GOVERNMENT OF MADRAS.

FINANCIAL DEPARTMENT.

10th October 1881, No. 1938.

Municipal Reports.

Read the following paper :—

From H. SEWELL, Esq., President of the Municipal Commission, Trichinopoly, to the Chief Secretary to Government, dated Trichinopoly, 29th July 1881, *No.* 2309 [*Current No.* 2019].

I have the honor to forward herewith the annual report of the Municipal Commissioners of Trichinopoly with the prescribed statements for the year 1880-81.

2. The concise report of the Civil Surgeon and the Educational report of the Deputy Inspector of Schools are also enclosed.

3. With reference to the remarks made by the Sanitary Commissioner regarding the accommodation for out-patients in the hospital in his inspection report embodied in G.O., No. 644, of 16th April last, necessary arrangements have been made to enlarge it as will be observed in paragraph 16 of the report. The result of vaccination shows a steady improvement during the year.

4. In regard to the suggestions made by the Sanitary Commissioner about the dry-earth system in his inspection report embodied in the above-quoted Government Order, the Commissioners have already passed estimates for erecting sheds outside every latrine to have dry earth stored up for effectually carrying out the dry earth system.

5. The private scavenging system was tried in the town for some time during the year; but as there was great difficulty in collecting the scavenging fee from the house-owners, and as there was no control over them in any legal way, the method which was in existence previously by voluntary arrangement among the people was reverted to and has been working satisfactorily.

6. Captain Drake-Brockman, R.E., has undertaken to give the Commissioners a complete scheme of drainage for the town; the work is in progress, and I hope the scheme will be in the hands of the Commissioners before the end of this month.

7. All the points noticed in G.O., Financial Department, No. 1661, dated 31st August last, have been reported upon in this office letter, No. 19, dated 21st October 1880, recorded in G.O., No. 2268, dated 6th December 1880, Financial Department.

ENCLOSURE No. 1.

From T. PRITCHARD, Esq., Vice-President of the Municipal Commission, Trichinopoly, to the President of the Municipal Commission, Trichinopoly, dated 9th July 1881, No. 331.

I have the honor to submit my report on the working of the Towns' Improvement Act, III of 1871, during the official year 1880-81.

2. The total receipts during the year amounted to Rs. 84,425-9-8 including the opening balance of Rs. 1,515-8-10 and the expenditure to Rs. 78,280-9-4, leaving a balance of Rs. 6,145-0-4 at the close of the year, besides a deposit balance of Rs. 683-8-4 to the credit of the Municipality. Although the closing balance falls short by Rs. 2,298 of the percentage laid down in G.O., No. 449, dated 16th March 1881, I have the honor to point out that the balance at the end of the year was much greater than that of the previous year (1879-80). The Government Order in question was not issued till within a few days of the close of the year under report, and it was impossible to give its conditions that consideration which the Commissioners will be

careful that they receive in future. The budget estimate for the year was Rs. 87,759-11-5 as sanctioned or modified by the Government Orders marginally noted. The variations between the actuals and the estimated figures are explained in column 7 of Statement VI-B. The decrease in the actual receipts is chiefly owing to the falling off in the receipts from "House and Land Tax," "Taxes on Arts, &c.," "Taxes on Vehicles and Animals," and the "Imperial License Tax."

G.O., dated 13th March 1880, No. 551.
,, ,, 6th August ,, ,, 1521.
,, ,, 17th Nov. ,, ,, 2138.
,, ,, 8th March 1881, ,, 387.
,, ,, 16th ,, ,, ,, 448.

3. *Rate on Houses.*—The House-tax was levied at the maximum rate of 7½ per cent. on the annual valuation of houses and yielded Rs. 21,494-12-5 against the estimate of Rs. 22,000. The decrease is attributable to many buildings in the cantonment having been left vacant by the removal of troops from this station. The collection of the tax was as usual on the contract system, the commission allowed to the contractor having been Rs. 4 per cent. instead of Rs. 4-8-0 as in the previous year.

4. *Rate on Lands.*—The amount due on account of this tax for the year 1879-80 not having been collected in that year owing, as then stated, to the delay caused by the curnams in getting the new registers framed, its realization was undertaken during the year under report, and consequently the Commissioners were not able to collect the tax due for the year 1880-81 during that year. They have, however, undertaken to collect the tax for the two years (1880-81 and 1881-82) during the current year, and have since collected Rs. 4,045-4-0, which was all that was due for the year 1880-81. The commission allowed for the collection of this amount was Rs. 3-4-0 per cent., which is the rate agreed on for the current year.

5. *Taxes on Arts, &c.*—After a cessation of six years this tax has been reimposed in the first five classes of Schedule B to meet the extra charges on account of Police contribution. The demand from this tax was Rs. 11,476. Deducting remissions on appeal, viz., Rs. 3,764, the net demand was Rs. 7,712, of which Rs. 5,023 was collected within the year, leaving a balance of Rs. 2,689 to be collected at the end of the year. The delay in the collection of this tax, as stated in paragraph 4 of the budget report for the current year, is owing to the receipt of a large number of appeal petitions (716).

6. *Taxes on Vehicles and Animals.*—The total receipts from this tax were Rs. 3,971-12-0 against the estimate of Rs. 5,100 and the actuals of the previous year of Rs. 4,494-4-0. The falling off in this item is also attributable to the removal of troops from this station, and the consequent reduction in the number of carriages and animals in almost all the livery stables in this town. The same cause accounts for the lessened collection in the registration fees of carts.

7. *License Tax.*—From this source, as the estimate was based on the classes of the old enactment No. III of 1878, it was expected that Rs. 5,000 would have been realised, but, in consequence of the Amendment Act No. VI of 1880, the original demand itself fell to Rs. 3,885; remissions to the amount of Rs. 280 were granted after hearing objection petitions, and the net demand was Rs. 3,605, of which Rs. 3,275 were collected within the year as also fines amounting to Rs. 865 imposed on defaulters. The whole amount due on account of this tax to Government, viz., Rs. 3,587-8-0,* was paid to the Collector within the year. Finding that so large a sum was realized by fines owing chiefly to defaulters not knowing the period within which payment was due, the Commissioners, in addition to publishing the list in the District Gazette and by beat of tom-tom in the town, now serve each rate-payer with a notice informing him of his liability.

8. *Tolls.*—This item of receipt has been, as usual, under the management of the Local Fund Board, Trichinopoly Circle, and a moiety of the net collections, which amounted to Rs. 15,495, was paid to the credit of the Municipal Funds.

9. *Fines and Fees.*—The receipts under this head were below the estimate by Rs. 358-1-0 and consisted entirely of fines collected in Magisterial cases. The decrease is attributable to the leniency of the Bench of Magistrates.

10. *Rent of Markets, Slaughter-houses, and Gardens.*—The revenue derived from this source amounted to Rs. 11,270-4-4 against Rs. 10,950 in the budget and Rs. 10,740-3-8, the actual receipt of the previous year.

11. *Miscellaneous.*—This consisted of a sum of Rs 3,165 from the sale of sweepings and nightsoil, Rs. 335-8-1 from the sale of avenue trees and grass, and Rs. 804-0-8 from the sale of old materials. It will be observed that there were increased receipts from the two latter sources owing to the damage caused to avenue trees by the late cyclone and the sale of old Commissariat sheds which were handed over with the ground they stood on to the Municipality under G.O., dated 6th November 1880, No. 1033, as also from the sale of empty canisters, &c., and an unclaimed sum of Rs. 56-6-9 having been carried to credit.

---

* This includes a sum of Rs. 162-12-0, being the balance due for 1879-80.

1938
2

12. *Expenditure, Grant I.*—New works cost Rs. 3,135-9-3, of which Rs. 1,143-0-3 were spent in metalling for the first time the Eastern and Western Boulevard roads, Rs. 364 in the construction of a new market in Chinnakadai Street, Rs. 1,538 in building latrines with stone foundations to replace those destroyed during the cyclone, and Rs. 90-9-0 in petty works. The estimate for the latrines amounts to Rs. 3,500, of which Rs. 1,538 only were spent during the year. The remainder will be utilized during the current year from the closing balance of the year under review.

13. *Repairs.*—Rs. 5,782-3-5 were expended for the maintenance of the roads enumerated in Statement II-A, Part II. This includes the wages of road coolies. Buildings cost Rs. 1,080-7-0, and drains of a petty nature Rs. 113.

14. *Tools and Plant.*—Rs. 248-9-6 were spent under this head against Rs. 100 provided in the budget. The actual figures include a sum of Rs. 132-10-0, being the value of lamp posts.

15. *Grant II, Education.*—Under this head Rs 2,558-7-2 were expended during the year against the estimate of Rs. 2,617. As usual four schools received salary grants and fourteen grants under the combined system of aid, the fixed monthly pay of each master being Rs. 3. Twenty-two schools against thirteen in the previous year were paid under the result grant system. The combined and result schools are under the supervision of an Inspecting Schoolmaster who is paid from Municipal funds. Statement V gives details of expenditure of each school. The extract from the annual report of the Deputy Inspector of Schools is herewith submitted, from which it appears that the education imparted in the Municipality is on the whole satisfactory.

16. *Grant III—Sanitation and Medical Services—Municipal Hospital.*—The total expenditure in working this institution was Rs. 17,188-6-7 during the year against the estimate of Rs. 17,668. The establishment cost Rs. 2,722-2-3, or Rs. 154-2-3 over the estimate, as the famine camp servants had to be retained for seven months of the year and extra servants were entertained on emergencies. Rs. 6,522-2-6 were paid on account of the value of medicines purchased against the estimate of Rs. 7,000. Dieting charges amounted to Rs. 6,675-14-4, while the provision in the budget for the same was Rs. 7,200. The saving in this item is due to the smallness of the number of in-patients resulting from an unusually healthy season. The expenditure on account of sundries and contingencies amounted to Rs. 1,268-3-6, which is over the estimate by Rs. 368-3-6. Bedding and clothing alone cost Rs. 737-8-0. During the year under report 1,229 in-patients and 38,860 out-patients were treated against 1,561 and 38,366 respectively in the previous year, when the famine was not quite over. Arrangements are being made for the erection of a male and female ward as the existing accommodation is insufficient.

17. *The Leper Hospital.*—This is merely a branch of the Municipal Hospital and not a distinct institution. Its cost was Rs. 2,100-5-0 against Rs. 2,260 provided in the budget. The remark made with regard to the decreased dieting charges in the Municipal Hospital applies to this institution also. The Civil Surgeon's reports on the Municipal and Leper Hospitals are herewith forwarded.

18. The contribution due to the Medical College was paid during the year on the figures of the regular estimate.

19. *Vaccination.*—The Vaccination staff of the Municipality consists of a first-class vaccinator, three second-class vaccinators, and two probationers. The pay of each of the probationers is Rs. 5 a-month. The vaccine establishment cost Rs. 618-2-7 and the contingencies, which consist of batta to mothers of vaccinated children, the allowance paid for supervision to the Hospital Assistant on the Collector's Establishment, and the remuneration allowed to vaccinators for all cases in excess of the fixed number during the month, amounted to Rs. 295-3-8. The two latter items should, I consider, be brought under the head of "Establishment" and will be so arranged in future. The total number of cases vaccinated was 3,549 during the year against 2,449 in the previous year. The result of the vaccination was as follows for the past three years:—

Year.	Successful.	Unsuccesful.
1878-79	1,896	260
1879-80	2,231	171
1880-81	3,277	183

It will be seen from the above figures that vaccination has made greater progress in the year under report than in the two preceding years. Each successful case during the year 1880-81 cost very nearly Annas 4 and Pies 6.

20. *Registration of Births and Deaths.*—The number of births registered during the year was 822 males and 771 females against 769 males and 740 females in the previous year, and that of deaths was 763 males and 718 females against 715 and 773 respectively in the year 1879-80.

The figures for the four preceding years are noted below :—

Year.	Births.	Deaths.
1876-77	1,838	2,227
1877-78	1,578	2,934
1878-79	1,474	1,577
1879-80	1,509	1,488

The following table shows the mortality from the various diseases :—

Diseases.	1880-81.		1879-80.		1878-79.
Cholera	Nil.	against	Nil	against	4
Small-pox	4	do.	24	do.	45
Fever	359	do.	328	do.	313
Bowel complaint	391	do.	387	do.	511
Other diseases	727	do.	749	do.	704

21. *Conservancy.*—The expenditure under this head amounted to Rs. 15,999-14-11 against the estimate of Rs. 15,931 and the actuals of the previous year of Rs. 17,160-6-5. The decrease from the previous year's expenditure is caused by the reduction of rates in the rubbish and night-soil carts as already reported (*vide* G.O., No. 2,138, dated 17th November 1880). The conservancy establishment, which consists of 5 Inspectors, 14 peons, and 82 scavengers, cost Rs. 6,440-8-6 against Rs. 6,474 in the budget. Rs. 9,263-8-0 were spent on account of the conservancy carts, &c., the estimate for the same amounting to Rs. 9,197. The contingencies cost Rs. 274-14-2, while the sum spent on account of cleaning tanks, &c., was Rs. 21-0-3.

22. The contribution payable on account of additional sanitary establishment remains unpaid pending receipt of bills.

23. Sixty-six carts have been employed on the whole, of which 45 are for removing sweepings and 21, which are covered ones, for removing nightsoil from the latrines.

24. *Grant IV, Lighting.*—The total expenditure on account of lighting was Rs. 2,973-12-3, of which the cost of establishment amounted to Rs. 1,501-8-3 and the contingencies to Rupees 1,472-4-0. The provision for the latter was Rs. 1,850 in the budget, and the saving in this item of expenditure is due to the price of kerosine oil having fallen in the local market. 252 lamps were lit during the year.

25. *Markets and Slaughter-houses.*—The cost on account of this item was Rs. 1,217-4-10 against the actuals of the previous year of Rs. 1,250-12-0, while the receipts from these sources were greater in the year under report as will be seen from paragraph 10.

The stalls of the general market were repaired at a cost of Rs. 137 (*vide* Statement II-A, Part II).

In compliance with resolutions passed at a meeting of the Commissioners to consider steps for improving the condition of the market so unfavorably reported on by Dr. Furnell in his report embodied in G.O., No. 644, dated 16th April 1881, the butchers' stalls have been whitewashed, the floor remade with concrete, the urinal floor asphalted and its walls tarred, the drainage of the market improved by the construction of a wide masonry drain running through it from end to end, and the whole of the interior regravelled. The staff of the scavengers has been increased, and every effort is being made to improve its sanitation.

26. Rs. 506-6-0 were spent on account of census operations within municipal limits during the year.

27. *Grant V, Supervision and Management.*—The slight increase in the cost of the head office establishment has been explained in the previous year's report.

28. *Drainage Scheme.*—Levels are being taken with a view to the introduction of an improved system of drainage within the town.

29. *Health of the Town.*—General health in the town throughout the year was on the whole satisfactory. Statistics of mortality have been already given in paragraph 20.

30. The accounts for the year were audited by Mr. Kæneman, Accountant in the Chief Auditor's Office, South Indian Railway, Negapatam, from whose report herewith forwarded it will be seen that the accounts were kept with care.

31. With reference to the Auditor's remark in the concluding sentence of paragraph 3 of his report, I have the honor to state that the agreements executed yearly by the contractors of markets, &c., show the fixed or periodical payments due by them, and the Auditor could have verified these payments by a reference to the agreements. The taking of any further voucher in support of these payments would be superfluous.

32. Adverting to paragraph 5 of the report, I beg to state that the cash book is checked by the Manager with the collection registers and vouchers and signed by him daily. A statement showing the transactions of each week is prepared from the entries in the cash book, placed before the Commissioners at meetings, and signed by the Chairman. This has hitherto been considered sufficient.

1938/3

33. Referring to paragraph 6 of the report, I would observe that the amounts of the several bills are debited in the cash book and cheques issued to Commissioners of divisions who personally disburse the money; but, as this is not always done on the day the cheques reach them, the dates of debit and of actual payments cannot correspond, from which reason the dates of payment are not entered on the bills. The Auditor's suggestion regarding erasures will be strictly attended to in future, but I hardly think that three, which was all he found this year, merit being spoken of as "great numbers."

34. Adverting to paragraph 9, the expediency of entering the value of other than real property, in foot-note to Statement II is doubtful. A register showing the value of movable property is kept. The difference in the value of Municipal premises is due to greater accuracy in valuation.

Concise Report for 1880-81—*Municipal Hospital, Trichinopoly.*

The buildings are suitable, but the accommodation is insufficient although recently the diarrhœa and venereal cases were transferred to the buildings formerly occupied by the Lock Hospital and now in the possession of the Municipality. Separate wards for the reception and treatment of European and East Indian patients, as well as for the native caste patients are much needed. The male and female latrines now in use are too small for the number of patients of either sex under treatment, but sanction has been accorded for the construction of additional latrines, and I hope they will be soon completed. The buildings are in good repair. The supply of bedding and clothing is insufficient. Two almirahs are required to complete the furniture. This has been provided for in the budget, and the almirahs will be duly supplied.

2. During the year under report there were no meetings of Dispensary Sub-Committee, but all dispensary matters requiring attention are discussed at the weekly meetings in the Municipal Office.

3. The prevailing diseases during the year were as usual fevers, rheumatism, and venereal affections, conjunctivitis, and bowel complaints, skin diseases and abscesses and ulcers. Wounds and injuries were also causes of frequent admissions into hospital. The mortality has been lower than in the previous year.

4. None.

5. None.

6. Compared with the previous year there is a slight falling off in the numbers of admissions amongst the out-patients (viz., of 1,247), and this is attributable to the heavy rains of October November, and December last, which prevented patients from resorting to the dispensary, also to the fact that employment was more easily obtained. Likewise amongst the in-door patients there was a decrease of 670 admissions into hospital as compared with the previous year. This is probably partly due to the return to their villages of famine-stricken people and partly to the low prices of food grains.

7. The lying-in ward and the wards for the caste sick and self-supporting patients continue to be utilized as usual, but occasionally the accommodation is found insufficient for the reception of native caste patients as has already been noticed under paragraph 1 of this report. The temporary sheds for the treatment of famine-stricken patients were closed on the 21st November 1880, and on that date those sheds were blown down by the cyclone. Patients suffering from diarrhœa and venereal affections were, however, immediately transferred to the old Lock Hospital buildings, where they are now being treated. The cost of the maintenance of this institution has been somewhat reduced as compared with the expenditure of the previous year. The item of expenditure of medicine furnished by the Municipal Commission, viz., Rs. 7,949-5-6, is excessive, but includes the arrears of the previous year as shown below :—

	RS.	A.	P.
1879-80	4,249	8	2
1880-81	3,699	13	4
Total	7,949	5	6

The public health was on the whole generally satisfactory although fevers of a malarial type were very prevalent during the latter part of the period. The sanitary condition of the station is indifferent. The burial of the Mahomedans dead in the very centre of the thickly-populated parts of the town and in close proximity to tanks which are used by the people for drinking purposes is a matter for urgent consideration; and, unless immediate steps are taken to prevent the contamination of the tanks, the result in coming years may be very seriously detrimental to public health. It is a pity that the system of dry earth conservancy is not thoroughly carried out in the latrines of the town.

TRICHINOPOLY,
1st *April* 1881.

(Signed) J. NORTH, Surgeon,
Acting Civil Surgeon.

EXTRACT from the Annual Report of the Deputy Inspector of Schools, Trichinopoly District, to the Inspector of Schools, Fourth Division, dated 13th May 1881, No. 533.

8. *Municipal Aided Schools—Fort Hindu School, Trichinopoly.*—This is a very efficiently-conducted Aided Primary School, and it was inspected by me on the 9th December. The answering of the whole school was very satisfactory. In the highest class, which is of the standard of a second class, however, there were four boys that were utterly unfit for the class. The teachers are all passed and trained men and discharge their duties with great willingness. The strength of the school at the commencement and close of the year was sixty and sixty-four respectively. Nine pupils in the Upper and nine in the Lower Primary examinations passed from this school. The manager of this school takes a warm interest in its progress.

9. *S.P.G. Schools—Worriyur, Tennoor, and Fort Infant.*—These schools were inspected by me on 23rd November and 15th December 1880 and 16th March 1881 and produced satisfactory results. In efficiency Worriyur stands first, Tennoor next, and the Infant School third. Tennoor school was very weak in attainments in the previous year, but by great exertion the condition of the school has materially improved this year. The teachers of these schools work well, and their work is strictly supervised by the Manager. The strength of these schools have been nearly the same as they were at the close of the year previous. The Worriyur School passed eleven in the Upper Primary and eighteen in the Lower Primary Examinations; Tennoor, six in the Upper and twenty-two in the Lower Primary Examinations; and Fort Infant, six in the Lower Primary Examination.

* * * *

18. *Trichinopoly Municipality—Municipal Combined Schools.*—In addition to the Aided Salary System Municipal Schools of Worriyur, Tennoor, and Fort Hindu and Infant, there are fourteen Municipal Primary Schools on the combined system. The teacher of each of these schools gets a monthly fixed pay of 3 rupees from the Municipality. They were all examined in the year and earned a grant of Rs. 239-6-0. The whole of this amount, together with Rs. 44-12-0, which was sanctioned for last year (but was undrawn), was paid this year. These continue to do very useful work to the localities where they are situated. As the pay is only Rs. 3, and as the Municipality does not undertake to maintain the schools entirely by having control over the school fees and defraying all the charges, no passed men can be induced to take up this post; consequently all the teachers are unpassed men.

The following table gives the particulars of the Combined Schools in the Municipality:—

Schools.	NUMBER OF PUPILS ON 31ST MARCH		Total Cost to the Municipality.			Condition of the Schools.
	1880.	1881.	RS.	A.	P.	
Andar Street	35	36	47	12	0	Middling.
Rock Fort	33	38	52	12	0	Poor.
Varadarajaperumal Covil Street	42	45	75	4	0	Good.
Pandamungalem	32	27	50	8	0	Good.
Edatheru Palakarai	47	59	58	8	0	Fair.
Metoo Chintamony	16	31	44	14	11	Fair.
Jaffer Sahib's Street	36	33	59	0	0	Poor.
Kosipoliem	58	52	53	4	0	Fair.
Virupatchipuram	29	23	56	0	0	Fair.
Manjakara Street	63	54	59	4	0	Good.
Periakammala Street	33	40	46	8	0	Poor.
Puthur	39	35	47	2	0	Middling.
Vasandaroya Pillay Street	43	29	81	0	0	Good.
Tennoor	48	36	62	4	0	Good.
Total ..	554	544	789	0	11	

19. *Municipal Result Schools.*—In this Municipality twenty-two schools (exclusive of girls' schools) were examined against thirteen of the previous year. These twenty-two schools earned a result grant of Rs. 994-8-0, of which Rs. 11-8-0 remained unpaid at the close of the year. The average grant earned by each school is Rs. 45-3-3. This class of schools on the whole have produced very fair results. Nine of the result schools are under Mission management and thirteen under native management. There are also eleven unaided result schools, which are under improvement and which will have to be aided during 1881-82. In addition to these there are lots of other schools—a College—Higher and Middle Class of schools for boys and girls—which serve to educate the children in the Municipality without any expenditure to it. On the whole the education imparted in the Municipality is satisfactory. There are in addition nine girls' schools which I shall take under the head of Female Education.

* * * *

(True Extract.)

(Signed) C. APPIAH SASTRY,
Deputy Inspector of Schools, Trichinopoly.

Concise Report for 1880-81—*Leper Hospital, Trichinopoly.*

For the period under review there were sixty admissions with eight deaths amongst in and out patients against seventy-eight admissions with four deaths in the previous year. The decrease of eighteen admissions was owing to the number of cases under treatment at one and the same time being restricted to fifteen, and the increase of four deaths was due to the fact that the lepers resorted to the institution at an advanced stage of disease with various complications.

2. The building now in use as the Leper Hospital is an old jail situated in the heart of the town; part of it is occupied by the pauper patients till sufficient wards are erected in the Municipal Hospital for their accommodation.

TRICHINOPOLY,
1st *April* 1881.

(Signed) J. NORTH, Surgeon,
Acting Civil Surgeon.

ORDER THEREON, 10th October 1881, No. 1938.

The receipts and charges of the Trichinopoly Municipality for 1880-81 are contrasted below with the estimates for the year and the actuals for the previous year:—

RECEIPTS.

	Actuals, 1879-80.	Estimate, 1880-81.	Actuals, 1880-81.
	RS.	RS.	RS.
Balance brought forward	1,785	850	1,515
Rates on Houses and Lands	22,496	29,010	25,502
Taxes on Arts	..	6,000	5,023
Taxes on Vehicles and Animals	4,494	5,100	3,972
Registration of Carts	4,085	4,200	3,940
Tolls	12,750	15,490	15,495
Licenses	1,231	1,200	1,240
License Tax	6,971	5,200	4,140

2. The receipts, exclusive of License Tax collections, amounted to Rs. 78,771 against Rs. 82,560 estimated and Rs. 69,277 actuals for the previous year. The decrease below the estimate was distributed generally under all the heads of taxation with the exceptions of Tolls and Licenses. No portion of the land-rate for the year was collected, but the arrears of former years were realized almost in full. The removal of troops is again alleged to have prejudicially affected the revenue from vehicles and the registration of carts. The profession-tax was reimposed during the year, but yielded Rs. 977 less than the estimate. The amount remitted on appeal or otherwise was very large—no less than Rs. 3,764—and this is sufficient to show that the original assessments were incorrect. 23·4 per cent. of the demand remained uncollected at the close of the year. The collection of taxes was carried out under a system of contract. It is not stated whether, and if so to what extent, recourse was had to coercive processes. A grant of Rs. 1,403 from the Prince of Wales' local reception fund towards the construction of a ward in the Municipal Hospital was a partial set-off against the general diminution of income above stated. Compared with the previous year there was an increase of Rs. 2,745 in the share of tolls handed over by the Local Fund Board, and a decrease of Rs. 5,000 in the contribution from Local Funds on account

---

1938/5

of the hospital. With regard to this, it is observed that the contribution for 1879-80 was doubtless sanctioned as a special case; but, if, as is probable, the hospital is of great advantage to the surrounding country, there is no reason why a permanently-increased contribution should not be secured. The Government regret to learn that the private scavenging service introduced during the year proved a failure. It is not understood why the collection of scavenging fees should be attended with more difficulty in Trichinopoly than elsewhere.

3. The expenditure aggregated Rs. 74,693 excluding License Tax against Rs. 74,950 estimated and Rs. 70,878 actually spent in 1879-80, and was distributed in the proportions noted below:—

Grant I	14·8
" II	3·4
" III	49·6
" IV	24·8
" V	6·9
Debt and Refunds	·5

4. There was a saving of Rs. 1,622 in the allotment under Grant I, Public Works, owing to the provision of Rs. 3,500 for latrines not having been fully utilized. It is presumed the roads in the town, the repair of which cost Rs. 5,782, were kept in good condition.

5. The budget provision for Education was almost entirely expended. The attendance at the 4 salary grant schools remained very much the same as it was during the previous year, but there was a reduction of Rs. 135 in the salary grant expenditure, due no doubt to increased receipts from fees and other sources. The 14 combined system schools also show little change. The result grant schools numbered 22 against 13 in 1879-80. The introduction of the new rules sufficiently accounts for the increased grant under this head. The report of the Deputy Inspector is on the whole favorable as regards the working of these schools. Out of a school-going population of 5,540 boys and 5,937 girls there were 3,646 boys and 434 girls under instruction in the various schools of the town, aided and unaided.

6. The number of persons treated at the hospital and dispensary is stated to have been 1,229 in and 38,860 out patients against 1,5[illegible] and 38,366 respectively in 1879-80. The Civil Surgeon observes that there was a falling off in the number of out-patients, a statement which the figures given do not bear out. The working of the lying-in ward is not sufficiently noticed in the Civil Surgeon's report. The numbers relieved should have been stated.

7. Vaccination shows steady improvement, the numbers operated on having risen from 2,449 to 3,549. The cost of each successful case was 4 annas and 5 pies against 6 annas and 5 pies in 1879-80.

8. The returns of vital statistics show the following results:—

	Births.	Rate per Mille.	Deaths.	Rate per Mille.
1879-80	1,509	19·7	1,488	19·4
1880-81	1,593	20·8	1,481	19·3

9. The Government gather from the Medical Officer's report that the sanitary condition of the town remains indifferent in spite of the large expenditure (Rs. 16,000) on conservancy. The attention of the Commissioners is drawn to that officer's remark regarding the objectionable situation of the Mahomedan burial-ground. The contribution for Sanitary inspection remained unpaid at the end of the year.

10. The other items of expenditure do not call for remark.

11. The License Tax account prescribed by G. O. 22nd August 1879, No. 1614, has not been submitted. The total of the details given in Statement II-B for market establishments does not tally with the amount shown under the corresponding head in Statement II.

12. The Government note that a drainage scheme for the town is under preparation and will shortly be considered by the Commissioners and that considerable improvements have been effected in the sanitary condition of the market. From the President's report it also appears that steps have been taken to carry out the recommendations of the Sanitary Commissioner in regard to the adoption of the dry earth system and other matters.

13. The Auditor's report has received careful attention. In future the daily cash chittah should be signed by the Vice-President and not merely by the Manager; and the value of all Municipal property, whether movable or immovable, should be included in the statement of assets and liabilities.

OCTOBER.

Municipal Reports.—Report on the working of the Trichinopoly Municipality during 1880-81, reviewed.

Ht.
13.6.81

Negapatam, 11th June 1881.

1938/28 7

To

The President
Municipal Commission
Trichinopoly

Sir

1 I have the honor to report that in compliance with instructions contained in extract of proceedings of Municipal Commissioners, dated 8th February last I have audited the accounts of the Trichinopoly Municipality

2 I have carefully checked every entry of receipts in the cash book with the vouchers and collection registers laid before me, and I have seen that all the receipts and disbursements have been brought to account in the Ledger, and

thence into the Statements required by Government

3 In the course of my examination of the items of receipts I found them in accord with the vouchers and collection registers produced and with the exception of three items, all remittances to the Treasury were supported by acknowledgements from the Treasury, the instances in which these receipts were wanting were pointed out to the Cashier who explained that they had been accidentally destroyed but that duplicates could be obtained. No vouchers were produced for fixed or periodical payments by Contractors and others, for the rent of markets, stalls, slaughterhouses, gardens &c &c and the correctness of these items, therefore, did not admit of any check.

4 During the year under audit a considerable amount has been credited to the Municipality by transfers from Local Funds on account of tolls collected, and the various sums have been accounted for in the Cash book upon mere letters of advice from the Vice President of the Local Fund Board to the Vice President of the Municipality I would suggest, as a more correct way of accounting, that such letters of advice be in future accompanied by a receipt from the Treasury to show that the amount has been credited to the Municipality, upon which a regular receipt should then be granted to the Local Fund Board for the amount received

5 The daily collection registers, which represent a record of the whole amount received on account of taxes, are in no instance verified by the Vice President or any other responsible Officer, they merely contain the initial of the Cashier, and in some instances that of the Manager, set against the total of each day's collection accounted for by him in the Cash book. As these registers are books, which contain

the details of monies received, for which the Cashier is directly responsible, I consider they ought to be verified by same responsible Officer, as much as any other cash voucher.

6. I have carefully compared the disbursements with the vouchers filed in support of them and found them correct - In a good many instances the dates upon which payment was made has not been entered upon the bills, in other respects this portion of the account proved very satisfactory, every voucher contained the Authority of the Vice President "To Pay", and, although most of the bills were not allocated, evidently great care had been taken to enter them under the proper account to which they were chargeable.

7 I must draw attention to the great number of erasures which occur in the cash book, a practice which should be discontinued in so important a book, if a figure requires

correction it should be scored out and the correct figure placed above it and initialed.

8 In Statement I, it will be observed, the receipts under taxes on lands have been estimated at Rs 7007. 3. 0 whereas not a rupee has been collected during the year, the amount of Rs 4007. 3. 0 collected under this head, represent "arrears".

9 In foot note to Statement. II. it will be observed an amount of Rs 79030. is quoted as representing the value of premises owned by the Municipality; In looking at the list giving the details of this amount I found it a very rough statement indeed, containing a record only of House and Land property, it does not contain the value of any plant, tools, or surgical and surveying instruments the Municipality may possess, I would also point out that the

value of this same property was in the preceeding Year estimated at only Rs 39,543. 14. 0., vide note to Statement II of accounts for that Year.

10 The Year closes with a balance to the credit of the Municipality of R. 6828. 8. 8 – of which R. 683. 8. 4 belongs to the deposit account.

I have the honor to be
Sir
Your most Obt Servant

CURRENT No. 2019

29th July 1881.

No: 2309.

1938/31 33

From,

The President

Municipal Commission

Trichinopoly

To,

The Chief Secretary

to Government

Financial Department

Ootacamund

Sir,

I have the honor to forward herewith the Annual report of the Municipal Commissioners of Trichinopoly with the prescribed statements for the year 1880-81.

2. The Concise report of the Civil Surgeon and the Educational report of the Deputy Inspector of Schools are also enclosed.

DISPOSED OF 10 OCT 81 BY G.O. No.

3. With reference to the remarks made by the Sanitary Commissioner regarding the accommodation

for out-patients in the Hospital in his inspection report embodied in Government Order No: 644 of 16th April last, necessary arrangements have been made to enlarge it as will be observed in para. 16 of the report. The result of vaccination shows a steady improvement during the year.

4. In regard to the suggestions made by the Sanitary Commissioner about the dry-earth system in his inspection report embodied in the above quoted Government Order, the Commissioners have already passed estimates for erecting sheds outside every latrine to have dry earth stored up for effectually carrying out the dry earth system.

5. The private scavenging system was tried in the Town for

some time during the year, but as there was great defficulty in collecting the scavenging fee from the house owners and as there was no control over them in any legal way, the method which was in existence previously by the voluntary arrangement among the people was reverted to and has been working satisfactorily.

6 Captain Drake Brockman R.E. has undertaken to give the Commissioners a complete scheme of drainage for the Town; the work is in progress and I hope the scheme will be in the hands of the Commissioners before the end of this month.

7. All the points noticed in Government Order, Financial Department No: 1661 dated 31st August last, have been reported upon in this Office letter No 19

dated 21st October 1880 recorded in Government Order No 2268 dated 6 December 1880, Financial Department.

I have the honor to be,
Sir,
Your most Obedt Servant,

President

Enclosures. 20.

Submits the annual report of Trichinopoly municipality with the prescribed statements for the official year 1880 – 81.

Trichinopoly Municipal Comm's office
9th July 1881

No 331

1938
34

From,

The Vice-President,
Municipal Commission,
Trichinopoly

To

The President,
Municipal Commission,
Trichinopoly

Sir,

I have the honor to submit my report on the working of the Town's Improvement Act III of 1871, during the official year 1880-81.

2. The total receipts during the year amounted to Rs 84,425„9„8 including the opening balance of Rs 1515„8„10 and the expenditure to Rs 78,280„9„4 leaving a balance of Rs 6145„0„4 at the close of the year, besides a deposit balance of Rs 683„8„4 to the credit of the Municipality. Although the closing balance falls short by Rs 2,298 of the percentage laid down in G. O. No. 449 d/ 16th March 1881, I have the honor to point out that the balance at the end of the year was much greater than that of the previous year (1879-80). The G. O. in question was not issued till within a few days of the close

of the year under report and it was impossible to give its conditions that consideration which the Commissioners will be careful that they receive in future. The Budget Estimate for the year was Rs 87,759-11-5, as sanctioned or modified by the G. Os marginally noted. The variations between the actuals and the estimated figures are explain-ed in column 7 of Statement VI B. The decrease in the actual receipts is chiefly owing to the falling off in the receipts from "House and Land Tax", "Taxes on Arts &c". "Taxes on vehicles and Animals" and the "Imperial License Tax".

G. O. d/13th March/80 No 551
G. O. d/6th August/80 No 1521
G. O. d/17 Nov/80 No 2138
G. O. d/8th March/81 No 387
G. O. d/16th March/81 No 448

3 Rate on Houses:— The house tax was levied at the maximum rate of 7½ per cent on the annual valuation of houses and yielded Rs 21,494-12-5 against the estimate of Rs 22,000. The decrease is attributable to many buildings in the Cantonment having been left vacant by the removal of troops from this station. The collection of the tax was, as usual, on the contract system, the commission allowed to the Contractor having been Rs 4 percent instead of Rs 4½ as in the previous year.

4 Rate on Lands:— The amount due on account of this tax for the year 1879-80, not having

having been collected in that year, owing, as then stated, to the delay caused by the surveyors in getting the new Registers framed, its realization was undertaken during the year under report and consequently the commissioners were not able to collect the tax due for the year 1880-81 during that year. They have, however, undertaken to collect the tax for the two years (1880-81 and 1881-82) during the current year and have since collected Rs 4045-4-0 which was all that was due for the year 1880-81. The commission allowed for the collection of this amount was Rs 3-4-0 percent which is the rate agreed on for the current year.

1938/38 37

Taxes on Arts &c

5. After a cessation of six years, this tax has been reimposed in the first five classes of Schedule B to meet the extra charges on account of Police Contribution. The demand from this tax was Rs 11,476. Deducting remissions on appeal viz Rs 3,764, the net demand was Rs 7,712, of which Rupees 5,023 was collected within the year, leaving a balance of Rs 2,689 to be collected at the end of the year. The delay in the collection of this tax as stated

in para 4 of the Budget report for the current year is owing to the receipt of a large number of appeal petitions. (716)

Taxes on Vehicles and Animals

6. The total receipts from this tax were Rs 3,971„12„0 against the estimate of Rs 5,100 and the actuals of the previous year of Rs 4,494„4„0. The falling off in this item is also attributable to the removal of troops from this station and the consequent reduction in the number of carriages and animals in almost all the livery stables in this town. The same cause accounts for the lessened collection in the registration fees of carts.

License Tax

7. From this source, as the Estimate was based on the classes of the old Enactment No III of 1878, it was expected that Rs 5,000 would have been realized, but in consequence of the amendment Act No VI of 1880, the original demand itself fell to Rs 3,885; remissions to the amount of Rs 280 were granted after hearing objection petitions and the net demand was Rs 3,605; of which Rs 3,275 were collected within the

year

year, as also fines amounting to Rs 85 imposed on defaulters. The whole amount due on account of this tax to Government viz Rs 3,587„8„0* was paid to the Collector within the year. Finding that so large a sum was realized by fines owing chiefly to defaulters not knowing the period within which payment was due, the Commissioners in addition to publishing the list in the District Gazette and by beat of tom-tom in the town, now serve each rate-payer with a notice informing him of his liability.

Tolls

8. This item of receipts has been, as usua under the management of the Local Fund Bo Trichinopoly Circle, and a moiety of the re collections which amounted to Rs 15,495 was p to the credit of the Municipal Funds.

Fines and Fees

9. The receipts under this head were belo the estimate by Rs 358„1„0 and consisted entir of fines collected in Magisterial cases. The d -crease is attributable to the leniency of the B of Magistrates.

Rent

---

* This includes a sum of Rs 162-12-0, being the balance due for 1879-80.

Rent of Markets, Slaughter houses and gardens.

10. The revenue derived from this source amounted to Rs 11,270„4„4 against Rs 10,950 in the Budget, and Rs 10,740„3„8, the actual receipt of the previous year.

Miscellaneous.

11. This consisted of a sum of Rs 3,165 from the sale of sweepings and Night soil; Rs 335„8„1 from the sale of avenue trees and grass, and Rs 804„0„8 from the sale of old materials. It will be observed that there were increased receipts rom the two latter sources owing to the damage caused to avenue trees by the late cyclone and he sale of old Commissariat sheds which were anded over with the ground they stood on to the Municipality, under G. O. dated 6th November 1880, No. 1033; as also from the sale of empty anisters &c. and an unclaimed sum of Rupees 6„6„9 having been carried to credit.

Expenditure. Grant I.

2 New works cost Rs 3,135„9„3; of which s 1143„0„3 were spent in metalling for the first ime the Eastern and Western Boulevard roads;

Rs

Rs 364 in the construction of a new market in Chinnakadai Street; Rs 1,538 in building latrines with stone foundations to replace those destroyed during the cyclone, and Rs 90„9„0 in petty works. The Estimate for the latrines amounts to Rs 3,500, of which Rs 1,538„0„0 only were spent during the year. The remainder will be utilized during the current year from the closing balance of the year under review.

Repairs.

13 Rs 5,782„3„5 were expended for the maintenance of the roads enumerated in Statement II A–part II. This includes the wages of road coolies. Buildings cost Rs 1,080„7„0, and drains of a petty nature Rs 113.

Tools and Plant.

14. Rs 248„9„6 were spent under this head against Rs 100 provided in the Budget. The actual figures include a sum of Rs 132„10„0, being the value of lamp posts.

Grant II. Education

15. Under this head Rs 2,558„7„2 were expended during the year, against the

estimate of Rs 2617. As usual 4 schools received salary grants and 14 grants under the combined system of aid, the fixed monthly pay of each master being Rs 3. 22 schools against 13 in the previous year were paid under the result grant system. The combined and result schools are under the supervision of an Inspecting School Master who is paid from Municipal funds. Statement V gives details of expenditure of each school. The extract from the annual report of the Deputy Inspector of Schools is herewith submitted, from which it appears that the education imparted in the Municipality is on the whole satisfactory

Grant III. Sanitation and Medical Services

Municipal Hospital

16. The total expenditure in working this Institution was Rs 17,188 " 6 " 7 during the year against the estimate of Rs 17,668. The establishment cost Rs 2,722 " 2 " 3 or Rs 154 " 2 " 3 over the estimate, as the famine camp servants had to be retained for 7 months of the year and extra servants were entertained on emergencies. Rupees 6,522 " 2 " 6 were paid on account of the value of

medicines

medicines purchased against the estimate of Rs 7000. Dieting charges amounted to Rs 6,675 " 14 " 4, while the provision in the budget for the same was Rs 7200. The saving in this item is due to the smallness of the number of in-patients resulting from an unusually healthy season. The expenditure on account of sundries and contingencies amounted to Rs 1,268 " 3 " 6 which is over the estimate by Rupees 368 " 3 " 6. Bedding and clothing alone cost Rupees 737 " 8 " 0. During the year under report 1227 in-patients and 38,860 out-patients were treated against 1,561 and 38,366 respectively in the previous year, when the famine was not quite over.

Arrangements are being made for the erection of a male and female ward as the existing accommodation is insufficient.

1938
38
40

The Leper Hospital

17. This is merely a branch of the Municipal Hospital and not a distinct institution. Its cost was Rs 2100 " 5 " 0 against Rs 2,260 provided in the Budget. The remarks made with regard to the decreased dieting charges in the Municipal Hospital applies to this Institution also. The Civil Surgeon's reports on the Municipal and Leper Hospitals are herewith forwarded

18

18 The contribution due to the Medical College was paid during the year on the figures of the regular Estimate.

Vaccination

19. The Vaccination staff of the Municipality consists of a first class vaccinator, three second class vaccinators and two probationers. The pay of each of the probationers is Rs 5 a month. The vaccine Establishment cost Rs 618„2„7 and the contingencies which consist of batta to mothers of vaccinated children; the allowance paid for supervision to the Hospital Assistant on the Collector's Establishment and the remuneration allowed to vaccinators for all cases in excess of the fixed number during the month amounted to Rs 295„3„8. The two latter items should, I consider, be brought under the head of "Establishment" and will be so arranged in future. The total number of cases vaccinated was 3,549 during the year against 2,449 in the previous year. The result of the vaccination was, as follows, for the past three years.

Year.	Successful	Unsuccessful
1878-79	1896	260
1879-80	2231	171
1880-81.	3277	183

It will be seen from the above figures that vaccination has made greater progress in the year under report than in the two preceding years. Each successful case during the year 1880-81 cost very nearly annas 4 and pies 6.

Registration of Births and Deaths.

20. The number of births registered during the year was 822 males and 771 females against 769 males and 740 females in the previous year; and that of deaths was 763 males and 718 females against 715 and 773 respectively in the year 1879-80.

The figures for the 4 preceding years are noted below.

1938/39 41

Year		Births		Deaths.
1876-77	———	1838	———	2227
1877-78	———	1578	———	2934
1878-79	———	1474	———	1577
1879-80	———	1509	———	1488.

The following table shows the mortality from the various diseases.

Diseases	1880-81.	1879-80	1878-79
Cholera	Nil	against Nil	against 4
Small pox	4	do 24	do 45
Fever	359	do 328	do 313
Bowel complaint	391	do 387	do 511
Other diseases	727	do 749	do 704

Conservancy

21. The expenditure under this head amounted to Rs 15,999 „ 4 „ 11 against the estimate of Rs 15,931 and the actuals of the previous year of Rs 17,160 „ 6 „ 5. The decrease from the previous year's expenditure is caused by the reduction of rates in the rubbish and Night soil carts, as already reported, vide G. O. No 2138, d/ 17th November 1880. The Conservancy establishment which consists of 5 Inspectors, 14 peons and 82 scavengers cost Rs 6,440 „ 8 „ 6 against Rs 6474 in the budget. Rupees 9,263 „ 8 „ 0 were spent on account of the Conservancy carts &c, the estimate for the same amounting to Rs 9,197. The Contingencies cost Rs 274 „ 14 „ 2, while the sum spent on account of cleaning tanks &c was Rs 21 „ 0 „ 3.

22. The contribution payable on account of additional sanitary establishment remains unpaid, pending receipt of bills.

23. 66 Carts have been employed on the whole; of which 45 are for removing sweepings and 21 which are covered ones, for removing night-soil from the latrines

Grant

Grant IV. Lighting

24. The total expenditure on account of lighting was Rs 2,973 „ 12 „ 3, of which the cost of Establishment amounted to Rs 1,501 „ 8 „ 3 and the contingencies to Rs 1,472 „ 4 „ 0. The provision for the latter was Rs 1,850 in the Budget, and the saving in this item of expenditure is due to the price of Kerosine oil having fallen in the local market. 252 lamps were lit during the year.

Markets and Slaughter-houses.

25. The cost on account of this item was Rs 1217 „ 4 „ 10 against the actuals of the previous year of Rs 1230 „ 12 „ 0, while the receipts from these sources were greater in the year under report as will be seen from para 10

The stalls of the general market were repaired at a cost of Rs 127 vide Statement II A part II

In compliance with resolutions passed at a meeting of the Commissioners to consider steps for improving the condition of the market so unfavorably reported on by Dr Furnell in his report embodied in G. O. No 644 d/ 16th April 1881, the butchers' stalls have been whitewashed, the floor remade with concrete, the urinal floor asphalted and its walls tarred; the drainage of the market improved by the construction of a wide masonry drain running through it from end to end and the whole of the interior regravelled. The staff of the scavengers has been increased and every effort is being made to improve its sanitation.

26. Rs 506. 6. 0. were spent on account of census operations within municipal limits. during the year

Grant V. Supervision and Management

27. The slight increase in the cost of the Head office Establishment has been explained in the previous year's report.

Drainage Scheme

28. Levels are being taken with a view to the introduction of an improved system of drainage within the town.

Health of the town

29. General health in the town throughout the year was on the whole satisfactory.

Statistics

Statistics of mortality have been already given in para 20.

30. The accounts for the year were audited by Mr. Kaeneman, accountant in the Chief Auditor's office, South Indian Railway, Negapatam; from whose report herewith forwarded, it will be seen that the accounts were kept with care.

31. With reference to the Auditor's remark in the concluding sentence of para 3 of his report, I have the honor to state that the agreements executed yearly by the contractors of markets &c. show the fixed or periodical payments due by them, and the Auditor could have verified these payments by a reference to the agreements. The taking of any further vouchers in support of these payments would be superfluous.

32. Adverting to para 5 of the report, I beg to state that the Cash book is checked by the manager with the collection Registers and vouchers and signed by him daily. A statement showing the transactions of each week

is prepared from the entries in the cash book, placed before the Commissioners at meetings and signed by the chairman. This has hitherto been considered sufficient.

33 Referring to para 6 of the report, I would observe that the amounts of the several bills are debited in the cash book and cheques issued to Commissioners of divisions who personally disburse the money; but as this is not always done on the day the cheques reach them, the dates of debit and of actual payments cannot correspond, from which reason the dates of payment are not entered on the bills. The Auditor's suggestion regarding erasures will be strictly attended to in future, but I hardly think that 3 which was all he found this year merit being spoken of as "Great numbers."

34 Adverting to para 9, the expediency of entering the value of other than real property in foot note to Statement II is doubtful. A register showing the value of moveable property is kept. The difference in the value

of

of municipal premises is due to greater accuracy in valuation.

Concise Report for 1880/81

Municipal Hospital Trichinopoly

1 The Buildings are suitable but the accommodation is insufficient although recently the Diarrhoea and Venereal Cases were transferred to the buildings formerly occupied by the Lock Hospital and now in the possession of the Municipality. Separate wards for the reception and treatment of European and East Indian patients, as well as for the Native caste patients are much needed. The male and female Latrines now in use are too small for the number of patients of either sex under treatment, but sanction has been accorded for the construction of additional Latrines and I hope they will be soon completed. The buildings are in good repair. The supply of Bedding and Clothing is insufficient. 2 Almirahs are required to complete the furniture. This has been provided for in the Budget and the Almirahs will be duly supplied.

2 During the year under report there were no meetings of Dispensary Sub Committee, but all Dispensary matters requiring attention are discussed at the Weekly Meetings in the Municipal Office.

3. The prevailing diseases during the year were as usual Fevers, Rheumatism and Venereal affections, Conjunctivitis & Bowel complaints, Skin disease and Abscesses & Ulcers, Wounds and Injuries were also causes of frequent admissions into Hospital. The Mortality has been lower than in the previous year.

4 None

5. None

6. Compared with the previous year there is a

slight falling off in the numbers of admissions amongst the Out patients (Viz. of 1247) and this is attributable to the heavy rains of October, November, & December last which prevented patients from resorting to the Dispensary, also to the fact that employment was more easily obtained. Likewise amongst the Indoor patients, there was a decrease of 670 admissions into Hospital as compared with the previous year. This is probably partly due to the return to their villages of Famine Stricken people and partly to the low prices of food grains

7. The Lying-in-ward and the wards for the caste sick and self-supporting patients continue to be utilized as usual, but occasionally the accommodation is found insufficient for the reception of Native Caste patients as has already been noticed under para 1 of this report. The temporary Sheds for the treatment of Famine Stricken patients were closed on the 21st November 1880 and on that date these sheds were blown down by the Cyclone. Patients suffering from Diarrhoea & Venereal affections were however immediately transferred to old Lock Hospital Building where they are now being treated. The cost of the maintenance of this institution has been somewhat reduced as compared with the expenditure of the previous year. The item of expenditure of Medicine furnished by the Municipal Commission Viz (Rs 7949-5-6) is excessive, but include the arrears of the previous year as below

	R. As. P.
1879/80	4249- 8-2
1880/81	3699-13-4
Total	7949-5-6

The public health was on the whole generally satisfactory although Fevers of Malarial type were very prevalent during the latter part of the period. The Sanitary condition of the Station is indifferent. The burial of the Mohammedans dead in the very centre of the thickly populated part of the Town and in close proximity to tanks which are used by the people for drinking purposes, is a matter for urgent consideration; and unless immediate steps are taken to prevent the contamination of the tanks, the result in coming years may be very seriously detrimental to public health. It is a pity that the system of dry earth conservancy is not thoroughly carried out in the Latrines of the Town.

Extract from the Annual Report of the Deputy Inspector of Schools, Trichinopoly District to the Inspector of Schools 4th Division dated 13th May 1881. No. 633

1938/40 47

8 Municipal Aided Schools

Fort Hindu School Trichinopoly. This is a very efficiently conducted aided Primary school and it was inspected by me on the 9th December. The answering of the whole school was very satisfactory. In the highest class which is of the standard of a Second Class, however there were 4 boys that were utterly unfit for the class. The teachers are all passed and trained men and discharge their duties with great intelligence. The strength of the school at the commencement and close of the year was 60 and 64 respectively. Nine pupils in the Upper and 9 in the Lower Primary Examinations passed from this school. The manager of this school takes a warm interest in its progress.

9 S. P. G. Schools Woriyur, Tennur and Fort Infant.

These schools were inspected by me on 23rd November and 1st December 80 and 16th March 81 and produced satisfactory results. In efficiency Woriyur stands first, Tennur ment and the Infant school third.—

Tennur school was very weak in attainments in the previous year but by great exertion the condition of the school has materially improved this year. The teachers of these schools work well, and their work is strictly supervised by the Manager. The strength of these schools have been nearly the same as they were at the close of the year previous. The Worriyur school passed 11 in the Upper Primary and 18 in the Lower Primary examinations, Thennur, 6 in the Upper & 2 in the L. Primary, and Fort Infant 6 in the Lower Primary examination

× × × × ×

18 Trichinopoly Municipality

Municipal Counted schools } In addition to the aided salary system Municipal schools of Worriyur, Tennur and Fort Hindu Infant there are 14 Municipal Primary Schools on the Combined system. The teacher of each of these schools gets a monthly fixed pay of 3 Rs from the Municipality. They were all examined in the year and earned a grant of Rs 239-6- The whole of this amount together with Rs 44-12- which was sanctioned for last year (but was undrawn) was paid this year. These continue to do very useful work to the localities where they are situated. As the pay is only

158

Rupees 3 and as the Municipality does not undertake to maintain these schools entirely by having control over the school fees and defraying all the charges no passed men can be induced to take up these posts, consequently all the teachers are unpassed men.

The following table gives the particulars of the Combined Schools in the Municipality

1938/48

Schools	Number of pupils on 31st March		[illegible] to the Municipality			Condition of the Schools

Concise Report for 1880/81
Leper Hospital Trichinopoly

For the period under review, there were 60 admissions with 8 deaths amongst In and Out patients against 78 admissions with 4 deaths in the previous year. The decrease of 18 admissions was owing to the number of cases under treatment at one and the same time being restricted to 15. And the increase of 4 deaths was due to the fact that the Lepers resorted to the institution, at an advanced stage of disease with various complications.

2 The building now in use as the Leper Hospital is an old Jail situated in the heart of the Town; part of it is occupied by the Pauper patients till sufficient wards are erected in the Municipal Hospital for their accommodation.

PROCEEDINGS OF THE MADRAS GOVERNMENT.

READ the following letters :—

From the President, Municipal Commission, Trichinopoly dated 29th July 1881, No 2309.

ORDER. 10th October 1881, No. 1938.

The receipts and charges of the Trichinopoly Municipality for 1880-81 are contrasted below with the estimates for the year and the actuals for the previous year:—

Receipts.	Actuals 1879-80	Estimate 1880-81	Actuals 1880-81
Balance brought forward ..	1,785	850	1,515
Rates on Houses and Lands ..	22,496	29,010	25,502
Taxes on Arts	"	6,000	5,023
Taxes on Vehicles and Animals ..	4,494	5,100	3,972
Registration of Carts	4,085	4,200	3,940
Tolls	12,750	15,490	15,495
Licenses	1,231	1,200	1,240
License Tax	6,971	5,200	4,140
Assignments by Government ..	1,215	1,640	1,674
Contribution from Local Funds ..	7,150	2,150	2,150
Fines and Fees	989	1,100	742
Endowments	1,966	2,000	3,091
Miscellaneous	12,901	14,670	15,942
Loans	"	"	"
Advances Recoverable	"	"	"
Total ..	78,033	88,610	84,426

Balances	1515	4,360	6,145	7.3
Total	78,033	88,610	84,426	

The receipts, exclusive of License tax collections, amounted to Rs 78,771 against Rs 82,560 estimated and Rs 69,277 actuals for the previous year. The decrease below the estimate was distributed generally ~~in~~ under all the heads of ~~the~~ taxation ~~items~~ with the exceptions of Tolls and Licenses. No portion of the land rate for the year was collected but the arrears of former years were almost in full ~~fully~~ realized, the removal of troops is again ~~said~~ alleged to have prejudicially affected the revenue from the ~~[illegible]~~ vehicles and the Registration of Carts. The profession tax ~~which~~ was re-imposed during the year but yielded Rs 977 less than the estimate.

The

The amount remitted on appeal or otherwise was very large, ~~being~~ not less than Rs 3764 and this ~~fact~~ is sufficient to show~~s~~ that the original assessments were incorrect. 23·4 per cent of the demand remained uncollected at the close of the year. ~~The~~ The grant of Rs 1403 from the Prince of Wales local reception fund towards the construction of a ward in the Municipal Hospital was a partial set off against the ~~decreases~~ general diminution of income ~~above~~

The collection of taxes was carried out under a system of contract. It is not stated whether, and if so, to what extent, recourse was had to coercive processes.

above stated. Compared with the previous year there was an increase of Rs 2745 in the share of Tolls ~~paid~~ handed over by the Local Fund Board ~~compared with the previous year~~, and a decrease of Rs 5,000 in the contribution from Local Funds on account of the Hospital, ~~the contribution for 1879-80 having been special on account of the relief afforded to outsiders. Vide G.O. 16 May~~ 1879 No 935. ~~The collection of the taxes was carried out under a system of contract. It is not~~

With regard to this it is observed that the contribution ~~[illegible]~~ for 1879-80 was doubtless sanctioned as a special case but if, as is probable, the Hospital is of great advantage to the surrounding country there is no reason why a permanently increased contribution should not be secured.

~~not stated whether, and, if so, to what extent, resort to coercive measures became necessary.~~

The Government regret to learn that the ~~system of~~ private scavengering service introduced ~~into the town~~ during the year proved a failure. It is not understood why the collection of ~~the~~ Scavengering fees should be attended with ~~so much~~ more difficulty in Trichinopoly than elsewhere. ~~while~~

~~while it is not so~~ ~~elsewhere~~.

The expenditure aggregated Rs 74,693 excluding License tax, against Rs 74,950 estimated and Rs 70,878 actually spent in 1879-80, and was distributed in the proportions noted below:-

Grant I	14·8
" II	3·4
" III	49·6
" IV	24·8
" V	6·9
Debt and Refunds	·5

There

There was a saving of Rs 1622, in the allotment under Grant I, Public Works, owing to the provision of Rs 3,500 for latrines, not having been fully utilized. It is presumed the roads in the town, the repair of which cost Rs 5782, were kept in good condition.

The Budget provision for Education was almost ~~fully utilized~~ entirely expended. The attendance at the 4 salary grant schools remained ~~almost~~ very much the same

& as it was during the previous year ~~same but earned a grant less than the previous year by Rs 130.~~ but there was a reduction of R 135 in the salary grant Expenditure, due no doubt ~~to increased~~ receipts from fees and other sources.

The 14 combined system schools also show little change. The Results grant schools numbered 22 against 13 in 1879-80. The ~~favorable~~ introduction ~~[illegible]~~ of the New rules sufficiently accounts for the increased grant under this head. The report of the Dy Inspector is ~~generally~~ on the whole favorable as regards the working of these schools. ~~There were~~

Out of a school-going population of 5540 boys and 5939 girls there were 3646 boys and 434 girls, under instruction ~~in the town~~ in the various schools, of the town, aided and unaided ~~including those un aided, out of a school going population of 5340 and 5939 respectively.~~

The number of persons treated at the Hospital and dispensary is ~~returned~~ stated to have been ~~as~~ 1,229 in and 38,860 out patients against 1561 and 38,366 respectively in 1879-80. The Civil Surgeon ~~supposes~~ observes that there was a falling off in the number of outpatients, a statement which the figures given do not bear out. The working of the Lying in Ward is not ~~fu.~~ sufficiently ~~fully~~ noticed in the Civil Surgeon's report. The numbers relieved should have been stated.

Vaccination shows ~~marked~~ steady improvement, the numbers operated on having risen from 2449 to 3549. The cost ~~per cap.~~ of each successful case was 4 as & 5 pies against 6 as & 5 pies in 1879-80.

The ~~registration of~~ returns vital statistics ~~showed~~ show the following results:

	Births	Rate per mille	Deaths	Rate per mille
1879-80	1509	19·7	1488	19·4
1880-81	1593	20·8	1481	19·3

The Government ~~observe~~ gather from the medical officer's report that the sanitary condition of the town ~~is~~ remains indifferent, in spite of the large expenditure (R16,000) on conservancy. ~~although a large sum of Rs 16,000 appears as expenditure on conservancy~~ The attention of the Commissioners is drawn to that officer's remark regarding the objectionable situation of the Mahomedan burial ground. The contribution for Sanitary inspection remains unpaid at the end of the year

The other items of expenditure do not call for remark.

The License tax account prescribed by G.O. 22d. Augt. 1879 No 1614 has not been submitted. The total of the details given in Statement II B for Market Establishments does not tally with the amount shown under the corresponding head in Statement II. ~~The contribution for Sanitary Inspection was not paid.~~

The Government

note

note that a drainage scheme ~~of drainage~~ for the Town is under preparation and will shortly be considered by the Commissioners. and that ~~The Vice President~~ considerable ~~reports that~~ improvements have been effected in the sanitary condition of the market. From the President's report it also appears that steps have been taken to carry out the recommendations of the Sanitary Commission in regard to the adoption of the dry earth system and other matters.

The Auditor's report has received careful attention. In future ~~It is desirable that~~ the daily cash chittah should be signed by the Vice President and not merely by the Manager, and ~~that~~ the value of all municipal property whether moveable and immoveable should be included in the Statement of Assets and liabilities.
