FINANCIAL DEPARTMENT.

15th October 1881, No. 2000.

Municipal—Reports.

Read the following paper:—

From W. S. FOSTER, Esq., President of the Municipal Commissions, Godâvari District, to the Chief Secretary to Government, dated Cocanada, 6th August 1881, *No.* 23 [*Current No.* 2100].

I have the honor to submit the report of the Ellore Municipality for the official year 1880-81, together with the usual accounts prepared in the forms prescribed by Government, and the reports of the Assistant Apothecary in charge of the Municipal Dispensary and of the Auditor.

2. The total receipts of the year under notice amounted to Rs. 23,441 inclusive of the opening balance of Rs. 4,747-8-0. This was less than what was expected when the budget was framed by Rs. 1,142-8-0 and is due to the fact that the contribution towards the cost of the dispensary in 1879-80 was not paid by the Local Fund Board in that year, which necessitated a decrease in the opening balance in the year under report. The actual collections were less than the budget estimate by Rs. 2,699.

3. The receipts under the head "Rates on Houses and Lands" was Rs. 4,022-7-0. The actual demand was Rs. 4,064-3-0 and the budget estimate Rs. 4,050. Of an arrear of Rs. 24-9-0, Rs. 13-1-0 were collected and the remainder written off as irrecoverable in the year under report. Unlike in the previous year, resort was not had to law for the realization of the amount except in a few cases and no property was sold.

4. There was a small increase under the head Fees on Carriages and a decrease under Registration, &c., of Carts not calling for any special remarks.

5. The tolls were sold for Rs. 9,050; the Municipal share amounts to Rs. 6,033-5-4, being Rs. 33-5-4 over budget and the previous year's receipts.

6. The receipts under Fines and Fees was only Rs. 150-7-0, or one-half of the budget estimate, and is due to the fact that in the year under report but very few demand notices and distress warrants were issued for the collection of the Municipal revenue. The differences under the other heads are fully explained by the Vice-President in his report. The large decrease in the License Tax collections of Rs. 2,080 is, of course, due to the exclusion of incomes below Rs. 500 from the assessment.

7. The expenditure amounted to Rs. 21,611-1-5. Of this Rs. 4,789-13-11 were spent on public works, Rs. 3,060-12-6 for new works consisting of five new roads costing Rs. 2,284-13-7, the construction of two brick latrines and a store-room to the dispensary costing together Rs. 476-6-11, the completion of drains begun in the last year for Rs. 130-8-2, and the sinking of a well in the dispensary compound costing Rs. 29-8-0. Rs. 1,401-9-5 were spent on repairs as follows:—Repairing five roads Rs. 916-41-0, repairing drains Rs. 117-11-3, repairs to tanks and wells Rs. 104-13-5, Miscellaneous repairs Rs. 262-2-9. Rs. 300 were spent on establishment, and the balance on tools, &c. The amount spent on roads was originally intended for drainage purposes. Ellore certainly wants drainage works, but the amount proposed to be spent would not, I think, have been sufficient to effect any great results.

8. Only Rs. 640 were budgeted for Educational purposes, while last year Rs. 1,070 were allotted for the purpose. The actual expenditure amounted to

Rs. 775-14-0. This is owing to the payment of Rs. 431-12-0 as results grants, while only a sum of Rs. 260 were allotted for the purpose.

9. The Hospital charges amounted to Rs. 2,668-10-7. The budget grant is Rs. 3,590. The difference is principally due to saving in the pay of the Assistant Apothecary who joined late in the year. The numbers treated at the hospital were 120 in-door and 6,848 out-door patients. That the benefits afforded by the hospital are sought after by the people is clear from the single fact that 120 sought aid as in-door patients, while the year before there were only 48. The income of the hospital is derived in great part from the grant of the Local Fund Board. It seems to me this Board contribute more than their fair share.

10. The contribution to the Medical College was duly paid during the year under report, both arrear and current.

11. The Vaccination work has been bad. The numbers vaccinated were 290 successful, 87 unsuccessful, and 31 unknown, making a total of 408. The number vaccinated last year was 788. The Vice-President explains it as being due to the changes in the Vaccinator's post. I have received complaints against the present Vaccinator from the Assistant Apothecary in charge of the dispensary about his work. I am inquiring into it, and, if I find that he is not attending to his work as he ought to do, I shall replace him by another.

12. The registration of births and deaths is satisfactory. The numbers are compared below :—

	Births.	Deaths.
1879-80	702	668
1880-81	837	578

13. The sum expended on Conservancy amounted to Rs. 4,212-15-5. Only Rs. 585-15-5 were spent on lighting, a considerable saving having been effected by the fall in the price of kerosene oil.

14. Rs. 2,688-9-5 were paid on account of Police charges during the year, and the License Tax collections, amounting to Rs. 2,332-4-0, were paid over to Government.

15. Under Supervision Rs. 2,630-15-10 were spent. The budget allotment was Rs. 2,150. The increase is due to the unforeseen expenditure incurred on account of the Census.

16. The Auditor's report shows that the work in the Municipal Office is carefully done. His suggestions are reported to have been adopted. I am glad to be able to report that the Commissioners have paid greater attention to Municipal matters than in the last year. The Vice-President reports that many of them did good work in the way of supervision and in looking after the conservancy of the town. This speaks well for the Municipality and the improvement of the town generally.

ENCLOSURE No. 1.

From G. F. T. POWER, Esq., Vice-President of the Municipal Commission, Ellore, to the President of the Municipal Commissions, Godávari District, dated Ellore, 9th July 1881, No. 29.

I have the honor to submit my report on the working of the Towns Improvement Act, III of 1871, in the Ellore Municipality, during the official year 1880-81. All the necessary accounts prepared in the prescribed forms are submitted with the report.

2. The year opened with a balance to the credit of the Municipality of Rs. 4,747-8-0, which was much less than was anticipated. The estimated balance was Rs. 5,890. The difference between the estimated and actual figures is chiefly due to the fact that the Local Fund Board did not pay their contribution towards the cost of the dispensary in 1879-80, and thus the closing balance of that year and opening balance of the year under report were decreased.

3. The receipts of the year, with the opening balance, amounted to Rs. 23,441 ; the expenditure was Rs. 21,611-1-5. There was thus a balance at the close of the year of Rs. 1,829-14-7.

4. The actual receipts were less than the budget estimate by Rs. 2,699, and there was a precisely similar difference between the estimated and actual expenditure. Details of the difference will be explained hereafter under the appropriate heads, but it may here be remarked that more than Rs. 2,000 of the decrease in actual revenue as compared with the estimate is accounted for by the diminished receipts from the License Tax.

5. *Statement I, Receipts—Head I, Rate on Houses and Lands.*—The estimated receipts under this head were Rs. 4,050. The actual demand was Rs. 4,064-3-0, and Rs. 4,022-7-0 was actually collected. There was also an arrear demand of Rs. 24-9-0, of which Rs. 13-1-0 was collected, and the balance Rs. 11-8-0 written off as irrecoverable. The number of houses and lands assessed was the same as in last year. There were 10 appeals, of which 8 were unsuccessful. There were 95 demand notices served and 50 distress warrants were issued. These figures compare very favorably with those of the previous year, when the number of demand notices and distress warrants was 1,514 and 1,092 respectively. In the year now under report no property was actually distrained; the tax due was paid in all cases as soon as the warrant issued.

6. *Taxes on Carriages, Horses, and other Animals.*—The receipts under this head were Rs. 742-12-0. The budget estimate was Rs. 700. The small increase under this head is more than counterbalanced by the decrease under the head.

7. *Registration of Carts.*—Six hundred and nineteen carts were registered and Rs. 1,238 collected, whereas in the previous year 658 carts were registered and Rs. 1,316 collected. The budget estimate of receipts for the year under report (Rs. 1,300) was based on the previous year's collections. Many carts were, it now appears, registered in 1879-80 which were not kept in the town and should not have been registered.

8. The sale of the *Municipal tolls* realized Rs. 9,050, of which one-third goes to the Local Fund Board. The balance, Rs. 6,033-5-4, is the income derived by the Municipality from this source. This is very nearly the same as the estimate and the actuals for the previous year (Rs. 6,000).

9. *Licenses* realized Rs. 332-8-0. The estimated receipts under the head were Rs. 300. In the previous year Rs. 457 were collected, but a considerable portion of this was arrears.

10. *Contribution from Special Funds—Surplus Pound Fund.*—Rs. 24-8-6 were received from this source.

11. The amount contributed by Local Fund Board to the cost of the Municipal Dispensary was Rs. 2,380. The estimate was only Rs. 1,860. The reason for the difference is that the Local Fund Board paid in the year under report the contribution which they should have paid in 1879-80 as well as the contribution for 1880-81.

12. There is a noticeable difference between the actual and the estimated receipts from *Fines and Fees*. It was estimated in the budget that Rs. 300 would be received from this source, whereas only Rs. 150-7-0 was actually received. In the previous year the receipts were Rs. 742-7-0. The decrease in revenue under this head is not, however, a matter for regret, being, as it is, due to the fact that we were able to collect our revenue with less difficulty and fewer demand notices and distress warrants than we anticipated.

13. The *Fees in Schools* realized Rs. 48-14-0, or nearly double the estimate, which was Rs. 25. The estimate in the budget was too low; it was framed when the schools were first established, and when it was not possible to know accurately what the attendance would be.

14. The rent derived from the *Cart-stands* was Rs. 875, while the budget estimate was only Rs. 600 and the actuals of the previous year Rs. 625. The receipts under this head vary from year to year for no very apparent reason.

15. The receipts from *Fees on Cesspools* were over-estimated. They were only Rs. 167-6-0, while the estimate was Rs. 305. The number of people who arranged to have their cesspools cleaned was less than was expected. The receipts, however, were considerably more than they were in the previous year (Rs. 68-4-0).

16. The *Miscellaneous receipts* were Rs. 245-3-2, while the estimate was Rs. 300 and the actual receipts of the previous year Rs. 431-13-6. The decrease is due principally to the fact that several heaps of town sweepings, which it was thought would be sold during the year, were not sold then, but were reserved for future sale. There was also a small decrease in the fees paid by travellers halting in the *Public Bungalow*.

17. The receipts from the *License Tax* were Rs. 2,420, whereas the estimate was Rs. 4,500. The decrease is of course owing to the change in the law, by which incomes under Rs. 500, which were formerly taxable, were exempted from taxation.

18. There are no endowments.

19. *Expenditure—Grant I, Public Works—New Works.*—Rs. 3,060-12-6 were spent on New Works. The estimated expenditure was Rs. 3,000. Of the expenditure—

(*a*) Rs. 2,284-13-7 were incurred on communications, five roads being constructed.

(*b*) Rs. 476-6-11 were spent on buildings, two brick latrines being built and a store-room added to the dispensary.
(*c*) Rs. 130-8-2 were spent to complete drains begun in the previous year.
(*d*) Rs. 29-8-0 was spent on a new well in the dispensary compound, which was not completed at the end of the year, but has been since finished.
(*e*) The miscellaneous expenditure was Rs. 139-7-10.

20. *On Repairs.*—Rs. 1,401-9-5 were spent, the expenditure being distributed as follows :—

(*a*) Communications—Rs. 916-14-0 ; five roads were repaired.
(*b*) Buildings—No expenditure.
(*c*) Drainage—Rs. 117-11-3 ; one culvert and two drains repaired.
(*d*) Water-supply—Rs. 104-13-5 ; six wells and one tank were repaired.
(*e*) Miscellaneous—Rs. 262-2-9. The major part of this expenditure (Rs. 207-6-7) was incurred in repairs to 69 dust-bins.

21. *Establishment.*—The expenditure was Rs. 300, the same as the estimate and as the actuals of the previous year.

22. *Tools, Plant, &c.*—The actual expenditure was Rs. 27-8-0, whereas the estimate was Rs. 100. In the previous year the expenditure was much higher (Rs. 348-7-9) owing to the fact that a Dumpy level and some mathematical instruments were bought.

23. The total expenditure was Rs. 4,789-13-11. The estimate was Rs. 5,000. The difference between the totals is trifling ; but, as I have already pointed out when submitting the budget for 1881-82, more than Rs. 2,000 originally provided for drainage was spent on communications. I need not here recapitulate the reasons for this, as they have been declared to be sufficient.

24. *Grant II—Education.*—The actual expenditure was Rs. 775-14-0, while the estimate was Rs. 640. The difference is principally due to the fact that larger result grants were earned by the schools in the town than was at first anticipated.

25. *Grant III—Sanitation and Medical Services—Hospitals and Dispensaries.*—The expenditure was Rs. 2,668-10-7, whereas it was originally estimated that it would be Rs. 3,590. The difference is due to saving in establishment salaries. The Assistant Apothecary, whose pay was budgeted for from the beginning of year, did not join till October.

There was a small increase in the number of out-patients treated during the year over the number treated in the previous year. The increase in in-patients was very marked.

The figures are—

	In-patients.	Out-patients.	Total.
1879-80	48	6,798	6,846
1880-81	120	6,848	6,968

26. *Contribution to Medical College.*—Rs. 264-15-11 was spent, the estimated expenditure being only Rs. 130. The explanation of the difference is that only one year's contribution was budgeted for, and three years' contribution were actually paid.

27. Rs. 130 were provided in the budget for payment on account of *Sanitary Inspection*, but nothing was paid because nothing was demanded.

28. *Vaccination.*—The expenditure was Rs. 176-2-5, the estimate being Rs. 240. The low expenditure is due to the fact that the post was vacant for about two months, and also to the fact that there was no expenditure on contingencies.

The work done during the year was, I regret to say, very unsatisfactory. The total number of cases was about half what it was in the previous year, and the number of successful cases was less than half. The figures are—

	Successful.	Unsuccessful.	Unknown.	Total.
1879-80	653	110	25	788
1880-81	290	87	31	408

One cause for this unsatisfactory state of things is, I think, to be found in the fact that in August the Vaccinator was dismissed. His successor died soon after appointment, before he could get settled down to his work. The post was then vacant for a short time, no suitable man being immediately available, and the present holder of the post has only worked for about four months of the year. I anticipate better results in 1881-82.

29. *Registration of Births and Deaths.*—The expenditure was Rs. 120, the same as the estimate.

The return of births and deaths compared with the previous year's return is as follows :—

	Cholera.	Small-pox.	Fevers.	Bowel-complaints.	Suicide.	Wounds.	Accidents.	Snake-bites.	Killed by Wild Beasts.	All other Causes.	Total Deaths.	Births.
1879-80 ..	63	..	85	37	3	..	5	2	2	471	668	702
1880-81 ..	..	..	83	35	2	..	6	..	1	391	518	837

This is, I consider, eminently satisfactory. The decrease in the number of deaths and the increase in the number of births are both considerable. The death-rate is now 20·72 per mille per annum, which, in a crowded town like Ellore, is, I think, remarkably low.

30. *Conservancy.*—The expenditure was Rs. 4,212-13-5 and the estimate was Rs. 4,530 ; the difference is slight. The saving was principally effected by suppressing one of the cesspools carts budgeted for.

31. The total expenditure under III was Rs. 7,442-12-11, the estimate being Rs. 8,740. The saving, as already pointed out, is chiefly under the heads Hospitals and Dispensaries and Conservancy.

32. *Grant IV (Miscellaneous Municipal purposes)—Lighting.*—The expenditure actually incurred was Rs. 585-15-5. It was estimated that it would be Rs. 800, but the price of oil fell considerably after the budget was framed, and a large saving was effected.

33. *Avenues.*—Rs. 60-6-4 were spent. The provision in the budget was Rs. 100.

34. *Public Bungalow.*—The expenditure was Rs. 87-0-4, of which Rs. 84 was pay of establishment and the rest contingencies.

35. The Police employed in the town cost the Municipality Rs. 2,688-9-5. This was the cost for eleven months of 1880-81 and three months of 1879-80.

36. Rs. 2,332-4-0 were paid to Government on account of License Tax. The reason why the amount was less than the estimate and than last year's actual has been already explained.

37. *Miscellaneous* expenditure amounted to Rs. 217-5-10, of which Rs. 162-12-6 were paid to Government on account of the maintenance of a lunatic in Waltair Asylum. Rs. 54-9-4 were spent on water-pandals.

38. The total expenditure in this grant was Rs. 5,971-9-4. The estimated expenditure was Rs. 8,280. The License Tax is responsible for the difference.

39. *Grant V—Supervision and Management.*—The expenditure on account of the Head Office calls for no remark.

40. The License Tax Establishment cost Rs. 117, the estimate being Rs. 260. The clerk, whose pay for the whole year was provided, was dispensed with after three months, Rs. 135 being thereby saved.

41. *Miscellaneous.*—The expenditure was Rs. 744-0-9. This is considerably more than the estimate, Rs. 150. When the budget was framed it was not foreseen that the Municipality would have to incur the expense, which it has since actually incurred, on account of printing and census. The houses in the town were also renumbered and the cost debited to this head.

42. The total expenditure in this grant was Rs. 2,630-15-10. The estimated expenditure was Rs. 2,150. The excess expenditure was under *Miscellaneous* as already explained.

43. The balance at the close of the year was Rs. 1,829-14-7.

44. The population of this Municipality according to the Census of 1871 is 25,000. The incidence of taxation per head of population is As. 7-11. If tolls be not taken into account it is 4 annas only. I may remark here that, in calculating the incidence of taxation, the share of the tolls taken by the Local Fund Board has been, as in past years, excluded from consideration and only the actual income derived by the Municipality from the tolls considered as taxation. But it appears to me that the Local Fund share of the tolls is really a part of the taxation imposed on the town, though the Municipal Commissioners do not get the benefit of it. If this Local Fund share be added the incidence of taxation will be As. 9-10.

45. There are nineteen Commissioners, two of whom are Commissioners ex-officio. The officials are eight and the non-officials eleven.

46. The average attendance at meetings was six, which, I think, is rather less than it should be. Four non-official members on an average attended each meeting.

47. There was a very noticeable improvement during the year in the attention paid by the Commissioners generally to their duties; and many of them have done excellent work in the way of supervision and criticism, especially of the conservancy of the town.

48. The health of the town was very good. There was no cholera or other epidemic. There were six cases of small-pox of a mild type, none of which were fatal, and, curiously enough, all the persons attacked had either had small-pox before, or bore marks of successful vaccination. A report from the Assistant Apothecary in charge of the Municipal Dispensary which accompanies this report gives a clear and correct account of the sanitary condition of the town.

49. The accounts were audited in May 1881 by the Head Accountant of the Collector's Office. A report by him on the subject is also sent herewith. His suggestions have been attended to.

ENCLOSURE No. 2.

ANNUAL REPORT of the MUNICIPAL DISPENSARY, ELLORE, for the Official Year 1880-81.

Income.—No fixed income, but all expenses are defrayed by the Municipality in the first instance, and afterwards one-half of the total expenditure is recovered from Local Funds, Ellore Circle.

2. *Expenditure.*—The total expenditure during the past year was Rs. 2,819-1-0. Statement D exhibits the various heads and the amount expended under each head.

3. *Dispensary Building—Repairs, Furniture, Fittings.*—The hospital building is situated in the centre of a capacious compound. It is new and strongly built. It consists of a central portion and two wings, right and left. The central portion is divided into four large compartments, the foremost of which is used as an ante-room, where out-patients assemble every morning previous to being seen; the next compartment is used as a dispensary, where medicines are compounded and dispensed; the third is a stock-room and examining-room; and the fourth, which till a few months ago was nothing more than a confined verandah and of very little use, has, on representation, been converted by order of the Vice-President of the Municipality into a serviceable compartment, which I have utilized as a store-room. The right wing is capable of accommodating twelve patients, and is used for males. The left wing is devoted to the use of females. It contains eight beds.

In November last I requested that the dispensary-room walls may be fitted up with a double row of wooden shelves and that the stock-room be furnished with two movable medicine stands. My request was granted, and the necessary expense was sanctioned by the Vice-President, who saw that these additions were greatly needed.

There are five out-houses, viz., one contagious disease ward, one cook-room, one bath-room, and two latrines.

A well has been sanctioned. It is in construction in the hospital compound.

The total amount expended during the past year for the various improvements and additions to the building was Rs. 198-11-5.

4. *Establishment.*—There is a medical staff and a staff of servants. The medical staff at present consists of an Assistant Apothecary and an Hospital Assistant. At the opening of the year the dispensary possessed no Medical officer of its own; the work was carried on by the Hospital Assistant attached to the Police Hospital, who received a monthly allowance of Rs. 20 from the Municipality for the aid he afforded. In July 1880, a Civil Hospital Assistant was posted to the dispensary, but he was young and inexperienced. It was therefore deemed necessary to secure the services of one with several years' experience, and if possible one with a higher qualification, under whose management it was thought the usefulness of the institution would be more fully developed, being situated, as it is, in a large town with more than 25,000 inhabitants. Accordingly an Assistant Apothecary was applied for. I was appointed in September and assumed charge of the dispensary in October.

The servants attached to this hospital are six in number, viz., one compounder, one ward attendant, a nurse, a cook, a water-carrier, and a toty.

The amount drawn on account of the establishment during the past year is shown in the following table:—

	Rs.	A.	P.
Assistant Apothecary	625	0	0
Hospital Assistant	242	2	3
Compounder	84	0	0
Ward Attendant	72	0	0
Nurse	60	0	0
Cook	60	0	0
Water-carrier	60	0	0
Toty	60	0	0
Total	1,263	2	3

5. *Attendance of Patients.*—The benefits of the dispensary were given to 7,024 persons, of whom 6,898 received medical aid as out-door and 126 as in-door patients. Of the 6,898 out-door patients, 50 remained in hospital on 31st March 1880 since which 6,848 were admitted, 6,825 were discharged cured and relieved, and 73 are now under treatment. Of the 126 in-patients, 6 remained on 31st March 1880, 120 were admitted during the year, 108 were discharged cured and relieved, 10 died, and 8 still remain in hospital. The attendance compares very favorably with that of the previous year during which 6,798 out and 48 in patients were treated. The numbers show that during 1880-81 there was an increase of 100 cases as out-patients, and that the number of in-patients was nearly trebled.

With regard to diets, 14 in-patients dieted themselves and 112 were dieted in hospital. Rs. 227-9-3 were expended on this account. The cost of each diet was 1 anna and 8 pies, and the average cost of dieting each patient was Rs. 2-0-6; the average stay of each patient in hospital being 19½ days.

6. *Most common Diseases.*—These were chiefly malarious fevers, rheumatism, syphilitic affections, inflammation of external ear, respiratory affections, gonorrhœa and its complications, worms, abscesses, boils, ulcers, skin diseases, and general debility.

7. *Cholera.*—There were no admissions with this disease. The town was free from an epidemic.

8. *Small-pox.*—In January six persons living near the native regimental lines were attacked with small-pox in a modified form. Four of these suffered from small-pox previously, and the other two bore marks of successful vaccination. Another case occurred in March and was admitted to hospital as the subject was a pauper. This case also was mild, having been modified by a previous attack of small-pox.

9. *The Health of the People.*—The health of the people on the whole was good. During the rainy season ague, bronchitis, and asthma were frequent and furnished most patients to hospital. The attendance was not so great during this season as during the succeeding one (cold season), in which latter, in addition to the diseases mentioned, the people suffered from all varieties of rheumatism, diarrhœa, severe forms of fever and inflammation of the external ear. During the hot weather the attendance of patients decreased considerably, owing to the better health the natives enjoy in the hot months.

10. *General and Seasonal Phenomena.*—The past year was comparatively a dry one. The total amount of rainfall from 1st April 1880 to 31st March 1881 was only 29 inches. This is below the average. Most rain fell during May, June, July, August, and September. The amount registered in the Taluk Cutcherry as having fallen during these months is 24 inches. Some rain fell during October and November. About the middle of November the cold season commenced; it lasted till the middle of February. This was followed by hot oppressive weather which still continues.

11. *Necessaries of Life.*—Food-grains continued moderately cheap throughout the year, rice, ragi, cholum, dhall, and wheat being abundant. Rice, dhall, and wheat are eaten by the well-to-do classes. The poorer people live on ragi and cholum. Meat was procurable at all times, mutton, fowl, and fish being the principal varieties. Beef was occasionally sold in the market. The quality of these was almost always good.

12. *General Remarks.*—The sanitary condition of the town at present is satisfactory. The principal streets and their branches are lined with drains and studded with dust-bins. Many public latrines are scattered over the Municipal area, and the cleanliness and conservancy are attended to by a sanitary staff consisting of one Sanitary Inspector, four Sub-Inspectors, forty-five toties, six carts and cartmen. The street sweepings, contents of dust-bins and night-soil are removed every morning beyond the Municipal limits and are discharged into open fields. There are some narrow streets, lanes, and bye-lanes which, though kept clean, are unhealthy. The unhealthiness arises from the close crowding together of houses in these localities. The remedy

would be to knock down some of the houses and thus widen the streets. But this remedy is costly, and the Municipality, from want of funds, is not able to apply it.

There are many irrigation canals which ramify in the town. These in the hot weather become offensive while drying up; but during the rains they are useful in carrying off the surplus water, as well as filth, to the adjacent fields.

The water-supply of the town is ample and is obtained from the Kistna Canal, from tanks fed by it, and from wells. That obtained from the canal and tanks is thick with suspended matter chiefly alluvial clay; but when cleared by subsidence or by the use of alum or of clearing nut (*Strychnos Potalorum*), methods usually adopted by the people, it is rendered sweet, safe and good for all purposes. That obtained from wells is usually clear but has a saline taste from the presence of chlorides.

ELLORE,
1st *April* 1881.

(Signed) T. KIDDLE, Assistant Apothecary,
In Medical Charge, Municipal Dispensary.

ORDER THEREON, 15th October 1881, No. 2000.

The receipts and charges of the Ellore Municipality for 1880-81 are contrasted below with the estimates for the year and the actuals for the previous year:—

RECEIPTS.

	Actuals, 1879-80.	Estimate, 1880-81.	Actuals, 1880-81.
	RS.	RS.	RS.
Balance brought forward	8,074	5,890	4,748
Rates on Houses and Lands	4,953	4,050	4,036
Taxes on Vehicles and Animals	756	700	743
Registration of Carts	1,316	1,300	1,238
Tolls	6,000	6,000	6,033
Licenses	457	300	332
License Tax	5,054	4,500	2,420
Assignments by Government	24	10	25
Contribution from Local Funds	..	1,860	2,380
Fines and Fees	742	300	150
Miscellaneous	1,181	1,230	1,336
Total ..	28,557	26,140	23,441

CHARGES.

Refunds	172	..	..
Balances	4,748	1,330	1,830
Total ..	28,557	26,140	23,441

2. The receipts, excluding License Tax collections, amounted to Rs. 16,273 against Rs. 15,750 estimated and Rs. 15,429 realized in 1879-80. The increase over the estimate is owing to the payment of the Local Fund Contribution on account of the hospital for two years, the amount due for 187[illegible]80 not having been paid in that year. The difference as compared with the actuals for 1879-80 is the net result chiefly of a decrease under "Rate on Houses and Lands" and an increase under Local Fund Contribution under the circumstances above stated. The decrease in the rate is not explained, but is probably due to arrears collected in 1879-80 in excess of those collected in the year under review.

—	1878-79.	1879-80.	1880-81.
Number of Notices ..	1,198	1,514	95
Warrants ..	424	1,092	50

3. The collection of taxes was very satisfactory, the outstanding balances at the close of the year being insignificant, although, unlike previous years, but little recourse has had to coercive measures.

4. It is observed that the receipts from private scavengering fees while falling short of the estimate by Rs. 138 exceeded the actuals of the previous year by Rs. 99.

5. The collections under License Tax according to the License Tax statement were Rs. 2,675, but Statement I shows only Rs. 2,420 under that head. The special return does not appear to have been revised by the Board of Revenue, to whom it will now be forwarded. Attention is drawn to G.O., 14th September 1881, No. 1721, Financial Department, which applies as much to annual as to budget accounts.

6. The receipts from tolls are greatly in excess of the outlay on roads and communications.

7. The expenditure, exclusive of Rs. 2,332, License Tax paid to Government, aggregated Rs. 19,279 against Rs. 20,310 estimated and Rs. 18,520 spent in 1879-80, and was distributed in the following proportions:—

Grant I—Public Works	24·8
„ II—Education	4·0
„ III—Sanitation	38·6
„ IV—Lighting and Miscellaneous	18·9
„ V—Supervision	13·7

8. The total Public Works Expenditure nearly equalled the estimate; but the allotment for drains was transferred to communications and utilized in the construction of five new roads, the amount being considered too small to enable any permanent improvement in drainage to be effected on a scale commensurate with the requirements of the town. No information is furnished as to the state of the roads. It is presumed that the sum of Rs. 917 expended on their upkeep was sufficient to keep them in good order.

9. The notice of Education[al] work in the report is unusually meagre. The increase in the expenditure under [Grant] lts Grants is satisfactory; but the report of the Educational Officer regarding the [work] ing of the several schools should have been submitted, and the progress of t[he] o Municipal Schools should have been specially noticed. As observed last year, [the] own is well provided with private schools which work without any aid from Gover[nme]nt or the Municipality.

10. During the year 120 in-patients and 6,848 out-patients were treated in the dispensary against 48 and 6,798 respectively in 1879-80. The report of the Assistant Apothecary in charge is carefully written and evidences the growing popularity and usefulness of the institution.

11. There was a very large decrease in the number of vaccine operations performed, and the work is stated to have been very unsatisfactory owing to the dismissal of the Vaccinator and the death of his successor. Better results are expected in the current year.

12. The registration of vital statistics is improving and shows the following results:—

	1879-80.	1880-81.
Births	702	837
Deaths	668	518

13. The sanitary condition of [the] own is, in the opinion of the Medical Officer, fairly good; but is reported in many [re]spects susceptible of improvement as soon as the finances of the Municipality will allow [of] of it. It is matter for regret that more use was not made for sanitary purposes [of] he opportunity which occurred at the end of 1878-79 when the closing balance [was] s Rs. 8,074. The balance for the year under review is only Rs. 1,830. The contri[bu]tion for Sanitary Inspection was not paid within the year "because nothing was de[ma]nded," an excuse which is inadmissible. The increase in the supervision charges is attributed to the inclusion of the cost of printing and to expenditure entailed by Census work.

14. The other items of expenditure do not call for remark.

15. The cost of enclosing [the] back verandah of the dispensary should appear under Sanitary and Miscellaneous [an]d not under Buildings; and the charges for surveying the town on account of [the] Census should appear under Grant V, Miscellaneous, with the other Census charges [a]nd not under Grant I. These errors have accordingly been rectified in the abstract [at] the head of these Proceedings. Statement V is incomplete inasmuch as the population and the number of children of school-going age are not shown. In the foot-note to Statement II the contribution for Sanitary Inspection, which was not paid within the year, should be shown as an unpaid liability.

16. The Auditor's suggestions regarding the passing of the day-book and the disposal of collections made towards the close of each month are approved.

17. The Vice-President reports that attention has been paid to them.

[30th September 1881, No. 2,046.

2000

PROCEEDINGS OF THE BOARD OF REVENUE, dated 30th September 1881.

No. 2,046.

Read—the following letter from G. D. LEMAN, Esq., President of the Local Fund Boards, Ganjam District, to the Acting Secretary to the Board of Revenue.

ENCLOSURE No. 1.

EXTRACT from the Proceedings of the Local Fund Board of the Chicacole Circle at a Meeting held at Chicacole on 17th January 1881.

* * * * *

1. Read again Revenue Board's Proceedings, No. 1,426, dated 29th September 1880, and the President's footnote thereon, remitting for further consideration the question regarding the employment of a Local Fund Engineer for supervising the Local Fund works in the Chicacole Circle.

Read also the Board's Resolution No. 1, dated 20th December 1880.

The Board are of opinion that, considering that all the roads in the estate belong to the estate and not to the Local Fund Board, and that there is an Engineer and sufficient establishment to supervise their maintenance, it would, as long as the estate is under the Court of Wards, be better for the Board to disconnect themselves with the Parlákimedi Estate so far as the details of the expenditure on roads are concerned. It is proposed that a lump sum, varying in amount according as funds are available, be given every year by the Board to the Court of Wards for the improvement of the communications in the estate, and that it be left entirely to the Court to determine how that money shall be spent, provided that it be utilized for communications only. This arrangement will not, of course, prevent application being made to the Local Fund Board for any further contribution in case necessity for the same should arise.

For the rest of the circle, viz., the Chicacole Taluk, the Board propose the following establishment, amounting in the year to Rs. 6,660, which they think will be quite sufficient at present for the 182 miles in the taluk:—

Items.	Monthly Amount.	Yearly Amount.	Items.	Monthly Amount.	Yearly Amount.
	Rs.	Rs.		Rs.	Rs.
1 Supervisor, at Rs. 100 + 30 travelling allowance	130	1,560	2 Sub-Overseers, 2nd Grade, Rs. 25+10.	70	840
1 Accountant and Draughtsman, at Rs. 25 + 10 travelling allowance ..	35	420	2 Sub-Overseers, 3rd Grade, Rs. 20+10.	60	720
1 Writer, at Rs. 15 + 10	25	300	6 Lascars, at Rs. 6 each	36	432
2 Lascars, at Rs. 6 each	12	144	Pensionary Allowance	87	1,044
2 Sub-Overseers, 1st Grade, at Rs. 35+15.	100	1,200			
			Total ..	555	6,660

(True Extract.)

(Signed) C. J. KNOX,
Vice-President, L. F. Board,
Chicacole Circle.

ENCLOSURE No. 2.

From C. J KNOX, Esq., Vice-President of the Local Fund Board, Chicacole Circle, to the President of the Local Fund Boards, Ganjam District, dated Bhyri, 28th January 1881, No. 16.

WITH reference to the Revenue Board's Proceedings, No. 1,426, dated 29th September 1880, and subsequent papers on the subject of the revision of the Local Fund Road Establishment, I have the honor to forward an extract from the Proceedings of the Circle Board passed at a meeting held on the 17th instant.

RECEIVED
18 OCT 81
BY G.O.S.

2. The question appears to have been confused by calling the roads in the Parlákimedi Estate Local Fund Roads. They are not really such because they are not the property of the Board, the land through which they run not having been acquired from the proprietor. The exact state of the case appears to be that as the estate has been included in the Local Fund Circle, and as the Zemindar pays a certain sum in the shape of land-cess, the Local Fund Board allot a certain portion of this sum for the improvement of the estate roads.

3. No doubt if the Zemindar managed his own estate, the Local Fund Board would have to see that the money given was properly spent, and for this purpose would be obliged, to a certain extent, to supervise the expenditure. But as things are now, there is a competent Engineer and establishment maintained, and their work is scrutinized by the Court of Wards acting through its agents. The Board, therefore, have every guarantee that the money will be laid out to the best advantage for the purpose for which it was given, and no good end would be gained by any further supervision on their part.

4. The Estate Engineer will then have to confine his attention to his own proper work, part of which is the supervision of the work on the roads lying within the estate. The Board having given their yearly contribution for roads to the estate, would leave it to the Court of Wards to settle the details of the expenditure and the supervision of the work, and direct their attention only to the roads in the circle lying outside the estate.

5. The Board think that if this scheme be adopted it will put an end to all confusion, and they recommend that it be brought into force from the 1st April next. If it be approved, the Budget for 1881-82 will have to be revised in two particulars—(1) the details of the estate roads should be excluded and the lump sum given as contribution put in instead, and (2) the amount entered for road establishment for the rest of the circle will have to be altered.

6 I request that the matter may be decided as soon as possible, so that if approved the new establishment may be organized and things put into working order before the beginning of the next year.

Letter—dated 10th March 1881, No. 583.

I HAVE the honor to submit the enclosed for the consideration of the Board of Revenue.

2. The question of the maintenance of the roads situated in Parlákimedi Estate has been considered in a new light by the Local Fund Board, Chicacole Circle. The roads in question are in the Zemindar's land, were mostly constructed from the Zemindar's funds, and were never formally made over to the Local Fund Board by the Court of Wards acting on behalf of the Zemindar, and I presume that the Court do not desire to make them over. In such circumstances it seems to me that the Court will hardly reject the proposal of the Local Fund Board to hand over to them a contribution for the upkeep of the Zemindar's road by the Zemindar's Engineer.

3. Moreover, in my view it must entail an unnecessary waste of time and labor to have a special officer to look after the roads while there is a person already employed competent to do so, and who can do so without any extra trouble in the process of doing his ordinary estate work. The amount of contribution to be paid need hardly be decided on till the Court's decision is known, but it will probably be the ordinary Local Fund grant *plus* the pay of a small establishment and that of a proportion of the Overseer's, &c., pay.

4. Mr. Jennings is now receiving, under Court of Wards' Proceedings, dated 3rd November 1879, No. 3,103, and 7th April 1880, Miscellaneous No. 3,792, Rs. 100 a-month for looking after these roads. The sanction having been granted at the time when it was supposed that these were absolutely Local Fund works, I do not suppose that the Court will now stop this payment, and I think that the Local Fund Board may be asked to pay it.

Resolution—

SUBMITTED for the orders of Government with reference to paragraph 3 of their Order, dated 26th May 1881, No. 927, and paragraph 4 of the Board's Proceedings, dated 22nd July 1881, No. 1,461.

2. The Chicacole Circle Board propose the following scale of the Engineering Establishment to look after the works in the circle, excluding the roads in the Parlákimedi Estate :—

	Per Month. Rs.
1 Supervisor	100
Travelling allowance	30
1 Accountant and Draughtsman	25
Travelling allowance	10
1 Writer	15
Travelling allowance	10
2 Lascars, at Rs. 6 each	12
2 Sub-Overseers, 1st Grade, at Rs. 35 each	70
Travelling allowance to do. at Rs. 15 each ...	30
2 Sub-Overseers, 2nd Grade, at Rs. 25 each	50
Travelling allowance to do. at Rs. 10 each	20
2 Sub-Overseers, 3rd Grade, at Rs 20 each	40
Travelling allowance to do. at Rs. 10 each	20
6 Lascars, at Rs. 6 each	36
	468 × 12 = 5,616

The provision in the current year's budget for the establishment is Rs. 6,230, or Rs. 614 more than the cost of the proposed establishment.

3. The Circle Board are for entrusting the charge of the Local Fund Roads in the Kimedi Estate to the Engineer attached to the estate, but the Court of Wards have decided upon relieving that officer from the extra work which has not been efficiently performed by him. It now rests with the Local Board to make their own arrangements for the upkeep of the roads in question. The President will report upon this point.

Proceedings, dated 10th August 1881, Miscellaneous No. 7,613.

4. Meanwhile the Board recommend that the establishment as now proposed, costing Rs. 348 per mensem, be sanctioned subject to any addition that may be deemed necessary for the supervision of the estate roads. The travelling allowances to the establishment will, of course, be regulated in accordance with the rules of the Public Works Code.

5. The Local Fund Engineering Establishment for the Chatrapur Circle was sanctioned in G.O., Financial Department, dated 9th January 1880, No. 48.

Explanation of Variations

The total expenditure under this Grant is less than the budget Estimate by Rs 210 - 2 - 1. The decrease is due to the fact that two Wells (one nr S. Venkatachellum's Choultry and one in Dispensary Compound) were not completed within the year.

The difference in the items between the Estimate and Actuals of this Grant chiefly arises from the fact that it was found desirable to spend on Communications the funds which were originally provided for Drainage.

Net decrease Rs 210 - 2 - 1

The actual expenditure of each month was Rs 7 and that budgeted Rs 10 hence the difference of Rs 3 per mensem

The increase is owing to the Schools drawing higher grants than what was anticipated.

Net increase Rs 135 - 14 - 0

B.

of the Ellore Municipality for the

(Continued)

Increase over Estimate	Decrease under Estimate	Explanation of Variations
	224 13 9	The decrease is chiefly owing to the Asst. Apothecary not having joined till October 1880
195 10 2		The increase is owing to the large number of out patients
	372 6 9	The number of In-patients was less than what was anticipated.
136 2 11		This is owing to the increase in the number of patients.
44 2 -		This Item was not budgeted.
134 15 11		The Contribution of the two previous years were paid in 1880-81
	120 - -	The Item was not paid
	29 12 7	This post was vacant for more than two months
	24 - -	
	6 10 5	
	2 15 6	
	184 4 2	Only one cart was employed
	107 11 5	
	14 13 -	
510 15 -	1808 2 8	Tot decrease Rs 1297-3-8
	25 8 -	Four lighters were budgeted for, but only three were employed till August
	189 8 7	Although nine new lamps were put up yet there was a decrease; chiefly because Cocoanut oil was Cheaper than in 1879-80 by Rs 2/- per measure
	214 - 7

2000/18

To

The Vice President

Municipal Commission, Ellore

Inctig Gs. 7.50/

Respected Sir

Having been appointed by the President, Municipal Commissions, Godavari District to audit the accounts of your Municipality for 1880-81 I respectfully beg to state that I have Examined the accounts and found them Correct. The Daybook and the Ledger are prepared by the Manager and the way in which they are kept reflects great care and accuracy on the part of the Manager. I beg to suggest that all the pages of the Daybook be numbered and stamped with the initial seal of the Vice President, the total number of the pages being noted on the first fly leaf of the book under the signature of the Vice Preside

2 Separate registers are kept for the House. License Tax &c and all the Sums realized are duly noted in them.

3 The preparation of the Passbook requires a little more care. The several alterations there

made are not initialed by any body.

4 The instructions given in paragraph 14 of G.O. Financial Deptt No 2060 dated 28th October 1879 that Cash should, on no account, be allowed to remain in the hands of the Manager, are not strictly attended to. The Taluk Treasury at Ellore is closed two or three days before the last day of the months and the money realized at the Municipality after the close of the Treasury is retained in the hands of the Manager. The money thus retained at the end of september amounted to Rs 432-5-4 and at the end of october Rs 154-11-4. There is no strong chest in the Municipal office. To allow any sums of money to be retained in the Personal Custody of an officer who has not furnished security seems objectionable. I would recommend that the Sums realized at the Municipal office new after the closure of the Treasury be remitted to the Treasury in a sealed bag to be dealt with as in the case of village remittances received at the Treasury after its close.

They are secured in the Treasury in sealed bags in a strong chest under Police guard and brought to account on the first working day in the following month.

5 On Examining the vouchers I have found that the following documents whose values Exceed Rs 20/- each bear no adhesive stamps

1 Voucher No 40 for Rs 22-5-1 paid to Kami adayya for supplying stone for a drain.

2 Voucher No 121 for Rs 76-8-1 on account of Result Grant of the Church Mission School

3 Voucher No 122 for Rs 22/- on account of the Result Grant of the Church school

4 Voucher No 554 for Rs 66-15-1 paid to a Contractor on account of Cost of Gravel.

Charge on account of the purchase of postage stamps for the use of the Municipality is not supported by any voucher. I would recommend that receipts be obtained either from a stamp Vendor or a Post Master for the value of stamps purchased as in the case of Local Funds.

6 With the above omissions all the charges have been duly Covered by proper vouchers supported by proper authorities and all the Collections have been duly brought to account.

I beg to enclose a statement of the Cash transaction of the Municipality for the

Year under audit

The following sums have been Expunged from the credit and debit sides of the Statement.

1	License Tax Refunded	Rs. 256-0-0	
2	Refund of House tax	1-13-0	
3	1/3 share of tolls paid to Local Funds	3,016-10-8	
4	Remmeration on a/c of Collection of License Tax	122-12-0	
		3,396-3-8	

I beg to remain

NO. 23

GODAVARI DISTRICT,
Municipal Office, COCANADA,
16th August 1881.
Despatched to

From W. S. Foster Esquire
President, Municipal Commission
Godavari District

2520/27

To

The Chief Secretary to
Government, Fort St. George

Sir,

I have the honor to submit the report of the Ellore Municipality for the official year 1880-81 together with the usual accounts prepared in the forms prescribed by Government, and the reports of the Assistant Apothecary in charge of the Municipal Dispensary and of the Auditor.

2 The total receipts of the year under notice amounted to Rs. 23, 441 inclusive of the opening balance of Rs. 4,747-8-0 This was less than what was expected when the Budget was framed by Rs. 1162-8- and is due to the fact that the Con-

tributions

fo (Fmc) 2000/01

tribution towards the cost of the Dispensary in 1879-80 was not paid by the Local Fund Board in that year which necessitates a decrease in the Opening balance in the year under report. The actual Collections were less than the Budget Estimate by Rs 2,699.

3 The receipts under the head, "Rates on houses and lands" was Rs 4,022-7-0 The actual demands was Rs 4,064-3-0 and the Budget Estimate Rs. 4,050- Of an arrear of Rs 24-9-0 Rs 13-1-0 were collected and the remainder written off as irrecoverable in the year under report. Unlike in the previous year, resort was not had to law for the realization of the Amount except in a few cases and no property was sold.

4 There was a small increase under the head fees on carriages and a decrease under registration of Carts not calling for any special remarks.

5 The tolls were sold for Rs 90-50, the Municipal share amounts to Rs

Rs 6,033-5-4 being Rs 33-5-4 over budget and the previous year's receipts 2,000/2,028

6 The receipts under Fines and fees was only Rs 150-7-0 or one half of the Budget estimate and is due to the fact that in the year under report but very few demand notices and distress warrants were issued for the collection of the municipal revenues. The differences under the other heads are fully explained by the Vice President in his report. The larger decrease in the License Tax collections of Rs 2,080-0 is of course due to the Exclusion of incomes below 500 from the Assessment.

7 The expenditure amounted to Rs 21,611-1-5 of this Rs 4789-13-11 were spent on Public Works, Rs 3,060-12-6 for new works consisting of 5 new roads costing Rs 2284-13-7, the Construction of 2 brick latrines and a store room to the dispensary costing together Rs 476-6-11, the completion of drains begun in the last year for Rs 130-8-2 and the Sinking of a well in the Dispensary Compound costing Rs 29-8-0 Rs 1401-9-5 were spent on repairs as follows Repairing 5 roads Rs 916-14-0 Repairing drains Rs 117-11-3, Repairs to tanks and wells Rs 104-13-5. Miscellaneous repairs Rs 262-0 Rs 300-0 were spent on establishment and the balance

balance on tools &c. The amount spent on roads was originally intended for drainage purposes. Ellore certainly want drainage works but the amount proposed to be spent would not, I think, have been sufficient to effect any great results.

8 Only Rs 640 were budgetted for educational purposes while last year Rs 1,070 were allotted for the purpose. The actual expenditure amounted to Rs 775-14-0 This is owing to the payment of Rs 431-12-0 as results grants while only a sum of Rs 280 were allotted for

9 The Hospital charges amounted to — Rs 2,668-10-7. The budget grant is Rs 3570 Rs 3550. the difference is principally due to saving in the pay of the Assistant Apothecary who joined late in the year. The numbers treated at the hospital were 120 in-door and 6,648 outdoor patients. That the benefits afforded by the hospitals are sought after by the people is clear from the single fact that 120 sought aid as in-door patients, while the year before there were only 48. The income of the Hospitals is derived in great part from the Grant of the Local Fund Board. It seems to me the Board contribute more than their fair

fair share.

10 The Contribution to the Medical College was duly paid during the year under report, both arrear and current.

Rs 2000 / 29

11 The Vaccination work has been bad. The numbers vaccinated were 290 successful, 87 unsuccessful and 31 unknown making a total of 408. The number vaccinated last year was 786. The Vice President explains it as being due to the changes in the Vaccinators post. I have received complaints against the present Vaccinator from the Assistant Apothecary in charge of the Dispensary about his work. I am enquiring into it and if I find that he is not attending to his work as he ought to do I shall replace him by another.

12 The registration of births and deaths is satisfactory. The numbers are compared below.

	Births	Deaths
1879-80	702	668
1880-81	837	578

13 The sum expended on Conservancy amounted to Rs 4,212-15-5. Only Rs. 385-15 were spent on lighting, a considerable saving having been effected by the fall in the price of Kerosine oil.

Rs.

14. Rs 2,688-9-5 were paid on account of Police charges during the year and the Licuse Tax collections amounting to Rs 2,332-4-0 were paid over to Government.

15. Under Supervision Rs 2,630-15-10 were spent. The budget allotment was Rs 2,150. The increase is due to the unforeseen expenditure incurred on account of the Canons.

16. The Auditors report shows that the work in the Municipal Office is carefully done. His suggestions are reported to have been adopted. I am glad to be able to report that the Commissioners have paid greater attention to Municipal matters than in the last year. The Vice President reports that many of them did good work in the way of supervision and in looking after the Conservancy of the town. This speaks well for the Municipality and the improvement of the town generally.

I have the honor to be
Sir,
Your most Obedient Servant

W. Foster.

President.

From

G. F. I. Power Esqre
Vice President
Municipal Commissioner
Ellore

To

W. S. Foster Esqre
President
Municipal Commissioners
Godavery District

Sir,

I have the honor to submit my report on the working of the Towns Improvement Act III of 1871 in the Ellore Municipality during the Official year 1880-81. All the necessary accounts prepared in the prescribed forms are submitted with the report.

2 The year opened with a balance to the credit of the Municipality of Rs 4747-8-0 which was much less than was anticipated. The estimated balance was Rs 5890. The difference between the estimated and actual figures is chiefly due to the fact that the Local Fund Board did not pay their contribution towards the Cost of the Dispensary in 1879-80, and thus the Closing balance of that year and Opening balance of the year under report were decreased.

3 The

3 The receipts of the year, with the Opening balance, amounted to Rs 23.441. The expenditure was Rs 21611-1-5 There was thus a balance at the close of the year of Rupees 1829-14-7.

4 The actual receipts were less than the budget estimate by Rs 2199 and there was a precisely similar difference between the estimated and actual expenditure. Details of the difference will be explained hereafter under the appropriate heads, but it may here be remarked, that more than Rs 2000 of the decrease in actual revenue as compared with the estimate, is accounted for by the diminished receipts from the License-tax.

5 Statement I:- Receipts - Head I - Rate on houses and lands. The estimated receipts under this head were Rs 4050. The actual demand was Rs 4064-3-0 and Rs 4022-7-0 was actually collected. There was also an arrear demand of Rs 24-9-0 of which Rs 13-1-0 was collected and the balance Rs 11-8-0 written off as uncollectable. The number of houses and lands assessed was the same as in last year. There were 10 appeals of which 8 were unsuccessful. There were 95 demand notices served and 57 distress warrants were issued. These figures compare very favourably with those of the previous year when the number of demand notices and distress warrants was 1514 and 1092 respectively. In the year now under report no property was actually distrained, the tax due was paid in all cases, as soon as the warrant issued.

6 Taxes on Carriages horses and other Animals. The receipts under this head were Rs 742-12. The budget estimate was Rs 700. The small increase under this head is more than counterbalanced by the decrease under the head

Registration of Carts -

7 Registration of Carts. 619 Carts were registered and Rs 1238. Collected. whereas in the previous year, 668 Carts were registered and Rs 1316 Collected. The budget estimate of receipts for the year under report (Rs 1300) was based on the previous years collections. Many carts were now appear registered in 1879-80 which were not kept in the Town and should not have been registered.

8 The sale of the Municipal tolls realised Rs 9050, of which ⅔ goes to the Local Fund Board. The balance Rs 6033-6-4, is the income derived by the Municipality from this source. This is very nearly the same as the estimate and the actuals for the previous year (Rs 6000)

9 Licenses realised Rs 332-8-0. The estimated receipts under the head were Rs 300. In the previous year Rs 457 were collected, but a considerable portion of this was arrears.

10 Contribution from Special Funds. 2000/31

Surplus from Road Fund. Rs 24-9-6 were received from this source -

11 The amount contributed by Local Fund Board to the cost of the Municipal Dispensary was Rs 2381 The estimate was only Rs 1860. The reason for the difference is that the Local Fund Board paid in the year under report the Contributions which they should have paid in 1879-80, as well as the Contribution for 1880-81.

12. There is a noticeable difference between the actual and the estimated receipts from Fines and Fees It was estimated in the budget that Rs 300 would be received from this source, whereas only Rs 150-7-0 was actually

actually received. In the previous year the receipts were Rs 742-7-0. The decrease in revenue under this head is not however, a matter for regret, being, as it is, due to the fact, that we were able to collect our revenue with less difficulty and fewer demand notices and distress warrants than we anticipated.

13. The fees in Schools, realised Rs 48-14-0 or nearly double the estimate which was Rs 25. The estimate in the budget was too low; it was framed when the schools were first established, and when it was not possible to know accurately what the attendance would be.

14. The rent derived from the cart stands was Rs 875 while the budget estimate was only Rs 600 and the actuals of the previous year Rs 625. The receipts under this head vary from year to year for no very apparent reason.

15. The receipts from fees on Coss-roads were 6d. were over estimated. They were only Rs 167-6-0 while the estimate was Rs 305. The number of people who arranged to have their Coss-roads cleared was less than was expected. The receipts however were considerably more than they were in the previous year (Rs 68-4-0).

16. The Miscellaneous receipts, were Rs 245-3-2 while the estimate was Rs 300. and the actual receipts of the previous year Rs 431-13-6. The decrease is due principally to the fact that several heaps of town sweepings, which it was thought would be sold during the year, were not sold them, but were reserved for future sale. There was also a small decrease in the fees paid by travellers halting in the Public Bungalow.

17. The receipts from the License-tax were Rs 2420, whereas the estimate was Rs 4500. The decrease is of course owing to the change in the law, by which incomes under Rs 500 which were formerly taxable, were exempted from taxation.

18 There are no endowments.

19 Expenditure. Grant I (Public Works) 2050/2137

New works. Rs 3060-12-6 were spent on New works The estimated expenditure was Rs 3000. Of the expenditure

(a) Rs 2284-13-7 was incurred on communications, five roads being constructed.

(b) Rs 476-6-11 were spent on Buildings; Two brick latrines being built and a Storeroom added to the Dispensary.

(c) Rs 130-8-2 were spent to complete drains begun in the previous year.

(d) Rs 29-8-0 was spent on a new well in the Dispensary Compound, which was not completed at the end of the year, but has been since finished.

(e) The Miscellaneous expenditure was Rs 139-7-10

20 On Repairs Rs 1401-9-5 were spent, the expenditure being distributed as follows:-

(a) Communications. Rs 916-14-0 Five roads were repaired

(b) Buildings. No expenditure

(c) Drainage. Rs 117-11-3. One culvert and two drains repaired.

(d) Water supply. Rs 104-13-5. Two wells and one tank were repaired.

(e) Miscellaneous. Rs 262-2-9. The major part of this Expenditure (Rs 207-6-7) was incurred in repairs to 69 dust bins.

21. Establishment. The expenditure was Rs 300, the same as the estimate and as the actuals of the previous year.

22 Tools

22 Tools plants &c. The actual expenditure was Rs 27-8-0, whereas the estimate was Rs 100. In the previous year the expenditure was much higher (Rs 348-7-9) owing to the fact that a Dumpy level and some Mathematical instruments were bought.

23. The total expenditure was Rs 4789-13-11. The estimate was Rs 5000. The difference between the totals is trifling, but, as I have already pointed out when submitting the budget for 1881-82, More than Rs 2000 originally provided for drainage was spent on Communications. I need not here recapitulate the reasons for this, as they have been declared to be sufficient.

24 Grant II — Education.

The actual expenditure was Rs 745-14-0 while the estimate was Rs 640. The difference is principally due to the fact that larger result grants were earned by the Schools in the town than was at first anticipated.

25. Grant III Sanitation and Medical Services Hospitals and Dispensaries. The expenditure was Rs 2668-10-7 whereas it was originally estimated that it would be Rs 3590. The difference is due to saving in Establishment salaries. The Assistant Apothecary, whose pay was budgeted for from the beginning of year, did not join till October.

There was a small increase in the number of out-patients treated during the year, over the number treated in the previous year. The increase in In-patients was very marked.

The figures are:—

	In-patients	Out-patients	Total
1879-80	48	6798	6846
1880-81	120	6848	6968

26 Contribution to Medical College. Rs 264-15-11 was spent, the estimated expenditure being only Rs 130. The explanation of the difference is that, only one years Contribution was budgetted for, and three years Contribution were actually paid.

27 Rs 130. were provided in the budget for payment on account of Sanitary Inspection, but nothing was paid, because nothing was demanded.

28. Vaccination. The expenditure was Rs 176-2-5; the estimate being Rs 240. The low expenditure is due to the fact that the post was vacant for about two months, and also to the fact that there was no expenditure on Contingencies.

The work done during the year was I regret to say very unsatisfactory. The total number of cases was about half what it was in the previous year, and the number of successful cases was less than half. The figures are:—

	Successful	Unsuccessful	Unknow	Total
1879-80	653	110	25	788
1880-81	290	87	31	408

One cause for this unsatisfactory state of things is I think to be found in the fact that in August the Vaccinator was dismissed. His successor died soon after appointment, before he could get settled down to his work. The post was then vacant for a short time, no suitable man being immediately available, and the present holder of the post has only worked for about 4 months of the year. I anticipate better results in 1881-82.

29 Registration of Births and Deaths The expenditure was Rs 120, the same as the estimate.

The return of births and deaths compared with the previous years return is as follows:-

	Cholera	Small pox	Fevers	Bowel Complaints	Suicides	Wounds	Accidents	Snake bites	Killed by wild beasts	All other Causes	Total Deaths	Births
1879-80	63	"	85	37	3	"	5	2	2	471	668	702
1880-81	"	"	93	35	2	"	6	"	1	391	518	837

This is, I consider, eminently satisfactory. The decrease in the number of deaths and the increase in the number of births are both considerable. The death rate is now 20.72 per mille per annum, which, in a crowded town like Ellore, is I think remarkably low.

30 Conservancy. The expenditure was Rs 4212-15-5 and the estimate was Rs 4530, the difference is slight. The saving was principally effected by suppressing one of the Coss-poole Carts budgetted for.

31 The Total Expenditure under Grant III Rs 7442-12-11 the estimate being Rs 8740. The saving as already pointed out is chiefly under the heads Hospitals and Dispensaries and Conservancy.

32 Grant IV (Miscellaneous Municipal purposes) Lighting. The expenditure actually incurred was Rs 585-15-5 It was estimated that it would be Rs 800, but the price of oil fell considerably after the budget was framed, and a large saving was effected.

33 Avenues Rs 60-6-4 were spent. The provision in the budget was Rs 100.

34 Public Bungalow. The expenditure was Rs 87-0-4 of which Rs 84 was pay of establishment and the rest contingencies.

35 The Police employed in the town cost the Municipality Rs 2688-9-5. This was the cost for 11 months of 1880-81 and 3 months of 1879-80. 2000/34

36 Rs 2332-4-0 were paid to Government on account of License-tax. The reason why the amount was less than the estimate and than last year actuals has been already explained.

37 Miscellaneous expenditure amounted to Rs 217-5-10 of which Rs 162-12-6 were paid to Government on account of the maintenance of a Lunatic in Waltair Asylum. Rs 54-9-4 were spent on water pandals.

38 The total expenditure in this Grant was Rupees 5'9729-4. The estimated expenditure was Rs 8280. The License tax is responsible for the difference

39. Grant V Supervision and Management

The expenditure on account of the Head Office calls for no remark.

40. The License-tax establishment cost Rs 117-0-0 the estimate being Rs 260. The Clerk, whose pay for the whole year was provided, was dispensed with after three months, Rs 135 being thereby saved.

41 Miscellaneous The expenditure was Rs 744-0-9. This is considerably more than the estimate Rs 130. When the budget was framed it was not foreseen that the Municipality would have to incur the expense which it has since actually incurred on account of Printing and Census. The houses in the town were also renumbered and the cost debitted to this head.

42. The total expenditure in this Grant was Rupees 2630-15-10. The estimated expenditure was Rs 2150.

The

The excess expenditure was under Miscellaneous as already explained.

43. The balance at the close of the year was Rs 829-14-7

44. The population of this Municipality according to the Census of 1871 is 25,000. The incidence of taxation per head of population is 0-7-11. If tolls be not taken into account it is 4 annas only. I may remark here that in calculating the incidence of taxation the share of the tolls taken by the Local Fund Board has been, as in past years excluded from consideration and only the actual income derived by the Municipality from the tolls considered as taxation. But it appears to me that the Local Fund share of the tolls is really a part of the taxation imposed on the town, though the Municipal Commissioners do not get the benefit of it. If this Local Fund share be added the incidence of taxation will be 0-9-10.

45 There are 19 Commissioners, two of whom are Commissioners ex-officio. The officials are eight and the non-officials eleven.

46 The average attendance at meetings was Six, which I think is rather less than it should be. Four Non-Official members on an average attended each meeting.

47 There was a very noticeable improvement during the year in the attention paid by the Commissioners generally to their duties; and many of them have done excellent work in the way of supervision and criticism, especially of the Conservancy of the town.

15.

48 The health of the town was very good. There was no Cholera or other epidemic. There were Six cases of Small pox of a mild type, none of which were fatal, and, curiously enough, all the persons attacked had either had small pox before, or bore marks of successful vaccination. A report from the Assistant Apothecary in charge of the Municipal Dispensary which accompanies this report gives a clear and correct account of the Sanitary condition of the town.

49 The accounts were audited in May 1881 by the Head Accountant of the Collectors Office. A report by him on the subject is also sent herewith. His suggestions have been attended to.

I have the honor to be
Sir
Your most obedient Servant

Vice President

2/6/35

Annual Report of the Municipal Dispensary Ellore for the official year 1880-81

1 Income - No fixed income. But all expenses are defrayed by the Municipality in the first instance, & afterwards one half of the total expenditure is recovered from Local Funds Ellore Circle

2 Expenditure - The total expenditure during the past year was Rupees 2819-1-- Statement D exhibits the various heads & the amount expended under each head

3 Dispensary building. repairs furniture fittings

The Hospital building is situated in the centre of a capacious compound. It is well & strongly built. It consists of a central portion & 2 wings right & left. The central portion is divided into 4 large compartments the foremost of which is used as an anteroom, where out patients assemble every morning previous to being seen - The next compartment is used as a dispensary, where medicines are compounded & dispensed. The 3rd is a stockroom & examining room & the 4th, which till a few months ago, was nothing more than a confined verandah & of very little use, has on representation been converted by order of the Vice President of the Municipality, into a serviceable compartment, which I have utilized as a storeroom. The right wing is capable of accommodating 12 patients & is used for males. The left wing is devoted to the use of females It contains 8 beds.

In November last, I requested that the Dispensary

Dispensary room walls, may be fitted with a double row of wooden shelves & that stockroom be furnished with 2 movable medicine stands. My request was granted, the necessary expense was sanctioned by the Vice President who saw that these additions were greatly needed.

There are 5 out houses Viz one contagious disease ward 1 cookroom 1 bathroom & latrines.

A well has been sanctioned. It is in construction in the Hospital compound.

The total amount expended during the past year for the various improvements & additions to the building was Rupees 198-11-5

4 Establishment - There is a medical staff & a staff of Servants. The medical staff at present consists of an Assistant Apothecary & an Hospital Assistant. At the opening of the year, the Dispensary possessed no medical officer of its own; the work was carried on by the Hospital Assistant attached to the Police Hospital who received a monthly allowance of Rs 20 from the Municipality for the aid he afforded. In July 1880, a Civil Hospital Assistant was posted to the Dispensary; but he was young & inexperienced. It was therefore deemed necessary to secure the services of one with several years' experience & if possible one with a higher qualification under whose management it was thought the usefulness of the Institution would be more fully developed - being situated as it is, in a large town with more than 25000 inhabitants. Accordingly

an Assistant Apothecary was applied for. I was appointed in September & assumed charge of the Dispensary in October.

The Servants attached to this Hospital are 6 in number Viz one compounder one ward attendant, a nurse, a cook & a water carrier & a coly.

The Amount drawn on account of the Establishment during the past year is shown in the following table

2500/37

	Rs	a	p
Assistant Apothecary	625	-	-
Hospital Assistant	242	2	3
Compounder - -	84	-	-
Ward Attendant -	72	-	-
Nurse - - -	60	-	-
Cook - - - -	60	-	-
Water Carrier - - -	60	-	-
Coly - - - - -	60	-	-
Total.	1263	-	2

5 Attendance of Patients - The benefits of the Dispensary were given to 7024 persons of whom 6898 received medical aid as outdoor & 126 as indoor patients. Of the 6898 outdoor patients 50 remained in Hospital on 31st March since which 6848 were admitted, 6825 were discharged cured & relieved & 73 are now under treatment. Of the 126 in patients 6 remained on 31st. March 80, 120 were admitted during the year, 108 were discharged cured & relieved 10 died & 8 still remain in Hospital. The attendance compares very favorably with that of the previous year during which 6798 out & 48 in patients were treated - The numbers show that during 1880-81 there was an increase of 100 cases as out patients

and

and that the number of in patients was nearly trebled.

With regard to diets 14 in patients dieted themselves & 112 were dieted in Hospital. Rs 227 -9- 3 were expended on this account. The cost of each diet was one anna & 8 pies & the average cost of dieting each patient was Rupees 2 — a — 6. The average stay of each patient in Hospital being 19½ days.

6 Most Common diseases. These were chiefly malarious fevers, Rheumatism, Syphilitic affections, inflammation of external cavities, Respiratory affections, Gonorrhoea & its Complications, worms, abscesses, boils ulcers, skin diseases & General debility.

7 Cholera - There were no admissions with this disease. The town was free from an epidemic.

8 Small pox. In January six persons living near the native regimental lines were attacked with small pox in a modified form. Four of these suffered from small pox previously & the other two bore marks of successful vaccination. Another case occurred in March & was admitted to Hospital as the subject was a pauper. This case also was mild having been modified by a previous attack of small pox.

9 The health of the people - The health of the people on the whole was good. During the rainy season Ague, Bronchitis & Asthma were frequent & furnished most patients to Hospital. The attendance was not so great during this season, as during the succeeding one (cold season) in which latter

latter, in addition to the diseases mentioned the people suffered from all varieties of Rheumatism, Diarrhoea, severe forms of fever & inflammation of the external ear. During the hot weather the attendance of patients decreased considerably, owing to the better health the natives enjoy in the hot months.

2 500/1938

10 General & Seasonal Phenomena - The past year was comparatively a dry one - The total amount of rainfall from 1st April 80 to 31st March 81 was only 29 inches - This is below the average. Most rain fell during May June July August & September. The Amount registered in the Taluq Cutcherry as having fallen during these months is 24 inches. Some rain fell during October & November. About the middle of November the cold season commenced, it lasted till the middle of February. This was followed by hot oppressive weather which still continues.

11 Necessaries of life. Food grains continue moderately cheap throughout the year. Rice, Ragi, cholum, dhall, & wheat being abundant. Rice dhall & wheat are eaten by the well-to-do classes. The poorer people live on ragi & cholum. Meat was procurable at all times, mutton fowl & fish being the principal varieties - Beef was occasionally sold in the market. The quality of these was almost always good

12 General Remarks. The sanitary condition of the

town at present is satisfactory - The principal streets & their branches are lined with drains & studded with dust bins - Many public latrines are scattered over the Municipal area & the cleanliness & conservancy are attended to by a Sanitary staff consisting of one Sanitary Inspector 4 Sub Inspectors 45 tonkies 6 carts & Cartmen - The street sweepings contents of dust bins & nightsoil are removed every morning beyond the Municipal limits & are discharged into open fields - There are some narrow streets lanes & bye lanes which though kept clean are unhealthy - The unhealthiness arises from the close crowding together of houses in these localities. The remedy would be to knock down some of the houses & thus widen the streets - but this remedy is costly & the Municipality from want of funds is not able to apply it.

There are many irrigation canals which ramify in the town - These in the hot weather become offensive while drying up. But during the rains they are useful in carrying off the surplus water, as well as filth, to the adjacent fields.

The water supply of the town is ample & is obtained from the Krishna Canal from tanks fed by it & from wells That obtained from the Canal & tanks is thick with suspended matter chiefly alluvial clay. but when cleared by subsidence or by the use of alum or of Clearing nut (Strychnos Potatorum) methods usually adopted by the people it is rendered

sweet, safe & good for all purposes.
That obtained from wells is usually clear but has a saline taste from the presence of chlorides -

1c 15-D

2000/39 42

The receipts, excluding License tax collections, amounted to Rs 16,273 against Rs 15,750 estimated and Rs 15,429 realized in 1879-80. The increase over the estimate is owing to the payment of the Local Fund Contribution on account of the Hospital for two years, the amount due for 1879-80 not having been paid in that year. The difference as compared with the actuals for 1879-80 is the net result chiefly of a decrease under "Rate on houses and lands" and an increase under

under Local Fund Contribution ~~for the reasons~~ under the circumstances above stated. The ~~fall~~ decrease in the rate is not explained but is probably due to arrears ~~left to be~~ collected in 1879-80 ~~having been larger than~~ in excess of those collected in the year under review.

The collections of the taxes ~~were~~ was very satisfactory, the outstanding balances at the close of the year being ~~small~~ insignificant, although ~~and the resort to coercive measures being~~, unlike previous years, ~~very limited~~ but little recourse had to coercive measures.

It is ~~noted~~ observed that the receipts

	1878-79	1879-80	1880-81
Number of Notices	1198	1514	95
Warrants	424	1092	50

2000/43 16P

receipts from private scavenging fees ~~on cesspools~~ while falling short of the Estimate by Rs 138 exceeded the actuals of the previous year by Rs 99.

The collection under License Tax according to ~~The License Tax statement~~ ~~shows a collection of~~ were Rs 2,675, but statement I shows only Rs 2,420 under that head. The special return does not appear to have been revised by the Board of Revenue, to whom ~~therefore~~ it will now be ~~sent~~ forwarded. Attention is drawn to G.O. 14th September 1881 No 1721 F. D which ~~is equally applicable~~ applies as much to annual ~~and annual accounts~~ as to budgets accounts.

The receipts from Tolls are

greatly in excess
are ~~far in advance~~ of
the outlay on roads and
communications.

The expenditure, exclusive of Rs 2,332, License
tax paid to Government,
aggregated Rs 19279 against
Rs 20,310 estimated and
Rs 18,520 spent in 1879-80
and was distributed
in the following proportions:

Grant I - Public Works	24·8
" — II - Education	4·0
" — III - Sanitation	38·6
" — IV - Lighting & Mis.	18·9
" — V - Supervision	13·7

The total public works
expenditure nearly equalled
the

the Estimate; but the
allotment for drains was
transferred to communications and utilized in the construction
of five new roads, ~~as it~~
~~was thought insufficient~~
~~to effect improvement in~~
~~drainage~~ the amount being considered too small to enable any permanent improvement in drainage to be effected on a scale commensurate with the requirements of the town. No
information is furnished
as to the state of the
roads ~~communications in the~~
~~town~~. It is presumed that
the sum of Rs 917 expended
on their upkeep was
~~found~~ sufficient to keep
them in good order.

The

The notice of Educational work in the ripat is ~~exceedingly~~ ~~poor~~ meagre. The increase in the Results Grants ~~paid~~ expenditure under is satisfactory, but the ~~&~~ report of the Educational officer regarding the working of the several schools should have been submitted, and the progress of the two municipal schools should have been specially noticed. As observed last year the town is well provided with private schools which work ~~independently~~ ~~of~~

2080 / 45

assistance of any aid from ~~the~~ Government or the Municipality.

~~The number of cases treated at the dispensary~~ During the year ~~was~~ 120 in patients and 6848 out patients against 48 and 6798 respectively in 1879-80. The work treated in the Dispy

report of the assistant apothecary in charge ~~of~~ ~~shows~~ the growing popularity and usefulness of the institution.

There was a very large ~~&~~ decrease ~~of 500~~ in the number of vaccine operations performed ~~is reported~~ and the work is stated to have been very

very unsatisfactory owing
principal
to the ~~death of the~~ vaccinator
~~not having been available~~
~~during a portion of the~~
year. Better results are
expected in the current
year. ~~The attention of~~
~~the Sanitary Commissioner~~
~~is requested to the matter.~~

and the death of
his successor.

7

The registration of
vital statistics ~~appears~~
~~to have been carried out~~
~~with care~~.

is improving and
shows the following
results.

	1879-80.	1880-81
Births	702	837
Deaths.	688	578

The sanitary condition
of the town is, in the opinion
of the medical officer,
~~generally~~ fairly good; but is reported in many respects
susceptible of improvement

~~in~~

This matter for regret- that
more was not done in March for
sanitary purposes of the
opportunity which occurred
at the end of 1878-79 when
the closing balance was R5,074.
The balance for the year
under review is only R1,830.
The contribution for sanitary
inspection was not paid within
the year "because nothing
was demanded," an excuse
which is inadmissible.

The ~~expenses of~~ cost of enclosing the back verandah of
the dispensary should appear
under Sanitary and Mis-
cellaneous and not under
Buildings, and

2000
~~1000~~ 190

as soon as
~~in many respects as~~ the
finances of the Municipality
will allow
~~admitting of it~~. The increase
in the Superintendence charges is
attributed to the inclusion
of the cost of printing and
to expenditure entailed by
Census work.

The other items of ex-
penditure do not call
for remark.

The charges for surveying
the Town on account of
the Census should appear
under Grant V mis: with
the other Census charges and
not under Grant I. These
errors have been accordingly
~~been~~ rectified

in the abstract at the head of these proceedings. Statt V is incomplete in as much as the ~~number~~ population and the number of children of school going age ~~is~~ are not shewn ~~there~~. In the footnote to Statement I the contribution for sanitary inspection which was not paid within the year should be shown as a unpaid liability.

The Auditor's suggestions regarding the ~~keeping~~ passing of the day book and the ~~remittances~~ disposal of collections made ~~to the treasury~~ towards the close of each month are ~~good~~. The Vice President reports that attention has been paid to them.

approved –

~~The Govt. note with pleasure the fact that many of the Commissioners took an active interest in the working of the Municipality during the year.~~
