GOVERNMENT OF MADRAS.

FINANCIAL DEPARTMENT.

27th December 1881, No. 2514.

Municipal—Reports.

Read the following paper:—

From G. D. LEMAN, Esq., President of the Municipal Commissions, Ganjam District, to the Chief Secretary to Government, dated Chatrapur, 21st September 1881, *No.* 2605 [*Current No.* 2688].

I have the honor to forward the annual report received from the Vice-President, Chicacole Municipality, for the past official year 1880-81, together with all its accompaniments.

2. The receipts and charges have been so fully explained by the Vice-President that it seems useless to repeat the explanations; I therefore confine my remarks to such points as call for special notice.

3. The report called for by Government regarding the taxation of lands in the Municipality is still awaited from the Vice-President. Mr. MacCartie has not as yet had time to visit Chicacole, for he has been occupied with the Savara Hill inquiry ordered by the Special Commissioner. The collection of land-cess under Act IV of 1871 has been stopped, and steps will be taken for a refund to the Municipality of such sums as may be found due.

4. The collections during the year are better than in 1879-80. I am now getting a monthly demand, collection, and balance statement of the various items of revenue.

5. In No. IV Statement, the items "Tax on Animals," "Tax on Vehicles," and "Registration of Carts" need not have been shown, while the License-tax receipts should have been shown. I have directed the Vice-President that all the outstanding balances must be recovered at once, whereby the necessity for remitting such large sums as are shown in this statement will be avoided.

6. The Local Fund Board, Chicacole Circle, object to the reduction of the share paid to them from one-half to one-fourth of the collections from tolls. But if this is not allowed, they desire that the contribution they make to the Municipality for the Civil Dispensary, which is Rs. 900 now, be reduced. As they give no reason for it, I cannot say anything in support of their request. The report called for in paragraph 6, G.O., No. 936, Financial Department, dated 26th May 1881, has been sent to the Board.

7. Under G.O., 25th April 1877, No. 1347, Financial Department, paragraph 4, deposit transactions should be excluded from Statements I and II. I have therefore struck off the Rs. 85 shown in Statement I, and transferred it to Statement No. III.

8. The names of the roads repaired ought to have been shown in Statement No. II-A, Part II, instead of the particulars of the materials, &c. The wages of laborers employed are far in excess of the materials used, and I think there must be some error in the figures: explanation has been asked for. The Vice-President is o

opinion that in view of the limited expenditure under Grant I and of the low financial state of the Municipality, the post of the maistry, entertained for the works at Rs. 15 a-month, should be done away with. I endorse his opinion, as such petty work can easily be given on contract. With reference to paragraph 36 of the report, I consider that the 15 rupees paid extra to the Municipal Office establishment for registration of births and deaths should be discontinued. The savings to the Municipality from both the above heads would then be Rs. 360 per annum, which would relieve it to some extent in its present want of funds, and enable it to meet other important charges. Nothing was paid towards the contribution for the additional sanitary establishment, apparently for the reason given in paragraph 7 of my report, No. 230 E., dated the 28th March last, embodied in G.O., 26th May 1881, No. 936, Financial Department.

9. Although the Vaccinator's work is supervised by Honorary Surgeon Kinsley, yet the vaccination operations are far from satisfactory, each successful case having cost the Commissioners Annas 8-4. I have already called upon the Vice-President to insist upon the Vaccinators producing not less than the minimum number of cases, 50 per mensem, required by the rules.

10. The number of deaths registered was 277 as shown below against 253 in the preceding year and 602 in the year before:—

	Males.	Females.
Cholera	1	2
Small-pox	16	16
Fever	43	33
Other causes	86	80
Total ..	146	131

11. The births were 157 males and 141 females against 137 and 112, respectively, in the previous year.

12. The contribution for the establishment in the Government Office should be shown under Grant V not Grant IV. I have made the necessary transfer.

13. The sum of Rs. 575-10-9 shown under Grant IV on account of Government License-tax is made up as follows:—

	Rs.	A.	P.
For the year 1878	28	0	0
„ „ 1879	56	0	0
„ „ 1880-81	491	10	9
Total ..	575	10	9

14. The receipts for 1880-81 were Rs. 535, and deducting the remuneration at 5 per cent., the net amount due to Government would be Rs. 508-4-0, but only Rs. 491-10-9 were paid up as above shown during the year, leaving a balance of Rs. 16-9-3, which was, however, remitted to the treasury in July 1881.

15. It is not known what *registration* is meant in paragraph 36 of the Vice-President's report, as he says there Rs. 220-7-3 were expended for "Registration and for Contingencies." I have called for particulars.

ENCLOSURE No. 1.

From C. F. MACCARTIE, Esq., Vice-President of the Municipal Commission, Chicacole, to the President of the Municipal Commission, Ganjam District, dated Parlákimedi, 26th August 1881, No. 37.

I have the honor to submit the annual report of the Chicacole Municipality for the past official year 1880-81, together with the prescribed returns, the Auditor's report, and that of the Medical Officer on the working of the dispensary.

2514/2

2. The receipts of the Municipality during the year under report were Rs. 10,828-15-5, or exclusive of the License-tax collections, Rs. 10,293-15-5 as detailed below:—

Items.	Actuals. Rs.	A.	P.	Estimate. Rs.
1. House-tax	1,766	12	0	2,200
2. Rate on Lands	..			100
3. Professional-tax	1,772	0	0	2,200
4. Taxes on Vehicles and Animals	290	0	0	430
5. Registration of Carts	136	0	0	210
6. Tolls	2,526	0	8	2,800
7. Surplus Pound Fund	1	3	6	..
8. Contribution from Local Funds for Dispensary	900	0	0	900
9. Fees and Fines	89	2	3	50
10. Market Fees, Rents, &c.	1,952	7	0	1,870
11. Endowments for Dispensary	652	11	0	800
12. Miscellaneous	207	11	0	20
Total ..	10,293	15	5	11,580
13. License-tax Collections	535	0	0	1,660
Grand Total ..	10,828	15	5	13,240

3. The opening balances amounted to Rs. 186-10-2 against an estimate of Rs. 30—a small increase due to short expenditure during 1879-80.

4. In submitting the Budget Estimates for the current year, the Vice-President observed that the tax on lands is newly proposed, but this is a misapprehension. The tax was introduced in 1879-80, and Rs. 100 were budgeted for in the year of report, though actual collections have never taken place owing, in the main, to inaccuracy in the statistics on which it was proposed to base the assessment, and also to hesitation in regard to the proper incidence of the tax. The corrected return of taxable area, which is under preparation, is daily expected, and no time will be lost in soliciting orders in regard to the difficulties which have cropped up. Meanwhile it may be observed that such inquiry as has been made renders it quite clear that the Commissioners' estimate of Rs. 1,500 as the safe income from this source is far too sanguine; a third or a fourth of this sum is the maximum which they can ever hope to realise.

5. The following table exhibits at a glance the current and arrear demand, collection, and balance of the house and other taxes during the year:—

Items.	Current. Demand.	Current. Collection.	Arrear. Demand.	Arrear. Collection.	Irrecoverable.	Balance.	Remarks.
	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	
House-tax ..	2,205 0 0	1,347 6 0	1,046 12 8	419 6 0	623 10 8	861 6 0	Subsequently collected Rs. 430-4-0.
Professional-tax ..	2,097 0 0	1,769 8 0	44 0 0	2 8 0	265 8 0	103 8 0	Subsequently collected Rs. 72-8-0.
Tax on Vehicles and Animals.	337 0 0	290 0 0	..	..	..	47 0 0	Subsequently collected Rs. 47.
Registration of Carts.	153 0 0	136 0 0	..	..	..	17 0 0	Subsequently collected Rs. 17.
Total ..	4,792 0 0	3,542 14 0	1,090 12 8	421 14 0	889 2 8	1,028 14 0	

6. The total demand, inclusive of arrear and current, amounted to Rs. 5,882-12-8, of which Rs. 3,964-12-0 were collected within the year, and Rs. 889-2-8 were classed as irrecoverable; for realising the professional-tax-portion of this arrear there is no hope. It is true that the Commissioners have classed Rs. 600 and odd as irrecoverable under House-tax; but I am not satisfied that so large a sacrifice of revenue is really unavoidable. It has, therefore, been resolved to institute further inquiry into the details of this item before proceeding to strike it off.

Realisation of current demand was greatly obstructed by the Census, hence the heavy balance of Rs. 1,028-14-0; the greater portion of this, however, has since been brought to account.

7. The decrease in professional-tax receipts, as compared with the estimate, is mainly ascribable to over-estimation; of course, desertions and deaths have played their part as well.

8. The decrease in tax on vehicles and registration of carts is partly explained by the abolition of the Sub-Court, and the consequent departure of Vakils and others who kept vehicles.

Changes among European Officers were also a source of loss. No further explanation is forthcoming, this source of revenue being necessarily of a fluctuating nature.

9. The tolls fetched a sum of Rs. 4,684-7-6 or, deducting Rs. 267-10-2 establishment charges previous to letting, Rs. 4,416-13-4, of which half was payable to the Local Fund Board to whom, however, Rs. 2,158-6-10 only were disbursed, the difference being withheld in adjustment of an over-payment in the previous year. The net revenue yielded by tolls to the Commissioners was Rs. 2,526-0-8 as compared with an estimate of Rs. 2,800; the difference is ascribable, in my opinion, not so much to the non-restoration of the bridge as to the fact that the tolls were under the direct management of the Commissioners for a short time previous to letting, which supposition receives some color from the figures for the previous years when letting had not been introduced :—

	RS.
1878-79	
1879-80	1,750
	2,004

10. The receipts from the Surplus Pound Fund, amounting to Rs. 1-3-6, call for no special remark.

11. The Chicacole Local Fund Board's contribution towards the Municipal Dispensary was, as usual, Rs. 900.

12. Recourse to coercive process for the collection of house-tax to a larger extent than usual accounts for the increase under Fees and Fines which, however, is trifling.

13. Market fees were swelled above the budget figure by sale of the cart-stand contract, and that for the collection of fees from petty shops in the market.

14. The endowment to the Civil Dispensary fell short of the estimate by Rs. 147-5-0, or about the amount of the Vizianagrum Maharaja's arrear contribution. As this payment seems to have been overlooked, a reference has been made to the Dewan on the subject.

15. The item Miscellaneous consists of—

	RS.	A.	P.
Sale of Refuse	25	3	0
Recovered from the Local Fund Board on account of the advance made to Midwife	97	8	0
Toll Contractor's deposit	85	0	0
Total ..	207	11	0

16. The falling off in the license-tax receipts, as compared with the estimates, is attributed to exemption of the last or four-rupee class from taxation, together with reductions on appeal or objection. The demand now stands at Rs. 535 as compared with Rs. 1,435 and Rs. 1,301 in the two previous years. Allowing Rs. 500 for unavoidable loss of income incurred by raising the scale of taxation, it appears to me that the wealthier merchants must be under-assessed.

EXPENDITURE.

17. The expenditure was Rs. 10,780-11-7, including the net License-tax remittance less 5 per cent., as compared with budget allotment of Rs. 12,640—

Closing Balance ..	234	14	0	630	0	0
Grand Total ..	11,115	9	7	13,270	0	0

18. *Grant I.*—The expenditure under this grant was Rs. 915-4-4 against an estimate of Rs. 1,940. The decrease is due to general short expenditure and *nil* expenditure on New Works.

19. Rs. 574-14-9 were laid out on repairs to the Municipal roads, the particulars of which are as follow :—

	RS.	A.	P.
Purchase of Gravel	166	0	0
Do. of Metal	48	2	0
Wages of laborers	360	12	9
Total ..	574	14	9

The dispensary building was repaired at a cost of Rs. 137-7-11, and Rs. 9-0-2 were spent on stone drains. Under Other Items are compared Rs. 180 as salary to the Municipal Maistry and Rs. 13 odd cost of tools. In view of the limited expenditure under this grant and the low financial state of the Municipality, I consider the entertainment of a special Maistry unadvisable at any rate for the present.

20. The Municipal roads which are 9 miles in length were kept in good order throughout the year.

21. *Grant II—Education.*—Rs. 180 were paid to the Local Fund Board as contribution for educational inspection. In lieu of this arrangement, the Board have lately proposed to entertain a special inspecting agency, which will be reported to the Director of Public Instruction for approval.

22. Rs. 590-3-0 was disbursed in results grants, of which Rs. 394-7-0 was due for the previous year. Rs. 758 were qualified for during the year under report, but of this sum Rs. 562-4-0 had to lie over till the current year owing to want of funds. Payments have been subsequently made to this extent.

23. The particulars of the Elementary Results Grants Schools supported by the Municipality are given in the Statement V.

24. On the 31st March 1881 there were, within the limits of the Municipality, 19 schools with 636 pupils against 20 schools with 603 pupils in the previous year. Fourteen of these schools were examined, of which 7 drew their grants within the year. The increased attendance at existing schools thus compensates for the disappearance of one.

2514/3

25. Two hundred and eighty-one boys were present for examination according to the 1st, 2nd, and 3rd standards; 183 passed in Reading, 185 in Writing, 160 in Arithmetic, 104 in Poetry, 35 in Grammar, 32 in Geography, and 26 in History. On the whole, the boys acquitted themselves creditably according to the Deputy Inspector's report. The number of pupils that attended these Municipal Schools may be classified as follows:—

Hindus	458
Mahomedans	41
Oriyas	20
Pariahs	2
Native Christians	7
Girls of various Castes	108
Total ..	636

The proportion of school-going population is 3·87. The general attendance seems encouraging, but the apathy of the Mussulman population, as evidenced by the short attendance of their children, 41 out of a population of 1,127, is much to be regretted.

26. The bulk of the Masters are unqualified. Two only have passed the General Test Examination and a third holds a Teacher's Certificate. Advanced education is provided for by the Government High School, and the Commissioners have it in contemplation to start a new Town School, under trained instructions, as a feeder to it. The scheme has already been sanctioned.

27. *Grant III.—Sanitation and Medical Services.*—The actual expenditure under this head was Rs. 4,789-0-2 as compared with an estimate of Rs. 4,710. This small increase is owing to the payment of Rs. 200 arrear contribution to the Chicacole Local Fund Board on account of the nurse and midwife.

28. Rs. 2,112-9-1 were absorbed in maintaining the Municipal Dispensary, including the aforesaid arrear contribution.

29. Particulars of the in and out-patients treated at the dispensary appear in the following abstract:—

—	In-patients.							Out-patients.						
	Remaining on 31st March 1880.	Admitted during the Year.	Total treated.	Discharged.	Died.	Remained on 31st March 1881.	Average.	Remained on 31st March 1880.	Admitted during the Year.	Total treated.	Discharged	Died.	Remained on March 31st 1881.	Average.
Europeans	..	2	2	2	..	..		4	40	44	44	..	..	
Natives	13	156	169	149	15	5		124	5,554	5,678	5,626	1	51	
Total ..	13	158	171	151	15	5	13·21	128	5,594	5,722	5,670	1	51	15
1879-80 ..	14	122	136	97	26	13	12·08	96	6,137	6,233	6,101	4	128	44·61

30. *Vaccination.*—The number of persons vaccinated was as follows:—

1880-81.	Male.	Female.	Total.	Successful.	Unsuccessful.	Total.
Under one year	1	2	3	3	..	..
Above one year	273	71	344	287	57	..
Total ..	274	73	347	290	57	..
1879-80 ..	216	80	296	231	65	..

The Municipal Vaccinator works under the immediate supervision of Dr. Kinsley, and the account rendered by him is therefore presumably correct.

31. *Births and Deaths.*—Taking the figures of the last Census, the population of the Municipality is 16,349: 298 births were registered against 277 deaths, the ratio per thousand being respectively 19·01 and 17·13 per annum. I am ignorant of the theoretic proportion which should be maintained under normal conditions between births and deaths, but the registers are

2514/4

said to be carefully kept, precautions having been taken last year to ensure a greater degree of accuracy.

32. *Conservancy.*—Four Nuisance Inspectors, thirty-seven Scavengers, two Toties, and six Carts with their drivers, constitute the conservancy establishment of the town. Two hundred and seventy loads of refuse were sold at 20 loads per rupee; all the thoroughfares were kept clean and the general state of health was on the whole very good.

33. The charges under Grant IV amounted to Rs. 2,704-8-10 against an estimate of Rs. 3,580. The difference between actuals and estimate is principally ascribable to diminution in License Tax receipts, as has been noticed above.

34. The cost of the Municipal Police was Rs. 2,000-0-1 or a trifle over the estimate. Rs. 67-5-0 is set down as expended on road avenues, but I am informed that this is not the case. It represents the wages of two gardeners who look after a small flower and plantain garden behind the Municipal Office. This expenditure being unproductive, I think the money can be used more advantageously elsewhere, and have accordingly ordered the gardeners to be discharged on the ground that the Municipality cannot afford luxuries until they discharge their outstanding liabilities.

The Miscellaneous expenditure consists of the salary of the peon in charge of the cart-stand, but since removed; Rs. 18-1-0 for killing dogs, and Rs. 23-2-9 which represents the contribution for establishment in the Government Office.

35. *Grant V.*—The charges under this grant are as follow:—

	RS.	A.	P.
Office Establishment	1,012	7	3
House Tax Establishment	179	0	0
Toll Establishment	267	10	2
Miscellaneous	17	7	1
Refunds	102	0	0
Total ..	1,476	8	6

36. The Office Establishment consists of—

One Manager, Rs. 40 per mensem.
One Clerk, „ 20 do.
Peon, „ 6 do.

or Rs. 792 per annum, to which is added Rs. 220-7-3 for registration and for contingencies, making a total of Rs. 1,012-7-3. Besides this the Manager and the Clerk receive Rs. 10 and 5 per mensem for the death and birth registration which is chargeable to Grant III.

37. The House Tax Establishment consists of three bill collectors at Rs. 5 each.

38. The tolls were leased out early in the year, and the establishment which had cost Rs. 267-10-2 was dispensed with.

39. Rs. 17-7-1 were spent on petty charges in connection with the Census work, and this will be refunded by Government.

40. Rs. 102 were refunded to those concerned on account of professional tax reduced on appeal.

41. The actual closing balance amounted to Rs. 234-14-0 in comparison with Rs. 630 budgeted for. The liabilities of the Municipality on the 31st March 1881 that were postponed to the current year for want of funds amounted to Rs. 1,350-12-3:—

	RS.	A.	P.
1. To Results Grants Schoolmasters	562	4	0
2. Contribution to Local Fund Board for Educational Inspection	180	0	0
3. Due to Government for Medical supplies for 1877-78 ..	608	8	3
Total ..	1,350	12	3

42. Twenty-two meetings were held during the year at which a total of 119 Commissioners were present, making an average of a little over four per meeting. One or other of the various Vice-Presidents presided at seven meetings when at head-quarters.

43. Collections appear to have been a little slack, but they are rapidly improving, and so far as I can judge from a distance this Municipality may yet be prosperous. The introduction of lighting is desirable as soon as financial exigencies permit, and to my mind the establishment is susceptible of further reduction in place of augmentation, the percentage of its cost to expenditure is already too high.

44. Other remarks I have none to offer, as, since I joined this office on July 4th, the Special Commissioner's orders have kept me on almost continuous duty within the hill tracts.

ANNUAL MEDICAL REPORT OF THE CIVIL DISPENSARY, CHICACOLE.

Population 15,587.

1. *Dispensary Buildings, present state of Repairs and Furniture, Fittings, &c.*—The building is still in a state of disrepair, and measures are only now being taken to make it comfortable for the sick, such as retiling, &c. This is especially the case with the portion occupied by the male patients. The detached building used as female wards is in a better condition, being of more recent construction. The finances of the Municipality would seem to be and to have been the great drawback to thorough repairs being made to the buildings, as also to completing the supply of furniture, which is sufficient, except an almirah for keeping instruments, which now, as heretofore, have been kept in a deal-wood box.

2. *Dispensary Committee and frequency of Meetings.*—The affairs of the dispensary are discussed by the Municipal Commissioners at their fortnightly meetings which are held regularly, and no meetings are held at the dispensary itself.

3. *Most Common Diseases among Out-door and In-door Patients; their prevalence and fatality as compared with other years.*—The classes of diseases for which relief was sought in largest numbers are given below in their order of frequency :—

	Out-patients.		In-patients.	
	1879.	1880.	1879.	1880.
Malarious fevers	1,615	882	7	7
Worms	526	796	..	..
Skin Diseases	426	437	3	3
Ulcers	478	360	24	22
Respiratory affections	303	304	2	2
Rheumatic affections	263	241	9	19
Inflammation of ear	153	198	..	..
Diarrhœa	169	156	13	5
Injuries	135	135	18	20
Abscesses	108	115	6	1
Gonorrhœa and its complications	111	87	4	8
Dysentery	90	84	8	4
Syphilitic affections	79	62	15	14
Dropsy	57	55	22	16
Anæmia	59	51	1	5

It will thus be observed that, as compared with that of 1879, there has been a decrease in the number treated of all the classes of diseases of out-patients, except in worms, inflammation of the ear, respiratory affections, and abscesses ; and noteably in the class of malarial fevers which were mostly mild in their character and yielded readily to ordinary treatment. The experience gained during the previous year (1879) of the value of the tincture of iodine, the tincture of aconite, and the powder of the root of the plant *Aconitum Heterophyllum* in the treatment of intermittent fevers, affords encouragement to still further utilize them as being cheaper and more plentiful than quinine. Very few of these cases of fever exhibited hepatic, spleenic, or other complications, and were observed only in such individuals as were habitual residents of the more malarious tract of country near Parlákimedi.

The prevalence of worms among the children of the lower classes of natives is not uncommon and chiefly just before the setting in of the monsoons is as striking here as I have observed it to be in the Western Coast, as well as in Burma. Santonine is so well known for its efficacy as an anthelmintic by the native population that they will not accept any other drug in substitution.

The respiratory affections were chiefly cases of mild bronchitis, yielding readily to the usual remedies.

Skin diseases, ulcers, and abscesses prevailed largely as usual among the classes of the population usually seeking relief at dispensaries, and needed no special treatment.

A very successful application for ring-worm, which is so commonly seen and which is found often to defy treatment of all kinds, was found to consist of the following combination :—

Sulphur Sublimatum	℥i.
Ammonia Hydrochloras	ʒi.
Soda Biborat	ʒi.
Acedum Sulphuricum	ʒii.
Acedum Aceticum	ƒʒss.
Aqua	ƒ℥ii.
M. ft. Lotio.	ƒʒii.

A little to be applied twice daily. With its use cure has been rapidly attained, and I have seen no relapses.

The cases returned under dropsy and anæmia were almost exclusively found among the poorest of the patients, and, although every means were used to ascertain the result of treatment,

the conditions under which out-patients are treated renders it difficult to write with certainty as to a cure being the ultimate result.

Among the in-patients there is observed a decrease in the numbers of all classes except in those treated for rheumatic and gonorrhœal complications. There were 15 deaths among the in-patients, some of these having been received in a dying state.

4. *Epidemics which have occurred in the Station or its Vicinity.*—The station and its vicinity have been singularly free from epidemic disease of any kind throughout the year under review.

5. *Inspection by Civil Surgeon and Deputy Surgeon-General.*—The Dispensary was inspected by the Deputy Surgeon-General of the Presidency and Northern Districts on the 17th January 1880 whose remarks in the Visitors' Book will be found in the extract from that record appended to this report.

6. *Attendance of patients as contrasted with previous years distinguishing in-door from out-door patients.*—This is tabulated below :—

	In-patients.	Out-patients.
1879	146	6,199
1880	158	5,594

This shows a slight increase of 12 in the number of in-patients and the large decrease of 605 among the out-patients. There is no reason to doubt that the two Dispensaries recently established—one at Tekkali in the Chicacole Sub-division, and the other at Cheepurupillee in the Vizagapatam District, and which came into thorough working order during the year—had the effect of diverting a number of out-patients from this Dispensary which is one cause of the lower number of out-patients treated here. But it appears more reasonable to suppose that, in consequence of the past year being an exceptionally healthy one, less sickness prevailed ending in the result shown by the decrease now noted. Much, if any, stress cannot be laid on the fact of the itinerating Medical practitioner's services in the district forming a factor in the cause of the diminution in number of the out-patients during the year, as, practically, there was little or no itinerating work undertaken, and this post not meeting with favor from the Local Fund Board the members have recently recommended its abolition.

7. *General Remarks.*—The total rainfall during the year was 42·39 inches. This quantity was found to be ample for cultivation, which was carried on actively and ending in a bountiful harvest. The year was remarkably healthy, and prices of articles of food were low, so that the poor were not affected by the opposite condition of things observed in the recently past few years.

Vaccination continues to be practised by the Municipal Vaccinator, and, as opportunities offer, by the Hospital Assistants of the Collector's establishment and of the Dispensary; as is the case elsewhere so here also, we find the prejudices of a large section of the native population decidedly against it, thus making the total of work in this direction appear meagre indeed. The lymph in use is good and was recently supplied by the Inspector of Vaccination.

CHICACOLE,
1st January 1881.

(Signed) P. KINSLEY, Surgeon,
In Medical Charge.

From G. D. LEMAN, Esq., President of the Municipal Commissions, Ganjam District, to the Chief Secretary to Government, dated 9th January 1882, *No.* 117].

ABSTRACT.—Stating that the word "Registration" in paragraph 36 of the Vice-President's report, dated 26th August 1881, No. 37, was a mistake.

ORDER THEREON, 27th December 1881, No. 2514.

The receipts and charges of the Chicacole Municipality for 1880-81 are compared below with the estimates for the year and the actuals for the preceding year :—

RECEIPTS.

	Actuals, 1879-80.	Estimate, 1880-81.	Actuals, 1880-81.

Total ..	11,149	13,270	10,931

2. The receipts, exclusive of License Tax collections, amounted to Rs. 10,209 against Rs. 11,580 estimated and Rs. 9,671 realized in 1879-80. The decrease as compared with the estimate was mainly due to the non-collection of as much as 48·7 per cent. of the House Tax demand, current and arrears, to the Land rate not having been levied, and to considerably diminished receipts under every other head of taxation with the exception of Tolls. The unsatisfactory nature of the House Tax collections is not properly accounted for, being ascribed to the Census work which however did not affect the progress of collections in other Municipalities to anything approaching this extent. It is intended to subject the large arrears of House Tax reported to be irrecoverable to a thorough scrutiny before they are written off. The non-levy of the land rate, notwithstanding the instructions of Government in Government Orders marginally noted, is most unsatisfactory. The further information

Para. 3, G.O., 15th June 1881, No. 1105.
„ 6, „ 26th May „ „ 936.

promised on the subject in the President's letter, dated 8th November 1880, No. 2808, has not yet been procured owing to the absence of the Vice-President while engaged on the Savara Hill inquiry. As regards other heads of taxation the falling off is attributable to lax and negligent estimation in combination probably with still laxer collection.

2514/6

3. The President's remarks regarding the exhibition of arrears uncollected at the close of the year, under Tax on Vehicles and Animals and Registration of Carts in Statement IV, are approved.

4. It does not appear to what extent coercive measures were adopted, the Vice-President merely remarking in paragraph 12 of his report that they were resorted to "to a large extent."

5. The question raised regarding the proportion of tolls to be made over to Local Fund Board will be separately disposed of when the correspondence on the subject comes before Government.

6. The President has rightly eliminated the deposit transactions from Statements I and II, but he should at the same time have reduced the closing balance from Rs. 234-14-0 to Rs. 149-14-0.

7. The expenditure, excluding License Tax paid to Government, aggregated Rs. 10,205 against Rs. 11,100 estimated, and Rs. 9,680 spent in 1879-80, and was distributed in the following proportions:—

Grant I	9·0
„ II	7·5
„ III	46·9
„ IV	20·9
„ V	14·7
Refunds	1·0

8. There was a saving of Rs. 1,025 in the budget allotment for Public Works under Grant I owing to the New Works budgeted for not having been undertaken, and the repairs to roads having cost only a trifle over half the budget provision for the purpose and not much more than a fifth of the income derived from Tolls. The Government sanction the proposal to dispense with the services of the maistry.

9. The Educational work in the Municipality was confined to the payment of Rs. 590, of which Rs. 394 were due for the previous year to ten results grants schools. Fourteen schools were examined for results grants during the year, and the total grants earned are given at Rs. 758. Of this a sum of Rs. 562 or 74·1 per cent. remained undisbursed owing, it is alleged, to want of funds. This is far in excess of the arrears (43·5 per cent.) reported for 1879-80. The Commissioners will be reminded that a gradual diminution in the annual grants to indigenous schools must naturally lead to their decline. The expenditure should be so adjusted as to provide for the usual and necessary grants to schools, and these should never be permitted to fall into arrears. The schools appear to have made fair progress on the whole, but the report of the Deputy Inspector should have been submitted.

10. The number of persons treated at the Civil Dispensary amounted to 171 in and 5,722 out patients against 136 and 6,233 respectively in 1879-80.

11. The Vaccinator performed 347 operations against 296 in 1879-80, and the cost per successful case fell from 10 annas and 5 pies to 8 annas and 3 pies which however is still exceedingly high and must be reduced. The results, on the whole, are still very meagre.

12. The returns of vital statistics are reported to have been carefully kept. Two hundred and ninety-eight births and 277 deaths were registered against 249 and 253 respectively in the previous year.

13. The arrangements made for the conservancy of the town appear satisfactory, and the public health continued to be good during the year. The annual report of the Civil Surgeon should in future contain some notice of the sanitary condition of the town and neighbourhood.

14. The special License Tax account has not been submitted. In regard to this account G.O., dated 14th September 1881, No. 1721, should be borne in mind.

15. The contribution to the Government Office was rightly transferred from Grant IV to Grant V in Statement II. The amounts shown as remitted in Statement IV against "Tax on Arts" and "Tax on Animals" are included as collections in Statement I. The two sets of figures, viz., Column 2 of Statement IV and Column 1 of Statement I, should agree. The toll contractor's deposit should have been shown among "Assets" in note to Statement II, and the unpaid contribution for sanitary inspection should be included among the unpaid liabilities if not already done.

Auditors report on
the Municipal
Accounts of
Chicago
for 1886-87

13/6/6

Statement VI B Comparative Statement (Receipts)

2514/20

Heads.	Actuals for the previous year	Estimate for current year	Actuals for current year 1880-81	Increase over Estimate	Decrease under Estimate	Explanation of Variations.
1 Rates and Taxes &c						
(a) Rate on Houses	1746-8-8	2200	1766-12-0	..	433-4-0	A large portion of the arrear was classed Irrecoverable.
(b) Rate on Lands	..	100	..	..	100-0-0	No Collections under this head took place.
(c) Rate on arts &c	1979	2200	1772	..	428	Overestimation combined with deaths and desertions account for the decrease.
(d) Taxes on Vehicles	60	80	51	..	29	+ The falling off is due to changes among officers and others who kept vehicles.
(e) Taxes on Animals	264-4-0	350	239	..	111	do do
(f) Registration of Carts	166-0-0	210	136	..	74	do do
(g) Gross receipts from Tolls Deduct charges Local Funds Share	2632-6-1	2800	2526-8	..	273-15-4	The difference is ascribable not so much to the delay in Gestization of the bridge as to the fact that the tolls were under the direct management of the Commissioners for a short time during the year.
2 Contribution from Provincial Funds	. . . . .					
3 Contribution from Special Funds	. . . . .					
(a) Surplus Pound Fund	1-8-0	-	1-3-6	1-3-6	-	
4. Contributions from Local Funds						
(a) Public boats						
(b) Civil Dispensary	900	900	900	.	.	
5 Fines and Fees	123-12-0	50	89-2-3	39-2-3	-	Recourse to coercive process for the Collection of house tax to a larger extent than usual accounts for the increase.
6 Fees in Schools and Training Institutions	- - - -					
7. Rents of Houses, Gardens and Markets &c						

Statement ~~H~~ B Comparative Statement (Receipts)

2514/96

Heads.	Actuals for previous year	Estimate for Current year	Actuals for Current year 1880-81	Increase over Estimate	Decrease under Estimate	Explanation of Variations.
(a)						
(a) Market fees and Rents &c	1322-13-3	1400	1328-15-0	..	71-1-0	The increase is due to the selling of the cart stand contract and that for the collection of fees from petty shops in the market.
(b) Fees from Slaughter place	180	180	165	.	15	
(c) Fees from Cart Stand	202-6-0	240	426	186	"	
(d) Fees from Pandal	34-4-0	45	28-8-	..	16-8-0	
(e) Income from Municipal Garden	5	5	4	.	1	
(f) Travellers Bungalow	-	-	-	-	-	
8 Payment for Municipal Services by private parties	-	-	-	-	-	
9. Endowments, Private Contributions and Donations & Miscellanious Receipts	-	-	-	-	-	
(a) Hospitals	605-13-1	800	652-11-0	.	147-5-0	Arrear contribution due from the Vizianagram Maharajah Recovered Subsequently.
10. Imperial License Tax	1379	1660	535	..	1125	The decrease is attributed to the exemption of the last class of Rs from taxation together with large reductions on appeal or objection.
11. Miscellaneous						
(a) Sale of Sweepings	16-9-8	10	13-8-0	3-8-0	"	
(b) Avenues	1-15-3	5	4-2-0	.	0-14-0	
(c) Sale of Materials	"	5	7-9-0	2-9-0	"	
12 Loans	-	-	-	-	-

CURRENT No. 2088

To,

The Chief Secretary to
Government F. D.

Sir,

2514/52 Acknowledged.

I have the honor to forward
the annual Report received
from the Vice President Chicacole
Municipality for the past Official
Year 1880-81, together with all its
accompaniments.

2. The Receipts and Charges
have been so fully explained by
the Vice President that it seems
useless to repeat the explanations
[redacted]. I therefore confine my
remarks to such points as call
for special notice.

3. The report called for by
Government regarding the taxation
of lands in the Municipality —

is

is still awaited from the Vice President. Mr. MacCartie has not as yet had time to visit Chicacole for he has been occupied with the Savara Hill enquiry ordered by the Special Commissioner. The collection of Land Cess under Act IV of 1871 has been stopped and steps will be taken for a refund to the Municipality of such sums as may be found due.-

4. The collections during the year are better than in 1879-80. I am now getting a Monthly Demand Collection and balance Statement of the various items of revenue.

5. In S. III Statement the items "Tax on Animals" "Tax on Vehicles" and "Registration of Carts" need not have been shewn, while the License Tax Receipts should have been shewn. I have directed the Vice President that all the outstanding balances must be recovered at once whereby the necessity for remitting

remitting such large sums as were shewn in this Statement will be avoided.- 2514/46 39

6. The Local Fund Board, Chicacole Circle object to the reduction of the share paid to them from one half to one fourth of the collections from tolls. But if this is not allowed they desire that the contribution they make to the Municipality for the Civil Dispensary which is Rs 900 now, be reduced. As they give no reason for it, I cannot say any thing in support of their request. The report called for in para 6 G.O. S. 936, 7th dated 26th May 1881, has been sent to the Board.

7. Under G.O. 25th April 1877 S. 1347 F.D. para 4. deposit transactions should be excluded from Statements I & II. I have therefore struck off the Rs 85 shewn in Statement I and transferred it to Statement S. III.

8. The names of the roads as

repaired

repaired ought to have been shewn in Statement № II A Part II in instead of the particulars of the materials &c. The wages of labourers employed are far in excess of the materials used and I think there must be some error in the figures; explanation has been asked for.

The Vice President is of opinion that in view of the limited expenditure under Grant I and of the low financial state of the Municipality, the post of the Registry entertained for the works at Rs 15 a month should be done away with. I endorse his opinion as such petty work can easily be given on Contract. With reference to para 3 b. of the report, I consider that the 15 Rs paid Extra to the Municipal office Establishment for registration of births and deaths should be discontinued. The savings to the Municipality from both the above heads would then be Rs 360 per annum which would relieve it to some extent in its present want of funds and enable it to meet other important charges.

Nothing was paid towards the contribution for the Additional Sanitary Establishment apparently for the reason given in para 7 of my report № 230 E. dated the 28th March last embodied in G.O. 26th May 1887 № 936 F.D.

2514/49 4°

9. Although the Vaccinator's work is supervised by Honorary Surgeon Kinsley, yet the re-vaccination operations are far from satisfactory, each successful case having cost the Commissioners Annas 8-4. I have already called upon the Vice President to insist upon the Vaccinator's producing not less than the minimum number of cases - 50. per mensem required by the Rules.

10. The number of deaths registered was 277 as shewn below against

against 253 in the preceding year and 602 in the year before.

	Males	Females
Cholera	1	2.
Small Pox	16	16
Fever	43	33.
other causes	86	80
Total	146	131.

11. The births were 157 males and 141 females against 137 and 112 respectively in the previous year.

12. The contribution for the Establishment in the Government Office should be shewn under Grant V not Grant IV. I have made the necessary transfer.

13. The sum of Rs 575-10-9 shewn under Grant IV on account of Govt Licence Tax is made up as follows.

For the year 1878	Rs	28--
" " " 1879	"	56--
" " " 1880-81	"	491-10-9
Total		575-10-9

14. The receipts for 1880-81 were Rs 535, and deducting the remuneration at 5 per cent, the net amount due to Government would be Rs 508-4-- but only was Rs 491-10-9 were paid up as above shewn during the year, leaving a balance of Rs 16-9-3 which was however remitted to the Treasury in July 1881.

2514/50 41

15. It is not known what registration is meant in para 36 of the Vice Presidents report as he says there Rs 220-7-3 were expended for "registration and for Contingencies" I have called for particulars.

I have the honor to be
Sir,
Your most Obedt Servant.

G W Leman
President.

Subject.

Reporting on the Chicacole
Municipality for the
Official year 1880-81

E.H. [illegible]

Received in the Records Office September 12th/81

No. 37. Camp Parlakimedi
26th August 1881. 588

From

E.T. MacCarthy Esquire
Vice President
Chicacole Municipality

To 43

G.D. Lonan Esquire 2514/39
President Municipalities
Ganjam District.

Sir.

I have the honor to submit the annual report of the Chicacole Municipality for the past Official year 1880-81 together with the prescribed returns, the Auditor's report and that of the Medical Officer on the working of the Dispensary.

2. The receipts of the Municipality during the year under report were Rs. 10828-15-5 or exclusive of the License Tax Collections Rs. 10,293-15-5 as detailed below:—

Items.	Actuals.	Estimate.
1. House Tax.	Rs. a. p. 1,186 12 -	Rs. 2,200
2. Rate on Lands	- - -	100
3. Professional Tax.	1,772 - -	2,200
4. Taxes on Vehicles and Animals.	290 - -	430
5. Registration of Carts	136 - -	210.
6. Tolls.	2526 - 8	2800
7. Surplus Pound Fund	136 -	"
8. Contribution from local Funds for dispensary	900 - -	900
9. Fees and Fines	89 2 3	50.
10. Market fees, rents &c.	1,952 7 -	1,870.
11. Endowments for dispensary	652 11 -	800.
12. Miscellaneous.	207 11 -	20.
Total	10,293 15 5	11,580
13. License Tax Collections	535 - -	1,660
Grand Total	10,828 15 5	13,240

3. The opening balances amounted to Rs. 186-10-2. against an Estimate of Rs. 30 a small increase due to short Expenditure during 1879-80.

4. In submitting the Budget Estimates for the current year the Vice President observed that the tax on lands is newly proposed, but this is a mis-apprehension. The tax was introduced in 1879-80 and Rs. 100 were budgetted for for in the year report, though actual collections have never taken place owing in the main to inaccuracy in the statistics on which it was proposed to base the assessment and also to hesitation in regard to the proper incidence of the tax. The corrected return of taxable area which is under preparation is daily expected, and no time will be lost in policting orders in regard to the difficulties which have cropped up. Meanwhile it may be observed that such enquiry as has been made, renders it quite clear that the Commissioner's Estimate of Rs. 1500 as the safe income from this source is far too sanguine, a third or a fourth of this sum is the maximum which they can ever hope to realize.

5. The following table exhibits at a glance the current and arrear demand Collection and balance of the House and other taxes during the year.

2514/40

Items.	Current Demand	Current Collection	Arrear Demand	Arrear Collection	Irrecoverable	Balance	Remarks.
	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	
House Tax	2,205 - -	1,347 6 -	1,076 12 8	419 6 -	623 10 8	861 6 -	Subsequently collected Rs. 430-4
Professional Tax	2,097 - -	1769 8 -	44 - -	2 8 -	26 8 -	103 8 -	Do Rs. 72-8-
Tax on Vehicles and Animals	337 - -	290 - -	- - -	- - -	- - -	47 - -	Do Rs. 47-
Registration of carts	153 - -	136 - -	- - -	- - -	- - -	17 - -	Do Rs. 17.
Total	4,792 - -	3,542 14 -	1,090 12 8	421 14 -	889 2 8	1,028 14 -	

6. The

6. The total demand inclusive of arrear and current amounted to Rs 5882-12-8 of which Rs 3964-12-- were collected within the year and Rs 889-2-8 were classed as irrecoverable. For realizing the professional tax-portion of this arrear there is no hope. It is true that the Commissioners have classed ~~and~~ Rs 600 and odd as irrecoverable under House Tax but I am not satisfied that so large a sacrifice of Revenue is really unavoidable. It has therefore been resolved to institute further enquiry into the details of this item before proceeding to strike it off.

Realization of current demand were greatly obstructed by the Census, hence the heavy balance of Rs 1028-14-- ; the greater portion of this however has since been brought to account.

7. The decrease in professional Tax receipts as compared with the Estimate, is mainly ascribable to our Estimation, of course desertions and deaths have played their part as well.

8. The decrease in tax on vehicles and registration of carts is partly explained by the abolition of the Sub-Court and the consequent departure of Vakils and others who

who kept vehicles. Changes among European Officers were also a source of loss. No further explanation is forthcoming, this source of revenue being necessarily of a fluctuating nature

9. The tolls fetched a sum of Rs 4684-76 or deducting Rs 267-10-2 Establishment charges previous to letting Rs 4416-13-4 of which ½ was payable to the Local Fund Board to whom however Rs 2158-6-10 only were disbursed, the difference being withheld in adjustment of an overpayment in the previous year. The net revenue yielded by tolls to the Commissioners was Rs 2526---8 as compared with an Estimate of Rs 2800, the difference is ascribable in my opinion not so much to the non restoration of the bridge as to the fact that the tolls were under the direct management of the Commissioners for a short time previous to letting, which supposition receives some color from the figures for the previous years when letting had not been introduced.

1878-79	Rs 1750
1879-80	2004.

10. The receipts from the surplus Pound Fund amounting to Rs 1-3-6 call for no special remark.

11. The Chicacole Local Fund Board's

	Closing balance	234 14 -		630
	Grand Total —	11,115 9 7		13,270

18. Grant I. The Expenditure under this grant was Rs 915-4-4 against an Estimate of Rs 1940. The decrease is due to General short Expenditure and nil Expenditure on new Works.

19 Rs 574-14-9 were laid out on Repairs to the Municipal roads. The particulars of which are as follows.

Purchase of gravel —	Rs 166.
Do — of Metal —	48-2-
Wages of labourers —	360-12-9
	574-14-9

The dispensary Building was repaired at a cost of Rs 137-7-11 and Rs 9-- 2 were spent on stone drains. Under other items are compared Rs 180 as salary to the Municipal Maistry and Rs 130 odd cost of tools In view of the limited Expenditure under this grant and

and the low financial state of the Municipality, I consider the Entertainment of a Special Maistry unadvisable at any rate for the present.

20. The Municipal roads which are nine miles in length were kept in good order throughout the year.

21. Grant II. Education — Rs 180 were paid to the Local Fund Board as Contribution for Educational inspection - In lieu of this arrangement, the Board have lately proposed to entertain a special inspecting Agency which will be reported to the Director of Public Instruction for approval.

22. Rs 590-3-- was disbursed in Results Grants of which Rs 394-7-- was due for the previous year. Rs 758 were qualified for during the year under report but of this sum Rs 562-4-- had to lie over till the current Year owing to want of funds. Payments have been subsequently made to this Extent.

23. The particulars of the Elementary Results grants schools supported by the Municipality are given in the Statement-V.

24. On the 31st March 1881, there were within the limits of the Municipality 19 schools with 636 pupils against 20 schools with

within 603 pupils in the previous year. 11 of these schools were examined of which 7 drew their grants within the year. The increased attendance at existing schools thus compensates for the disappearance of one.

25. Two hundred and Eighty one boys were present for Examination according to the 1, 203 Standards; 183 passed in reading, 185 in writing 160 in Arithmetic, 104 in poetry, 35 in Grammar 32 in Geography and 26 in History. On the whole the boys acquitted themselves creditably according to the Deputy Inspector's report. The number of pupils that attended these Municipal schools may be classified as follows:—

Hindus	458
Mahomedans	41
Opiyas	20
Parias	2
Native Christians	7
Girls of Various Castes	108
	636

The proportion of school-going-population is 3·87. The general attendance seems Encouraging but the apathy of the Mussulman population as evidenced by the Short attendance of their Children 41 out of a population of 1127, is much to be regretted.

26. The bulk of the Masters are unqualified two only have passed the general Test Examination and a third holds a teacher's Certificate. Advanced Education is provided for by the Government High School and the Commissioners have it in contemplation to start a new Town School under trained instructions, as a feeder to it; The scheme has already been sanctioned.

27. Grant III Sanitation and Medical Services. The actual Expenditure under this head was Rs 4789-11-2 as compared with an Estimate of Rs 4,710. This small increase is owing to the payment of Rs 200 arrear contribution to the Chicacole Local Fund Board on account of the nurse and midwife 2514/49

28. Rs 2112-9-1 were absorbed in maintaining the Municipal Dispensary including the aforesaid arrear Contribution.

29. Particulars of the in and out-patients treated at the Dispensary appear in the following abstract.

	In patients. Remaining on 31st March 1880	Admitted	Total treated	Discharged	Died	Remained on 31st March 1881	Average	Out patients. Remaining on 31st March 1880	Admitted	Total treated	Discharged	Died	Remained on 31st March 1881	Average
Europeans	..	2	2	2	..	..	2/365	4	40	44	44	..	..	44/365
Natives	13	156	169	149	15	5	169/365	124	5550	5674	5678	6	76	1	51	15 203/365
Total	13	158	171	151	15	5	13·21	128	5590	5718	5722	6	76	1	51	34·45
1879-80	14	122	136	97	26	13	12·08	96	6137	6233	6101	4	128	44·62

30. Vaccination — The number of persons Vaccinated was as follows:—

1880-81.	Male	Female	Total.	Successful.	Unsuccessful.	Total.
Under one year	1	2	3	3	..	..
Above one year	273	71	344	287	57	..
Total	274	73	347	290	57	..
1879-80	216	80	296	231	65	..

The Municipal Vaccinator works under the immediate Supervision of Dr. Kinsley and the account rendered by him is therefore presumably correct.

31. Births and Deaths. — Taking the figures of the last Census, the population of the Municipality is 16,349 (298) Births were registered against (277) deaths, the ratio per thousand being respectively 19.01 and 17.13 per annum. I am ignorant of the theoretic proportion which should be maintained under normal conditions between births and deaths but the Registers are said to be carefully kept, precautions having been taken last year to ensure a greater degree of accuracy.

32. Conservancy — Four Nuisance Inspectors thirtyseven scavengers, two tonies and six carts with their drivers, constitute the Conservancy Establishment of the town.

270 loads of refuse were sold at 20 loads per Rupee; all the thoroughfares were kept clean and the General state of health was on the whole very good.

2514/45

33. The Charges under Grant IX amounted to Rs. 2704-8-10 against an Estimate of Rs. 3580. The difference between actuals and Estimate is principally ascribable to diminution in License Tax receipts as has been noticed above.

34. The Cost of the Municipal Police was Rs. 2001-1 or a trifle over the Estimate. Rs. 67-5-11 is set down as Expended on Road avenues but I am informed that this is not the case. It represents the wages of two gardeners who look after a small flower and plantain garden behind the Municipal Office. This Expenditure being unproductive, I think the money can be used more advantageously elsewhere and have accordingly ordered the gardeners to be discharged on the ground that the Municipality cannot afford luxuries until they discharge their outstanding liabilities.

The Miscellaneous Expenditure consists of the salary of the peon in charge of the Cart stand but since removed, Rs. 18-1-11 for killing dogs Rs. 23-2-9 which

which represents the contribution for Establish-ment in the Government Office.

35. Grant V. The Charges under this grant are as follows:

Office Establishment	Rs 1012-7-3.
House tax Establishment	179-——
Toll Establishment ——	267-10-2.
Miscellaneous ——	17-7-1
Refunds ——	102-——
	1476-8-6

36. The Office Establishment consists of

1 Manager Rs 40 per Mensem.
1 Clerk. — Rs 20 Do —
Peon —— 6 Do —

or Rs 792 per annum to which is added Rs 220-7-3 for registration and for Con-tingencies making a total of Rs 1012-7-3. Besides this the Manager and the Clerk receive Rs 10 and 5 per mensem for the death and birth registration which is chargeable to grant III.

37. The House tax Establishment con-sists of three bill Collectors at Rs 5 each.

38. The tolls were leased out early in the year and the Establishment which has cost Rs 267-10-2 was dispensed with.

39. Rs 17-7-1 were spent on petty charges in connection with the Census Work and this will be refunded by Government.

40. Rs 102 were refunded to those concerned on account of professional tax reduced on appeal. 2574/880 Sc

41. The actual closing balance amounted to Rs 234-14-— in comparison with Rs 630 budgetted for. The liabilities of the Municipality on the 31st March 1881 that were postponed to the current year for want of funds amounted to Rs 1350-12-3

	Rs a P.
1. To Results grants School Masters	562-4-—
2. Contribution to Local Fund Board for Educational in-spection	180-——
3. Due to Government for Medical Supplies for 1877-78	608-8-3
	1350-12-3

42. Twenty two meetings were held during the year at which a total of 119 Com-missioners were present making an average of a little over four per meeting. One or other of the various Vice Presidents pre-sided at 7 meetings when at Head Quarters

43. Collections appear to have been a little slack but they are rapidly improving and so far as I can judge from a distance this Municipality may yet be prosperous. The introduction of lighting is desirable as soon as financial exigencies permit

ated

and to my mind the Establishment is susceptible of further reduction in place of augmentation, the percentage Rate cost to expenditure is already too high.

114. Other remarks I have none to offer as since I joined this Office on July 4th the Special Commissioners orders have kept me on almost continuous duty within the hill tracts.

I have &c.

A. C. F. MacCastle
Vice President
Chucacole Municipality

(True Copy)

S. S. Munro
President

Annual Medical Report 1879 of the Civil Dispensary Chucacole

51

Population 15,587. 1. Dispensary & building. present state of repairs & furniture fittings &c.

The building is still in a state of disrepair & measures are only now being taken to make it comfortable for the sick such as netting &c.

This is especially the case with the portion occupied by the female patients. The detached building used as female wards is in a better condition, being of more recent construction. The finances of the Municipality would seem to be to have been the great drawback to thorough repairs being made to the buildings, as also to completing the supply of furniture, which is sufficient except an almirah for keeping instruments which now as heretofore have been kept in a deal wood box. 25/14/36

II Dispensary committee & frequency of meetings

The affairs of the Dispensary are discussed by the Municipal Commissioners at their fortnightly meetings which are held regularly & no meetings are held at the Dispensary itself

III Most common diseases among out door & In door Patients: their prevalence & fatality as compared with other years

The classes of diseases for which relief was sought in largest number are given below in their order of frequency

	Out Patients 1879—80	In Patients 1879—80
Malarious fevers	615—882	7—7
Worms	526—796	— —
Skin diseases	426—437	3—3
Ulcers	478—360	24—22
Respiratory affections	303—304	2—2
Rheumatic affections	263—241	9—19
Infls of ears	153—198	— —
Diarrhœa	169—156	13—5
Injuries	135—135	18—20
Abscesses	108—115	6—1
Gonorrhœa & Complications	111—87	4—8
Dysentery	90—81	8—4
Syphilitic affections	79—62	15—14
Dropsy	57—56	22—16
Anæmia	59—51	1—5

It will thus be observed that as compared with that of 1879, there has been a decrease in the number treated of all the classes of diseases of Out-Patient, except in those of the Cir. Respiratory affections & abscesses; & notably in the Class of malarial fevers which were mostly mild in their character & yielded readily to ordinary treatment. The experience gained during the previous year (1879) of the value of the Tincture of Iodine, the Tincture of Aconite & the powder of the root of the plant Acanthus Heterophyllum in the treatment of Intermittent fevers, affords encouragement to still further utilize them as being cheaper & more plentiful than Quinine. Of the few of these cases of fever exhibiting Hepatic, & Splenic & other Complications & were observed only in such individuals as were habitual residents of the more malarious tract of Country near Parlakemedy

The prevalence of worms among the Children of the lower Classes of Natives is not uncommon & chiefly just before the setting in of the monsoons is as striking here, as I have observed it to be on the western Coast, as well as in Burmah. Santonine is so well known for its efficacy as an anthelmintic by the Native population that they will not accept any other drug in substitution.

The respiratory affections were chiefly cases of mild Bronchitis, yielding readily to the usual remedies.

Skin diseases, ulcers & abscesses prevailed largely as usual among the Classes of the population usually seeking relief at Dispensaries & needed no special treatment.

A very successful application for Ringworm which is so commonly seen and which is found often to defy treatment of all kinds, was found to consist of the following Combination 2574/37

Sulphur Sublimatum ʒi, Ammonia hydrochloras ʒi Soda Biborat ʒii, Acidum Sulphuricum fʒβ, Acidum aceticum fʒii & Aquæ fʒii. M. ft. Lotio. a little to be applied twice daily

with its use, Cure has been rapidly attained & I have seen no relapses.

The Cases returned under Dropsy & Cachexia were almost exclusively found among the poorest of the patient & although every means were used, to ascertain the result of treatment; the Conditions under which Out-Patients are treated, renders it difficult to write with Certainty as to a cure being the ultimate result;

Among the In-patients, there is observed a decrease in the number of all classes except in those treated for Rheumatic & Gonorrhœal Complications There were 15 deaths among the In-Patient, some of these having been received in a dying state

¶ Epidemics which have occured in the Station & its vicinity

The Station & its vicinity have been singularly free from Epidemic disease of any Kind throughout the year under review

¥ Inspection by Civil Surgeon & Dy Surgeon General

The Dispensary was inspected by the Dy. Surgeon General of the Presidency & Northern Districts on the 17th January 1880

Whose remarks in the visitor's book will be found in the Extract from that record appended to this Report.

This is tabulated below

	In Patient	Out Patient
1879	146	6199
1880	158	5594

VI attendance patients, as contrasted with previous Year, distinguishing in door & Out door patients

This shews a slight increase of 12 in the number of In Patients & the large decrease of 605 among the Out-Patients. There is no reason to doubt that the two Dispensaries recently established, one at Tekkali in the Chicacole Sub-division & the other at Cheepurupilla in the Vizagapatam District & which came into thorough working order during the year, had the effect of diverting a number of Out-patients from this Dispensary which is one cause of the lower number of Out-Patients treated here. But it appears unreasonable to suppose that in consequence of the past year being an exceptionally healthy one, less sickness prevailed ending in the result shewn by the decrease now noted. Much, if any, stress cannot be laid on the fact of the Itinerating medical practitioner's services in the District, forming a factor in the cause of the diminution in number of the Out-patients during the year, as practically, there was little or no Itinerating work undertaken, & this, post

VII General remarks

not meeting with favor from the Local Fund Board, the members have recently recommended its abolition 25 5/14/38 53

The total rainfall during the year was 42-39 inches. This quantity was found to be ample for cultivation, which was carried on actively & ended in a bountiful harvest. The year was remarkably healthy & prices of articles of food were low so that the poor were not affected by the opposite condition of things observed in the recently past few years.

Vaccination continues to be practised by the Municipal Vaccinator & as opportunities offer, by the Hospital Assistant of the Collectors Establishment & of the Dispensary, as is the case elsewhere, so here also, we find the prejudices of a large section of the Native population decidedly against it, thus making the total of work in this direction appear meagre indeed. The lymph in use is good & was recently supplied by the Inspector of Vaccination

2514/55

The receipts under head: Grant of License Tax collections, amounted to Rs. 10,209 against Rs. 11,580 estimated and Rs. 9,671 realised in 1879-80. The decrease as compared with the estimate was mainly due to the non-collection of as much as 48.7 per cent of the House tax demand current and arrears, ~~having been left un-~~ collected, to the Land rate not having been levied, and to diminished receipts under every other heads of taxation with the exception of Tolls.

~~tion~~ The unsatisfactory nature

nature of the House
tax collections is not
properly accounted for
being ascribed to the
Census work which how-
ever did not affect
the progress of collec-
tions ~~to a great extent~~
~~extent~~ in other Municip
alities, ~~The~~ large ar-
rears of House tax
reported ~~are~~ to be recover-
able ~~are proposed to~~ to a thorough scrutiny before they are written off
~~be remitted upon~~.
The non-levy of the land
rate notwithstanding
the instructions of
Government in G.O.
marginally noted

The further information promised
on the subject in the Proceedings
letter of 8th Nov. 1880 No. 2808 has
not yet been procured owing
to the absence of the V.P. which
engaged on the Sarasa Hill enquiry.

is ~~unsatisfactory~~ as regards
the other heads of taxation the
falling off is attributable
to dull and neglectful
Establishments in conse-
quence principally with
still larger collections.

The President's re-
marks regarding the
exhibition of ~~arrears~~ uncollected
~~arrears~~ at the close of
the year under Taxes on
Vehicles and Animals
and Registration of
Carts in Statement IV
are approved. 2514/5

~~does not appear to what~~ the extent ~~to which~~
coercive measures were
adopted ~~in each~~
~~case~~, the Vice President
~~merely~~ remarking in
~~comply~~ para 12 of his report
that they were resorted to
"to a large extent."

The

The question raised regarding the proportion of tolls to be made over to Local Fund Boards will be separately disposed of when the correspondance on the subject comes before Government.

The President has rightly eliminated the deposit transactions from Statements I & II but he should at the same time have reduced the closing balance from Rs. 234-14-10 to Rs 149-14-10.

The expenditure excluding License tax paid

190

paid to Government aggregated Rs. 10 205 against Rs. 11100 estimated and Rs. 9680 spent in 1879-80 and was distributed in the following proportions.—

Grant I - 2514/57 - 9.0
" II ----- 7.5
" III ----- 46-9
" IV ----- 20-9
" V ----- 14-7
Refunds ---- 1-0

There was a saving of Rs. 1025 in the Budget allotment for Public Works under Grant I owing to the new works budgetted for not having been undertaken and the repairs to roads having

having cost only a
trifle over half the
Budget provision for
the purpose, and not much more than a fifth of the income derived from dues.
ment sanction the pro-
posal to dispense with
the services of the Maistry.

The educational
work in the Municipality
has confined to the
payment of Rs 590 to
10 Results Grants schools.
Fourteen
~~during the year 14~~ schools
were examined for Results
during the year
Grants, and the totals
Grants earned are given
at Rs 758. Of this a sum
of Rs. 562 or 74.1 per cent.
remained undisbursed
~~at the close of the year~~
owing it is alleged to
want of funds. This is
far

of which R. 394 were due for the previous year.

far in excess of the arrears. (43.5 per cent) reported for 1879-80.

The Commissioners will be reminded that ~~work~~ a gradual diminution in the annual grants to indigenous schools must naturally lead to their decline. The expenditure should be so adjusted as to provide for the usual and necessary grants to schools, and these should never be permitted to fall into arrears.+

The number of persons treated at the Civil dispensary amounted to 171 in and 5,722 out patients against 136 and 6233 respectively in 1879-80.

The vaccinator performed

347

× The schools appear to have made fair progress in the whole but the reports of the Deputy Inspector should have been submitted.

347 operations against 296 in 1879-80 and the cost per successful case fell from 10 annas & 6 pice to 8 annas and 3 pice; which however is still exceedingly high & must be reduced. The results, on the whole, are still very meagre. ~~The results are still unsatisfactory.~~

The returns of vital statistics are reported to have been carefully kept. 298 births and 277 deaths were registered against 249 and 253 respectively in the previous year.

The arrangements made for the conservancy of the town appear satisfactory and the public health
