel or metal has been spread over the major portion of the road. The completion of the above works, a 3′ span culvert, and the erection of the Eddatory iron Warren girder bridge of three bays, one of 60′ and two of 30′, will finish this last section of the road."
Sydapet Local Fund Board.		
For constructing an iron girder bridge across the Courtelliar River on the Great Northern Trunk Road.	4,793 3 2	The Acting Collector, Chingleput, reports, on information received from the Superintending Engineer, that "it appears no progress has been made in the construction of the Courtelliar Bridge from the amount of loan sanctioned for the purpose, and that the sum of Rupees 4,793-3-2 disbursed from the loan grant during 1874-75 was on account of materials previously collected for the erection of piers. "The reason why no progress has been made in the construction of the bridge from the loan amount is that tenders for the same were only recently received and disposed of in G.O., dated 29th July 1875, No. 1561, Financial."
Negapatam Municipality.		
For the construction of a market in that town.	12,500 0 0	The Vice-President of the Municipal Commission, Negapatam, reported on 24th August 1875 through the Treasury Officer, Tanjore, "that a sum of Rupees 11,258-5-7 has been expended up to 30th instant out of the market loan. The site has been levelled; the slaughter-house and a block containing forty-four stalls for selling meat and fish with verandahs have been nearly completed. Advances have been made for the supply of 17 lacs of bricks (5 lacs have already been received) besides the construction of four chunam kilns and a large well."
