GOVERNMENT OF MADRAS.

FINANCIAL DEPARTMENT.

12th November 1881, No. 2209.

Municipal—Reports.

Read the following paper :—

From H. G. TURNER, Esq., President of the Municipal Commissions, Vizagapatam District, to the Chief Secretary to Government, dated Vizagapatam, 24th September 1881, No. 614 [*Current No. 2694*].

I have the honor to submit the annual report of the Anakápalle Municipality for the official year 1880-81, accompanied by the accounts, &c., as per margin.

1. Annual Accounts.
2. Annual Report of the Vice-President.
3. Medical Report.
4. Auditor's Report.

2. The year under report opened with a balance of Rs. 2,489-11-2. The total receipts during the year amounted to Rs. 6,949-3-2, making a total of Rs. 9,438-14-4 available for expenditure. Of this Rs. 7,417-14-8 were spent during the year on account of the several purposes of the Municipal Act III of 1871, leaving a balance of Rs. 2,020-15-8 at the close of 1880-81.

3. The annexed statement shows the percentage of receipts and charges under the principal heads :—

Receipts.	Percentage.	Charges.	Percentage.
1. Rates on Houses and Lands	29·29	1. Public Works	24·82
2. Taxes on Arts	13·58	2. Education	3·52
3. Taxes on Animals and Carts.	11·98	3. Hospitals	15·62
4. Contributions from Special and Local Funds.	10·67	4. Vaccination	1·80
5. Fines and Fees	1·02	5. Conservancy	13·35
6. Rents on Houses, Gardens, &c.	0·22	6. Miscellaneous Charges including Advances Recoverable.	5·29
7. Miscellaneous Receipts ..	·86	7. Supervision and Management.	14·19
8. Opening Balance	26·38	8. Closing Balance	21·41
	100·00		100·00

4. The income of the Municipality is for the most part derived from Rates on Lands and Taxes on Arts. The Municipality is relieved from the task of collecting License Tax under G.O., No. 1132, dated 28th June 1878.

5. During the year, the Civil Surgeon inspected the Municipal Dispensary, and his remarks were communicated to the Municipal Commissioners.

6. The Vice-President's report gives a detailed account of the administration of the Municipality during the year 1880-81. I agree with him in the several remarks made in the body of the report.

7. As I was not in the district during the year under report, I am unable to make any special remarks.

ENCLOSURE No. 1.

From H. M. WINTERBOTHAM, Esq., Vice-President of the Municipal Commission, Anakápalle, to the President of the Municipal Commissions, Vizagapatam District, dated Narsapatnam, 5th September 1881, No. 32.

I have the honor to report on the working of the Municipal Act in the Anakápalle Municipality during the official year 1880-81. The prescribed statements of receipts and expenditure are enclosed. The Auditor has certified to the correctness of the figures, but has not yet submitted his report. It shall be forwarded to you when received.

2. I was appointed Vice-President a few days before the close of the year under report. My predecessor, Mr. Knox, was much occupied with the rebellion on the Gudem Hills; and this, joined with the fact that Anakápalle is nearly thirty miles from the head-quarters of the Principal Assistant Collector, resulted in the resident non-official Native Commissioners being left almost entirely to their own devices. I think they deserve credit for the measure of interest they have taken in the work. If fault must be found, I think the supervision of work out of doors has not been all that could be wished. I attribute this partly to the fact that the chief officer of the Municipality is (by what I consider a misnomer) styled the "Secretary." The progress of all out-of-door work depends on his energetic supervision; and he has devoted himself to office work rather than to the inspection of latrines and drains and road coolies.

The complete way in which he has collected the taxes merits praise.

3. *Receipts.*—Excluding the opening balance of Rs. 2,489-11-2, the receipts amounted to Rs. 6,949-3-2 (being Rs. 30 less than in 1878-79), and the charges to Rs. 7,417-14-8. The year closed with a balance of Rs. 2,020-15-8.

4. *House and Land Tax.*—When the next budget is submitted it will be a subject for consideration whether the House Tax should not be raised. I have now only to remark that the sanctioned rate of 3 per cent. on the rental of houses and lands is a very troublesome tax to assess and to collect. There is no coin which is 3 per cent. of a rupee. If a rate of 3¼ per cent., or half an anna in the rupee, were sanctioned, it would facilitate both the calculation and the payment of the tax, without appreciably increasing the burden.

5. In forty-four cases distraint warrants had to be issued before this tax was paid; but there was not a single instance in which it was necessary to bring the defaulter's movable property to sale.

6. *Tax on Trades, &c.*—The amount brought forward to 1881 as a recoverable arrear is Rs. 3. Ten individuals were prosecuted for non-payment of this tax, and were fined small sums varying between 8 annas and 1 rupee.

When the town was first made a Municipality in 1877, it was ordered that the tax on Classes VII and VIII should not be collected. The benevolent intention was that the poorer traders should be exempted from taxation; but the result has been that many who would have escaped with a payment of 1 or 2 rupees have now to pay Rs. 3.

The line which divides the classes is a purely arbitrary one, which it must be left to the good sense of the Commissioners to draw, and as they have the power under Section 38 to exempt any person from payment on the score of poverty, this is all that is required for the protection of the very poor. To prescribe a minimum of 3 rupees, when the law prescribes a minimum of 1 rupee, has the very opposite effect from what was contemplated.

7. *Taxes on Animals and Registration of Carts.*—Nine persons were prosecuted for non-payment of these taxes. A tax on bullocks and carts appears unsuited to the present circumstances of this town. In most Municipalities the tax secures immunity from Municipal tolls, and is therefore readily paid; but here there are no tolls. It is difficult to explain to the resident tax-payer why his bandy and bullocks should be taxed, when outsiders are at liberty to use all the roads in the town for their carts and animals toll free.

In many instances a man who pays a tax on his land or trade uses bullocks as his instruments and is taxed for them also. The oil grinder is taxed for his art and also for the bullock that turns his mill. The peddler is taxed for his trade, and also for his pack-bullocks.

Kasimkota is a large town only three miles from Anakápalle, and I think this tax will induce many petty traders, who own five or six pack-bullocks, to change their quarters.

I think the tax ought in policy to be foregone and the deficiency made good by raising the House Tax to 6¼ per cent. (1 anna in the rupee) and extending the Profession Tax.

8. *Fees on Bandies for use of Cart-stand.*—The levy of this small fee (1 anna per diem for a loaded bandy, 6 pies for an empty bandy) is avoided by the bandymen by halting outside the Municipal limits. Scores of bandies halt daily beneath the avenue trees on the roadside between the milestone, which is the western boundary and the river.

They do no harm to any one, and it is not evident how the practice can be stopped; but it will materially affect the Municipal income.

9. *Expenditure—New Works.*—The construction of V shaped drains on both sides of the principal streets was proceeded with. These drains cost Rs. 1-8-4 the running yard (for large drains) and Rs. 1-0-8 (for small drains). During the year 313 yards were completed at a cost of Rs. 374-6-5. A covered drain 100 yards long was constructed at a cost of Rs. 447-2-5 from the trunk road along the road to the cart-stand, to a channel which carries off the drainage of that neighbourhood. Three roads were made through Pagoda Street, Aleuka Street, and Old Street at a cost of Rs. 525-15-8. The total length is 1,148 yards. Rs. 87-15-2 were spent in finishing the wall round the cart-stand.

Repairs.—Rs. 249-9-0 were spent in collecting materials for the repairs of the trunk road. Rs. 75-13-4 were spent on petty repairs. This is not a brilliant show of work.

10. *Education.*—We cannot congratulate ourselves on the state of education. There is a Government Second-grade Middle School in the town which has fifty-one boys on the rolls.

There is a Girls' School supported by the Maharaja of Vizianagrum with fifty girls on the rolls.

The Municipality supports four schools on results grant system.

In these, eighty-two boys are under instruction. The Commissioners also paid a schoolmaster Rs. 8 per month for the greater part of the year; but the average daily attendance at his school was eight boys, and on the recommendation of the Deputy Inspector of Schools his services have been lately dispensed with.

Altogether 141 boys were under instruction, including the pupils at the Government School.

Reckoning at 15 per cent. of the population the Municipality contains 930 boys and 976 girls of a school-going age.

The only explanation for this state of things is that the bulk of the people belong to the agricultural class, and see no use in learning to read and write. Even the Banians, or trading class, do not send their children to school.

11. *Sanitation.*—The Dispensary seems to be to some extent appreciated. The daily average number of out-patients is nearly twenty. Only 106 persons were treated as in-patients. Full particulars on all points will be found in the Dresser's report, which is herewith forwarded. The towns people (with very rare exceptions) declined to avail themselves of the midwife's services; and by the unanimous vote of the Native Commissioners her services were dispensed with from March 15th, 1881.

12. *Vaccination.*—The Municipal Vaccinator vaccinated 477 cases, of which 461 are said to have been successful. Such excellent results are beyond my experience. There was no small-pox in the town during the year, and the Native Commissioners appear to think that Anakápalle is exempt from it. Vaccination will never make much progress except when an outbreak of small-pox excites alarm.

13. *Births and Deaths.*—The number of births registered was males 187, females 200, total 387, or between 28 and 29 per thousand of the population.

The deaths registered were males 131, females 116, total 247, or between 18 and 19 per thousand.

14. *Conservancy.*—The roads and streets near the trunk road are daily swept and kept in decent order, and this is a vast improvement. It must be admitted that practically nothing has been done to change the ancient custom of using the waste places as latrines, leaving all scavenging to the pigs and crows. The Commissioners maintain that this is the only satisfactory manner of getting rid of the filth.

Except where ample funds are available the latrine difficulty seems insuperable. It is increased at Anakápalle because the proprietor claims all the waste places as against the people of the town; and the Commissioners cannot deal with such lands at their pleasure. The growth of prickly-pear is constantly increasing, and is even now so thick that the women are forced to ease themselves in the lanes and byepaths.

To build latrines without providing an adequate establishment of scavengers and conservancy carts to carry off the stuff and a place to bury it in is much worse than useless. The Commissioners are deliberating as to what can be done, and I hope we shall be able to hit upon some device.

15. I must not close this report without alluding to the Census, now happily a labor of the past, but which cost the Commissioners great pains.

The population was found to be as follows:—

	Men.	Women.	Total.
Census of 1871	6,537	6,513	13,050
Census of 1881	6,780	6,625	13,405
Increase ..			355

ANNUAL CONCISE MEDICAL REPORT OF THE MUNICIPAL DISPENSARY OF ANAKAPALLE FOR THE OFFICIAL YEAR 1880-81.

I. General and Seasonal Phenomena.—The season has been good throughout the year and the climate satisfactory.

II. Necessaries of Life.—Nothing unusual regarding the condition of the crops. The prices of the paddy and other grain are just the same as last year, and the people enjoyed well on account of excellent condition of the crops.

III. General state of public health.—Public health has been good all along the year. The people suffered very little from the intermittent fever in the town and its vicinity.

IV. Cholera.—None.

V. Small-pox.—A few cases of mild form of small-pox have been reported to have occurred in the town during the last quarter of the year; but none of them proved fatal.

VI. Malarial Fever.—None except a very few cases of intermittent fever, which made its appearance in the town during the months of August, September, and October 1880.

VII. Prevailing Diseases.—I have not noticed any particular disease that has prevailed during the year except the cutaneous (itch, &c.,) which spread to such an extent in the town and in the surrounding villages during the months of December 1880 and January and February 1881, that it could not be seen in any of the previous years.

VIII. In case of new Dispensaries, dates of opening, &c., should be given.—None.

IX. General Remarks.—The working of the institution continues to be very highly appreciated by all class of people. The number of in and out patients to whom medical aid was afforded during the last four official years was as follows:—

Patients.	1877-78.	1878-79.	1879-80.	1880-81.
In	93	98	121	106
Out	3,555	4,087	5,363	6,241

The number of in-patients treated in the year 1879-80 was 125 and in the year under report 106, the decrease is 19. This decrease is solely attributed to the smaller number of Police patients admitted as in-door sick than last year, and the number of out-patients treated in the year 1879-80 was 5,399 and in the past year 6,241, the increase is 842.

List of Surgical operations performed during the year.—None among Europeans and among natives—In-patients, major three, minor none. Out-patients, major 13, minor 285, and all with success.

The native midwife attached to this institution conducted 22 natural, 3 tedious, 1 premature labor, and 1 retained placenta, during the last 11 months of the past year. As to the tedious labor, two met with success, and in the premature labor the child died.

Her services were dispensed with by the Municipal Board of Anakápalle from the 1st March 1881.

Financial Statement of the Dispensary for 1880-81.—The institution has been supported partly by the Local Fund Board and partly by the Municipal Board of Anakápalle and one-quarter of medical subordinate's salary has been paid by Government for treating Police force in the dispensary. Rs. 750 were paid by the Local Fund Board of Vizagapatam for maintaining the dispensary during the year. Rs. 645-9-3 were spent by the Municipal Board of Anakápalle and Rs. 218-13-0 was contributed by the Government as one-quarter salary of medical subordinate and as diet for Police cases.

Sanitary Condition of the Town of Anakápalle for 1880-81.—Although good deal remains to be done, yet the sanitation of the town has been witnessing a great change for the better on account of the exertions of the Municipal Commissioners, whom I am sorry to say the funds will not enable to undertake any methods of great scale. The roads and streets are kept clean and regularly swept and some new roads have also been formed in the town. One principal road is not yet made in the other side of the town (Gavarapalem), the want of which is greatly felt by the people living in that part of the town. Some dust-baskets have been kept on the sides of the roads at convenient spots for throwing the night-soil. The V mark side drains to the main roads of the town are under construction for clearing out the surface water. There are no suitable sites for latrines in the town and even the few spots on which some mud wall latrines to the extent at present are badly selected being too close to the drinking water wells and too near the public way and which will no doubt prove injurious to the drinking water as well as to the

public health. These latrines are kept clean, but still they are not used by the majority of the people whose residences are near them. The people prefer to resort to vacant spaces near their houses and to vacant grounds around the town which are covered with a thick growth of the croton and other plants. This bad practice of nuisance may be eradicated by the Municipal Commissioners by getting made a few more latrines for the public use in some suitable places.

(Signed) KAREEM SAHIB,
Hospital Assistant,
in Medical charge.

ANAKAPALLE,
1st April 1881.

EXTRACT from the Medical Inspection Report of the Municipal Dispensary, Anakápalle, dated 3rd April 1881.

* * *

The foundation of the building has sunk and the walls have cracked in all directions and the whole building is in such a dangerous condition that I doubt any attempt at repair will be of use; it is true that the present condition has existed since the flood of 1878, and the wonder is that the building has stood so long, nevertheless it is in a very dangerous state, and as there is not sufficient space for the Surgery and Dispensary, I suggest that the building be pulled down and rebuilt somewhat larger.

A dead-house and latrine are much required.

There is plenty of space around the Dispensary limited in front and to the west by large drains to the east the school in the rear open ground. Sanitary condition good.

* * *

The cook-room is in good order. The contagious disease shed which was erected last year is now dilapidated and should be repaired as it will always be useful.

* * *

The immediate neighbourhood of the Hospital is clean; in-patients adjourn to the neighbouring jungles and fields for the purpose of nature; and bed-ridden patients use a chatty and dry earth in the ward or verandah. A latrine is required.

The conservancy of some parts of the outskirts of the town is very bad, and more latrines are required. There is much low jungle that require clearing away.

More substantial dust-bins and repairs to most of the wells are required.

* * *

There are six boarded charpoys which answer the purpose for which they are required. The bedding is sufficient and is in fair order. Furniture sufficient; order good.

* * *

The annual supply of medicines has not yet been received, but judging from the balance now on hand from last year, I consider the medicines have been sufficient. The appliances are in good order and sufficient. Poisons are kept locked up in separate almirah.

* * *

The instruments are in very good order and are amply sufficient for the requirements of the institution. The nipple pump has never been used, nor is it likely to be required. The set of catheters require a case to prevent them being bruised or bent.

* * *

Ague, rheumatic and syphilitic affections, dyspepsia, worms, itch, and ulcer were the principal diseases.

* * *

There is a dissecting table, but no dead-house or *post-mortem* room, and at present *post-mortem* examinations are made anywhere in the Dispensary compound. This is most objectionable.

* * *

The want of more latrines, better dust-bins, clearance of low jungles, and better conservancy of the ground in the neighbourhood of the town, and the bad drainage around most of the wells, were pointed out to the Sub-Magistrate and one of the Municipal Commissioners.

* * *

There are two vaccinators (Local Fund and Municipal) operating in this town. So the medical subordinate has not operated during the past year, but he is now instructed to notify a day and to take every opportunity of operating, a supply of lymph always being obtainable from the vaccinators.

(True Extract.)

(Signed) A. N. ROGERS HARRISON, Surgeon,
Civil Surgeon.

ORDER THEREON, 12th November 1881, No. 2209.

The receipts and charges of the Anakápalle Municipality for 1880-81 are compared below with the estimates for the year and the actuals for the previous year:—

RECEIPTS.

	Actuals, 1879-80.	Estimate, 1880-81.	Actuals, 1880-81.
	Rs.	Rs.	Rs.
Balance brought forward	2,465	2,170	2,490
Rates on Houses and Lands	2,735	2,740	2,762
Taxes on Arts	1,248	1,250	1,232
Taxes on Vehicles and Animals	824	840	749
Registration of Carts	381	400	382
Assignments by Government	11	10	8
Contribution from Local Funds	1,000	1,000	1,000
Fines and Fees	106	50	89

Schools on the Combined System	29	..	..
Inspection (Contribution)	..	70	138
GRANT III.			
Hospitals and Dispensaries	1,481	1,490	1,405
Medical College	45	50	69
Vaccination	143	170	170
Conservancy	1,257	1,330	1,260
GRANT IV.			
Markets	9	230	101
Police	..	400	..
GRANT V.			
Supervision and Management	1,230	1,330	1,339
Advances Recoverable	199	..	..
Refunds	..	..	399
Balance	2,490	240	2,021
Total ..	9,442	8,940	9,439

2. The receipts amounted to Rs. 6,949 against Rs. 6,770 estimated and Rs. 6,977 actually realized in 1879-80. The increase over the estimate was due to the revenue derived from the market which was not anticipated at the time the budget was framed. No receipts appear under Endowments &c., the sum of Rs. 300 shown in the accounts of 1879-80 having been a special contribution by Mr. G. L. Narasinga Rao for the construction of the market. The cart-stand also yielded a revenue for the first time in the year under report. This raised the total receipts very nearly to an equality with those of the previous year.

3. The taxes were collected with ease as in former years; and resort to coercive measures was very limited. The observations of the Vice-President regarding the defects in the existing House rate merit consideration; and the danger of over-assessment pointed out by him as resulting from the exemption of Classes VII and VIII from the Trades Tax is one that should be scrupulously guarded against. To what extent this evil has developed during the four years in which the exemption has been in force should be more specifically reported after a careful scrutiny of the assessment registers. The suggestion regarding the inequitable working of the tax on animals may be brought forward again with the Budget proposals for next year. The Commissioners should first consider the subject.

4. With reference to paragraph 8 of the report it is observed that the Vice-President is unable to suggest remedy for the evil complained of. Possibly the extension of the western municipal boundary to the river might suffice. A report should be submitted on the subject stating whether there are any objections to such a measure.

5. Statement VI-A contains the remark that the decrease under Cart registration is due to the reduction of registration fee to one rupee. The authority for this reduction should be quoted as the rate (Rs. 1-4-0 for each registration) which was in force in 1879-80 was sanctioned for the subsequent year (1880-81) also.

6. The expenditure aggregated Rs. 7,418 against Rs. 8,700 estimated and Rs. 6,952 spent in 1879-80, and was distributed in the proportions noted below:—

Grant I	31·0
,, II	4·5
,, III	39·2
,, IV	1·3
,, V	18·0
Refunds	5·4

The saving of above 1,000 rupees in the Budget provision for Public Works was due partly to some Budget works not having been undertaken and partly to savings effected on those executed. The expenditure on road repairs was unsatisfactory, as the money was spent merely in the collection of materials *and no actual repairs were done.*

7. Education is in a very backward state—a fact attributed to the inability of the population, chiefly agricultural, to appreciate its value. The Municipal School maintained during the greater portion of the year had an attendance of only eight children and was discontinued. Four schools received results grants aggregating Rs. 107 against Rs. 53 in 1879-80. Nothing is stated as to the progress of these schools, but their attendance appears to be improving slowly. The report of the Educational Officer should have been submitted. To some extent the educational wants of the town are supplied by the Government Middle-class School and the Maharaja's Girls' School; but a great deal still remains to be done before the number of children under instruction can be said to bear a reasonable proportion to the population of school-going age.

8. The Dispensary is reported to be fairly appreciated by the people. It relieved 106 in and 6241 out patients against 121 and 5,363 respectively in 1879-80. The Government regret to learn that the midwife's services were dispensed with in consequence of the reluctance of the townspeople to avail themselves of them.

9. The remarks of the Civil Surgeon regarding the present state of the dispensary building demand attention. The number of operations performed by the vaccinator was 477 against 304 in 1879-80, and the cost per successful case fell from 6 annas and 5 pies to 5 annas and 10 pies which however is still too high.

10. The returns of vital statistics show the following results:—

	Births.	Rate Per Mille.	Deaths.	Rate Per Mille.
1879-80	249	19·0	324	24·8
1880-81	387	29·6	247	19·0

11. The difficulties in the way of effecting sanitary improvements in the town are fully stated by the Vice-President. The present condition of the town is reported by

Govt. of [1881] Madras.

FINANCIAL.

To

The PRESIDENT of the
MUNICIPAL COMMISSION,
Anakapalle.

NOVEMBER.

Abstract—Records—Report on the working of the Anakapalle Municipality during 1880-81, reviewed.

No. 611

Vizagapatam
Local Fund Board Office
27th September 1881

CURRENT No. 2269/87

From

H. G. Turner Esquire
President Municipal Commission
Vizagapatam District

Enclosures no. 1 to 4

To

The Honorable R. Davidson C. S.
Chief Secretary to Government
Fort Saint George
Madras.

Sir,

I have the honor to submit the annual report of the Anakapalle Municipality for the official year 1880-81 accompanied by the accounts as per margin.

1. Annual Account
2. Annual Report of the Vice President
3. Medical Report
4. Auditor's Report

2. The year under report opened with a balance of Rs 2489: 11: 2. The total receipts during the year amounted to Rs 6949: 3: 2 making a total of Rs 9438: 14: 4 available for expenditure. Of this Rs 7417: 14: 8 were spent during the year on account of the several purposes of the Municipal Act IV of 1871, leaving a balance of Rs 2020: 15: 8 at the close of 1880-81.

3. The annexed statement shows the

the percentages of receipts and charges
under the principal Heads.

Receipts	Percentage	Charges	Percentage
1. Rates on Houses and Lands.	29.29	1. Public Works	24.88
2. Taxes on Dogs.	13.03	2. Salaries	3.52
3. Taxes on Animals and Carts.	11.98	3. Hospitals	15.63
4. Contributions from Fees and Fines of Police.	10.67	4. Vaccination	1.80
		5. Cemeteries	13.25
5. Fines and fees	1.02	6. Miscellaneous Charges including Interest on Loans	5.27
6. Rents of Houses, Gardens &c	6.22		
7. Miscellaneous Receipts.	.86	7. Lighting and Watering	14.19
8. Sinking Balances.	26.32	8. Closing Balances	21.46
	100.00		100.00

I. The income of the Municipality
is for the most part derived from rates
on Lands and Dogs on which Assessments
respectively is reduced from the Govt
of one Penny & Pounds for every £10
Value assessed by Valuers &c under Ord
No 132 dated 22nd June 1878.
2. During the year the Municipal Corporation
expended the Municipal Revenue in accordance
with the provisions of the Municipalities

(a)

2 to the Municipal Commissioners.
b. The Vice President to report generally
on detailed account of the administration
of the Municipality during the
year 1880-81. I agree with him in
the general remarks made in the
body of the report
7 As I was not in the District
during the year under report I am
unable to make any special remark

I have the honor to be
Sir
Your most obedient Servant
J Templeton
Inspector P. & L. Q.

J Meuctin
Municipal Commissioner
Vice President

Vizagapatam
Dt. 9th September 1881

No. 2201/28

H. G. Turner Esqr.
President Mr. C.
Anakapalle.

Sir,

With reference to your Memo No 308 dated 25th April last, I beg to report the result of my audit of the Municipal Accounts of Anakapalle for the official year 1880-81.

2. The year 1880-81 opened with a balance of Rs 2,489:11:2. The receipts during the year amounted to Rs 694:9:2 and the total expenditure to Rs 717:14:8 leaving a balance, on the 31st March 1881, of Rs 2,020:15:6 which is certified by the Sub-Treasury Officer at Anakapalle.

3. I have examined the several assessment registers kept. Bills were issued to taxpayers according to these registers and taxes were brought to account as they were collected.

By

4. The expenditure is covered by
Vouchers. I noticed that a payment
for Rs 20 : 4 : 0 bears no receipt stamp
During the year 1880-81 the Commissioner
of the Municipal Dispensary was
granted 2 months privilege leave and
another man was put to act during
his absence. The permanent member
was paid his salary fully and the
acting man was paid at Rs 8 a
month. There was then an excess charge
on the Municipality. This is against
the principles of Service under Govern-
ment or Local Fund Boards.

5. The Municipality has no Cash and
the Drawing connected with the Licence
Tax Act of 1870 is done by the Deputy
Tahsildar of Ankapalle under G. O.
No 1132 dated 20th June 1870.

I beg &c.

(Signed) K. Jagannadham Pan-
tulu.

A. T. Wotherton Esqr.

Vice President

Municipal Corporation

Brockville.

To

W. G. Turner Esqr.

Resident Mr. C.

Brockville

Sir

Upon the form of report over the
working of the Municipal Court in the
Brockville Municipality relating
to the Steamer year 1880-81. The Journal
Statements appended and explanations
are enclosed. The Auditor has called
to the Committee of the Legislature, that he
not yet obtained the Report of Mr. Hall
to formerly Agent Mr. Receiver.

2 I have appointed Wednesday
ten days before the date of the year ended
report by Freedom, to Mr. Hall
which accepted with the Auditor and
to Gordon Office, and Mr. Hall with
the Steamer that Constantly in Navi-
gation from the Open Season of the
Navigation

Principal Assistant Collector, resulted in the resident Non-Official Factories Commissioner being left almost entirely to their own devices. I think they deserve credit for the measure of interest they have taken in the work.

If fault must be found, I think the supervision of work out of doors has not been all that could be desired. I attribute this partly to the fact that the Chief Officer of the Municipality is (by Act) Conservator in Secondary Schools the "Secretary" the proper function of whom work depend upon the energetic supervision, and he has therefore to devote much attention to the inspection of factories and dangerous trades.

The Complete way in which he has collected the Lagos Sanitary Revenue.

3 Receipts— Excluding the opening balance of £2,289-11-2, the receipts amounted to £6,949-3-2. Closing Balance in 1878-79; and the Charges to Loyalty-us. The year closed with a balance of £2,020-13-

4 Ground Rent Lagos— When the next Budget is submitted it will be a subject for consideration whether

the

the house tax should not be raised. I have merely to remark that the sanctioned rate of three pence in the pound of house and land is a very troublesome tax to assess and collect. There is no town which 3 per cent of assessed value - the rate of 3½ per cent, as only one in the year, was sanctioned, would facilitate both the Calculation and the payment of the tax, without increasing the burden.

5 Direct Taxes distraint warrants had to be issued before the day was paid; but there was not a single instance in which it was necessary to bring the defaulter's movable property to sale.

6 Town Trades £1— The amount brought forward £1081 as recoverable arrears is £3-0-0 less remitted as worthless for non-payment of the tax, and which should be collected. The Lagos Chiefs in Council did not like the power to be vested in them to remit taxation, but the result has been that many, who could have easily paid the

payment

[illegible] proposed to revise the Excise Laws
to pay £10 [illegible]
the one which divides the Colony is
a purely arbitrary one, which it must
be left to the good sense of the Commis-
sioners, and as they have power, under
sec 38, to exempt Licensees from
payment for the term of twenty years,
is all that is required for the protection
of the very poor. To prescribe a
minimum of three pence, when the
Law prescribes a minimum of one
penny, does the very opposite effect
from what was intended.

7. Taxes on Animals — and Registration of
Carts —

Q persons were prosecuted for non-payment
of these taxes. If Cart or Bullocks and
Carts appeared unlicensed to be present
certain stances of that sort. In most
Municipalities the dog leaves immunity
from Municipal tolls and is therefore
readily paid, but here there are
no tolls. It is difficult to explain
to the resident taxpayer why his
bandy and bullocks should be taxed
when residents are at liberty to use
all the roads in the town for their
Carts and Animals toll-free.

do.

In many instances a man who pays
a tax on his Cart or trade uses Bullocks
as his instruments, and is taxed for them.
also. The oil grinder is taxed for his cart
and also for the bullock that turns
his mill. The Potter is taxed for his
trade, and for his pack-bullocks.

2009
31

Xanthota is a large town only
three miles from Cantapolis, and I
think this tax will increase many petty
traders, who own just a leg pack-bullock
to change their quarters.

I think the tax ought to policy that
foregone, and the deficiency made good
by increasing Income-tax to 6½ per cent, com-
mencing in the current and extending the
profession tax.

8 — Fees on borders for use of Cart-Shandy —

The Levy of this small fee (one penny
per dram for a tot of brandy, dip pie
for an empty bandy) is avoided by the
bandyman lay-bidding-out-side the
Municipal limits. Scores of bandies
both daily beside the aforementioned
road side between the mile-stone, which
is the western boundary and the river, —
They do no harm to any one, and if is
not evident how the practice can be
stopped, but it will gradually affect
the Municipal income.

9 Expenditure — New Works — The construction of V Wapeh drains on both sides of the principal streets and proceeded with — Rec drains (Cost Rs 1-4 the running yard for large drains) and Rs 1-8 (for small drains) During the year 313 yards were Completed at a Cost of Rs 374 & 0. 10 Covered drains for yards Long was Constructed at a Cost of Rs 442-2-5 from the Sun to Road along the road to the Cart Stand, to a Channel which Carries off the drainage of that neighbourhood. Rec transverse made through Rapida Street, Colonka Street and old Street at a Cost of Rs 523-13-8. The total length is 1175 yards. Rs 87-13-2 was spent in finishing the wall round the Cart Stands.

Repairs — Rs 249-9-1 was spent in Collecting Materials for the repairs of the Kunda Road — Rs 73-15-4 was spent on petty repairs. This is not a brilliant Item of work.

10 Education — We cannot congratulate ourselves on the state of Education. There is a Government 2nd Grade Middle School in the Town, which has 51 boys on the roll.

There is a Girls School, supported by the Municipality, with 98 boys and 97 girls of a school going age.

The only explanation for this state of things is that the bulk of the people belong to the agricultural class, and see no need in learning to read & write. Even the Banians or trading class, do not send their children to school.

11 Sanitation — The Dispensary seems to be doing excellent unpretentious work. The daily average number of outpatients is nearly 20. Only 106 persons were treated as in-patients. Full particulars are given in the Hospital Report, with 50 girls on the rolls.

The Municipality supports four Schools on vernacular system. 225/37

In these 82 boys are under instruction.

The Commissioner also pays a School-Master Rs 8-- per month for the greater part of the year; but the average daily attendance at this School was eight boys and on the recommendation of the Deputy Inspector of Schools his services have been lately dispensed with.

Altogether 190 boys were under instruction, including the pupils of the Government School.

Reckoning at 15 percent of the population the Municipality contains 950 boys and 950 girls of a school going age.

The only explanation for this state of things is that the bulk of the people belong to the agricultural class, and see no need in learning to read & write. Even the Banians or trading class, do not send their children to school.

11 Sanitation — The Dispensary seems to be doing excellent unpretentious work. The daily average number of outpatients is nearly 20. Only 106 persons were treated as in-patients. Full particulars are given in the Hospital Report, with

points will be found on the Inspector's report which is herewith forwarded. The Town people (with very few exceptions) take much interest themselves in the Red Rope Surveys and by the unanimous vote of the Sanitary Commissioners the Surveys were approved with from March 15th 1881.

12 Vaccination — The Municipal vaccinator vaccinated 477 cases, of which 461 are said to have been successful. Such excellent results are beyond the average. There was no small pox in the Town during the year, and the Sanitary Commissioners appear to think that vaccination is exempt from it. Revaccination has never had much support except when an outbreak of small pox excited alarm.

13 Births and Deaths — The number of births registered was Males 187, Females 200, total 387, or between 27 and 32 per thousand of the population. The deaths registered were Males 131, Females 116 total 247, or between 18 and 19 per thousand.

14 Conservancy — The roads and streets near the Trunk Sewers are daily swept and kept in decent order

and there is a vast improvement. It must be admitted that practically nothing has been done to change the ancient custom of using the waste plates as Cutaways, leaving all scavenging to the pigs, and Commissioners maintain that this is the only satisfactory manner of getting rid of the filth.

Except where ample funds are available the Sanitary difficulty seems insurmountable. It is proposed at Conshohocken because the Proprietor Claims all the waste places as against the people of the Town, and the Commissioners cannot deal with such land as their property. The growth of pickle pear is constantly increasing and it soon now so thick that the mowers are forced to cease themselves in the lanes and bye-paths.

To build Cottages without providing an adequate establishment of Scavengers and Conservancy Carts to carry off the Stuff, and a place to bury it in is much worse than useless. The Commissioners are deliberating as to what can be done and if hope will shortly be able to send upon some advice.

15 I must not close this report without alluding to the Census, not happily as labour of the past, but which lies at the

Date 5-6-81

Received 7-6-81

No. 32.

Enclosure (3)

Subject.

Report on the working of the Municipal Act in the Amakpala Municipality during the official year 1880-81.

Report on the working of the Municipal Act in the Amakpala Municipality during the official year 1880-81.

I have the honor to submit herewith the Report on the working of the Municipal Act in the Amakpala Municipality during the official year 1880-81.

The Municipality was established in the year 1875 and consists of 9 Members, 3 of whom are appointed by Government and 6 are elected by the Ratepayers. The Municipality is divided into 3 Wards, each Ward returning 2 Members. The Municipality has jurisdiction over the Town of Amakpala and the surrounding villages within a radius of 3 miles from the Post Office. The limits of the Town and the surrounding villages were fixed by the Municipality in the year 1877 and have not been altered since.

The Municipality has been working satisfactorily during the year under report. The Members have taken a keen interest in the affairs of the Municipality and have attended the meetings regularly. The Chairman has also been very active in the discharge of his duties.

The following statement shows the number of meetings held during the year under report and the number of Members present at each meeting:

Wards	1877-1878	1878-1879	1879-1880	1880-1881
No.	93	98	121	100
Each	35 55	40 57	53 83	42 61

[illegible] ... 880
acres 125 and in 22 Years under Cultivation 86. The Rent ...
is £0. The Revenue is solely dependent on the Establishment
of Police stationed Annually in the Town each year
and the Number of Non-Catholic Residents in the Town 1881 was
was 5399 and in each year 2 to 3 hundred less.

Sick & Surgical Attendance for the Year

Some Convicts Surgical and Medical Attendance is provided
Major Brian and Dr Cuthbert Hayes at £85
and all Medicines.

The Native Prisoners Attended to in the Hospital
Confined 22 Patients. 3 Deaths. 19 Remain in Hospital
and 1 Returned Prisoner during the last 11 Months of the
Year. As the Prisons Returns of Prisoners in Custody
and in the Hospital Returns do not agree.

Law Charges were Referred entirely by the Prisoners
Board for Examination from the 1st January 81.

Expenses & Estimates for the Enforcement for 1880-1881.

The Instructions for the Inspection of Prisons by the Local
Board and Yearly by the Inspector General
Have Regularly and Efficiently been Carried out.
Have been Found by Government for the Convict Prison
Force in the Dispensary, No 750 were Found by the Local
Board 12 and by Civil Agencies for Prisoners in Prisons
during the Year. No 600-9 were Found by the
Inspector & Board of Education & No 258-13-0
were Contributed by the Government as a Salary of
Medical Practitioner and Do Duty for Public Cases.

St Amicans Convicts of the Town of Ona Lately for 1880-1881
Although good Care & Attention to the Sanitary Condition of the
Town has been exercising a great change for the better in regard
of the execution of the Municipal Commissioners, as there is room enough
to say the Grounds will not be enough to enable to any method
of great scale. The roads and streets are kept Clean and
are in Early Repair and some more roads have also been formed

in the Town. One principal road is not yet made on the
other side of the Town (Esmeraldem) the wants of which
is greatly felt by the people living in that part of the Town.
Some Dust Carts have been kept on the sides of the roads
as the Commissioners Report for Removing the Night Soil.
The Main side Drains to the main roads of the Town are
under Construction for Cleaning with the Surface Water.
There are no suitable Pits for Latrines in the Town and
even the few Pits on which some mud walls Latrines are
erected as Prisons are badly selected being too close to the
Town Tanks, wells and to near the public way and
which will no doubt prove injurious to the Inhabitants
water as well as to the public health. These Latrines
are kept Clean, but still they are not used by the majority
of the people whose residences are near them. The people
prefer to resort to Secret Spaces near their Houses and
to Vacant Grounds around the Town which are covered
with a thick Jungle of the Cactus and often pollute. The
Local Authorities of Nemencia may be encouraged by the Municipal
Commissioners by getting made a few more Latrines for the
public use in some suitable Places.

Hospital & Asylum
Dr Dos Reis Gallego

Extract from the Medical Inspection Report of the Municipal Dispensary, Ahmedabad, dated 3rd April 1891.

1889
37

× × ×

The foundation of the building has sunk and the walls have cracked in all directions and the whole building is in such a dangerous condition that I doubt any attempt at repair will be of use; if so true that the present condition has existed since the flood of 1878 and the concrete, so that the building has stood so long, however that as it is a dangerous state and there is not sufficient space for the convenient and Dispensary, I suggest that the building be pulled down and

Mr Chief Medical Officer

rebuilt somewhat larger.

A dead house and latrine are much required.

There is plenty of space around the Dispensary limited in front and to the West by large drains & the East the School in the Mean Open ground - Sanitary Condition good.

× × × × ×

The cook room is in good order.

The contagious disease shed which was erected last year is now dilapidated and should be repaired as it will always be useful.

× ×

The immediate neighbourhood of the Hospital is clean - Inpatients admitted from the neighbouring jungle and fields

fields for the purpose of Nature, and bedridden patients use a shabby and dry earth in the Ward or verandah. A latrine is required. 38/9/38

The conservancy of some parts of the Out-skirts of the town is very bad, and more latrines are required. There is much low jungle that require clearing away.

More substantial drainage and repairs to most of the wells are required.

× × ×

There are six bearded charpoys which answer the purpose for which they are required. The bedding is sufficient and is in a fair order. Furniture sufficient, Order good.

× × × ×

The annual supply of medicines has not yet been received but judging from the balance now on hand from last year, I consider the medicines have

have been sufficient. The appliances are in good order and sufficient. Rooms are kept locked up in separate almirah

x x x x

The instruments are in very good order and are amply sufficient for the requirements of the district. The hypodermic syringe has never been used but will likely to be required. The set of catheters require a case to preserve them being smeared of rust.

x x x

Dyce, Rheumatic and Syphilitic affections, Dyspepsia, Worms, Malarial fever were the principal diseases.

x x

There is a dissecting table, but no dead horse or post mortem room and at present no examinations are made anywhere in the Dispensary Compound. This is most objectionable.

x x

The want of more cattle, stall

Mud Huts

dustbins, clearance of low jungle and better conservancy of the ground in the neighbourhood of the town, and the bad drainage around most of the wells, were pointed out to the Sub-Assistant and one of the Municipal Commissioners.

x x x

There are two vaccinators (Local Fund and Municipal) operating in this town. So the Medical Subordinate has not operated during the past year, but he is now instructed to notify a day and to take every opportunity of operating. A supply of lymph always being obtainable from the Vaccinators.

2889/99

The receipts & expenditure for Rs 6949 as noted in 6770 estimated under the 6977 actually realised in 1879-80. The [illegible] estimate for the receipts over Rs 500 for which no reason is given which exceeds the estimate by [illegible] the sum of Rs 300 [illegible] the receipts of 1879-80 having been [illegible] by the G.A. Stevenson Esq. [illegible] Conservancy [illegible]

The cash stand also yielded a revenue for the first time in the year under report. The raised the total receipts very nearly to an equality with those of the previous year.

The taxes were collected with ease as in former years; and resort to coercive measures was very limited. The observations of the Vice President regarding

[illegible] 8209/42

regarding the [illegible] defects in nature of the existing House rate merit consideration, and the danger of over-assessment pointed out by him as resulting from the exemption of Classes VII & VIII from the Trades tax is one that should be scrupulously guarded against. To what extent this evil has developed during the four years in which the exemption has been in force should be more specifically reported after a careful scrutiny of the

the Professional Register.

The Secretary reads
the ~~Secretary~~ Report

of the Executive Committee
~~to~~ be read with the Report
presented at the next
year. The Committee
also ~~to~~ present
the Secretary.

With reference to para
5 of the Report.

Upon which the Vice President is made to enter
that ~~a~~ new ballot for the
~~appointment of Auditor~~
will ~~be~~ consist of

and the cost per suc-
cessful case fell from
6 annas and 5 pice
to 5 annas & 10 pice, which however is still
too high -

The returns of
vital statistics shew
the following results
~~which appear to be~~
~~accurate~~

	Birth Rate per mille		Death Rate per mille	
1879-80.	249	19.0	324	24.3
1880-81.	387	29.6	247	19.0

The difficulties in
the way of effecting
sanitary improve-
ments in the town are
fully stated by the
Vice President. Little
can be done without
scavengers

The present condition of the town is reported by the medical officer as very decidedly unsatisfactory especially in the outskirts which are more or less overrun by prickly pear and scrub jungle.

scavengers and con-
servancy carts and the
matter is and the under the con-
sideration of the com-
missioners. The President
will impress on the com-
missioners the necessity
of early action in the
matter.
