Encl.

G.O., 22nd March 1895, No. 264.

MARCH.

St. Bartholomew's Hospital,  
Ootacamund.

Sanctioning a grant of Rs. 1,500 towards the extension of the lying-in ward of —, and drawing the attention of the Hospital Committee to the meagre subscriptions from the native community in view to greater efforts being made to enlist native support.

that the amount already derived from this source, aided by fancy bazaars, concerts, theatrical performances, &c., is already considerable and barely suffices to keep up with the current and constantly increasing expenditure of the hospital, and that the raising of the comparatively large additional sum of Rs. 3,000 for the special purpose of extension of buildings cannot be hoped for without imperilling the precarious hospital income from these sources. The following figures will show the yearly increasing numbers relieved at the hospital and the consequent increasing expenditure in keeping the hospital going, rendering necessary a careful husbanding of all sources of regular income:—

| Year.        | Total attendance. |
|--------------|-------------------|
| 1890 .. .. . | 12,889            |
| 1891 .. .. . | 14,318            |
| 1892 .. .. . | 16,687            |
| 1893 .. .. . | 18,319            |
| 1894 .. .. . | 20,537            |

3. The committee, however, have all along had in view the raising of a moiety of the sum required, viz., Rs. 1,500, by a special appeal to the public as suggested by Government.

4. Government further states that the Ootacamund Municipality should provide the necessary hospital buildings, as is the case with other municipalities. I would point out, however, that this hospital is under different circumstances and is supported in quite a different manner from municipal hospitals on the plains. St. Bartholomew's Hospital is not a municipal hospital; it is a charitable hospital supported chiefly by voluntary contributions, and is managed by a representative managing committee of twelve local gentlemen and a sub-committee of nine ladies. If the municipality took it over, they would have to provide and budget for a large sum of money (Rupees 9,000 per annum), which they doubtless would decline to do, or even, if willing, could not provide at once; moreover it is very questionable whether it would be for the benefit of the hospital that the municipality should support and manage it. If such a change was adopted, the following would be the result, viz., the present representative managing committee which meet at the hospital regularly once a month would cease to exist, and with them the ladies' sub-committee would disappear, leaving the management to the municipal council (composed largely of natives), who certainly would not trouble themselves to meet at the hospital monthly and take the active benevolent interest in the welfare of the institution that the existing voluntary committees do. The present chief sources of income, such as voluntary contributions, fancy bazaars, concerts, theatrical entertainments, "Hospital Sundays" in the various places of worship, would also disappear; the promoters of entertainments and collections now got up in aid of the hospital would transfer them to some other charitable object, as they would naturally consider that as the hospital was the property of the municipality it was the business of that corporation to support it. Such a change would, I think, be detrimental to the best interests of the hospital.

5. I would now emphasize the urgent need for the immediate extension of the lying-in ward. The following figures show the considerable increase in number of lying-in women accommodated during the last five years, viz.—

| Year.        | Lying-in cases. |
|--------------|-----------------|
| 1890 .. .. . | 64              |
| 1891 .. .. . | 107             |
| 1892 .. .. . | 104             |
| 1893 .. .. . | 122             |
| 1894 .. .. . | 142             |

6. An increase of 222 per cent. since 1890. Such an increase, I think, is very satisfactory, but it has a very regrettable drawback if accommodation does not keep pace with the applications for relief; and this has been exemplified during the past year by the fact that we have had three cases of puerperal fever amongst lying-in patients, the appearance of which fatal disease has been doubtless influenced by want of sufficient accommodation, the constant occupation of the small lying-in wards; and defective drainage behind those wards, which defects are removable by the proposed lying-in ward extension and drainage scheme, which I have submitted to the Surgeon-General in foregoing correspondence on this subject. It is almost an impossibility to restrict the number of lying-in women to the extremely limited existing accommodation, as the women are brought to hospital when actually in labour, often in an advanced condition, and sometimes in conditions requiring immediate operative assistance; such cases cannot be refused admission, even at the risk of overcrowding.

7. Neither the hospital funds nor the municipality can be looked to to furnish the necessary funds for the proposed alterations; if, then, Government will not give a grant-in-aid, admissions of lying-in women must be greatly restricted and many applications refused.

8. I would again give prominence to the fact that Government is only asked for the comparatively insignificant sum of Rs. 1,500 towards the work, being half the amount of the estimate, the hospital committee undertaking to raise the other moiety.

9. The Honorable the Chief Secretary during the conversation above referred to expressed a desire to have an interview with the Surgeon-General on the subject of a re-consideration by Government of their decision in the matter of the grant asked for, and stated that he would return to Madras on Monday, the 21st instant.

ORDER—dated 22nd March 1895, No. 264, Financial.

Under the circumstances represented in the present communication from the Surgeon-General, the Government is pleased to sanction, as a special case, a grant of Rs. 1,500 towards the proposed extension of the lying-in ward of St. Bartholomew's Hospital, Ootacamund. The grant will be met from savings under 45, Civil Works, and should be drawn before the close of the current official year.

2. The appended statement, which has been prepared from the annual returns of the civil hospitals and dispensaries in this Presidency, shows that the number of patients treated rose from 14,318 in 1891 to 18,319 in 1893 and that, whilst the subscriptions from Europeans amounted to Rs. 4,493, Rs. 4,984 and Rs. 5,188 in the years 1891, 1892 and 1893, respectively, those from Natives were as low as Rs. 169, Rs. 370 and Rs. 294. The attention of the Committee will be drawn to the matter by the Surgeon-General, in view to greater efforts being made to enlist native support.

OFFICE OF SURGEON-GENERAL

No 168

Encl.

From

SURGEON MAJOR-GENERAL C. SIBTHORPE, *FRCP*

WITH THE GOVERNMENT OF MADRAS,

Madras, *16<sup>th</sup> February* 1895.

SURGEON-GENERAL WITH THE

GOVERNMENT OF MADRAS,

Madras,

To

THE HONORABLE THE CHIEF SECRETARY TO GOVERNMENT,

*Financial* DEPARTMENT.

SIR,

With reference to GO No 1069 dated the 5<sup>th</sup> December '94 Financial Department I have the honor to submit for the favorable consideration of Government a further representation from the Honorary Secretary Hospital Committee, Ootacamund requesting a reconsideration of the refusal of Government to give a grant-in-aid amounting to Rs 1500/- towards the proposed extension of the Lying-in ward of St. Bartholomew's Hospital.

2. The reasons for this request are fully explained in the Honorary Secretary's letter I quite agree with him that the Hospital at Ootacamund is placed under different circumstances and supported in quite a different manner from Municipal Hospitals on the plains. It is a charitable institution supported

UNDER SECRETARY  
17 FEB 95  
PUBLIC DEPT.

1895

File

1

437

chiefly by voluntary contributions.

The amount derived from this source is already considerable but nevertheless hardly sufficient to meet the ever increasing expenditure of the Hospital. To attempt therefore to raise an additional sum of Rs 3000/- for the extension of the buildings will imperil the ordinary hospital income from these sources and affect the efficient management of the institutions.

3. It will be seen from the large and yearly increasing numbers treated in the hospital that a further provision for lying-in cases is absolutely necessary to avoid overcrowding which insanitary condition is a powerful factor towards producing outbreaks of puerperal fever.

4. Under these circumstances I strongly recommend that Government will be pleased to reconsider their decision and sanction a grant-in-aid of Rs 1500/- which is only a small amount when compared with the total expenditure of the Hospital.

5. The plan and estimate are herewith resubmitted.

Financial DEPARTMENT

C. No. 437.

FOR ORDERS.

It seems to me that Govt. already pays more than a reasonable share of the cost of keeping up this local institution & that no more should be given. It is not as if this were an isolated case of a demand for add'l assistance expenditure by Govt. on medical purposes - In that case it might be considered. But the fact is that we have already in the office, awaiting disposal, proposals by the S. G. for medical expenditure which will run into several lakhs - I had almost said several lakhs per annum, and I am not sure that I should not have been right if I had done so. And apart from these and proposals, the increasing cost of the civil & military class is a most serious matter into which I am having enquiries made. Owing to the ridiculous way in which this class was ~~run~~ run on promise of increased pay according to length of service, without (as I believe & fear) any limitation to the total or proportionate number drawing

The notes marked with slips in G.O. of 4<sup>th</sup> April 1891, No 261, give a brief account of the history of St. Bartholomew's Hospital at Ootacamund.

There can, it is submitted, be no doubt that if the Municipality were to take over the institution it would suffer in the directions indicated in Dr. Walker's letter.

From the attached Statement A, which exhibits the income & expenditure of the Institution according to the latest information available in the office, it will be seen that the European population of Ootacamund has borne its very fair share of the Hospital expenditure - The subscriptions from natives, the class which derives the <sup>most</sup> principal benefit from the institution, are insignificant.

As the head-quarters of Govt. for six months in the year Ootacamund may perhaps expect exceptional treatment at the hands of Govt. in respect

of us hospitable.

If it is decided to reconsider the decision in S.D. of 5. 12. 94 No. 1069, it is submitted that the grant might be treated as a special one the attention of the Committee being drawn to the meagre subscriptions from the native community & to the necessity for greater efforts being made to enlist native support. If the Committee were to

C.B.  
27.2.95 Dr. Fisher when I was at  
Göttingen in leave speaking of  
the death which occurred <sup>in the hospital of</sup> whilst I  
was there - one having taken place  
under very sad circumstances - asked  
if I thought that there was any chance  
of success if a request for a reconsideration  
of the refusal of Göt. was put for-  
ward. I told him, as he mentioned  
what he has in his letter that and  
said that post-mortem fever when  
once introduced into a hospital was  
a most dangerous thing, that I  
would if in his place go up again  
and that I would tell the Surge  
Genl. what he had said to me  
if I met him in London - I did  
not meet the Surge Genl. for some  
time and made no mention of the  
matter to him.

I know what the feeling is at  
Waconia amongst those who  
have had to do with the management  
of and the contributing towards  
the up-keep of the hospital -

St. Bartholomew's Hospital

## Building Grant

FOR ORDERS.

at Hm & Co. the higher rate of  
pay, the cost of this  
class alone will within a few  
years increase by a lakh of  
rupees per annum. Then there  
are large demands, also under  
consideration, on account of proposed  
addl. Asst Surgeons - Lunatic  
asylum and General Hospital, the  
latter alone amounting to half a  
lakh of rupees per annum -  
But if the whole of the S.G.'s very  
extensive & expensive proposals  
are worked out we see what  
the total cost comes to, I most  
strongly object to any further  
medical expenditure - The work  
of the P. & H. Hospital must do  
as other people do - Cut their  
cost according to their cloth.

5/3/95-

The various sources of assistance  
and the hospital are extremely  
such as to justify but in giving  
an expenditure amount of aid  
It is shown that if the additional  
accommodation is not provided  
there will be fatal results. However  
the accommodation cannot be  
provided without a little help  
from Ent. The help needed is not  
large - £1500. This will not  
be abnormally more than the hospital  
liabilities with the Hon Mr. Blair  
adverts to. I think the aid may be  
given in the form suggested in the  
enclosed paper.

The hon. Mr. Bliss is perfectly right in resisting proposals for the increase to medical expenditure, in view of the serious roads wh. the S. G. is apparently making - amounting to several lakhs of rupees - but I think he might allow himself the very slight departure from the attitude he has taken up in this very particular case, <sup>which would be adopted by making this grant.</sup> agree with the hon. Mr. Growse that under the circumstances brought to light, Govt. would be fully justified in giving this contribution on the terms stated. It is monstrous that the native public sh<sup>d</sup>. give so little to an institution wh. is kept going almost entirely for their benefit - and I only hope the Committee will make the figures public - viz: the numbers of patients treated - and the amounts contributed by natives and Europeans respectively.

W  
—  
9 Mar

Then - I cannot alter my opinion that, situated as we now are, we should not incur any addl. medl. expenditure until we can see our way more clearly. The hospital atooty has done well enough for years past with its existing buildings & my opinion will go in as it is, at least for the present.

14/3/95

and that is strongly against the  
institution passing into the hands  
of the municipality which is not  
at all popular in Estacada. If  
it does, the municipality will have  
to find the money for the upkeep  
of the institution and subscriptions  
and aid by putting up entertain-  
ment will fall off and that very  
considerably. If half the amount  
for the building which are required  
is given by Gov. the other half will  
be raised by subscriptions but the  
whole amount would not.  
The municipality might give part of  
what is wanted but would certainly  
not give the whole or half.  
The hospital ~~is~~ <sup>is</sup> really in very straitened  
circumstances and is only kept going  
by the efforts of the members of the  
Committee who when they ceased to  
have, as they would if the hospital  
became an municipal one any voice  
in the management of its affairs, would  
no longer work for them do and  
have done in the past to keep  
the institution afloat.

1/31/95.

Current No. \_\_\_\_\_ of 1-9 , dated \_\_\_\_\_ from \_\_\_\_\_

ORDER. 22 March 1895, No. 264.

Under the circumstances represented in the present communication from the Surgeon-General, the Government is pleased to sanction, as a special case, a grant of Rs. 1,500 towards the proposed extension of the Lying-in-ward of St. Bartholomew's hospital, Ootacamund. The grant will be met from savings under 45 Civil Works and should be drawn before the close of the current official year.

2. The appended statement, which has been prepared from the annual returns of the Civil Hospitals and Dispensaries in this Presidency, shows that the number of patients treated rose from 14,318 in 1891 to 18,319 in 1893 and that whilst the subscriptions from Europeans amounted to Rs. 4,493, 4,984 and 5,188 in the years 1891, 1892, & 1893, respectively,

those from natives were as low as Rs. 169, 370 & 291. The attention of the Committee will be drawn to the matter by the Surgeon General, in view to greater efforts being made to enlist native support.
