Proceedings of the Madras Government, Financial Department,
5th February 1875.

Local Funds—Roads.

No. 74. Read the following Proceedings of the Board of Revenue, dated 25th January 1875, No. 159 :—

Read the following letter from W. S. WHITESIDE, Esq., Collector of North Arcot, to J. GROSE, Esq., Secretary to the Board of Revenue, dated Chittoor, 18th December 1874, No. 687 :—

With reference to paragraph 12 of the Board's Proceedings, dated 18th ultimo, No. 3316, I have the honor to submit, for early sanction, two estimates, together with specification reports and surveys, for the works noted in the margin, both of which are provided for in the budget estimate of the Vellore Circle for 1875-76. The necessity for these works are explained in the Vice-President's letter, dated 2nd instant, No. 282, an extract of which is herewith forwarded.

	Rs.
1. Formation of a road from Ramanaikpolliem to Saduperi	6,360
2. Do. road from trunk road to village of Ammundy, 89 miles ...	1,380
Total ...	7,740

2. The remaining two out of the four estimates referred to in the said paragraph were submitted with my letter, dated 23rd November 1874, No. 599.

Enclosure No. 1.

From C. A. GALTON, Esq., Vice-President of the Local Fund Board, Vellore Circle, to W. S. WHITESIDE, Esq., President of the Local Fund Boards, North Arcot, dated 2nd December 1874, No. 282.

In returning, herewith, the estimates for the marginally noted works received with your letter, No. 116, dated 23rd November, I have the honor to subjoin the explanation as to the necessity thereof.

Two Estimates.
Two Specification Reports.
Three Surveys.

1. Road from Ramanaikpolliem to Saduperi.
2. Do. Ammundy to the trunk road.

2. The first work, road from Ramanaikpolliem to Saduperi, is greatly wanted. The road is used to convey the produce of the villages of Sikanur, Sembedu, Saduperi and other neighbouring villages to the market held at Vellore. As the line is intersected by several irrigation channels and by the surplus water channels of the Torapady, &c., tanks, the traffic is carried on with great difficulty in the rainy season. The present estimate provides for the construction of tunnels, &c., across these channels. This road was included in the Budget for the year 1872-73, but the allotment was subsequently transferred to other works, and since then the villagers have often urged its construction.

3. The second road from Ammundy to the trunk road has been applied for several times by the villagers. The length of it is only three-fourths of a mile, but the District Engineer, who has inspected the line, recommends the construction of it. It is said that the present cart track is not passable at all seasons of the year, and that the supply-channel from the Palar River to the Saduperi tank forms the most difficult obstruction.
