GOVERNMENT OF MADRAS.
FINANCIAL DEPARTMENT.

4th April 1881, No. 592.

Municipal—Vaccination.

Read the following paper :—

From Surgeon-Major M. C. FURNELL, M.D., F.R.C.S., Sanitary Commissioner for Madras, to the Chief Secretary to Government, dated Madras, 10th March 1881, No. 404 [Current No. 627].

With reference to paragraph 2 of G.O., No. 170, dated 28th January 1881, I have the honor to report that during my recent inspection of the Bellary Municipality I found vaccination very backward in the town. I consider the resolution of the Commissioners to insist on the minimum number laid down by rules being performed by the vaccinators monthly and to impose fines for short work a step in the right direction. This will, no doubt, have a beneficial effect and show a larger outturn of work than is at present obtained, and thus reduce the cost per case, which in Bellary is very excessive. For 1880 it was six annas and one pie.

2. I cannot understand the reason which induced the Inspector of Vaccination, Dr. Laing, in 1879 to recommend a reduction in the staff of vaccinators from three to two in number, as that officer himself has reported vaccination to be backward in Bellary. His recommendation, I observe, was put into force from 1st May 1880, but during my recent inspection of the town in September 1880 I recommended the re-entertainment of an additional vaccinator. This has not, however, been done as yet as far as I am aware of.

ORDER THEREON, 4th April 1881, No. 592.

Communicated to the President of the Bellary Municipal Commission.

Sir

With reference to para 2 of G.O. No. 140, dated 20th January 1881, I have the honor to report that during my recent inspection of the Bellary Municipality, I found vaccination very backward in the town. Consider the Resolution of the Commissioners to insist on the minimum number laid down by rules being performed by the vaccinators monthly, and to impose fines for short work a step in the right direction. This will, no doubt have a beneficial effect and show a larger out turn of work than is at present obtained, and thus reduce the cost per case which, in Bellary is very excessive. For 1880 it was 5 as 1 pie.

2. I cannot understand the reason
which

which induced the Inspector Vaccination,
Dr. Loring in 1879 to recommend a reduction
in the staff of Vaccinators from three to
two in number, as that officer himself
has reported Vaccination to be backward in
Bellary. His recommendation, I observe, was
put into force from 1st May 1880, but
during my recent inspection of the town
in September 1880, I recommended the
re-employment of an additional Vacci-
nator. This has not, however, been done as
yet as far as I am aware of.

I have the honor to be
