GOVERNMENT OF MADRAS.

FINANCIAL DEPARTMENT.

10th October 1881, No. 1944.

Municipal—Reports.

Read the following paper :—

From H. P. GORDON, Esq., Collector and President of the Municipal Commissions, Bellary, to the Officiating Chief Secretary to Government, dated Bellary, 22nd July 1881, No. 3570 [Current No. 1947].

I have the honor to report upon the working of the Adóni Municipality during the past official year 1880-81, and to forward the Vice-President's report, with its enclosures, as detailed in the margin.

1. Statements of Receipts and Expenditure.
2. Auditor's Report.
3. Medical Report.
4. Statement of Tolls.

2. The total receipts amounted to Rs. 26,082 including the opening balance

of Rs. 7,134-13-11, the income having been estimated at Rs. 29,337. The total charges amounted to Rs. 23,598-7-10 out of budget charges estimated at Rs. 32,118. The sum of Rs. 3,039 entered as receipts in the supplemental budget is only nominal, the charges sanctioned therein having been proposed to be met out of the closing balance of 1880-81.

3. The decrease of Rs. 3,255 under receipts is chiefly under the heads "License-tax" and "Endowments," resulting in

the former case from the operation of Act VI of 1880, which exempted the XII Class of tax-payers from assessment, and in the latter case from the funded capital of the dispensary, Rs. 4,404-15-11, not having been drawn and expended as was anticipated during the year. The decrease in charges amounts to Rs. 8,520. The various grants to which it relates are shown in the margin. The Vice-President explains the fluctuations fully in Statement VI-B, Comparative Statement.

4. Considerable progress has been made in the construction of the Civil Dispensary building which was taken in hand during the year under report. But the progress made in the execution of the works sanctioned in the supplemental budget is not what might be desired.

5. The failure of the girls' school to attract pupils is discouraging. It does not appear to me, however, that the failure is so thorough as to justify the closing of the school. The average attendance was thirteen.

6. The health of the town was fair. The cost of vaccination per head was Annas 4-8 as compared with Annas 4-3 last year, the total number vaccinated falling short of the previous year's figures by 170; this is due in part to the absence of the Municipal vaccinator for some months. The vaccinator got a month's leave in the end of April 1880, applied for extension which I refused, thereon absented himself

without leave and was dismissed. Advertisement failed to bring forward a candidate until the end of August. Thus the town was without a vaccinator for four months.

7. The contribution on account of the Medical College was not fully paid during the year owing to the Commissioners being under the impression that the percentage calculated on the opening balance of the

* The year from which the contribution was ordered to be paid—vide G.O., No. 1865, dated 18th October 1878. year 1878-79* should be deducted from the amount due for the year under report, as such amounts do not form actual

receipts of the Municipality. The amount has been since recovered under instructions from the Accountant-General.

8. The contribution on account of the Police Force has been correctly paid, as also the amount provided for Sanitary Inspection and cost of Establishment in the Government Office.

9. It is satisfactory to note that a demand for the sweepings of the latrines is apparently springing up in the neighbourhood of this Municipality. The amount realized from this source is not, however, stated.

10. Six hundred and ninety births and 488 deaths are registered against 209 and 1,540 respectively in the previous year. These figures seem to indicate a great improvement both in the state of the population and in the attention paid to registration. From the commencement of the current year a separate Gumastah has been provided for the purpose of registration. The increase in births and decrease in deaths are attributable to the prosperous condition of the people.

11. With a view to provide a suitable site for a market for perishable goods, application was made to Government to make over the Circar Mandi to the Municipality in my letter, No. 658, of 11th February last. The disposal of the matter awaits certain information which the Vice-President has been asked to furnish.

12. The Auditor's report brings to light considerable irregularity in the keeping of the Municipal accounts. The Vice-President reports that steps will be taken to rectify them. They are attributed for the most part to the degree in which the Manager was occupied in superintending the building of the new dispensary, a duty from which he will shortly be relieved by the completion of the building.

13. The License-tax statement is submitted through the Board of Revenue as directed in the concluding part of paragraph 13 of G.O., No. 1548, dated 10th August 1880.

ENCLOSURE No. 1.

From A. TIROOVENGADAM MUDALIAR, Presiding Member, Adóni Municipal Commission, to the President of the Adóni Municipal Commission, Bellary, dated Adóni, 16th May 1881, No. 26.

As desired by the Commissioners in their meeting held on the 7th instant, I have the honor to submit my report on the working of this Municipality during the official year 1880-81, together with the statements prescribed in G.O., No. 1347, of 20th April 1877, and the reports of the annual Auditor and of the Hospital Assistant in charge of the dispensary.

2. The original and the supplemental Budget Estimates for the year were reviewed and sanctioned by Government in their Orders, Nos. 467 and 2328 of 5th March and 15th December 1880, respectively.

3. The figures under the items of the original budget, noted in the margin, were modified as directed by Government in their order reviewing the same and are adopted as the figures of the sanctioned estimate.

RECEIPTS.	
Opening balance.	
CHARGES.	
Contribution to Medical College.	
" to Sanitary Inspection.	
" to Police Force.	
Closing balance.	

4. The actual receipts and charges amounted to Rs. 26,082-7-10 and Rupees 23,598-7-10 against Rs. 32,376 and Rs. 32,118 respectively shown in the Budget Estimates,

and the variations thereof are explained in the column of remarks in the Comparative Statement VI-B herewith sent.

5. The following are the details of total receipts and charges of the sanctioned Budget Estimates of the year :—

	Receipts.	Charges.
	RS.	RS.
Original Budget Estimate	29,337	29,229
Supplemental Budget Estimate.. .. .	3,039*	2,889
Total	32,376	32,118

6. *Grant I—Public Works.*—Nearly two-thirds of the amount allotted for the construction of the new dispensary was spent during the year, and the work is in rapid progress and will be finished in course of two months. The other works, which were provided for in the supplemental budget and sanctioned, have not been executed, as the establishment and the workmen were engaged on the dispensary work. The difficulty of procuring stone and other materials has greatly impeded the works, and had it not been for that all the sanctioned works would have been brought to a completion before the close of the year. However, every exertion is being made to complete them in as short a time as possible.

7. All the roads and public latrines were repaired and kept in good order at a cost of Rs. 597-0-6 and Rs. 399-14-11, respectively.

8. The repairs to Davendrappah's well, for which Rs. 605 have been sanctioned, are in progress, and great portion of the work has been finished.

9. *Grant II—Education.*—The Telugu, Mahomedan, and Poor Schools showed a fair progress, and their average attendance was 28, 37, and 70, respectively. The falling off in the attendance in the Telugu School is due to the opening of two poor schools. Two classes with their Masters have been detached from this school to form these poor schools, and therefore the actual number of attendance in the Telugu School appears to be low. The attendance in the Mahomedan School is in increase, and this is attributable to the improving condition of that community.

10. A female teacher was sent for from Madras for the girls' school, but owing to the caste prejudices it did not work well for some time, but latterly it has improved, though not to a satisfactory extent. The Schoolmistress has subsequently resigned her appointment, as a better post was offered to her in Nellore. On three years' experience the Commissioners are able to say that a girl school here has been a failure, and that it is useless to continue it at present as most of their female population consists of gosha and mercantile classes.

11. *Results Grants.*—A sum of Rs. 96-14-0 was recommended for payment as results grants to four of the private Schoolmasters, and therefore the rest of the allotment was not utilized. The above sum includes Rs. 3-14-0 the grant recommended for one of the aforesaid Schoolmasters during last year and has been paid this year.

12. Besides the Government and Municipal Schools there are eleven private schools with a daily average attendance of 301 pupils. Some of these schools have applied for results grants during the year. The existing institutions appear to answer the present requirements of elementary education in this Municipality.

13. The Municipal Schools were examined by the Inspector and Deputy Inspector of Schools, and their report is favorable to their general progress. A proposal was made by the Director of Public Instruction in his Proceedings, No. 5631 P, of 4th December 1880, to introduce into the Central Telugu School the combined system of payment to the Schoolmasters, but the matter was deferred for consideration till after the services of trained head teacher are secured by the Commissioners.

14. *Grant III—Sanitation and Medical Services—Hospitals and Dispensaries.*—The working of the dispensary is, as usual, very satisfactory. It has been freely resorted to by the public and has been most popular.

15. The total number of sick treated during the year was 15,170 against 16,647 of the preceding year, and the decrease is due to the absence of epidemic diseases and to the favorable season.

16. *Vaccination.*—The progress of the vaccination was not satisfactory, but it may be accounted for by the absence of vaccinator for nearly five months.

17. Four hundred and sixty-nine cases were operated in seven months at the rate of about sixty a-month, and 423 proved successful against 639 and 601 respectively of the preceding whole year.

* This is the opening balance of the supplemental budget submitted with this office letter, No. 125, of 6th November 1880 and it has accrued from additional receipts and from savings in the sanctioned expenditure as detailed in the regular estimate for 1880-81 and has been shown here to correspond with the total receipts. But this does not appear under receipts in the budget heads of Statements I and VI-B, in which the original budget grants alone are shown.

18. Besides these there were sixty-nine cases operated by the Hospital Assistant in charge of the dispensary, and fifty-five were reported to be successful.

19. The animal vaccination which was resorted to of late showed very unhappy results: some cases had to be admitted into the dispensary under the head of ulcers. The children suffered very much from the vehement quality of the lymph, more particularly in the hot season, so much so that parents refused to submit their children to the lymph, and from their experience and inspection the Commissioners think that this objection is not without cause or reason. The Deputy Inspector of Vaccination has himself inspected some of these cases. For a history of these operations I beg to refer you to the Medical Officer's remarks on the subject.

20. *Registration of Births and Deaths.*—This work was done by the Conservancy Inspectors, and it has been well attended to. There were 690 births and 488 deaths against 205 and 1,540 respectively of the preceding year. To ensure better and more satisfactory registration, a separate Gumastah has been appointed during the current year.

21. *Conservancy.*—The conservancy of the town has been carefully attended to. Two Inspectors, one maistry, four peons, twenty-two sweepers, and eleven toties, besides thirteen private toties, were employed for the purpose. They worked satisfactorily and kept the town clean.

22. The sweepings of the streets and the contents of the eighty-one dust-bins were daily removed both by Municipal and other hired carts to a place outside the town.

23. There are five public latrines with separate compartments for both sexes. They are cleaned twice a-day, and the accumulation is carted in three Municipal carts to a place beyond the Municipal limits and sold for manure to ryots on their desire. The ryot class now begin to understand the value of the night-soil as manure to their fields, and the demand for it is increasing.

24. *Water-supply.*—The water-supply of the town is good. There are five fresh-water wells and three springs with abundant supply used for drinking purposes in and around at an easy reach of the town. Two peons, at Rs. 4 each a-month, were employed to watch Chintama's well and Ramajerry spring extensively used by the people. Besides these there are forty-nine wells within Municipal limits used for bathing and other domestic purposes.

25. *Drainage.*—The drainage of the town is good. The main streets are provided with either masonry or side channels to carry off surface water during rainy season. There are no house-drains, and cess-pits supply their place. They are cleaned periodically by the owners under the direction of the Commissioners, and their contents removed to a distance from the town.

26. *Grant IV—Miscellaneous and Municipal Purposes—Lighting.*—The lighting of the town is carefully looked after, and there are 122 lamps of kerosene-oil.

27. *Markets.*—There are no organized public markets in the town. The Commissioners own two shops, and they were rented out for Rs. 27 during the year.

28. The vegetable market is held in an open enclosure belonging to a private party, and the butchers' shops are scattered throughout the town. It has been the wish of the Commissioners to construct a public market for these shops, but they have deferred the project to the completion of their dispensary. An application to make over the Circar Mandi to the Commissioners for converting it into a public market was made to you in this office letter, No. 165, of 28th January last, and the Commissioners hope to organize one when their request is complied with.

29. *Avenues.*—All the avenue trees are thriving well, and they are watered and properly looked after by the establishment entertained for the purpose. Seventy-eight new trees have been planted during the year along the Bellary and Raichoor high roads, and they are progressing well.

30. *License Tax.*—Ninety persons were taxed with Rs. 1,655, and the whole amount was collected without any difficulty and paid to Government in September last deducting the authorized commission for collection.

31. A statement showing the transactions of the License-tax is herewith sent as required by the Board of Revenue in their Proceedings, No. 1723, of 12th November 1880.

32. *Grant V—Supervision and Management—Head Office.*—Calls for no remark.

33. *Statement IV—Demand, Collection, and Balance Statement.*—Out of a demand of Rs. 13,023-9-5 for House, Land, Professional, and Toll taxes during the year, coercive process had to be resorted to for the collection of only Rs. 163-7-6, and Rs. 195-13-10 have been struck off as irrecoverable owing to the poverty of the defaulters.

34. The accounts of the year have been audited by M.R.Ry. C. S. Vasudaviah Garu, Head Master of the Government Middle School, and the defects pointed out by him have been rectified.

35. *Health of the Town.*—The health of the town during the year was on the whole fair.

ANNUAL REPORT OF THE MUNICIPAL DISPENSARY, ADONI, FOR 1880-81.

Dispensary buildings; present state of repair, &c.; furniture, fittings, &c.—The dispensary building is in a tolerable repair. It is an old native house quite unsuited for a hospital. There is no separate ward attached to the dispensary for in-door patients except a small verandah which gives accommodation only for two beds. A new dispensary on a standard plan is under construction and it is likely to be completed in the course of a few months. Furniture, fittings, &c., are in a fair order.

2. *Dispensary Committee; frequency of Meetings.*—Thrice.

3. *Most common diseases among out-door and in-door patients; their prevalence and fatality as compared with other years.*—Fever, rheumatism, syphilis, inflammation of external ear, bronchial affections, affections of spleen, diarrhoea, dysentery, worms, cutaneous affections, and wounds and injuries were the principal prevailing classes of diseases during the year. Seven deaths occurred among in-door and one among out-door patients, showing a decrease of seven in the former, half as much less than in the preceding year.

4. *Epidemics which have occurred in the station or its vicinity.*—No epidemics have occurred in the station or its vicinity during the year.

5. *Inspection by the Civil Surgeon and Deputy Surgeon-General.*—The dispensary was inspected by the Deputy Surgeon-General on the 12th January 1880.

6. *Attendance of patients as contrasted with previous years, distinguishing in-door from out-door patients.*—During the year under report there has been a total of 15,170 admissions. Of these 15,132 out-door and 38 in-door patients, showing a decrease of 1,460 in the former and 17 in the latter. The decrease is owing to the absence of epidemic diseases and the improved condition of the seasons.

Sixty-nine cases have been vaccinated by me during the year; of these fifty-five proved successful, eight unsuccessful, and six unknown. Vaccination was suspended for a time in the early part of the year owing to the dismissal of the permanent vaccinator and the appointment of another in his room, hence a little more than four months elapsed in the interval. The new vaccinator brought a supply of scabs stated to have been of heifer's, with which we started on our first vaccination. Subsequent to this arm-to-arm vaccination was carried on. The results attending this vaccination are perfectly satisfactory in adult constitution, but in infants they seem to be rather severe, perhaps owing to the lymph being of a powerful nature. In 20 or 30 per cent. of the cases vaccinated I observed the inflammation at the seat of punctures extend to a large area, and the vesicles produced in them are abnormally large. In some instances the vesicles break out either by scratching or treating the children abruptly by their parents, and pour out their contents which, of course, seem to have a tendency to produce some kind of eruption on parts wherever it comes in contact. The vesicles in these cases instead of forming scabs and terminating within a fortnight or twenty days as is usually the case, they result in ulcers and remain in that state for weeks and heal away gradually after a long period, leaving a large irregular cicatrix behind, and sometimes a patch of eruptions over the deltoid on both arms and other parts of the body. Cases of this nature came under treatment and were treated for the same.

In conclusion, I beg to say that I cannot perfectly understand the unpleasant symptoms resulting only in few cases and in majority *nil*, except attributing them to the powerful quality of lymph in infant constitution. The Vice-President often observed this and brought to my notice, and I gave my opinion as stated above.

However, since of late, the vaccine virus seems to have become gradually mild, as it undergoes a change in the system by transferring it from arm-to-arm, and in course of time it might render quite acceptable and the result thereof satisfactory.

(Signed) T. KUNNIAH,
ADONI,
11th May 1881.
Second Class Hospital Asst. in charge,
Municipal Dispensary.

Extract from the Visitors' Book.

The number of out-patients has fallen to 146, most of whom are fever. There are four in-door patients—one female and three males. The building is clean and the medicines are arranged in neat order. Examined the stock book and it is kept correct, and shows the exact stock which was examined with the stock.

(Signed) C. RAGAVA ROW,
ADONI,

2. The budget figures for 1880-81 do not appear to be correctly given in Column 3 of Statement VI-B. These figures have evidently been arrived at by combining the supplemental expenditure sanctioned in G.O., dated 15th December 1880, No. 2328, with the original Budget Estimate of receipts and charges. The result is that the charges are considerably in excess of the receipts. It was remarked in the Government Order quoted above that the source from which the supplemental expenditure was to be met had not been clearly explained. The available funds were obviously due either to increased receipts or to reduced expenditure as compared with the budget, and their existence should have been distinctly accounted for in order that the original budget might be amended accordingly. The regular estimate figures furnished with the budget for 1881-82 appear therefore to embody more correctly the original and supplemental budgets sanctioned, and they are accordingly adopted in the above abstract.

3. Excluding the License-tax collections, the receipts aggregated Rs. 17,292 against Rs. 22,070 estimated and Rs. 17,862 collected in 1879-80. The falling off as compared with the estimate is due mainly to the funded capital of the dispensary not having been drawn as contemplated at the time the budget was prepared. The Tax on Arts &c., was reimposed during the year; yet the total revenue of the Municipality falls short of that of the previous year owing to the diminution of the receipts from Tolls and the absence of recoveries. The uncollected tax balances are inconsiderable. Private scavenging yielded Rs. 1,552 against Rs. 1,000 estimated.

4. The expenditure amounted to Rs. 22,026, excluding License-tax, against Rs. 29,180 estimated and Rs. 17,485 actual of 1879-80. It was distributed among the various grants in the proportion given below:—

Grant I.—Public Works	34.6
Do. II.—Education	8.0
Do. III.—Sanitation	34.9
Do. IV.—Miscellaneous	11.8
Do. V.—Supervision	10.7

5. The large falling off in expenditure under Grant I is due to the outlay in the construction of the dispensary having fallen short of the budget allotment and to the non-execution of most of the works provided for in the supplemental budget sanctioned in G.O., 15th December 1880, No. 2328. It is stated, however, that considerable progress has been made with the dispensary, and that the building is expected to be shortly completed.

6. The full budget allotments were spent during the year in the repair of Municipal roads and latrines, and these are reported to be in good order. Some progress was also made in the repair of a well, for which an allotment of Rs. 605 was sanctioned in the supplemental budget.

7. The expenditure on education was slightly below the budget provision. The attendance at the girls' school has fallen off; and, in the opinion of the Commissioners, the school has failed; but it is noted that the President does not consider the failure so thorough as to justify the closing of the school. The Telugu School suffered owing to the opening of two new Municipal Poor Schools formed by the detachment of two of its classes with their Masters. It is reported that measures are in contemplation for the introduction of the combined system. Results grants, amounting to Rs. 97, were paid to four non-municipal schools out of eleven existing in the town. The attendance at the Mahomedan School rose from twenty-nine to thirty-seven, and the total number of boys in Municipal and Aided Schools increased during the year from 274 to 296.

8. The number of patients treated at the dispensary was 15,170 against 16,647 in 1879-80. The institution is said to have worked satisfactorily, the decline in the number of cases treated being due to the absence of epidemics and to the remarkable healthiness of the season.

9. Vaccine operations were much impeded during the year owing to the unauthorized absence of the vaccinator followed by his dismissal, and the impossibility of obtaining another for several months. The attention of the Sanitary Commissioner is requested to the remarks in paragraph 19 of the Vice-President's report and in the annual report of the Medical Subordinate in charge of the Dispensary regarding the effects which followed in certain cases on the introduction of animal vaccination.

10. The registration of vital statistics is improving as well as the healthiness of the town, the returns showing 690 births and 488 deaths against 205 and 1,540 respectively in the previous year. Municipal conservancy is reported to have been well attended to. Water-supply and drainage are reported good. The remaining items call for no remark.

11. The Auditor's report shows that the accounts of the Municipality have been kept in a careless and slovenly way; and the explanation offered is that the Manager was occupied in superintending the building of the new dispensary. This is not as it should be. The Manager's duties should be confined to the office; and an Overseer or maistry appointed, if need be, for the supervision of public works and other out-door duties.

To
The Vice President
Adami Municipality

Sir,

In compliance with your letter No. 203. dated 24th March 1881, I have the honor to inform you that I have completed the audit of the Municipal accounts for 1880-81 and submit my report thereon.

2. I have carefully examined all the Collection books of the Municipality and found the amounts daily collected correctly entered in the cash-book.

3. The year under audit opened with the balance of Rs. 11696.13.10 and closed with that of Rs. 7047.8.2

4. The following statement shows the money transactions of the Municipality for 1880-81

Particulars	Opening Balance	Receipts	Charges	Closing Balance
Actuals as per statement I & II.	7134 13 11	18947 9 11	23598 7 10	2484 ..
Funded Capital.	4404 15 11	"	"	4404 15 11
Deposits.	157 ..	537 57	535 134	158 83
The L. & S. share of Tolls.	"	760 8 11	760 8 11	"
Totals agreeing with the credits and debits in the Municipal Cash-book.	11696 13 10	20245 8 5	24894 14 1	7047 8 2

In the course of my audit I found the following irregularities and deviations. -

(1) The cash book manifests great irregularities but contained several unaltered alterations which were initialled on my request. Will be attended to. A.S.

(2) The figures in some of the vernacular account books are rendered illegible in consequence of erasures, alterations and transmutation of figures i.e. for an instance changing 3 as to make it appear 8. Thus many figures are rendered illegible. The Committee is strictly warned for these irregularities. A.S.

(3) The remissions of warrant fees were apparently made by the Manager, but they were made to be submitted for the sanction of the Commissioners in my requisition. This kind of procedure the Commissioners ought to have taken measures to avoid. The Committee having failed to produce the list of these remissions in time, it was subsequently produced and passed in the meeting. A.S.

(4) In some cases the Municipal cheques were cashed at the Treasury under the signature of a single Commissioner during the absence of the Vice President in direct violation of the proviso in Sec. 37 of Act III of 1841. As the Manager was specially engaged on the construction of the Civil Dispensary the practice of collecting fees for notices issued under Sec. 52 of Act III of 1841 was not at all adhered to even this year. A.S.

(5) Some of the bills on the Municipality for 1880-81 were submitted for audit after some delay. Even long after the payment of these bills, they were found in the possession of the Manager but not filed in the office in a book kept for the purpose. A.S.

(6) Though the payment was made the Bill No 25 bears neither the signature of the Vice President nor that of the Commissioner. The amount of the Bill No 25 has been paid into the Treasury on the request of the Manager. A.S.

(7) Treasury Cheque No. 36 of 22. November 1880 seems to have been cancelled, but the other half of it has been detached and it was not, as it ought to have been, submitted for

remark 6
Vide para 4. A.S.

In the absence of the Vice President the presiding Member is used to sign the Contingent Expenses on the Contingent book. A.S.

Will be attended to. A.S.

Vide remark to para 4. A.S.

for audit if it had been cancelled. -

(9) An account of the detailed expenditure of Receipt stamps is not at all kept though there is a blank book in the office for the purpose. A.S.

(10) In the detailed Contingent Bills in some months the expenditure was sanctioned by a single Commissioner only at the end of each month, but the abstract bills were signed by the Vice President. The daily expenditure should bear the initials of the Vice President as a rule. 1944 A.S.

In the Pay Bills there are several erasures &c. which, I am sure, will tend to invalidate the Bills. These kind of mistakes should not be tolerated in the Bills. A.S.

(12) The keeping of the accounts in connection with the construction of the new dispensary and the repairs of Devendrapah's well is not at all systematic and satisfactory. For, out of the amount Rs. 220 drawn in two Bills for certain work, Rs. 59.11.0, were not utilized and the sum is secured with one of the sub-committee Comrs. The auditor for the next year will, I hope, examine the vouchers for the above amount. A.S.

In conclusion, I beg to tender my thanks to C. Ramasami Naidoo for his having given me clear explanations on points I referred to him in the course of my audit. A.S.

I have the honor to be Sir
Your most obedt. servant
C. Vasudevayya
Annual Auditor

The amount of the Bill No 25 has been paid into the Treasury on the request of the Manager. A.S.

Will be required into A.S.

Hospital & Dispensaries - 3257

20	20	20	20	20	20
3257	3208	2116	89	191	73

The decrease represents the saving in the pay of Hospital Assistant & in the cost of medicines, as also for dishing patients, owing to the substitution of a 2nd class Hospital Assistant for a first-class officer & to the cheapness of provisions.

A clerk was employed from July last on Rs 5 per mensem from pressure of work in the Dispensary & his pay was

Medical college - 76

76	146	35	82	110	70
----	-----	----	----	-----	----

met from the saving in the pay of the Hospital Assistant.

The decrease represents the saving caused by the deduction of Rs 66-2-6 paid in excess of the actual contributions for the year 1878-79 & by the calculation of contributions on the weight of the regular students as per recent instructions instead of on the total estimated receipts of the year as laid out in the framing of the budget.

Vaccination - 171

171	146	230	137	810	927
-----	-----	-----	-----	-----	-----

The decrease is due to the vacancy in the post for nearly 5 months & to the savings in the extra provided for the vaccine subjects in the budget.

Explanation of

variations

Actuals for previous year
 Estimated for current year
 Actuals for previous year
 Estimated for current year

This is a slight variation & it is due to the following causes. The charges under establishment & building & under sanitary services & condition of extra private works employed to meet the local demand & the amount of the difference is the amount shown here.

The decrease represents the difference between the contribution calculated on the receipts of the regular estimate & the budget allotment calculated on the total estimated receipts of the year.

Slight variations.

CURRENT No. 1947

From,

H. P. Gordon Esquire,
THE COLLECTOR AND PRESIDENT MUNICIPAL COMMISSION,

BELLARY.

To,

THE Chief Secretary to Government

Fort Saint George.

1944
26

Sir,

I have the honor to report upon the working of the Adoni Municipality during the past official year (1880-81) and to forward the Vice President's reports with its enclosures as detailed in the margin.

2. The total receipts amounted to Rs. 26082 including the opening balance of Rs. 7134-13-11 the income having been estimated at Rs. 29337. The total charges amounted to Rs. 23598-7-10 out of budget charges estimated at Rs. 32118. The sum of Rs. 3039 entered as receipts in the Supplemental Budget is only nominal, the charges sanctioned therein having been proposed to be met out of the closing balance of 1880-81.

3. The decrease of Rs. 3255, under receipts is chiefly under the head "Tax and Endowments" resulting in the former case from the operation of Act VI of 1880 which exempted the XII class of Tax payers from assessment and in the latter case from the funded Capital of the Dispensary.

fo (Final) 1944/81.

du Ind. 1947-81.

Papers 4404-15-11, not having been drawn and expended as was anticipated during the year. The decrease in charges amounts to Rs. 85-20. The various grants to which it relates are shown in the margin. The Vice President explains the fluctuations fully in Statement VI B. Comparative Statement.

4. Considerable progress has been made in the construction of the Civil Dispensary building which was taken in hand during the year under report. But the progress made in the execution of the works sanctioned in the supplemental budget is not what might be desired.

5. The failure of the girls' school to attract pupils is discouraging. It does not appear to me however, that the failure is so thorough as to justify the closing of the school. The average attendance was 13.

6. The health of the Town was fair. The cost of vaccination per head was Rs. 2-4-8, as compared with 2-4-3 last year, the total number vaccinated falling short of the previous year's figures by 170. This is due in part to the absence of the Municipal Vaccinator for some months. The Vaccinator got a month's leave in the end of April 1880, applied for Extension which I refused, thereon absented himself without leave and was dismissed. Advertisement failed to bring forward a candidate until the end of August. Thus the Town was without a Vaccinator for 4 months.

The

7. The contribution on account of the Municipal College was not fully paid during the year owing to the Commissioners being under the impression that the percentage calculated on the opening balance of the year 1878-79, should be deducted from the amount due for the year under report.

as such amounts do not form actual receipts of the Municipality. The amount has been since recovered under instructions from the Accountant General.

8. The contribution on account of the Police Force has been correctly paid as also the amount provided for sanitary inspection and cost of Establishment in the Government office.

9. It is satisfactory to note that a demand for the sweepings of the latrines is apparently springing up in the neighbourhood of this Municipality. The amount realized from this source is not, however, stated.

10. 690 Births & 488 Deaths are registered against 209 & 1540 respectively in the previous year. These figures seem to indicate a great improvement both in the state of the population and in the attention paid to registration. From the commencement of the current year a separate Gumbasta has been provided for the purpose of registration. The increase

No 260

Adami Mnl: Comm. of 16th May 1881.

1944/29 38

A. Tiruvengadam
Presiding Member
Adami Mnl: Comm.

D. P. B. Esq.
President of the
Adami Mnl: Comm.
Bellary.

Sir,

As desired by the
Commissioners in their
meeting held on the 7th
Instant, I have the honor
to submit my report on
the working of the
Municipality during the
official year 1880-81,
together with the
Statements prescribed
in G. O. No. 1347 of 20th
April 1877, and the
reports of the annual
auditor & of the
Hospital

Hospital assistant
in charge of the Dispensary

2. The original, and
the Supplemental Budget
Estimates for the year
were reviewed & sanctioned
by Government in their
Orders nos. 467 & 2328
of 5th March & 15th
December 1880 respectively.

3. The figures under
the items of the original

Receipts.—
Opening balance. — budget noted in the
Charged to Medical College
— Rs. — Sanitary Inspections margin were modified
— Rs. — Police force
Closing balance. — as directed by Government
in their order reviewing
the same & are adopted
as the figures of the
Sanctioned Estimate.

4. The actual receipts
and charges are amount to
Rs. 26082-7-10 & Rs. 23598-7-10
against

against Rs. 32,376 & Rs. 32,118
respectively shown in
the budget Estimates
& the variations thereof
are explained in the
column of remarks
in the Comparative
Statement VII B herewith
Sent. —

1904
30

5. The following are the
details of
total receipts and charges
of the sanctioned budget
Estimates of the year. —

Receipts		Charges	
Original Budget			
Estimate	29,337	29,229	--
Supplemental Budget	*		
Estimate	3039	2889	--
Total	32,376	32,118	--

* This is the opening balance
of the Supplemental
budget submitted with
this office letter no. 125
of 6th November 1880 & it
has

has accrued from additional receipts & from savings in the sanctioned expenditure as detailed in the Regular Estimate for 1880-81 & has been shown here to correspond with the total receipts.

But this does not appear under receipts in the budget heads of statements I, & VII in which the original budget grants alone are shown.

6. Grant I. "Public Works". Nearly two-thirds of the amount allotted for the construction of the new Dispensary was spent during the year and the work is in rapid progress and will be finished in course of 2 months. The other

other works which were provided for in the supplemental budget ¹⁹⁴⁴ sanctioned have not been executed as the establishment of the workmen were engaged in the Dispensary work. The difficulty of procuring stone & other materials has greatly impeded the work & had it not been for that, all the sanctioned works would have been brought to completion before the close of the year. However every exertion is being made to complete them in as short a time as possible. —

7. All the roads & khabbi latsees were repaired

Kept in good order
a cost of Rs. 591-0-6
Rs. 399-14-11 respectively.

The repairs to
mudroopahs well,
which Rs. 605 have
been sanctioned, are in
progress & great portion
the work has been
finished. —

Grant II. — "Education."
Taluga, Chokhanan,
Poor Schools showed
fair progress and their
average attendance was
37 & 40 respectively.
The falling off in the
attendance in the Taluga
School is due to the
opening of two poor
schools. Two classes
with their masters have
been detached from this
School.

School to form these
Poor Schools & ¹⁹⁴⁴ ~~32~~ ³³ therefore
the actual number
of attendance in the Taluga
School appears to be
low. The attendance in
the Chokhanan School
is in increase and this
is attributable to the
improving condition
of that community. —

10. A female teacher
was sent for from Madras
for the Girls' School, but
owing to the caste pre-
judices, it did not work
well for some time, but
latterly it has improved,
though not to a satisfactory
extent. The School mistress
has subsequently resigned
her appointment, as a
better post was offered
to

A.D.

to her in Kallase. On
these years experience the
Commissioners are able
to say that a girl school
here has been a failure
and that it is useless
to continue it at present
as most of the female
population consists of
gocha & Merchantile
classes. —

11. Results Grants. —

A sum of Rs. 96-16-0 was
recommended for payment
as results grants to 10
of the private school
teachers & therefore the
part of the allotment
was not utilized. The
above sum included Rs. 8-16-0
the grant recommended
for one of the aforesaid
school teachers during
last

last year and has
been paid this year. —

12. Besides the Govt
Government and Municipal
Schools there are 11 private
Schools with a daily
average attendance of 301
pupils. Some of these
schools have applied for
results grants during the
year. The existing insti-
tutions appear to answer
the present requirements
of elementary education
in this Municipality. —

13. The Municipal
Schools were examined
by the Inspector & Deputy
Inspector of Schools, and
their report is favorable
to their general progress. A
proposal was made
by the Director of Public
Instruction in his
proceedings

proceedings No. 5631 P.
of 4th December 1880
to introduce into the
Central Telugu School
the Combined System
of payment to the School
Masters but the matter
was deferred for consideration
till after the services of
trained head teachers are
secured by the Commissioners.

14. Grant III. - Sanitation
and Medical Services.
Hospitals and Dispensaries.
The working of the Dispensary
is, as usual very satis-
-factory. It has been
freely resorted to by the
public and has been
most popular. -

15. The total number
of sick treated during
the year was 15,170 against
16,647 of the preceding
year.

Year and the decrease
is due to the absence of
epidemic diseases, and
to the favorable season. -

16. - "Vaccination." -

The progress of the
vaccination was not
satisfactory but it
may be accounted for
by the absence of Vaccinator
for nearly 5 months. -

17. Four hundred &
Sixty-nine cases were
operated in 7 months
at the rate of about 60
a month, and 423 proved
successful, against 639
and 601 respectively of
the preceding whole year. -

18. Besides these
there were 67 cases operated
by the Hospital assistant
in charge of the Dispensary
and

and 55 were reported
to be successful. —

19. The annual
vaccination was resorted
to of late showed very
unhappy results. Some
cases had to be admitted
into the Dispensary under
the head of illness. The
children suffered very
much from the poor
quality of the lymph
more particularly in
the hot season so much
so that parents refused
to submit their children
to the lymph and from
their experience and inspection
the Commissioners think
that this objection is not
without cause or reason.
The Deputy Inspector of
Vaccination has himself
inspected

inspected some of these
cases. For a history
of these operations I beg
to refer you to the
Medical officer's remarks
on the subject. —

20. "Registration of
Births and Deaths." —

This work was done by
the Conservancy Inspectors,
and it has been well
attended to. There were
690 births and 488 deaths
against 205 and 1540
respectively of the preceding
year. To ensure better
and ^{more} satisfactory
registration a separate
Goswami has been
appointed during the
current year. —

21. "Conservancy." —

The Conservancy of the
town

1944
30A
34A

town has been carefully
attended to. Two Inspectors,
one chiefly, four Peons,
twenty-two sweepers,
and eleven toties, besides
thirteen private toties,
were employed for the
purpose. They worked
satisfactorily and kept
the town clean. —

22. The sweepings of
the streets and the contents
of the eighty-one dust
bins were daily removed
both by municipal &
other hired carts to a
place outside the town. —

23. There are five public
latrines with separate
compartments for both
sexes. They are cleaned
twice a day, and the
accumulation is carried
in

in three municipal ¹⁰⁸⁰
carts to a place beyond
the municipal limits and
sold for manure to ryots
on their desire. The ryot
class now begin to ⁱⁿ ~~understand~~
the value of the night soil
as manure to their fields,
and the demand for it
is increasing. —

24. "Water-supply." —

The water supply of the
town is good. There are
five fresh water wells,
and three springs with
abundant supply used
for drinking purposes
in, and around, at an
easy ^(reach) of the town. Two
peons at Rs. 4 each a
month were employed to
watch, Chintawas well
and Romajerry Spring
extensively used by the
people

people. Besides these there are forty-nine wells within Municipal limits used for bathing and other domestic purposes. —

25. "Drainage". — The drainage of the town is good. The main streets are provided with either macassey or side channels to carry off surface water during rainy season. There are no house-drains, and cess-pits supply this place. They are cleaned periodically by the owners under the direction of the Commissioners and their contents removed to a distance from the town. —

26. Grant IV. — Miscellaneous and Municipal purposes. — "Lighting". — The Lighting of

of the town is carefully looked after & there are 122 lamps of kerosine oil.

27. "Markets". — There are no organized public markets in the town. The Commissioners own two shops & they were rented out for Rs. 27, during the year. — 1944/86

28. The Vegetable market is held in an open enclosure belonging to a private party and the butchers shops are scattered throughout the town. It has been the wish of the Commissioners to construct a public market for these shops but they have deferred the project to the completion of their Dispensary. An application to make over the Circular Mundy to the Commissioners

Commissioners for converting
it into a public market
was made to you in the
Office letter No. 165 of 28th
January last and the
Commissioners hope to
organize one when their
request is complied with.

29. - "Acacias." - All
the acacia trees are
thriving well and they
are watered & properly
looked after by the
establishment entertained
for the purpose. Seventy-
eight new trees have
been planted during the
year along the Bellary
and Raichoor high Roads
and they are progressing
well. -

30. "License tax." - Thirty
persons were taxed with
Rupees

Rupees 1655 and the whole
amount was collected
without any difficulty
and paid to Government
in September last deducting
the authorized Commission
for collection. - 1944
37

31. A Statement
showing the transactions
of the License tax
is herewith sent as
required by the Board
of Revenue in their proceedings
No. 1723 of 12th November 1880.

32. Grant V. - Supervision
and Management. - "Head
office." - Calls for no
work. -

33. Statement IV. -
"Demand, Collection and
Balance Statement." -

Out of demand of Rs. 13023-95
for house, land, professions
and toll taxes during the
year

Year, Coercive process
had to be resorted to for
the collection of only
Rs. 163-7-6, & Rs. 195-13-10
have been struck off
as irrecoverable, owing
to the poverty of the
defaulters. —

34. The accounts of
the Year have been
audited by Mr. P. N. C. S.
Vasudaviah Gane, Head
Master of the Government
Middle School and the
defects pointed out by
him have been rectified.

35. Health of the town.
The health of the town
during the year was on
the whole fair. —

I have the honor to be

Annual Report of the Municipal
Dispensary Adams for 1880-81
1. Dispensary buildings; present
state, repair &c Furniture; fittings &c

The dispensary building is
in a tolerable repair. It is an old native
house quite unsuited for a hospital. There
is no separate ward attached to the dispensary
for In-door patients except a small veranda
which gives accommodation only for two
beds. A new dispensary on a standard plan
is under construction and it is likely to be
completed in course of a few months. Fur-
niture; fittings &c are in a fair order.

2. Dispensary Committee; frequency
of meetings
Thrice

1944
39

3. Most Common diseases

Among Out-door and In-door patients;
their prevalence and fatality as compared
with other years.

Fever, Rheumatism, Syphilis,
Inflammation of external ear, Bronchial
affections, affections of spleen, diarrhoea,
syphilis, worms, cutaneous affections
and wounds and injuries were the principal
prevailing classes of diseases during
the year. 7 deaths occurred among
In-door and one among Out-door
patients showing a decrease of seven in
the former half as much less than in

in the preceding year.

4 - Epidemics which have occurred in the Station or its vicinity

No epidemics have occurred in the Station or its vicinity during the year.

5 - Inspection by the Civil Surgeon and by Surgeon General. The Dispensary was inspected by the Civil Surgeon General on the 12th January 1880.

6 - Attendance of patients as contrasted with previous years distinguishing In-door from Out-door patients.

During the year under report there has been a total of 15-170 admissions. Of these 15-132 Out-door and 38 In-door. Patients showing a decrease of 1460 in the former and 17 in the latter. The decrease is owing to the absence of epidemic diseases and the improved condition of the seasons.

69 Cases have been vaccinated by me during the year of these 53 proved successful, 1 unsuccessful and 6 unknown. Vaccination was suspended for a time in the early part of the year owing to the dismissal of the permanent vaccinator and the appointment of another in his room about a little more than 4 months elapsed

1924/40
elapsed in the interval. The new vaccinator brought a supply of seeds stated to have been of higher quality which we started on our first vaccination. Subsequent to this our arm vaccination was carried on. The results attending this vaccination are perfectly satisfactory in adult constitution but in infants they seem to be rather severe perhaps owing to the lymph being of a powerful nature. In 20 or 30 percent of the cases vaccinated I observed the inflammation at the seat of punctures extend to a large area and the vesicles produced in them are abnormally large. In some instances the vesicles break out either by scratching or treating the children abruptly by their parents and pour out their contents which of course seem to have a tendency to produce some kind of eruption on parts whereever it comes in contact. The vesicles in these cases instead of forming seeds and terminating within fortnight or 20 days as is usually the case they result in ulcers and remain in that state for weeks and heal away gradually after a long period leaving a large irregular cicatrix behind. And sometimes a patch of eruptions over the deltoid on both arms and other parts of the body. Cases of this nature came

Came under treatment and were treated
for the same.

In conclusion I beg to say that
I cannot perfectly understand the unpleasant
symptoms resulting only in few cases and
in majority nil except attributing them
to the powerful quality of lymph in infant
constitution. The Ysiet President after
observing this and brought to my notice
and I gave my opinion as stated above.

However since of late the vaccine
virus seems to have become gradually mild
as it undergoes a change in the system
by transferring it from arm to arm and
in course of time it might render quite
acceptable and the result of thereof
satisfactory.

The estimate figures for 1880-81 do not appear to be correctly given in

column 3 of Statement VII B as the charges according to

it are considerably in excess of receipts. The Regular estimate figures furnished

with the Budget for 1881-82 therefore

appear to embody more correctly the original and

supplemental Budgets and they are sanctioned by G.O. of

5th March 1880 to 469 +

15th December 1880 to 2328. They will be accordingly adopted in the above abstract.

Excluding the License Tax collections the receipts aggregated Rs

These figures have evidently been arrived at by combining the supplemental expenditure sanctioned in G.O. of 15th Dec 1880. No 2328 with the original Budget estimate of receipts and charges. The result is that the charges are considerably in excess of the receipts. It was remarked in the G.O. noted above that the source from which the supplemental expenditure was to be met had not been clearly explained. The available funds were originally due either to increased receipts or to reduced expenditure as compared with the Budget and their existence should have been distinctly accounted for in order that the original Budget might be amended accordingly.

Rs 17,292 against Rs
 22,070 estimated and
 Rs 17,862 collected in
 1879-80. The falling
 off as compared with
 the estimate is due mainly
 to the funded capital
 of the Dispensary not
 having been drawn
 as contemplated at the
 time the Budget was
 prepared. The Tax on Arts
 &c. was reimposed
 during the year; ~~and~~
 yet the total revenue
 of the Municipality ^{that of the}
 falls short of the previous
 year owing to the ~~fall~~ diminution
 in the receipts from
 Tolls

1880
 1879
 44
 The
 Tolls and ~~to~~ absence
 of ~~any~~ recoveries. The
 uncollected ^{tax} balances
 of ~~tax~~ are inconsiderable.
 The private scavenging service yielded Rs
 1552 against Rs 1000 estimated.

The expenditure
 amounted to Rs 22,026
 excluding License Tax
 against Rs 29,180 estimated
 and Rs 17,485 actual
 of 1879-80. It was dis-
 tributed among the
 various grants in the
 proportion given below:

Grant I Public Works	34.6
— II Education	8.0
— III Sanitation	34.9
— IV Miscellaneous	11.8
— V Supervision	10.7

The

The large falling off
in expenditure under
Grant I is due to the
~~short~~ outlay ~~on the~~ in the construction of the

Dispensary ~~work~~ having
fallen short of the Budget allotment and
to the non-execution
of ~~most~~ of the works
provided for in the

supplemental budget
sanctioned in G.O. 15th

December 1880 No 2328.

It is ^{stated} ~~reported~~ however
that the Dispensary

~~work made rapid~~
~~progress during the~~

~~year~~ and that the building

~~same~~ is expected to be shortly completed.

~~be finished in a~~

that considerable progress
has been made with

building

The full ^{budget} allotments
were spent during the

year in the repair of
municipal roads and
latrines, and then are
reported to be in good
order. Some progress
was also made in the
repair of a well for
which an allotment
of Rs 500 was sanc-
tioned in the sub-
sidiary budget.

very short time.

The expenditure on
Education was slightly

below the Budget pro-
vision. The ^{attendance at the} girls' school
has fallen off and in the opinion of
is reported as a failure
the Commissioners the school has failed
but it is noted that

the President does not
consider the failure
to be so thorough as
to justify the closing

of the school. The Telugu
school suffered ^{owing to} by the
opening of two ^{new Municipal} poor

formed by the disbandment
of two of its classes with
their masters.

schools, but it is

reported that measures
are in contemplation

to introduce the
for the instruction of the people

~~principles of combined~~
~~system into them~~. Results
fruits amounting to

Rs 97 were paid to 4 non-municipal
schools, ~~and it is re-~~
~~ported that the existing~~
~~institutions answer~~
~~sufficiently the require-~~
~~ments of elementary~~
~~education in the muni-~~
~~cipality.~~

The number of
patients treated in the
Dispensary was 15,170
against 16,647 in 1879-
80. The institution is
said to have worked
satisfactorily, the
decline

The attendance at the
Khalomedan school rose
from 29 to 37 and the
total number of boys
in Municipal and other
schools increased during
the year from 274 to 296.

at? They were not all
in-patients.

1 Aug 80 278

The decline in the number
of cases treated being
~~due~~ ~~ascribed~~ to the absence
of epidemics and other
diseases during the
year

to the remarkable
healthiness of
the season -

Vaccine operations
were, ^{much} impeded during
the year owing to the

unauthorized absence of the Vaccinator
followed by his dismissal and the impossibility of
obtaining another for several months. The

attention of the Sanitary
Commissioner is ^{requested} ~~drawn~~
to the remarks in para

19 of the Vice President's
report, ^{regarding the effects} ~~showing that the~~
which formed in ~~certain cases~~ on
the introduction of animal

vaccination

and in the annual report
of the medical subordination
of the dispensary

1944

vaccination. was far
from being a success
in this Municipality.

The Registration of
vital statistics shows
that 690 births and
488 deaths were regis-
tered against 2054/1540

respectively in the pre-
vious year. The Conser-
vancy of the town is

reported to have been

well attended to. The

water supply and drainage
are reported to be good.

The ^{remaining} ~~other~~ items call
for no remark.

The Auditor's report
shows that the accounts
of

as well as the healthiness
is improving, the
showing

have been
and slowly way, and
the explanation offered
is that the manager
was occupied in su-
perintending the mil-
ding of the new Dispen-
sary. This is not as
it should be.

1944
